ISBELL'S SEEDS

As They Grow Their Fame Grows

ARGE SCALE PRODUCTION, modern equipment and scientific methods of handling seeds, have enabled us to make lowest prices without sacrificing quality. Nowhere will you find better seeds or seeds of equal quality at lower prices.

Isbell's
Low Prices
for 1936
will surprise
you

Everyone who plants seeds has found it necessary to cut expenses in every way pos-

sible. The importance of getting the best seed obtainable at lowest possible prices is greater than ever and deserves the utmost consideration. We invite you to compare prices in this catalog with those offered by any other responsible concern. You will find that you save when you purchase Isbell's Dependable Northern Grown Seeds.

In this catalog are listed only varieties of real merit which are worthy of a place in any garden. We also have a number of new and improved types this year which we know you can grow to good advantage and we want you to try them. You will never go wrong in planting any sort we recommend.

Our many thousands of customers know the dependable quality of Isbell's Northern Grown Seeds. Until you have tried them you will not know what you have been missing.

Special Gift Offers to Our Customers

To show our appreciation we are this year including absolutely free with each order of \$1.00 or more, some choice new flower seeds of the finer sorts which we are sure you will like. With orders of

\$2.50 or more, we give one dozen bulbs of handsome, large flowering Gladiolus in a brilliant assortment of colors. As a special favor to us we ask you to please send in your orders as early as possible.

ISBELL SEED COMPANY

Established 1878

DIRECTIONS FOR ORDERING

USE OUR ORDER SHEET.—It will be of great help to us in filling your order correctly and speedily. If you desire to write us, use a separate sheet of paper. Be sure to give full name and address on all orders and letters. Every year we receive orders and letters without a name or address. All we can do in such cases is to wait until the person writes again. The resulting delay is disappointing and can easily be avoided by making sure your name and address are on your order or letter.

KEEP A COPY OF YOUR ORDER.—Many customers complain of not having received goods which were not ordered at all. If goods ordered do not arrive in due time, advise us and send a copy of your order.

HOW TO SEND MONEY.—Remittances can be sent safely by Post Office Order, Bank Draft, Express Money Order, Check, or by Registered Letter. We will accept clean stamps for sums less than one dollar.

Never send coins, as they often wear through the envelope and are lost. If you send bills, register your letter.

C. O. D. SHIPMENTS.—Absolutely no plants or other perishable goods will be sent C. O. D. We advise against C. O. D. orders because of delays and excessively high collection charges which are unsatisfactory to the customer and expensive for us if goods are not called for promptly. We will accept C. O. D. orders only when a remittance for one-third or more of the value accompanies the order.

Potatoes, Onion Sets, Bulbs, Roots, and Plants will be sent after danger of freezing is past or as soon as weather will permit.

FREIGHT AND EXPRESS SHIPMENTS.—Our shipping facilities are unexcelled. State whether you want express or freight shipment. No definite rule can be laid down because conditions of distance, weight, and time allowance vary so widely. Transportation charges are paid by the customer except on items marked postpaid.

24-HOUR SERVICE.— Except for the short rush period, more than 90 per cent of all orders received are delivered to the post office, express or freight office within 24 hours.

OUR RESPONSIBILITY.—We have been in business here for the past 57 years. We refer you to any bank in Michigan.

OUR GUARANTEE.—We sell dependable seeds only. Should failure result from any fault in the seed, we will either replace this free of charge or give you credit for the amount paid. Every reasonable person knows that a failure can easily result with the best of seed, owing to climatic and other conditions beyond control, so that to guarantee a crop is an impossibility. Therefore, in common with all reputable seed houses, our seeds are sold subject to the usual disclaimer adopted by the American Seed Trade Association as follows: "Isbell Seed Company gives no warranty, express or implied, as to description, quality, productiveness, or any other matter, of any seeds, plants, or bulbs they sell and they will not be responsible for the crop."

Seeds by Parcel Post

DON'T FORGET POSTAGE.—Except on items marked prepaid or postpaid, delivery charges are paid by the purchaser. In remitting to cover postage, remember any fraction over a pound will require postage for an extra pound. Also figure one pound extra for packing on packages weighing up to 10 pounds and 2 lbs. extra for packages weighing over 10 pounds. If you allow more than necessary for postage, the balance will be returned or we will send extra seeds or give you credit for the amount, as you prefer. Packages weighing over 10 pounds beyond the fourth postal zone may be sent cheaper by express. We pay delivery charges on all items listed as prepaid or postpaid.

THE RATES FOR POSTAGE ARE AS FOLLOWS:

1st zone 8c for 1st lb. and 1.1c ea. additional lb.
2nd zone 8c for 1st lb. and 1.1c ea. additional lb.
3rd zone 9c for 1st lb. and 2c ea. additional lb.
4th zone 10c for 1st lb. and 3.5c ea. additional lb.
5th zone 11c for 1st lb. and 5.3c ea. additional lb.
6th zone 12c for 1st lb. and 7c ea. additional lb.
7th zone 14c for 1st lb. and 9c ea. additional lb.
8th zone 15c for 1st lb. and 11c ea. additional lb.

Isbell Seed Company, Jackson, Michigan

ISBELL'S SPECIALTIES

For 1936

Outstanding Varieties of Special Merit

The following new and improved strains are among the finest sorts in existence and carry our unqualified recommendation. All are of the highest table quality and are proven heavy yielding sorts. They are ideal varieties for the home gardener who takes pride in growing quality vegetables. For the market grower who wants to build up or maintain his reputation as a producer of vegetables of the highest grade, these valuable sorts will prove most profitable.

Beet—Ohio Canner

The Ideal Canning Beet.

This Beet has been developed to meet the exacting demands of the canner for a smooth, perfectly formed Beet with deep colored flesh. It is the result of the inbreeding of many generations of Beets by the Ohio Agricultural Experiment Station. The tops are small and dark colored. The roots are uniformly round in shape with a small tap root. The color of the flesh is intense deep blood-red without any trace of light zones. The smooth symmetrical form and superior color are combined to make this a perfect canning and pickling Beet. Commercial growers will find here a splendid paying sort for markets demanding Beets of superior quality. Also splendid for the home garden because of the fine table quality. Pkt., 10c; oz., 15c; ¼ lb., 45c; lb., \$1.25, prepaid.

New Carrot—Imperator

Of Handsome Appearance and Unsurpassed Quality.

This new type was developed especially to supply the demand for a longer and better colored Carrot. The roots are very smooth, and taper gradually with both ends well rounded. When mature the roots average 7 to 8½ inches long and are 1½ to 1½ inches in diameter. The flesh is a rich orange color which extends to the center of the root. They are strong enough to tie up well making it an ideal variety for bunching for the market. Matures nearly as early as the shorter varieties but is much superior in quality and appearance. Impera-

tor has rapidly become a favorite in the South where large quantities of winter vegetables are grown for northern markets. Pkt., 10c; oz., 15c; 1/4 lb., 40c; lb., \$1.20, prepaid.

Bean—Isbell's Early Wonder Wax

Ohio Canner Beets.

Extremely Early and Hardy. A Sure Bearer.

Early Wonder Wax is the most reliable and sure cropping Bean in existence. It will stand more gricf such as adverse weather conditions, extremes of heat and cold, drought and wet weather and variations of soil than any other Ban yet developed. Last summer out of more than two hundred test rows on our extensive trial grounds, Early Wonder Wax was the only variety that set a full crop of pods. This Bean stood out in striking contrast to varieties on both sides.

Early Wonder Wax is the earliest Bean and the quality is unexcelled. The pods are nearly flat, meaty, stringless and always tender and brittle. The average length is six inches and they are a clear waxy yellow color. The plants are strong and thrifty and practically disease proof. Pods are ready for use in 35 days. The plants continue to bear over a period of three to five weeks. Pkt., 10c; lb., 40c; 3 lbs., \$1.00, prepaid. Not prepaid, 10 lbs., \$1.85; 25 lbs., \$4.00.

Bean—New Stringless White Wax

See Illustration and Full Description on Page 11.

This fine new Bean has all the good qualities of the old Davis White Wax but is stringless and of much better quality. For full description see page 11. Pkt., 10c; lb., 40c; 3 lbs., \$1.00, prepaid. Not prepaid, 10 lbs., \$1.85; 25 lbs., \$4.00.

Bean—Tendersnap

Full Description on Page 11.

This is the finest of the large round green-podded sorts. Beautiful in appearance and of exceptionally fine quality. Pkt., 10c; lb., 40c; 3 lbs., \$1.00, prepaid. Not prepaid, 10 lbs., \$1.85; 25 lbs., \$4.00.

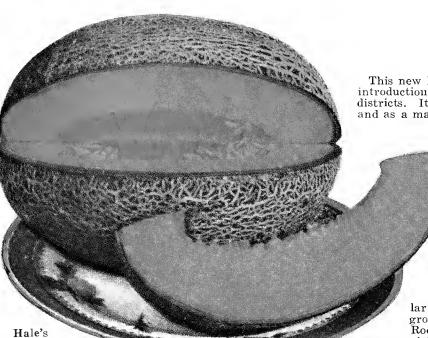

Cucumber New Hybrid White Spine

This is a hybrid of the well known Evergreen White Spine, and is a distinct improvement over that popular sort. The vines are vigorous and healthy and bear over a long period. The Cucumbers average about 9 inches long and are of a slender, symmetrical shape. The handsome dark green color does not fade until the fruits are past edible condition.

color does not fade until the Truits are past edible condition. Hybrid White Spine is immensely popular with large growers and shippers on account of the splendid size, shape and color of the fruits and because it is such a reliable heavy yielding sort. Pkt., 10c; oz., 20c; 1/4 lb., 50c; lb., \$1.50, prepaid.

Rest Muskmelon.

MUSKMELON Hale's Best

A Popular New Early Variety.

This new Melon has become very popular in the few years since its introduction and is now grown extensively in all the Melon growing districts. It has many fine qualities to recommend it, both for home use and as a market variety. Hale's Best is a medium early sort and the

earliest of the Rocky Ford type. The Melons are oval in shape and just the right size, averaging about 5 inches in diameter and 7 to 8 inches long. They are well covered with fine netting and are attractive in appearance. The flesh is a rich deep salmon color with a pleasing sweetness and aroma. Hale's Best is a prolific bearer and one of the heaviest yielding The fruits are so solid that they stand trucking and shipping to distant markets extremely well. Pkt., 10c; oz., 15c; 1/4 lb., 40c; lb., \$1.20, postpaid.

Muskmelon—Honey Rock

Also Called Sugar Rock. See Color Plate Inside Front Cover.

Few Melons have ever become so immensely popular in such a short time as Honey Rock. Wide awake Melon growers have been quick to sense the demand for Honey Rocks and have cashed in with them. This Melon is especially noted for the rich, melting sweetness of the highly colored golden flesh. In shape the Melons are nearly round, averaging six inches in diameter. They are covered with a

heavy coarse netting which is a great protection in handling. The plants are heavy bearers, commonly setting seven or more fruits. The Melons are remarkably uniform in size, shape and flavor, and are very attractive. Honey Rock is a medium early variety and the vines are hardy and vigorous. It is a good shipping sort and the size is just right. It has withstood the drought of past seasons extremely well and has been a real money maker. Pkt., 10c; oz., 20c; ½ lb., 50c; lb., \$1.50, postpaid.

Onion-Michigan Yellow Globe, Brigham Strain

Michigan Grown Seed

This improved strain of Yellow Globe was developed in the great Onion producing district of Southwestern Michigan by one of the largest commercial growers and shippers. It is the heaviest yielding and best keeping Yellow Globe Onion grown in this state. Ripens early and has the fine yellow color of Southport. Bulbs grow to large size and are very solid. Onion buyers take these first in preference to other sorts and usually pay a premium for them on account of their fine size and appearance and wonderful keeping quality. Our supply of seed is limited, so order early. Pkt., 10c; oz., 30c; 1/4 lb., 95c; lb., \$3.25, postpaid.

Onion—Early Yellow Globe

Here is a new early type of Yellow Globe Onion of Connecticut origin which matures fully three weeks ahead of Southport and other similar sorts. a fine globe-shaped Onion with a beautiful yellow color. It is a splendid wina me globe-shaped Offion with a headthful yellow color. It is a splendid winter keeper and, because of its thick skin, keeps in storage better than most early sorts. The bulbs do not quite reach the size of some of the later sorts but it yields nearly as well and is a more sure yielder because it is earlier. Pkt., 10c; oz., 30c; ½ lb., 90c; lb., \$3.00, prepaid.

Tomato—Isbell's Earlibell

First on the Market - Brings Highest Prices.

Of all the splendid Tomatoes we handle, we have received more letters of praise for Earlibell from our customers than for all other early sorts combined. Certainly no sort is more worthy of high favor. As an early sort of good size and quality, it has no equal. The large smooth fruits are uniform in size and produced in large clusters

containing a dozen often

more, all of a deep glossy scarlet and colored evenly up to the stem.

In shape they are nearly round or slightly flattened. They are very thick meated with few seeds and the flavor is truly delightful. Pkt., 10c; ½ oz., 25c; oz., 40c; ¼ lb., \$1.25; lb., \$4.00, prepaid.

Onion.

Michigan

Here is a new and distinct variety that was developed by a veteran Tomato grower, of New York State. Phenom-enal is a medium early variety that continues to bear throughout the season. The vines are strong and vigorous throughout the season. The vines are strong and vigorous like Marglobe. The fruits are nearly round or slightly flattened, of large size, always smooth, ripen evenly and are a bright deep scarlet all the way through. They seldom crack and are extremely solid with few seeds. The flavor is most pleasing, being very rich but not sharply acid. Phenomenal ripens slightly earlier than Marglobe, bears until frost and is an extra heavy yielding sort. It is resistant to both blight and rust. Pkt. 15c. 16, oz. 35c. is resistant to both blight and rust. Pkt., 15c; ½ oz., 35c; oz., 60c, ¼ lb., \$2.00, prepaid.

New Tomato—Oxheart

This new Tomato is aptly named because the fruits are shaped like a beef heart. The color is a deep pink or crimson of the same shade as Ponderosa. The plant is a vigorous grower and very prolific. The fruits ripen in good season and the plants continue to bear until frost. The unusually mild sweet flavor and the thick, meaty flesh have made this a great favorite home garden variety. The large solid slices are very attractive on the table. Oxheart always creates a let of interest because of its unusual size and distinctive shape.

a lot of interest because of its unusual size and distinctive shape. Pkt., 20c; ½ oz., 45c; oz., 75c; ¼ lb., \$2.75, prepaid.

RADISH—Isbell's Early Bird

The Most Profitable Market Variety.

Because of quick maturity—rich color—perfect shape—exquisite quality, Early Bird gets customers and keeps them. Our Early Bird Radish seed is all grown from transplanted roots. It costs us more than double to produce this but it insures absolute uniformity and trueness of type.

By many years of careful selection and most skillful cultivation this Radish

By many years of careful selection and most skillful cultivation this Radish has been bred up to a point that will be hard to surpass. It is a very early and quick growing Radish, fit to pull in 16 to 20 days, its strikingly rich scarlet color attracts attention everywhere, while the flesh is snow-white, always crisp, juicy, mild. In shape a slightly elongated globe.

Our strain of this popular Radish is used by a great many greenhouse men for growing in winter. Pkt., 10e; oz., 15c; 1/4 lb., 35c; lb., \$1.00; 5 lbs., \$4.75,

prepaid.

Radish—Isbell's Perfection White Tip

The Most Attractive Bunching Radish on the Market.

The best strain of Scarlet Turnip White Tip Radish, with the white tip well developed, covering the lower third of the Radish. Extra early, crisp and tender. Combines beautiful appearance with finest quality, appealing at once to the eye as well as the palate. Isbell's Perfection White Tip Radish is a leading market sort, many growers planting several hundred pounds of seed each season. In time of maturity it ranks with our famous Early Bird, being ready for the table in 18 days. Pkt., 10c; oz., 15c; 1/4 lb., 35c; lb., \$1.00; 5 lbs., \$4.75, prepaid.

Isbell's New Wonder Pea

The Quality Sort for Market and Home Use.

Here is a new Pea of native origin that we offer for the first time. New Wonder Pea was developed expressly for the market grower who wants a large, dark green podded Pea which will hold its flavor and sweetness after attaining full size. The deep green sturdy vines grow 24 to 28 inches high and produce a great abundance of handsome long pods up to 6½ inches long. The pods are slightly curved and pointed and contain from 7 to 10 large well colored peas of exceptionally fine flavor. Matures in 75 days or just after the Hundredfold-Laxtonian class. New Wonder Pea is remarkably resistant to fusarium will and the peac representations are strong and the product of the strong areas to start and the peac representations.

Wonder Pea is remarkably resistant to fusarium wilt and the peas remain sweet and tender for a full week after they are ready to pick. Because of the compact vines and its exceptionally fine quality, this is the ideal home garden Pea. Pkt., 10c; lb., 40c; 3 lbs., \$1.00, prepaid. Not prepaid, 10 lbs., \$2.25; 25 lbs., \$5.00.

New Hybrid Sweet Corn Varieties Wilt Resistant Strains

The seed of these hybrids is produced by cross pollinating two pure bred or line strains or with one inbred strain. Like all hybrids, only the first cross shows marked superiority. The second generation deteriorates and is of little value and is seldom wilt resistant. For this reason it is necessary to practice cross pollination every year in order to produce this seed. Naturally this makes the cost considerably greater than ordinary commercial stocks. The greater vigor, extra yield, and freedom from disease more than offset the extra cost and justify the more general use of these hybrids.

Golden Cross Bantam

This is one of the first hybrid strains to be offered, and has proven so successful that hybrid types of several other varieties are now being produced. Compared with Golden Bantam, the stalks are taller and more vigorous and the ears are considerably longer. It is a medium early type, maturing about a week later with the same deep golden kernels and unsurpassed flavor. Golden Cross Bantam is the heaviest yielding strain of this famous variety. Pkt., 10c; lb., 45e; 3 lbs., \$1.20, prepaid. Not prepaid, 10 lbs., \$3.00; 25 lbs., \$6.25.

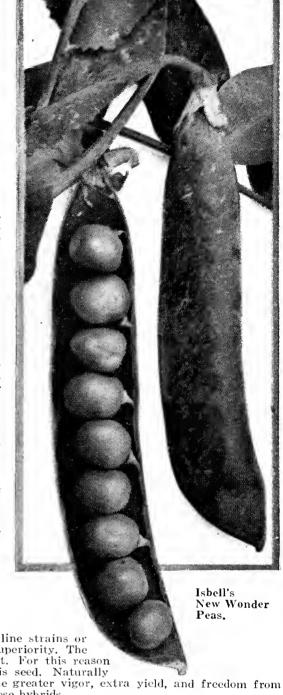

JULIUS MUNZKE OF ILLINOIS writes: I have ordered my garden seeds from you for the last sixteen years. During all that time I have been very well satisfied with your seeds, I am sending you my order again this year.

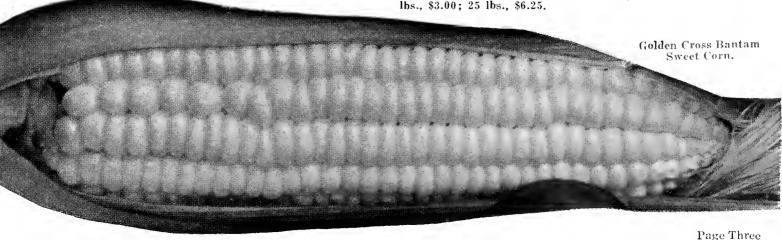

Top Cross Whipple's Yellow

Here is a hybrid wilt resistant type of another favorite yellow variety. Matures a week later than Golden Cross Bantam but produces ears considerably larger and of the same high quality. Pkt., 10c; lb., 45c; 3 lbs., \$1.20, prepaid. Not prepaid, 10 lbs., \$3.00; 25 lbs., \$6.25.

Top Cross Golden Evergreen

This is the largest and latest of the yellow varieties of Sweet Corn and matures with Stowell's Evergreen and Country Gentleman. Produces the largest ears of any of the yellow varieties. Has remarkable vigor, is wilt-resistant and of splendid quality. It is one of the heaviest yielding of all varieties and helps prolong the Sweet Corn season until frost. Pkt., 10c; lb., 45c; 3 lbs., \$1.20, prepaid. Not prepaid, 10 lbs., \$3.00; 25 lbs., \$6.25.

FLOWER SEEDS

Specialties and Choice Sorts

Beautiful Asters California Giants

Extra large and full flowers with broad, graceful petals that are curled and interlaced, a truly beautiful Aster. The plants reach a height of three feet, blooming from midsummer until frost. Long-stemmed flowers of marvelous size for those who want the finest in their garden and for cut flowers. Mixed colors. Pkt., 15c; ½ oz., 40c.

New Peerless Yellow

Good yellow Asters are very scarce but here we have a real one of good deep color and splendid form. Flowers double and of good size, with slightly incurved petals. Plants are of branching habit, height about 24 inches. A fine Aster in every way. Pkt., 15c; 3/5 oz., 40c.

New Wilt-Resistant Asters

See Color Illustration on Back Cover.

Many people who used to grow beautiful Asters have found it is almost impossible to grow them now because of Aster blight or wilt. These new strains are immune from wilt. Only through these resistant stocks is it possible to grow Asters on wilt-infected soil.

Per pkt., 15c. 1/8 oz., 50c.

GIANT CREGO-BLUE FLAME.—Bright navy-blue, with large, fluffy, full double flowers. 24 inches.

GOLDEN SHEAF.—Deep yellow, full double flowers with crestlike center. Excellent cut flower sort.

GIANT BRANCHING—PHLOX PINK.—A lovely shade of rich clear light rose-pink. Large flowers on long stems; late flowering. $2\frac{1}{2}$ to 3 feet.

HEART OF FRANCE—RUBY RED.—Full double flowers of medium size and rich color. 18 to 24 inches.

EARLY ROYAL—MIXED.—Choice early Aster with fine double flowers on good stems. 18 to 24 inches.

CREGO MAMMOTH — MIXED. — Immense flowers with curled and twisted petals, resembling Chrysanthemums. 24 inches.

mums. 24 inches.

AMERICAN BRANCHING — MIXED.—Large, very double flowers on long stems. Excellent cut flowers. 2

AMERICAN BRANCHING—LIGHT BLUE.

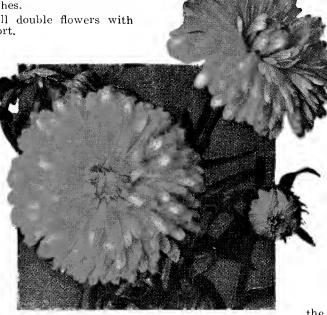

AMERICAN BRANCHING—ROSE.

AMERICAN BRANCHING —

For Complete List of Asters Sec Pages 73-74.

Dianthus-Hardy Pinks,

Calendula Chrysantha.

Dianthus - Annual Pinks

Fragrant Flowers.

One of the most popular hardy annual flowers, blooming all summer. They usually live over winter er self-seed and come up year after year. Another old-timer which recalls grandmother's garden.

FIREBALL.—Bright scarlet flowers of dwarf growth. Pkt., 10c; 1/4 oz., 50c.

CHINENSIS (China or India Pink).—Blooms in clusters and flowers are very double. Finest mixed. Pkt., 5c: 1/4 ez., 25c.

Pkt., 5c; ½ oz., 25c.

HEDDEWIGI (Double Japan Pink).—Double fringed flowers. Large range of colors. Pkt., 10c; ¼ oz., 40c.

ISBELL'S DIANTHUS MIXTURE.—Finest single and double sorts and all good colors. Pkt., 15c; ½ oz., 25c.

New Mammoth Verbena

SPECTRUM RED.—Intense bright red, brighter than any other Verbena. Its brilliance is quite dazzling. The individual florets are one and one-fourth inches in diameter. Pkt., 15c; ½ oz., 50c.

For Complete List of Flowers See Pages 70-91.

Calendula Chrysantha

California

All-America Selection — Gold Medal Award.—Chrysantha is a distinct type of Calendula with large double flowers resembling a Chrysanthemum. Bright buttercupyellow color. Grows long, stiff stems making it ideal for cutting. Blooms until frost. The finest of all Calendulas. Pkt., 15c; 1/4 oz., 50c.

Chinese Woolflower

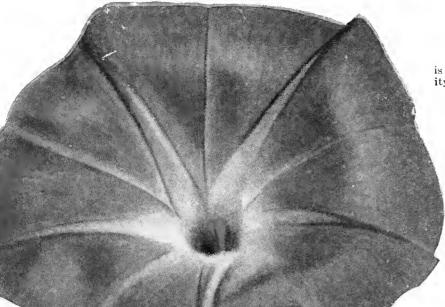

Colorful Garden Plant.

Plants grow 2 to 3 feet high, the blooms starting early with a central globular head which often reaches the immense size of 2 feet in circumference. Scores of branches are thrown out, each bearing a ball of wool.

A very attractive plant in the garden and for cut flowers. Scarlet, pink and yellow. Can be cut and dried, like an Everlasting. Pkt., 15c; 3 pkts., 40c.

Chinese Woolflower.

HEAVENLY BLUE MORNING GLORY

EARLY FLOWERING STRAIN.—This fine climber is creating a sensation and is enjoying great popularity just now, and rightly so. The flowers measure from 3 to 4 inches across, sky-blue with a white throat. They are profuse bloomers and during a long season the vines are a mass of lovely blue blossoms opening in the morning and facing the sun. Gravelly or sandy soil is best and southern or eastern exposure preferred. Pkt., 15c; ½ oz., 45c; oz., 75c.

Rose Marie Morning Glory

A Lovely Double Pink Morning Glory.

Blooms as early and as freely as any Morning Glory, with lovely double and semi-double flowers of a beautiful shade of deep rose. We predict for it the same popularity as the Heavenly Blue Morning Glory now enjoys. Pkt., 15c; ½ oz., 40c.

Dahlias from Seed

Coltness Hybrids-No Finer Cut Flower.

Very beautiful flowers in shades of red, yellow, orchid, etc. They make a brilliant show in the garden in fall and are highly prized for cut flowers. Plants grow 18 to 24 inches high and the flowers are single. Easily grown from seed. Plant in boxes indoors and transplant to the garden in May. The plants form bulbs during the first year and these are replanted the following spring. Pkt., 15c.

Double Strawflowers

For Winter Bouquets.

HELICHRYSUM .-- An annual of easy culture, growing nicely in any good garden soil. The plants grow 2 to 3 feet tall, branch out freely, and produce their bright colored flowers abundantly all summer and fall. This is the most popular Strawflower or Everlasting for winter bouquets, the flowers keep-

ing in perfect condition and retaining their brightness for a remarkably long time.

MAMMOTH-FLOWERED MIXED. Pkt., 10e; 1/4 ez., 30e; ez., 90c.

HELICHRYSUM-Fireball.-Brilliant dark red. Pkt., 10c; 1/4 oz., 35c.

HELICHRYSUM—Golden Bright yellow. Pkt., 10c; 1/4 oz., 35c.

HELICHRYSUM—Rose Beauty.—In shades of rose. Pkt., 10c; 1/4 oz., 35c.

HELICHRYSUM-Salmon Queen. Lovely shade of bright salmon. Pkt., 16c; ½ oz., 35c.

HELICHRYSUM — Snowball. — Large, pure white. Pkt., 10c; 1/4 oz.,

HELICHRYSUM — Violet Queen.—Fine dark sort. Pkt., 10c; 1/4 oz., 35c.

Cosmos—Orange Flare

Heavenly Blue Morning Glory.

> All-America Selection-Gold Medal Award. See Color Illustration on Back Cover.

This new and very lovely orange colored Cosmos blooms profusely and early, assuring flowers before frost. Nothing equals it for brilliance of color either in the garden or in bouquets. Be sure to grow this grand novelty. Pkt., 15c; 1/4 oz., 50c.

New Annual Canterbury Bells

At last we have an **annual** Canterbury Bell which blooms from seed the same year. The plants grow 24 to 30 inches high, each plant having from 6 to 8 flower spikes. This novelty will be welcome to all flower lovers. In mixture of dark blue, light blue, pink, rose and white. Pkt., 15c.

Phlox - Flame Flower

Vivid Colors-Long Blooming Season.

The annual Phlox surpasses almost everything else in dazzling brilliancy and yet is of the easiest

culture. Plants are of neat, compact growth and will thrive on any soil, if given a sunny location. Plants from seed sown in open ground in fall or early spring will begin flowering in June and remain literally covered with bloom until late in autumn. 12 inches.

> GRANDIFLORA MIXED .- Many colors, a splendid mixture that will make a bright color display. Pkt., 10c; 1/4 oz., 40c; oz., \$1.25.

Helichrysum-

Strawflower.

ISBELL'S PHLOX MIXTURE.—All the above sorts and many others included in this superfine mixture. Guaranteed to please. Pkt., 15c; 1/4 oz., 50c; oz., \$1.75.

Salpiglossis

Gold-Veined Flowers-Fine for Cutting.

VELVET FLOWER .-- One of the greatest favorites among annuals, partly because of its easy culture, but principally for its beautiful, almost orchid-like flowers, which it produces from early summer to late fall. Nearly every flower is veined with a glint of gold in a striking color display. Plants grow $1\frac{1}{2}$ to $2\frac{1}{2}$ feet high.

LARGE-FLOWERED MIXED.—Pkt., 5c; 1/8 02., 20c; ½ oz., 50c.

ISBELL'S SPECIAL MIXTURE.—Made up from

Phlox-Flame Flower.

the finest named varieties. Pkt., 15c; ½ oz., 35c; ½ oz., \$1.00.

Salpiglossis.

Petunias

For Mass Planting. For Borders, Window Boxes, Vases.

Balcony Sorts

These single large flowering sorts are great favorites for porch boxes, vases, beds, terraces and borders. They bear large, showy flowers and bloom in great profusion all season.

STAR OF CALIFORNIA.-Magnificent new sort. Flowers of rich velvety violet-blue, starred with five distinct blotches of pure white. Pkt., 20c.

BALCONY BLUE.-Velvety indigoblue. Pkt., 15c; ½ oz., \$1.00.

BALCONY RED.—Rich deep red.

Pkt., 15c; ½ oz., \$1.00.

BALCONY ROSE.—Bright rosepink. Pkt., 15c; ½ oz., \$1.00.

BALCONY WHITE.—Plant for con-

trast with the colored sorts. Pkt., 15c; 1% oz., \$1.00.
BALCONY MIXED. — Pkt., 10c;

½ oz., 75c.

Lovely Bedding Petunias

Desirable free blooming class. Plants of medium height, producing great masses of flowers all summer until frost.

ROSE OF HEAVEN .- Rich brilliant rose. Pkt., 10c; 1/8 oz., 35c.

HEAVENLY BLUE .- Silvery light blue.

Pkt., 25c; 1/2 oz., 75c. TRUE BLUE.—Rich dark blue. Pkt., 15c; 1/8 oz., 50c.

CRIMSON KING .- Showy deep red flow-

ers. Pkt., 15c; 1/2 oz., 40c. FRINGED MIXED.—Flowers with fring-

ROYAL PURPLE.—Beautiful dark violet-blue. Pkt., 15c; ½ oz., 50c.

DWARF GIANTS MIXED.—Extra large flowers. Choice colors. Pkt., 35c.

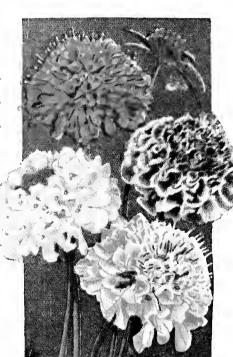

ISBELL'S SPECIAL MIXTURE BED-DING PETUNIAS .- A selected mixture guaranteed to please. Pkt., 15c; 1/8 oz., 50c; oz., \$3.00.

FINE MIXED BEDDING PETUN-

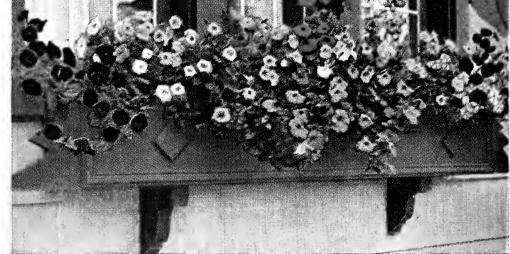

IAS.—Pkt., 5c; 1/4 oz., 35c; oz., \$1.00

Miniature Petunia, Pink Gem

All-America Selection. Gold Medal Award. Pink Gem forms a neat, compact plant six inches high, literally smothered with deep pink flowers 2 inches in diameter. Thirty to forty blooms in flower at the same time. Indispensable for borders, window boxes and for bedding. Planted with a dwarf blue Ageratum, the effect is most charming. Pkt., 20c; ½ oz., 50c.

Annual Scabiosa.

Petunias in a Window Box.

Annual Scabiosa Pincushion Flower.

Lovely flowers in exquisite colors on long, wiry stems; excellent for cutting. 2 to 2½ feet high; of easiest culture.

LOVELINESS. — Glorious salmon-pink flowers of delightful fragrance. Pkt., 10c.

LARGE FLOWERING DOUBLE MIX-ED.—Blue, white, red, pink and maroon-black. Pkt., 5c; 1/4 oz., 20c; oz., 50c.

Perennial Scabiosa

Hardy perennials for a sunny location. Handsome border plant producing freely large flowers for bouquets.

BLUE BONNET.—Blue flowers, 2½ inches across, prettily fringed, on long stems. Grows 18 to 24 inches tall. Pkt., 15c; 1/8 oz., 60c.

COLUMBARIA-Lavender. -- Showy lavender-blue flowers. Pkt., 20c; 1/8 oz.,

COLUMBARIA-Pink.-Flowers are of deep rosy pink color. Pkt., 20c; 1/8 oz., 75c.

New Zinnia—Fantasy

An All-America Selection. See Color Illustration on Back Cover.

The rounded flowers are composed of a mass of shaggy, raylike petals. In color range we have the brightest shades of red and orange, as well as the popular pastel pinks and cream. The plants are semi-dwarf and well suited for mass planting. Excellent for cutting. Pkt., 20c; 1/4 oz., 60c.

New Cactus-Flowered Zinnia

Also called Achievement or Victory Zinnias. Large, double, attractive flowers 3 to 4 inches across, with quilled or tubular petals, giving the appearance of a Cactus Dahlia. MIXED COLORS. Pkt., 10c; 1/4 oz., 40c.

Dwarf Zinnia—Rosebud

Very double flowers of a delightful rose-pink color. Fine cut flower sort. Dwarf plants well adapted to mass planting. Pkt., 15c; ½ oz., 50c.

Dahlia-Flowered Giant Zinnias

These Giant-Flowering sorts produce enormous flowers not to be compared with the old sorts of yesteryear. They are remarkable for the profusion and duration of their flowers, which are extremely useful for bouquets.

CRIMSON MONARCH .- Best of the dark red shades.

DREAM.—Fine deep lavender, turning to purple.
EXQUISITE.—Light rose with center of deeper rose.
ORIOLE.—Lovely orange and gold color.
OLD ROSE.—The real old rose shades so desirable for

bouquets and garden display.

POLAR BEAR.—Very large pure white.

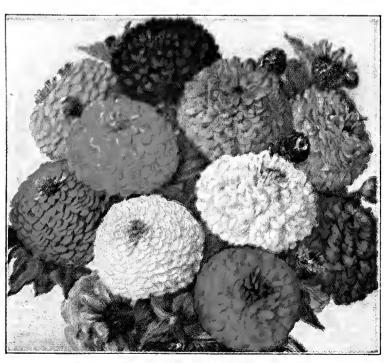

PURPIE PRINCE.—A fine dark colored sort.

Above Giant Zinnias: Per pkt., 15c; any four pkts. for 50c; 1/4 oz., 75c; oz., \$2.50.

GIANT DAHLIA-FLOWERED MIXED.—Pkt., 10c;

1/4 oz., 50c; oz., \$1.50.

For additional list of Zinnias see page 87.

Dahlia-Flowered Giant Zinnias.

QUALITY SEEDS AT LOWEST PRICES

For nearly 60 years we have been working to produce better seeds at lowest cost. To do this we have constantly improved our methods and equipment for growing and handling seeds, while at the same time the volume has been steadily increased. Large scale production, modern equipment, efficient handling methods mean a better product at a lower cost. This saving is passed on to our customers in lower prices for our seeds.

Isbell's Capacity for Seed Production

We grow every year over 6000 acres of seed crops, mostly in Michigan and Idaho. All of these crops are grown under our own supervision and from our own specially selected planting stocks. All are carefully inspected and any plants not true to type are removed from

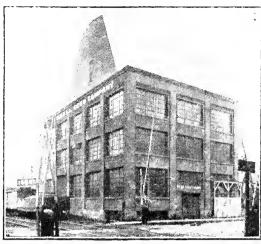

the growing crops. This seed is conditioned in our own warehouses by experienced workmen.

Isbell's Seeds are Twice Tested

All seeds are tested for germination as soon as harvested in our electric tester, which duplicates natural conditions. In addition all stocks are tested for purity and trueness to type on our extensive Trial Grounds which are maintained solely for testing purposes. Along with our stocks we plant seed from other concerns as check tests. Year after year the results show that our stocks are of the best types obtainable.

Quality Maintained Regardless

The past few years it has been necessary to economize in every way possible but we have not lessened our efforts to maintain and improve the quality of our seeds. We have used the same care in selecting our planting stocks, the number of our Trial Grounds tests has not been cut down, and all of our experienced help have been steadily employed.

One of our buildings at Jackson containing cleaning machinery unsurpassed anywhere. These buildings, with our new branch warehouse at Twin Falls, Idaho, have a combined capacity of 250 carloads of seeds.

Isbell's Prices are Low

Prices of Isbell's Northern Grown Seeds are low when quality is considered. Bell Brand Seeds are carefully grown and handled economically, but are not produced with low price as the main objective. Quality comes first and the price is made as low as possible and allow us to maintain the high standard we have established. Because we grow seeds so extensively, we are able to give better value than concerns which are dealers only.

Large Growers Use Isbell's Seeds

Enormous quantities of our seeds are used every year by market growers who must have seeds of proven dependability. We issue a Special Wholesale Price List for Market Gardeners. Every commercial grower should send for it. We also have a Current Price List of field seeds.

We also have a Current Price List of field seeds.

As there are so many other vital factors, beside the seed, which enter into the production of any crop, it is impossible for any concern to guarantee a crop, regardless of how good the seed is. Because of this fact, in common with all reputable seed houses, our seeds are sold subject to the disclaimer adopted by the American Seed Trade Association as follows, "We do not give any warranty, express or implied, as to description, quality, productiveness, or any other matter of any seeds we sell, and we will not be responsible for the crop."

Special Gift Offers To Our Customers

To express our appreciation we are including, this year, absolutely free with each order for \$1.00 or over, some choice new flower seeds of the finest sorts and with orders of \$2.50 or more one dozen bulbs of handsome, large flowering Gladiolus in a brilliant assortment of colors. We will consider it a special favor to have your orders as early as possible.

Muskmelon tests on our Trial Grounds at Jackson. More than 2000 test rows are planted here every year for comparing and checking our stocks.

NEW and BETTER SORTS Beans—McCrea's New Bush Lima

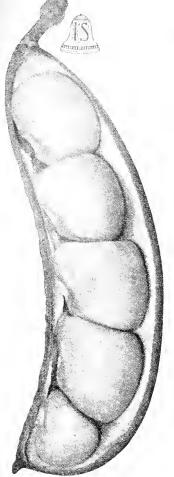

The Early Giant Podded Dwarf Lima Bean

Entirely new and different Lima with an unusually sweet flavor. Large thick beans of green color, retaining a green tint when cooked. Strong bushy plants, will stand cold and wet weather in spring and resist extreme heat in summer. Very prolific. The dry beans are small, shriveled, like a sugar pea, when cooked they swell to same size as the green beans, retaining the sweet flavor. The ideal home-garden Lima; highly recommended for market and canning. Pkt., 15c; lb., 45c; 3 lbs., \$1.20, prepaid.

Cabbage—Marion Market—Disease-Resistant

Excellent Early Sort-Preferred on Detroit Market

Will mature in 75 days, producing fine round heads of the Copenhagen Market type. The heads are solid, fine grained and tender, weighing 8 to 10 pounds each. Has given wonderful satisfaction, producing a normal crop on yellow-infected soils where the non-resistant strains failed almost entirely. Highly recommended to the Cabbage grower for market and is equally as good for the home garden. If you have experienced trouble growing good cabbage owing to yellows disease, try this variety for better results. Pkt., 10c; oz., 40c; 1/4 lb., \$1.25; lb., \$4.50, prepaid.

Bush Lima Beans.

Muskmelon—Delicious

Profitable Early Market Sort A large melon of extra fine quality which ripens early. In size and appearance it resembles Bender's Surprise but is all of two

weeks earlier. The firm, tender flesh of deep orange color is surprisingly sweet and truly delicious. The outside color is creamy yellow and the melons are entirely covered with fine netting. Its earliness, size and splendid quality recomand splendid quality recommend it for the home garden and early market. Pkt., 10c; oz., 15c; 1/4 lb., 45c; lb., \$1.60, prepaid.

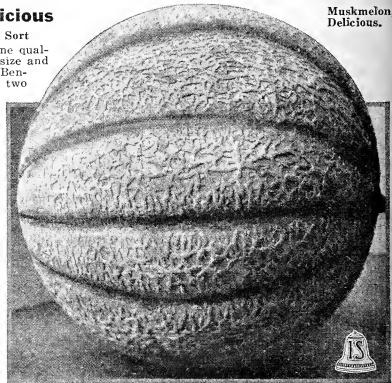

Early Ripening Improved Honey Dew An early strain of the well known Honey Dew Melon, An early strain of the well known Honey Dew Melon, ripening fully two weeks earlier, permitting the growing of this desirable melon in sections where the Honey Dew will not ripen. The melons have a rich, velvety, golden yellow color; flesh is most delicious, light green, ripens clear to the rind and has the characteristic Honey Dew flavor celebrated for its rich honey sweetness. Vines are of strong growth, very productive and disease-resistant. The grower for market as well as the home gardener should try out this promising sort. Pkt., 15c; oz., 30c; ¼ lb., \$1.00.

Cucumber—Straight Eight

An All-America Selection-Gold Medal Award

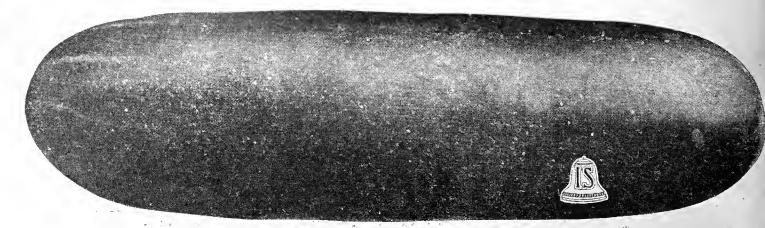

Here is the latest development in a slicing Cucumber of medium length. The shape is very symmetrical, almost cylindrical, perfectly straight and averaging 8 inches long by 2 inches in diameter. Color is a beautiful deep green with practically no light stripes. The flesh is firm and crisp making it an ideal slicing cucumber both for the home garden and as a market and shipping sort. The vines are of strong growth, resistant to disease and will yield an astonishingly large crop of fine shaped, beautiful dark green colored cukes. Pkt., 15c; oz., 25c; ¼ lb., 75c; lb., \$2.50, prepaid. \$2.50, prepaid.

Watermelon—Stone Mountain

The Quality Melon. Also called Dixie Belle or Lipsey.

It originated in Georgia and was named after the Great Stone Mountain in that state. The melons are very large, almost round, rich green. The flesh is bright scarlet, extremely sweet and of finest quality, solid through, almost all heart and but very few seeds. When eaten once, it is not forgotten—the finest and sweetest flavor of them all. On the southern markets it outsells all other melons, We offer Michigan grown markets for the states north of the Mason-Dixon line. Pkt., 5c: az. 10c: 14 lb. 30c: th. 95c prepaid—Not prepaid 5 lbs. 5c; oz., 10c; 1/4 lb., 30c; lb., 95c, prepaid.—Not prepaid, 5 lbs., \$4.00.

New Cucumber-Straight Eight-An All-America Selection.

CHOICE VEGETABLES

Peas—Senator

Resistant To Drought and Wilt

Thrives under adverse conditions of soil and weather when many other sorts fail. Stands hot dry weather better than most varieties. Senator is a very productive, medium late or main crop sort and is splendid for the home or market garden and for canning. The strong sturdy vines grow 30 to 36 inches high and produce an abundance of large pods, four inches long, which are well filled with 6 to 8 large peas of delicious flavor. In quality and sweetness, this variety is hard to beat. Pkt., 10c; lb., 35c; 3 lbs., 90c, prepaid.—Not prepaid, 10 lbs., \$1.90; 25 lbs., \$4.25.

Peas-Early Bird

Very Early-Extremely Hardy and Productive

The earliest large podded dwarf sort and is very popular on this account with market growers who want peas at the earliest possible date. It is extra hardy and very productive. The vines grow about 18 inches high and produce handsome dark green pods 4 inches long, well filled with 9 or 10 large peas. It is nearly as early as Alaska and much more readily salable. The seed is semi-wrinkled or nearly smooth and light blue in color. Pkt., 10c; lb., 35c; 3 lbs., 90c, prepaid.—Not prepaid, 10 lbs., \$2.00; 25 lbs., \$4.50.

Pepper—King of The North

Largest and Best Early Sort

This is the newest and best early large pepper and is especially valuable in the northern states. The fruits are enormous in size and color up a brilliant red much earlier than any other large sort.

SQUASH, Buttercup.

Squash—Golden Macaroni or Spaghetti

Entirely Different Sort From the Orient

Grows readily and thrives any place where other varieties of squashes are grown successfully. Each vine produces six to ten fruits which are oval in shape and 8 to 10 inches long. When ripe they are a bright orange-buff color. They keep remarkably well in storage and can easily be kept all winter in a moderately warm dry room. The fruits when fully ripe are cooked by boiling whole for 30 minutes and then cut in half. The meat separates from the rind and comes out in the form of strings like spaghetti. Seasoned with salt, pepper and butter and served hot it is a very tasty dish. It is also served hot with tomato sauce or ketchup. Here

is a truly valuable addition to our vegetable list and one which never fails to excite a great deal of interest. Pkt., 10c; oz., 30c; 1/4 lb., 75c, prepaid.

Squash—Delicious Winter THE SWEETEST OF ALL SQUASHES

Isbell's Delicious Squash is particularly excellent in table quality and is by some preferred even to the Hubbard. Is an early winter variety of medium size, top-shaped in form and dark green; shell moderately hard but very thin; flesh thick; fine grained and bright yellow in color. The fruits are somewhat smaller than Hubbard, weighing from 6 to 10 pounds and the force of the contract of the contra pounds each. Makes an ideal home garden Squash, as it combines all desirable qualities. Even when immature this Squash is in condition for use and is of very fine flavor. Pkt., 5c; oz., 15c; ¼ lb., 40c; lb., \$1.20, prepaid.

average about six inches long and 3 to 4 average about six inches long and 3 to 4 inches across. The flesh is thick, firm and very sweet and mild. The plants are spreading in habit and are literally covered with large peppers. Often one plant will have 8 to 10 mature fruits. We grew our seed of this wonderful new variety here in Michigan. Pkt., 15c; $\frac{1}{2}$ oz., 40c; 1 oz., 70c; $\frac{1}{4}$ lb., \$2.50, prepaid.

Tomato—Scarlet Topper

Extra Heavy Yielder-Superior Quality

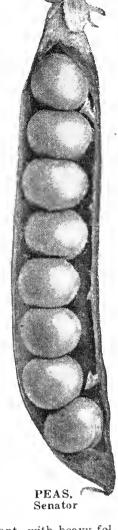

Also called Pritchard in honor of the Also called Pritchard in honor of the originator, the late Dr. Pritchard of the U. S. Department of Agriculture. It is a medium early sort, producing splendid highly colored globe-shaped fruits which resemble Marglobe and are of the same high

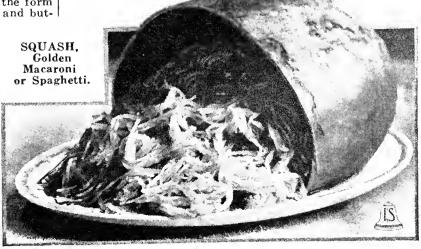

quality but about a week earlier. They are extremely solid and have few seeds. The vines are sturdy, compact and disease resistant, with heavy foliage which protects the fruit. While a comparatively new sort it has already gained great popularity both for the home garden and as a commercial sort. Market gardeners find this value really readly and is a very profitable one to raise. Pkt riety sells readily and is a very profitable one to raise. 10c; ½ oz., 25c; oz., 45c; ¼ lb., \$1.35; lb., \$4.75, prepaid.

Is Very Sweet-Cooks Dry and Mealy

A new type of Winter Squash of splendid quality which was developed at the North Dakota Experiment Station. Buttercup is just the right size for the average family as the fruits weigh from 3 to 5 lbs. The outside color is dark fruits weigh from 3 to 5 lbs. The outside color is dark green like Hubbard and the flesh is a rich orange, untinged with green. The shape is nearly that of the small sugar pumpkin except the top and bottom surface is flattened instead of rounded. The texture of the flesh is smooth and the flavor is mild like a sweet potato. They cook dry and mealy without strings or fiber so there is little waste. Of all the varieties of Squash which we grew on our Trial Grounds last season, Buttercup was the finest flavored and best quality. Plet 10cc or 20cc 14/1 lb 60cc lb \$2.00 prepaid. last season, Buttercup was the finest flavored and best quity. Pkt., 10c; oz., 20c; 1/4 lb., 60c; lb., \$2.00, prepaid.

ISBELL'S VEGETABLE SEEDS

Asparagus.

Asparagus

CULTURE.—In early spring sow the seed, after soaking it 24 hours in warm water, in drills one foot apart, and one inch deep. During the summer keep the soil mellow and free from weeds, thinning the plants to four inches apart. The following spring transplant them into permanent beds that have been deeply dug and highly manured. One ounce to 50 feet of row; five pounds per acre.

BONVALLET'S GIANT.—Recommended for home and market gardens. A strong and rapid grower. Flavor unexcelled. Pkt., 5c; oz., 15c; ¼ lb., 35c; lb., 75c, prepaid.

WASHINGTON.—The New Giant Rust-Proof Variety. This new sort is the result of many years' work in plant breeding by the U. S. Department of Agriculture. The Washington is a rust-resistant, vigorous, high yielding strain of Giant Asparagus. Plants grow rapidly and produce uniformly long shoots of superior table quality. Pkt., 10c; oz., 15c; ¼ lb., 40c; lb., 90c, prepaid.

MARY WASHINGTON.—This strain is used extensively by truckers who grow a large acreage for market. Pkt., 10c; oz., 15c; ¼ lb., 45c; lb., \$1.25.

Asparagus Roots

A bed of Asparagus in the garden properly attended to will for many years furnish an abundance of the finest vegetable in the early spring. An Asparagus bed is a permanent investment and every garden should have one. Plant about 8 to 10 inches apart in the row, and the rows 3 to 3½ feet apart. Plant deep enough to permit the crowns to be covered about 3 to 4 inches, with rich, mellow soil. Two year old plants give best results. We have a very fine stock of strong field-grown roots.

BONVALLET'S GIANT.—Strong, selected, two-year roots, 100 for \$1.25; 500 for \$5.00, not prepaid.—By mail, postpaid, 12 for 35c; 25 for 60c; 100 for \$1.65.

NEW WASHINGTON.—The New Giant Rust-Proof Variety. Two-year-old roots, 100 for \$1.35; 500 for \$6.00, not prepaid.—By mail, postpaid, 12 for 40c; 25 for 75c; 100 for \$2.00.

Sow seed early in May; transplant in June. Growth and habit like Cauliflower, but far more hardy. Of special value in the North. Cultivate and use same as Cauliflower. One ounce will produce 2,500 plants.

LARGE WHITE.—Produces large, white heads like Cauliflower which remain in good condition longer than Cauliflower. Ready for table in 100 days. Pkt., 10c; oz., 40c; 1/4 lb., \$1.25; lb., \$4.00, prepaid.

Broccoli, Italian Green Sprouting

This new Calabrese Broccoli makes a large head and many branching sprouts which are cooked like Cauliflower. The flavor is delicate and delicious, even milder than Cauliflower. Sow the seed in May and June; harvest in August and later. Our seed comes from the introducer of this fine vegetable.

EARLY CALABRESE.—The popular variety that is being grown extensively. Pkt., 10c; ½ oz., 25c; oz., 40c; ¼ lb., \$1.25; lb., \$4.00, prepaid.

LATE CALABRESE.—For main crop and later harvest this new strain is highly recommended. Pkt., 10c; ½ oz., 30c; oz., 50c; ¼ lb., \$1.35; lb., \$4.50, prepaid.

This is one of the best vegetables for fall and winter use, producing an abundance of sprouts, resembling small cabbages; of excellent mild flavor. By sowing in April and planting out in July, it may be had in fine condition until December, and in the South from November to March.

PERFECTION.—Plants grow about two feet high, are thickly set with good size "sprouts." A heavy yielder; of very fine flavor. Ready for table in 110-120 days. Pkt., 10c; oz., 25c; 1/4 lb., 60c; lb., \$1.90, prepaid.

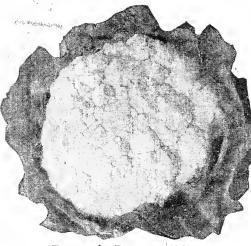

LARGE ROOTED.—The roots are cut in thick slices, then roasted and used as a substitute for coffee. In spring the leaves make a nice salad. Reaches maturity in 65-75 days. Pkt., 10c; oz., 15c; ¼ lb., 40c; lb., \$1.35.

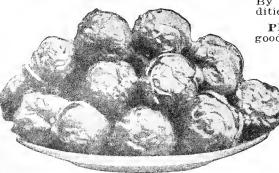

ASPARAGUS CHICORY.—This is grown for its green shoots which are boiled in salt water and served hot, or in cold salad. They are very tender and delicious with the flavor of Asparagus. New sprouts appear all season. Pkt., 10c; oz., 25c; ½ lb., 75c; lb., \$2.50, prepaid.

Corn Salad or Fetticus

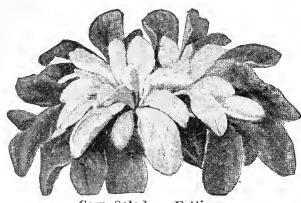

A most refreshing salad, especially for winter use; can also be cooked and used like Spinach. Plant is of quick growth and hardy. For spring crop sow seed ½ inch deep in rows 1 foot apart and thin to 6 inches in row. For extra early crop, sow seed in September and cover with straw or leaves in northern states. For fall use, a sowing should be made in July or August. One ounce will plant a row 50 feet long. Is ready for table in 60 days. Pkt., 5e; oz., 15e; ¼ lb., 45c; lb., \$1.25, prepaid.

Broccoli-Large White.

Brussels Sprouts.

Corn Salad or Fetticus.

BEANS - Four Leading Varieties

For The Home Garden—For Market—For Canning

New Stringless White Wax

Large Flat Pods-Bright Yellow-Entirely Stringless This fine new Bean is very productive and quite early. The large pods are flat, 6½ inches long and uniformly straight, entirely stringless, meaty and of extra fine quality. The color of the pods is bright yellow. For market and shipping it is ideal and for table use as well as canning you will find this variety of superior quality. We recommend it highly. The beans are white, fairly large, kidney-shaped and fine for baking. Ready for picking in 52 days.

Pkt., 10c; lb., 40c; 3 lbs., \$1.00, prepaid.—Not prepaid, 10 lbs., \$1.85; 25

lbs., \$4.00.

Pencil Pod Black Wax

Long Round Pods - Golden Yellow - Superb Quality

Wherever a fine quality round pod Wax Bean is wanted this variety fills the bill in every way. It is an exceedingly desirable sort long pods are round and thick, fleshy, slightly curved, of golden yellow color, tender and brittle as well as absolutely stringless and of finest quality. Plants large, vigorous, producing in great abundance fine pods 6½ to 7 inches long. The ripe beans are oblong and of clear black color. Ready for picking in 52 days. Pkt., 10c; lb., 35c; 3 lbs., 90c, prepaid.

Not prepaid, 10 lbs., \$1.75; 25 lbs., \$3.75.

Isbell's Longpod Stringless

Immense Pods — Excellent Quality

A new variety developed for high quality and yield. The pods are 6 to 8 inches long, perfectly round and slightly curved; very meaty, rich in flavor, absolutely stringless and free from fibers. The color is a rich green that will not show even a trace of paleness. The plant is erect with dark green foliage and in yielding quality we have yet to find any Bean that will surpass it. Longpod is much superior to Giant Stringless. We recommend it highly for the home garden, market gardeners and canners when a high quality round pod Bean is wanted. For the market gardener and canner Longpod will prove highly profitable because of the big yield of beautiful pods that are of superior quality and flavor. It is very resistant to Bean blight and other diseases also. Ready to use in 55 days. Pkt., 10c; lb., 35c; 3 lbs., 90c, prepaid.—Not prepaid, 10 lbs., \$1.75; 25 90c, prepaid.—Not prepaid, 10 lbs., \$1.75; 25 lbs., \$3.75.

Tendersnap - Green Pod

Unusually Tender Pods-Absolutely Stringless

Unusually Tender Pods—Absolutely Stringless

Here is a variety that can truly be called "perfection" in Beans. Absolutely stringless and tender from the first to the last picking; large, round, very meaty pods that snap like icicles. We know our customers who want quality will appreciate this fine new introduction. The vine is of vigorous, upright growth, strong and healthy; blight resistant, rust-proof and prolific to a high degree. The pods are 6 inches long, perfectly round, firm and meaty. Ready for picking in 54 days. Pkt., 10c; lb., 40c; 3 lbs., \$1.00; prepaid.—Not prepaid, 10 lbs., \$1.85; 25 lbs., \$4.00.

SATISFACTORY RESULTS

MR. P. O. STARTS OF OHIO writes: We think Isbell's New Stringless White Wax Beans the finest we ever raised.

MR. E. L. CANNON OF MASSACHUSETTS writes: Thank you for the wonderful seeds, I never had such good results as this year. The Beans, Beets, Carrots, Cueumbers, were just grand and Isbell's Perfect Early Peas cannot be excelled.

J. W. DAVIS OF NEW YORK writes: This is my 42nd year since first using Isbell's Seeds.

ISBELL'S CHOICE MICHIGAN BEANS

BUSH BEANS - Wax Podded

CULTURE.—Beans are tender and should not be planted until the ground is well warmed in the Spring. By making several plantings at intervals of two or three weeks a continuous supply may be had from early summer until frost. The last planting may be made late in July. Plant 4 or 5 beans 1½ inches deep about 18 inches apart in the row. Rows should be 2½ to 3 feet apart. One pound will plant about 100 feet of row and 50 lbs, will plant an acre.

Isbell's New 1936 Wax Pod

High Quality and High Yield.

High Quality and High Yield.

For those who are partial to yellow podded Beans we have here a new variety representing the latest development in Beans of this type. It is hardy, early maturing, disease resistant, and of superb quality. The long, handsome, rich golden pods which are produced with the greatest profusion on the compact bushy plants, are entirely stringless and unusually tender and rich flavored. They are round, thick, nearly straight and grow 6 to 7 inches long. By picking the mature pods often, a continuous supply is assured over a long period. This new Bean is the result of many years of breeding and selection in which quality, earliness and productiveness have been developed to an unusual degree. To home gardeners and market growers alike who take pride in growing quality vegetables, this remarkable new Bean is a source of satisfaction and profit. Pkt., 10c; lb., 40c; 3 lbs. for \$1.00, prepaid.—Not prepaid, 10 lbs., \$1.85; 25 lbs., \$4.00.

Isbeli's Early Wonder Wax

The Earliest of All—A Heavy Yielder.

Wonder Wax belongs to the flat podded class and grows a strong plant, well loaded with pods, five to seven inches long; flat, plump, handsome and meaty, of a clear, waxy yellow color. As to quality the pods are tender, brittle and of fine texture. Practically rust-proof; a bountiful yielder; in bearing for a long season, it is an ideal Bean for the home and market gardener. Ready to pick in 35 to 40 days. Pkt., 10c; lb., 40c; 3 lbs., \$1.00, prepaid.—Not prepaid, 10 lbs., \$1.85. 25 lbs. \$4.00 season, it is an idea 35 to 40 days. Pkt. \$1.85; 25 lbs., \$4.00.

Isbell's Golden Jubilee Wax

Large Round Pods-Meaty and Stringless.

Absolutely stringless pods of golden yellow color, very tender, meaty and of delicious flavor. The plants are of vigorous growth and bear heavy crops of large, round pods. This new variety is remarkably resistant to rust and other diseases. We recommend it for the home garden, for market and canning. Pkt., 10c; lb., 35c; 3 lbs., 90c, prepaid.—Not prepaid, 10 lbs., \$1.75.

Sure Crop Stringless Wax

Also Called Yellow Pod Bountiful,

most prolific cropper and of A most profile cropper and of superlative quality. The handsome rich yellow pods are slightly curved, averaging 6 to 7 inches in length, half an inch wide, very meaty and sweet, and perfectly stringless at all stages. For canning the Sure Crop is an ideal variety, planty of rods as long as the riety, plenty of pods as long as the jar. Pkt., 10c; lb., 30c; 3 lbs., 75c, prepaid.—Not prepaid, 10 lbs., \$1.65; 25 lbs., \$3.75.

NEW STRINGLESS WHITE WAX. See Page 11.

Round Pod Kidney Wax (Brittle Wax)

Of superb quality and surprisingly productive. The pods are perfectly round, nearly straight and often attain a length of 6 inches. Are very tender, entirely stringless and very fleshy. The plants are of vigorous growth, with large foliage. Recommended for market and home garden, splendid for canning. Ready to pick in 50 days. Pkt., 10c; lb., 30c; 3 lbs., 75c, prepaid.—Not prepaid, 10 lbs., \$1.65; 25 lbs., \$3.75.

Improved Rust Proof Golden Wax

Although this is not the earliest Dwarf Wax Bean, yet it is so sure to produce good crops of large, attractive pods, that it has found a very high place in the estimation of both home and market growers. The pods are medium in length and rather wide. The color is a beautiful clear waxy yellow. Ready for use in 45 days. Pkt., 10c; lb., 35c; 3 lbs., 90c, prepaid.—Not prepaid, 10 lbs., \$1.65; 25 lbs., \$3.75.

Unrivaled Wax

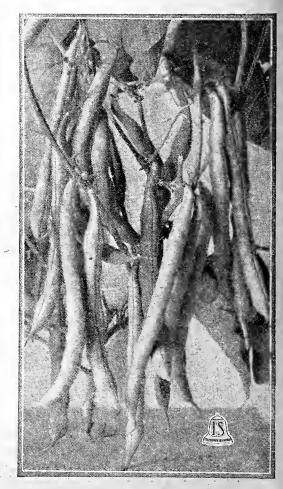

Sure Crop Stringless Wax.

See Page 64.

This Bean is a heavy yielding market variety. Plants of medium size, robust and very resistant to disease, loaded down with pods 5 to 5½ inches long, semi-round, but quite fleshy and tender, with small seeds. The color of the pods is a rich yellow. Ready for use in 45 days. Pkt., 10c; lb., 35c; 3 lbs., 90c, prepaid.—Not prepaid, 10 lbs., \$1.65; 25 lbs., \$3.75.

STARR COMMONWEALTH FOR BOYS. OF MICHIGAN, writes: As you know, we have purchased seeds from Isbell's for many years. We have a strictly vegetarian dict for our boys. therefore, we depend largely on our gardens and farm for food supplies. Your seeds have always been very satisfactory and have produced the very finest quality crops.

Isbell's New 1936 Wax Pod.

BUSH BEANS - Green Podded

The Green Podded Beans are as a rule more productive than the Wax or Yellow Pod varieties, besides being less sensitive to unfavorable conditions of soil and climate.

Don't fail to plant some beans this year to ean. They may be planted late, taking the place of some early erop like peas.

DON'T hoe Beans immediately after rain, wait until the soil dries out. Beans hoed immediately after rain are more liable to rust.

Isbell's New 1936 Green Pod

High Quality and High Yield.

High Quality and High Yield.

Here is the finest type of stringless green podded bush Bean we have ever offered and which represents the last word in the development of quality Beans. It is an early sort, maturing handsome deep green pods in 7 weeks and is not only a vigorous grower but one of the heaviest yielding of all varieties. Bears over a long period so that one planting supplies an abundance of tender, rich flavored Beans for many weeks. The thick meaty pods average 6 inches long, are round and solid and absolutely stringless. The quality is unsurpassed and seldom equalled. The rich full flavor is particularly pleasing to all who are fond of green Beans. If you like green Beans or if you are growing for a high class trade you can't go wrong with this splendid new variety which combines all desirable qualities. Pkt., 10e; lb., 35e; 3 lbs., 90e, prepaid.—Not prepaid, 10 lbs., \$1.85; 25 lbs., \$1.00.

New Stringless Green Pod

(Burpee's Stringless Green Pod). Splendid for Market and Home Garden.

Stringless Green Pod is one of the most popular Beans in America. It is stringless Green Pod is one of the most popular Beans in America. It is stringless in reality as well as in name. It is an abundant cropper and the pods are thick, round, fleshy, tender and brittle, about 5 inches long; deep green in color, and extremely handsome on the market bench. Quality is all that can be desired. Ready for picking in 48 days. Pkt., 10e; lb., 30e; 3 lbs., 75e, prepaid.—Not prepaid, 10 lbs., \$1.60; 25 lbs., \$3.50.

Giant Stringless Green Pod

Should not be confused with Stringless Green Pod, from which it is entirely distinct. The plants are of strong growth, very productive, pods 5 inches long, light green, slightly curved, very meaty, being broadly rounded, saddle-backed, and absolutely stringless. Ready for picking in 48 days. Pkt., 10e; lb., 30e; 3 lbs., 75e, prepaid.—Not prepaid, 10 lbs., \$1.60; 25 lbs., \$3.50.

TENDERSNAP. See Page 11.

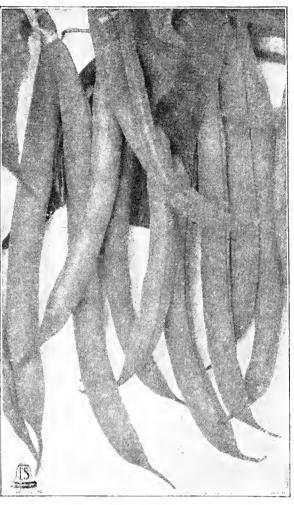

Full Measure

Productive-Early-Stringless-High Quality.

In great demand in the eastern states. Fine stringless medium green pod of high quality. The pods are straight, 6 inches long, very fleshy, almost round, crease-back, and are tender. It is a prolific sort, the heavy pods being produced throughout a long season. We consider this one of the very best stringless green pod bush Beans for early and main crop planting. Ready for use in 50 days. Pkt., 10c; lb., 35c; 3 lbs., 90c, prepaid.—Not prepaid, 10 lbs., \$1.85; 25 lbs., \$4.00. 10e; lb., 35e; 3 lbs \$1.85; 25 lbs., \$4.00.

Full Measure.

Isbell's New 1936 Green Pod.

Bountiful—Green Pod

Best of the Flat-Podded Stringless Beans.

Important early variety for market gardeners and shippers; likewise for home garden. Pods are 6½ to 7 inches long, thick, broad, slightly curved, light green in color, of good quality and stringless, though slightly fibrous. Very early and a bountiful producer. Ready for picking in 46 to 48 days. Pkt., 10c; lb., 35c; 3 lbs., 90c, prepaid.—Not prepaid, 10 lbs., \$1.85; 25 lbs., \$4.00.

Extra Early Red Valentine

For Early Market-A Fine Shipper.

This is an old standard, green-podded sort and is a great favorite among the truck growers. A true round-podded variety, early, hardy and very prolific. Pkt., 5c: lb., 25e; 3 lbs., 65e, prepaid.—Not prepaid, 10 lbs., \$1.60; 25 lbs., \$3.50.

Stringless Refugee Green Pod

For Main Crop—Choice Canning Bean.

A heavy producer of fine light green pods that are perfectly stringless, round, slightly curved and 5½ inches long. The pods are brittle and tender, thick and meaty, of particularly fine mild flavor. Especially fine for canning. Matures late. Pkt., 10c; lb., 30c; 3 lbs., 75c, prepaid.—Not prepaid, 10 lbs., \$1.60; 25 lbs., \$3.50.

Ruby Dwarf Horticultural

Popular as a green shell Bean and for baking when ripe. Very hardy, medium early, productive. Pods 5 inches long, round, color greenish yellow splashed with red. Pkt., 10e; lb., 35e; 3 lbs., 90e, prepaid.—Not prepaid, 10 lbs., \$2.00; 25 lbs., \$4.50.

Longfellow—Extra Long Pods

Old standard variety for market and canning, Handsome long pods of fine quality, although not stringless. **Pkt.**, **5c**; **lb.**, **25e**; **3 lbs.**, **65e**, **prepaid**.

English Broad Windsor Giant Butter Beans

This is a great shell Bean, to be used as butter Beans. The plants grow upright, 2 feet high and are very resistant to frost. It is the hardiest of all Beans. The dry Beans are very large, Pkt., 10c; lb., 45c; 3 lbs., \$1.20, prepaid.—Not prepaid, 10 lbs., \$3.25.

SARAH BOOR OF PENNSYLVANIA writes: Have ordered seeds for 44 years, and I do not think there are any better seeds grown than Isbell's. Every seed seems to grow.

BUSH LIMA BEANS

Be sure to grow a few of these Bush Lima Beans to be cooked as green shell Beans and for your Winter vegetable dishes. They are fine for succotash and may be cooked in many ways. Do not plant until ground is quite warm and dry. Use 2 pounds of seed to 100 hills.

McCrea's New Bush Lima

The Ideal Home Garden Lima.

Has a remarkably sweet flavor. The very thick pods contain 4 to 5 large plump beans. The plants are of strong growth and withstand cold as well as dry weather better than any other Lima Bean. Highly recommended to the gardener and canner. Pkt.; 15c; lb., 45c; 3 lbs., \$1.20, prepaid.

Henderson's Bush Lima

EARLY SMALL LIMA OR BABY LIMA

The heaviest yielding Bean. This variety is especially valuable because it suits all latitudes, North or South. The green Beans of this sort are plump, very tender and of the true buttery Lima flavor. From July until frost, green Beans can be had in abundance by planting this sort. Pkt., 5e; Ib., 30c; 3 lbs., 75c, prepaid.—Not prepaid, 10 lbs., \$1.75; 25 lbs., \$3.75.

Fordhook Bush Lima

The Early Giant Podded Bush Lima.

This is a dwarf form of the Potato Lima. Matures medium early and is very productive. The pods measure 4 to 5 inches. The Beans are tender, juicy and sweet in flavor when cooked. Ready for table use in 75 days. Pkt., 10c; lb., 40c; 3 lbs., \$1.00, prepaid.—Not prepaid, 10 lbs., \$2.15; 25 lbs., \$4.50.

Burpee's Improved Bush Lima

Burpee's Improved grows a more vigorous vine than the original Burpee's Bush Lima, with heavier foliage. The single beans of the Burpee's Improved are also larger, and of even better quality. Pods grow in large clusters and are 4½ to 5 inches long. Pkt., 10c; lb., 35c; 3 lbs., 90c, prepaid.—Not prepaid, 10 lbs., \$2.00; 25 lbs., \$4.35.

Jackson Wonder Bush Lima

For the home garden no better Bean could be wished for, being richly palatable, either used for cooking or as a Winter vegetable dish. About 2 feet high, bearing in greatest profusion large clusters of broad, flat pods. Very early. Pkt., 10c; lb., 30c; 3 lbs., 75c, prepaid.—Not prepaid, 10 lbs., \$1.75; 25 lbs., \$3.75. for, being a Winter

POLE LIMA BEANS

Do not plant until ground is warm and dry. Set the poles not less than 4 feet apart each way. In the home garden plant sunflowers for poles. Around each hill plant from 5 to 6 beans, two inches deep. When well started, thin to three plants. Use 2 to 3 pounds for 100 hills, 40 pounds to the acre.

Isbell's Perfect Early Pole Lima

THE EARLIEST POLE LIMA.—This variety was developed by a market gardener who selected the largest green beans from the thinnest and most easily opened pods. The result is that it furnishes the largest green shelled beans at the earliest date. Pkt., 10c; lb., 45c; 3 lbs., \$1.20, prepaid.—Not prepaid, 10 lbs., \$2.15; 25 lbs., \$4.50.

Siebert's Early Pole Lima

This Bean is very vigorous and productive, bearing throughout a long season large tender beans of excellent quality. Pkt., 10c; lb., 40c; 3 lbs., \$1.00, prepaid.—Not prepaid, 10 lbs, \$1.75; 25 lbs., \$3.75.

King of the Garden Pole Lima

An old, well known standard sort. A strong grower and uniformly large podded. Of fine quality and a heavy yielder. Pkt., 10c; lb., 40c; 3 lbs., \$1.00, prepaid.—Not prepaid, 10 lbs, \$1.75; 25 lbs., \$3.75.

Pole or Climbing Beans

Pole Beans are much more productive than the bush varieties, and their bearing season is longer. Plant a few hills of Pole Beans in your garden this year, you will be amply repaid for your trouble. In the home garden plant Sunflowers for poles.

Kentucky Wonder or Old Homestead

It is enormously productive, pods hanging in great clusters from top to bottom of the pole. Pods are 8 to 9 inches long, nearly round, much curved, of rich green color. It is almost stringless, cooks tender and melting. Pkt., 5c; lb., 30c; 3 lbs., 75c, prepaid.—Not prepaid, 10 lbs., \$1.65; 25 lbs., \$2.60 \$3.60.

Burger's Stringless Green Pod

White-Seeded Kentucky Wonder.—The Best Green Pod Pole Bean for the North. The vines are not very long, and can be grown on brush instead of on a pole. The pods are round and somewhat curved; very meaty, tender and of fine flavor. Pkt., 10c; lb., 35c; 3 lbs., 90c, prepaid.—Not prepaid, 10 lbs., \$1.75; 25 lbs., \$3.75.

Kentucky Wonder Wax

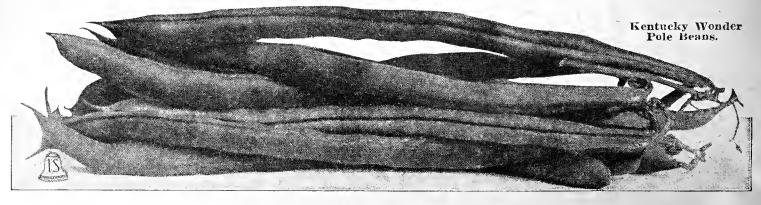

The best pole wax bean for Northern planting.—Pods are golden-yellow, very thick, fleshy and of delicious flavor, but stringy. A heavy yielder. Pkt., 10c; Ib., 40c; 3 lbs., \$1.00, prepaid,—Not prepaid, 10 lbs., \$1.75; 25 lbs., \$4.00.

Lazy Wife

The finest flavored of all as "snap-shorts." The pods are produced in abundance, and measure from 5 to 6 inches long, they are entirely stringless, very fleshy, brittle and of excellent quality. Pkt., 10c; Ib., 35c; 3 lbs., 90c, prepaid.—Not prepaid, 10 lbs., \$1.75; 25 lbs., \$3.75.

Yard Long or Asparagus Bean

A great curiosity and withal a bean of excellent quality. Pods are usually 18 to 24 inches but sometimes 36 inches long. Excellent table vegetable, pods tender, of rich asparagus flavor. Fkt., 10c; 1/4 lb., 25c; lb., 75c, prepaid.

FIELD BEANS

The Michigan Experiment Station has proved that farmers are annually losing thousands of dollars by planting poor Seed Beans. Mixed seed causes the clevator man to cut the price he will pay for your crop. Seed of poor germination will cause a heavy loss by reason of the poor stand it gives. Our Seed Beans are grown especially for seed purposes and carefully selected for purity and yielding cualities. qualities.

Isbell's Michigan Improved Pea Bean

The Best Field Bean in Cultivation. A Sure Cropper.

Isbell's Improved Pea Bean is one of the greatest money-making crops for the Michigan farmer. The pods are large and filled with medium sized, pure white, nearly round beans, which excel in cooking qualities. It is an upright grower, holding the pods well up from the ground, and a great bearer. The pods grow in thick clusters and ripen in August, the leaves falling earlier than other varieties. No other Bean excels it in yield, quality and readiness of sale on the market. Pkt., 5c; lb., 25c; 3 lbs., 65c, prepaid.—Not prepaid, 10 lbs., \$1.00. prepaid, 10 lbs., \$1.00.

New Robust Field Bean

Also Called Thousand-to-One Field Bean.

ROBUST is a new strain of field beans introduced by the Michigan Experimental Station and wherever it has been grown, has given excellent satisfaction. The plants are of decidedly robust growth. The ripe Beans are about the same size and shape as our Michigan Pea Beans and of clear white color. This variety is especially suited to heavier soils. Pkt., 10c; lb., 25c; 3 lbs., 65c, prepaid.—Not prepaid, 10 lbs., \$1.25.

Other Field Beans

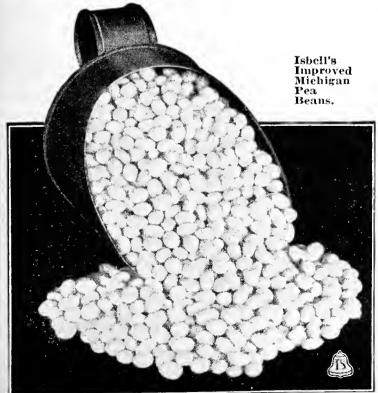

LIGHT CRANBERRY.—A new type of field Bean which in limited quantities has sold very well. The Beans are large, oval, and cream colored with carmine stripes. The plant is spreading with runners about 4 feet long. Matures late and requires a longer season than Pea Beans. Cranberry Beans have done very well in northern Michigan along the west coast and in the Thumb district. Pkt., 10c; 3 lbs., 75c, prepaid.—Not prepaid, 10 lbs., \$1.50.

LARGE WHITE MARROW.—Vines large, slender, spreading, with short runners and small leaves; very prolific; seeds large, about twice the size of the white Navy Bean; ovoid, clear white, cooking very dry and mealy. Pkt., 10c; lb., 25c; 3 lbs., 65c, prepaid.—Not prepaid, 10 lbs., \$1.25.

ROYAL DWARE or WHITE KIDNEY—Plant upright

ROYAL DWARF or WHITE KIDNEY.—Plant upright, with large, broad leaves; pods medium size, dark green; seed large, white, kidney-shaped, slightly flattened and of excellent quality green or dry. Pkt., 10c; lb., 25c; 3 lbs., 65c, prepaid.—Not prepaid, 10 lbs., \$1.25.

RED KIDNEY.—The good old-fashioned baking bean. The beans are of large size and very rich in flavor. A wonderful yielder on strong soil. Our stock is extra select Northern grown. Pkt., 5c; lb., 25c; 3 lbs., 65c, prepaid.—Not prepaid, 10 lbs., \$1.00.

MANGELS AND SUGAR BEETS

CULTURE.—Both Mangels and Sugar Beets require deep, well enriched soil. Sow in May or June in rows 18 inches to 2 feet apart and 6 to 8 inches in the row. Young plants may be transplanted to fill up vacancies. As soon as frost occurs, dig the erop. For Winter store in cellar or in pits. Sow 5 to 6 pounds per acre.

The value of Sugar Beets and Mangels for stock feeding is clearly seen in the improved health and condition of the animals. They yield enormously and can be grown at trifling cost.

Mangels make excellent and rich as well as cheap Winter feed for poultry.

Mammoth Long Red Mangel

Isbell's Select Strain, often growing from 24 to 30 inches in length, weighing from 25 to 35 lbs. We place this grand variety at the head of the list and believe it deserves first place. It grows to an immense size, is enormously productive and profitable, if grown on rich, deep soil, and is an excellent keeper. This variety will yield more tons per acre than any other. Oz., 10c; 1/4 lb., 20c; lb., 60c, prepaid.—Not prepaid, 5 lbs., \$2.25.

Golden Giant Mangel

A grand yellow Mangel, wonderfully prolific. Best and sweetest for milch cows. The roots of this variety are not quite as long as the Mammoth Long Red and more oval shaped at the bottom. Golden Giant is the largest and heaviest yielding of the yellow Mangels. They are easily harvested and are very rich in nutritive content. Oz., 10c; ¼ 1b., 25c; 1b., 70c, prepaid.—Not prepaid, 5 lbs., \$2.75.

Giant Feeding Half Sugar Mangel

Giant Feeding Sugar Beets are much more valuable for feeding purposes than the old sorts of Mangels. Yields nearly as much per acre as Mangels, and is much easier handled, keeps better and longer, and is in every way of great value to the farmer. Roots large, oval in form, with small top. Oz., 10c; ¼ lb., 20c; lb., 65c, prepaid.—Not prepaid, 5 lbs., \$2.50.

Golden Tankard Mangel

The flesh is rich deep yellow, differing in this respect from other Mangels, surpassing them in milk producing qualities. Sheep and other stock thrive on this variety. The roots are of large diameter, tapering quickly at bottom, which is quite broad with only a small tap root. It yields an enormous bulk on good land. Oz., 10c; 1/4 lb., 20c; lb., 60c, prepaid.—Not prepaid, 5 lbs., \$2.25.

Sugar Beets Vilmorin's Improved

Contains a large percentage of sugar and is a good yielder. For sugar making and for feedror sugar making and for feeding to stock and poultry. Of greater feeding value than the Mangels, but not as heavy yielders. Oz., 10c; 1/4 lb., 25c; lb., 75c, prepaid.—Not prepaid, 5 lbs., \$2.75.

Notice

PRICE OF FIELD BEANS IS GOVERNED BY THE MARKET. Ask for quotations on larger quantities, we always sell at the lowest rate consistent with best quality.

See Page 64.

Choice Table Beets

Culture Beets do best on a deep, rich, sandy loam, although will also do well on muck or any good garden soil. The first planting should be made as early in the Spring as the ground can be prepared. Sow the seed about one-half inch deep in rows 16 to 18 inches apart. Thin out the plants to 3 or 4 inches. For a succession make two later plantings about May 15th and July 1st. The last sowing will make a fine crop for winter use. For field culture the rows are usually 24 to 28 inches apart. One ounce of seed will sow a row 75 feet long and 5 to 6 pounds will plant an acre. A good crop should yield from 200 to 500 bushels per acre.

Reets are so easy to groy that you should plant at least

Beets are so easy to grow that you should plant at least a row or two in your garden. They may be cooked and sliced for salads; buttered beets are delicious; a few jars of pickled beets will be a treat in the winter.

Detroit Dark Red

Detroit Dark Red Beet is one of the best main crop, all-purpose Beets in cultivation. For the home garden it is especially desirable on account of its exquisite quality, being sweet, tender and fine grained. The rich, dark red color makes an attractive dish on your table. Splendid for canning. For Market Gardencrs, Detroit Dark Red is the standard main crop sort. Ready for use in 55 to 60 days. Pkt., 5c; oz., 15c; ½ lb., 40c; lb., \$1.15, prepaid.—Not prepaid, 5 lbs., \$5.00.

Isbell's Super Detroit Dark Red

Rich Color-Superior Quality-Green Tops.

Rich Color—Superior Quality—Green Tops.

It is truly a super strain of the well known and popular Detroit Dark Red. The roots are smooth and even in size, the flesh being of uniform deep blood-red color, decidedly fine grained, crisp and sweet. We recommend it to the large market grower as well as to the home gardener on account of fine quality, even size and good color. For canning especially you will find this beet to be all that could be desired. Pkt., 10c; oz., 20c; 1/4 lb., 45c; lb., \$1.50, prepaid.

Detroit Dark Red.

Dark Red Color-For Table and Canning.

Selected and bred up for rich dark red color and fine table quality. Uniform in shape, ideally suited for home use, for the market and for canning. Of fine globe shape, very smooth, with medium sized tops. The outstanding merit is the unusual sweetness and tenderness of the flesh, which is retained even when the beets grow to large size. Plant this beet for early use and main crop. Ready to use in 50 to 55 days. Try this fine beet and you will be satisfied in every way. Pkt., 10c; oz., 15c; ¼ lb., 45c; lb., \$1.35, prepaid.

Crosby's Egyptian

The Great Extra Early Money Maker For Mar-Money ket Growers.

A very superior extra early strain of garden Beet which has been carefully selected for years. It excels in handsome form, good size, small tops, very small taproot, fine quality, and above all, quick, rapid growth. The flesh is deep red. Takes on its turnip shape very early, a decided advantage for forcing for real early market, and especially for a market where Beets are sold in bunches. Ready for use in 45 to 50 days. Pkt., 5c; oz., 10c; 1/4 lb., 30c; lb., 9tc, prepaid.—Not prepaid, 5 lbs., \$3.75.

Crosby's Early

Egyptian.

Good For All Beet

Fine general purpose variety; good for bunching, pickling, canning and cooking for table use. Roots attain good size and hold their color and smooth shape even when 4 inches in diameter. The tops are medium size and spreading and the roots are a deep globe shape, having a fine dark red color all the way through. When the Beets are small they are splendid for pickling and canning. Good-for-All Beet is a splendid home garden sort and also a good commercial variety because it may be used at any size. Pkt., 10c; oz., 15c; 17. Ib.: \$1.25. nrenaid. canning. Good-for-All Beet is commercial variety because it 1/4 lb., 40c; lb., \$1.25, prepaid.

Early Blood Turnip

Early and of extra fine quality. The color is a rich dark red, and the beets are free from side or fibrous roots, being always smooth. Excellent for a main or summer crop, or for use in winter, as it is a good keeper. Tender, sweet and crisp, and is in every way the standard sort for the home gardener. Ready for use in 45 days. Pkt., 5c; oz., 10c; 1/4 lb., 25c; lb., 75c, prepaid.

Swiss Chard or Spinach Beet

LUCULLUS.—The best garden sort. Produces large, tender stalks with curly eaves. You may start cutting in 35 to 40 days. Pkt., 5c; oz., 10c; ¼ lb., 30c; lb., 90c, prepaid.

WHITE LYON-PLAIN LEAF.—Very broad midribs with plain leaves and for this reason preferred by many planters. Pkt., 5c; oz., 10c; 1/4 lb., 30c;

Isbell's Early Wonder

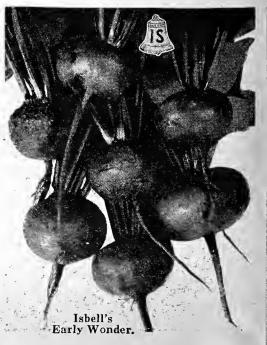

A very Fine Market and Table Beet.

A very Fine Market and Table Beet. This is an early Beet with a very small tap-root, also small top, and is of exceptionally fine dark red color. The Beets are slightly flattened and mature very evenly. Ripens so early it will mature two crops in one season on same field. Ready for use in 45 days. Very good sort for early as well as for fall or winter Beet. Some of the largest Beet canners buy seed of Early Wonder in thousand-pound lots. Pkt., 5c; oz., 10c; ¼ lb., 30c; lb., 90c, prepaid.—Not prepaid, 5 lbs., \$3.75.

Ohio Canner

Deep red color, uniform shape and superior quality make this an ideal beet for canning and main crop home garden sort. See color illustration and full description on page 1. Pkt., 10c; oz., 15c. 1/4 lb., 45c; lb., \$1.25, prepaid.

MARKET GARDENERS should write for Isbell's Market Gardeners' Net Price List.

ISBELL'S CABBAGE SEED

CULTURE.—In general, the dates given below are correct for the Northern and Central States.

For early use, sow seeds of the early kinds in the hotbeds or in a box in the house during February and up to March 10th; transplant to the open ground in April, in rows 2 feet apart and 18 inches in the row; or sow a bed of seed outside as soon as the soil can be worked. Transplant in about four weeks.

For second early Cabbage, sow in April and transplant in May. For late Cabbage, sow in May and transplant June 15th to July 5th in rows 3 feet apart and 2 feet in the row. In transplanting, it is important that plants be set down to the first leaf. Liming the soil will increase your crop. For Cabbage Worms dust with "Slug Shot," using the Feeny Duster (see page 99), For Cabbage Lice use "Ever Green,"

EARLY VARIETIES

Isbell's New 1936 Early Cabbage

The Earliest Round-Head Cabbage.

The Earliest Round-Head Cabbage.

After many years of breeding work, our Danish grower has developed an extra early round-head Cabbage that we consider the very best early sort for market and the home garden. Fine large heads of nearly globe shape and great uniformity to type. Every head in the field is of the same size and matures at the same time. The plants are of compact growth, the heads very firm and heavy, averaging about 8 pounds in weight. It is the best keeper of the early sorts. Isbell's 1936 Early Cabbage is fully as early as the Wakefield types and the heads are much larger. For the market gardener this variety is a real moneymaker and will bring repeat business on account of the superior quality and the fine flavor. Finest Danish grown seed. Pkt., 10c; oz., 30c; 1/4 lb., \$1.00; lb., \$3.50, prepaid.

Isbell's Lightning Express

The Earliest Hard Heading Cabbage in Cultivation.

Combines earliness with solidity, good size, delicious flavor, tenderness and productiveness. We have no hesitancy in making the bold claim that it is the Earliest Cabbage in Cultivation. It has produced fine marketable heads in 75 days from the sowing of the seed. Heads are cone-shaped or pointed

heads in 75 days from the sowing of the seed. Heads are cone-shaped or pointed. Very hardy, permitting earliest planting. We can recommend Isbell's Lightning Express Cabbage to the market gardener, trucker and private planter. Pkt., 10c; oz., 30c; 1/4 lb., \$1.00; lb., \$3.50, prenaid.

Glory of Enkhuizen

One of the very finest sorts with round, solid white heads of good size, fine ribbed, and is of

The Golden Acre

Danish Grown Seed.

Danish Grown Seed.

It matures hard, round heads nine inches in diameter, 80 to 85 days from time of sowing seed. It is uniform in size and growth, compact in habit, with few outer leaves, permitting close planting. The heads are firm and solid and fully equal to any of the late sorts in this respect. Can be shipped long distances and arrive in good condition. A profitable variety to raise for the early market. Pkt.. 10c; oz., 25c; 1/4 lb., 85c; lb., \$2.90, prepaid.

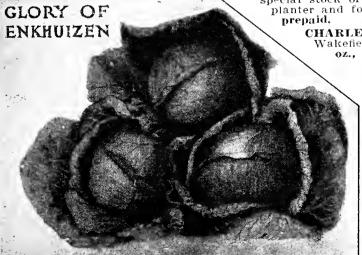

Copenhagen Market

Our seed comes direct from Our seed comes direct from the grower at Copenhagen. A valuable early Cabbage, producing fine, large heads of light green color, averaging six pounds in weight; uniform in shape and size and very solid. With few loose leaves. A vigorous grower and an excellent keeper. The entire crop can be harvested at one time. Ready for market in 85 to 90 days. Danish Grown Seed: Pkt., 10c; oz., 20c; 1/4 lb., 65c; lb., \$2.25, prepaid.

Well Known Early Sorts

excellent quality. This is not only a great Cabbage for second early market use, but it is also profitable to raise for fall use. Largely used by kraut makers. Ready for market in 90 days. Pkt., 5c; oz., 20c; 1/4 lb., 60c; lb., \$2.00, prepaid. Isbell's New 1936 Early. Isbell's New 1936 Early.

EARLY JERSEY WAKEFIELD.—Our will give entire satisfaction to the large and for the home garden. Pkt., 5e; oz., 15c; ½ lb., 50c; lb., \$1.80, special stock of this popular sort will

CHARLESTON or LARGE WAKEFIELD .- A large form of the Jersey Wakefield, maturing a week later, but is a oz., 15c; ¼ lb., 50c; lb., \$1.80, prepaid. a heavier yielder. I'kt., 5c;

EARLY WINNINGSTADT .-- Old standard sort. A good keeper, recommended for kraut making. Pkt., 5c; oz., t5c; 1/4, lb., 50c; lb., \$1.80, prepaid.

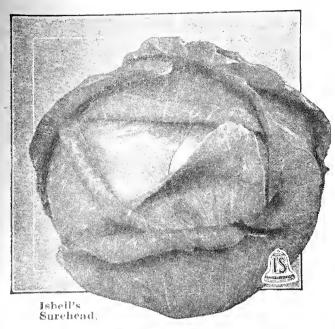

EARLY FLAT DUTCH.—Standard second early sort, producing large heads of flat shape. Pkt., 5c; oz., 15c; 4/4 lb., 45c; lb., \$1.65, prepaid.

ANNA M. PETERSON OF MICHIGAN writes; Isbell's Lightning Express Cabbage weighed five pounds per head and over. It was very sweet and fine flavored. From one packet of seed we had enough to can 121 quarts and plenty of Cabbage to give away.

MR. E. H. CHENEY OF MICHIGAN writes: Your Golden Acre Cabbage is great. Every seed came up and made a good solid head weighing from four to eight pounds. They will stand a long time without cracking open.

CABBAGE AND CAULIFLOWER PLANTS. See Page 56.

CABBAGE

GOOD SEED is of the utmost importance in all crops, and no doubt it has a greater effect on the final outcome of the Cabbage crop than any other. In buying Isbell's strains of Cabbage you take the first step in the right direction.

Cabbage requires rich, deep, mellow soil, high manuring and good culture to obtain fine, solid heads and a big crop. For Cabbage worms dust with "Slug Shot", using the Feeny Duster (See page 99). For Cabbage lice use "Ever Green."

One ounce of seed produces 2,500 to 3,000 plants; 4 ounces will grow enough plants to set one acre.

MAIN CROP VARIETIES

Isbell's Surehead

Well known variety and one of the very best late Cabbages. Heads are very uniform in shape, of the flat head type, weighing ordinarily from 10 to 15 pounds each. Of very good quality, solid and of fine texture. Certain to head, drought resisting, about 10 days earlier than Danish Ballhead. Grown extensively for winter use. Pkt., 5c; oz., 15c; 1/4 lb., 50c; lb., \$1.75, prepaid.

All Seasons—Good Early and Late

One of the finest for second early or late, growing to a large size quickly and surely. The heads are extremely hard and solid, round, flattened at top. It is called "All Seasons" because it is good for Autumn as well as early Summer. Pkt., 5c; oz., 15c; ¼ lb., 50e; lb., \$1.75, prepaid.

Kraut King

In many sections of Michigan and Ohio, Kraut King is the fa-vorite Cabbage with the kraut packers. It is an immense yielder, packers. It is an immense yielder, often producing 25 tons or more per acre. The heads are almost perfectly round and very firm. We recommend it to grow for kraut and for second early market use. Pkt., 10c; .oz., 25c; 1/4 lb., 75c; lb., \$2.50, prepaid.

Isbell's Jackson Winter

A very good Cabbage for Winter Keeping.—This splendid variety was brought into this country from the Fatherland by

Our market gardeners have grown it for many years with great success. The head is of good size, very hard and heavy, and has remarkable keeping qualities. Pkt., 10c; oz., 25c; 1/4 lb., 75c; lb., \$2.50, prepaid.

Seasons.

Bugner—Yellows Resistant

A late winter keeping cabbage of the drumhead type, bred for yellows-resistance. This variety is grown extensively in Illinois and Wisconsin. It is a heavy yielder. Pkt., 10c; oz., 30c; ¹/₄ lb., 90c; lb., \$3.00, prepaid.

Danish Ballhead

Also Known as Hollander, Dutch Winter and Tall Stem Ballhead.

Winter and Tall Stem Ballhead.
ISBELL'S GENUINE DANISH
GROWN TALL STEM BALLHEAD
CABBAGE is without a superior as a heavy, solid. long-keeping variety. It is the best shipping Cabbage in cultivation. It has very few outer leaves, which admits of close planting. It is medium in size, very fine grain, tender and crisp.

grain, tender and crisp.

DANISH BALLHEAD is the hardiest of all Cabbage. The hardiness, solidity and weight of heads is truly wonderful. The crop can be stored just as safely as potatoes. Especially recommended for Michigan, Ohio, Pennsylvania, New York, Minnesota, Wisconsin and other northern states. Danish Grown Seed: Pkt., 10c; oz., 25c; ¼ lb., 75c; lb., \$2.50, prepaid.

Danish Roundhead

The short-stemmed type of the famous Danish Ballhead.
Although of very robust growth, has rather less leaves than the original strain of Danish Ballhead. The heads are fully as large and of equally good quality, maturing a few days earlier. Pkt., 10c; oz., 25c; 1/4 lb., 75c; lb., \$2.50, prepaid.

Penn State Ballhead

True Stock-In State Sealed Packages.

Claimed to be the heaviest yielding cabbage in the world. This improved American strain was developed at the Pennsylvania State College. It is a medium tall stem strain of Ballhead producing extra large and solid heads. Crops of over thirty tons per acre have been produced of this variety. Pkt., 15c; oz., 45c; 1/4 lb., \$1.45; lb., \$5.00.

PENN STATE BALLHEAD.—Regular stock. Pkt., 10c; 02., 25c; ¼ lb., 75c; lb., \$2.90, prepaid.

Isbell's Premium Flat Dutch

The heads are of bluish green color, flat on top, and are solid and large. Has few outer leaves and short stem. It cuts white and crisp, the flavor is excellent. Ready for market in 125 days. Pkt., 5c; oz., 15c: 1/4 lb., 50c; lb., \$1.75, prepaid.

Volga or Stonehead

Profitable Market and Kraut Sort.

Prontable Market and Kraut Sort.

Plants set out July 9th on very ordinary soil, produced large, solid heads by the 10th of October—two or three weeks earlier than other large kinds. The heads are round and very hard. The quality of this Cabbage is very fine; it is a great keeper. Pkt., 10c; oz., 25c; ¼ lb., 80c; lb., \$2.75, prepaid.

Wisconsin Hollander Yellows Resistant.

In many of the Cabbage growing districts the disease called 'yellows' has caused great losses to the Cabbage growers. By selecting and breeding a yellows disease-resistant variety of the Danish Ballhead type known as Wisconsin Hollander, this problem has been solved. Pkt., 10c; 0z., 30c; 1/4 lb., \$1.00; lb., \$3.50.

CABBAGE—Continued

Red Stonehead

most solid and compact of all red The most solid and compact of all red varieties, sure heading and tender. The heads of medium size, do not crack, and even in late Spring the Danish Stonehead comes out of storage hard and sound. Rich dark red color; valuable for market and for pickling, Danish grown seed. Pkt., 10c; oz., 30c; 1/4 lb., \$1.00; lb., \$3.50, prepaid.

Mammoth Rock Red

The largest of the red Cabbages and a sure header; heads round, very solid, weighing 10 to 12 pounds, and an attractive red color. A very hardy variety. Pkt., 10c; oz., 25c; 1/4 lb., 70c; lb., \$2.75, prepaid.

Earliest of All Savoy

Forms medium sized, very solid heads, with leaves finely crimped. Without question the earliest and finest Savoy; its fine appearance and delicate, sweet flavor is unexcelled. A fine salad Cabbage. Pkt., 15c; oz., 35c; ¼ lb., \$1.25; lb., \$4.00, prepaid.

Drumhead Savoy

The quality and flavor of this "crumpled leaf" Cabbage is very superior; grown in fall and allowed to be touched by frost, it is sweet, delicate and most delicious. A general favorite for home and market. Pkt., 10c; oz., 20c; ½ lb., 65c; lb., \$2.25.

Celery Cabbage.

Celery Cabbage—Improved Pekin or Chihli

A Wonderful New Salad Plant All who like to try new things in the vegetable kingdom will find Celery Cabbage a real pleasure. Delicious in taste—valued highly by epicures, Celery Cabbage resembles Celery, and yet is like Cos Lettuce. Firm, crisp heads, easily blanched. As palatable as lettuce, keeps better and can be grown at half the cost. Boiled like cabbage it is of equal flavor and many people who do not like ordinary cabbage enjoy this Celery Cabbage. Excellent cooked as greens or as a salad, Full cultural directions on every packet. Not hardy to frost, but does best in cool weather. Pkt., 10c; oz., 20c; ¼ lb., 60c; lb., \$2.00, prepaid.

FOR CABBAGE AND CAULIFLOWER PLANTS, SEE PAGE 56.

SNOW-WHITE

CAULIFLOWER

DELICIOUS

CAULIFLOWER CULTURE. In order to be a success, Cauliflower must either be started very early or very late. Cauliflower loves cool, moist weather and it will not head up well during the hot dry midsummer months. For early Cauliflower the seed should be started under glass from January 20th to February 15th, so that good plants will be ready to set outdoors the first week in April. For late Cauliflower the seed may be sown outdoors from May 10th to June 1st, and transplanted into the field July 1st to 15th. One ounce of seed will produce 2000 to 2500 plants. To kill the worms on Cauliflower, dust with "Slug Shot." For green lice use "Ever Green" or Black Leaf 40.

Isbell's Super Snowball

A New and Superior Type.

This new strain of Snowball is earlier, hardier and more vigorous than any of the older types, and it yields a higher grade product. The plants start to head nearly all at the same time throughout the field. The head is perfectly protected by the long leaves until it reaches a size of five inches in diameter, when it should be tied up. The head will finally attain a size of ten inches across.

The crop matures with great uniformity and the heads are of snowy whiteness, exceptionally high, very solid, and heavy. We recommend it very highly to all growers of Cauliflower as the very finest stock obtainable at any price. Best quality Danish grown seed. Pkt., 25c; ½ oz., \$1.40; oz., \$2.50; ½ lb., \$8.00; lb., \$30.00.

True Early Snowball

This also is Danish grown seed but matures a little later than Isbell's Super Snowball. It is a good reliable strain of Cauliflower for market and the home garden, producing good sized heads of snow-white color. Ready for market in 105 days. Pkt., 15c; ½ oz., 50c; ½ oz., 90c; oz., \$1.60; ½ lb., \$5.50; lb., \$20.00.

For Cauliflower Plants, See Page 56.

"I planted a smoll patch to your Super Snowball Cauliflower and sold \$38.67 worth. I olways say it poys to get the best."
—W. A. LATHROP, Susquehanna, Pa.

Early Paris

An early dwarf sort that heads up well and the quality is quite good. Many of our customers like the Early Paris at the low price. Pkt., 5c; ½ oz., 45c; oz., 75c; ¼ lb., \$2.50.

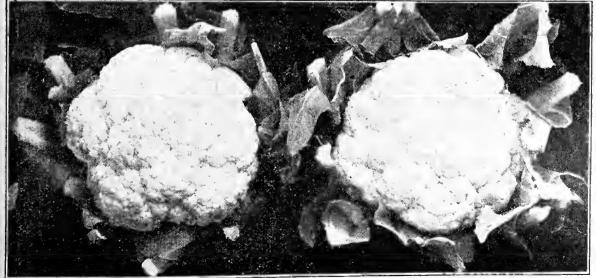

Isbell's Perfection Cauliflower

When you raise Cauliflower you like to have each plant When you raise Cauliflower you like to have each plant develop a beautiful snow-white head, round as a ball, and solid all the way through. This kind of heads makes a nice appearance on your table, and sells well at top-notch prices. You will come very close to this ideal if you plant our Perfection Cauliflower strain. While not quite as early as Snowball, the heads of "Isbell's Perfection" are better protected by leaves, and are very firm, solid and heavy. Pkt., 25c; ¼ oz., 80c; ½ oz., \$1.40; oz., \$2.50; ¼ lb., \$7.50, prepaid. prepaid.

Danish Dry Weather

Danish Grown Seed.

This strain produces large, and, pure white heads, maturing later than Early Snowball. It is in all respects a first-class Cauliflower, and is especially adapted to dry situations and to resist drought. Like all other Cauliflowers it requires high culture. Ready for market in 110 days. Best quality Danish grown seed. Pkt., 15c; ¼ oz., 50c; ½ oz., 90c; oz., \$1.60; ¼ lb., \$5.50, prepaid.

Isbell's Super Snowball Cauliflower. Pkt., 25c.

MR. PATRICK SHEA OF MICHIGAN writes: Enclosed my order for this year. I have alwoys had wonderful results from Isbell's Seeds. Cabboge, Cauli-flower, Beans, etc., were just grand. Cauliflower heads of three and onehalf pounds, the best quality I hove ever grown.

MRS. M. L. HUGHES OF OIIIO writes: - I have been getting my seeds from Isbell's for over fifteen years and I con surely recommend them to anyone, as they are always true to name.

This fine new carrot was developed especially to meet present day demands for a longer, smoother, better quality carrot. The handsome slender roots are cylindrical in shape, 7 to 8 inches long and of a rich deep red color, extending clear to the center. The exceptionally rich, sweet flavor combined with the natural tenderness makes this the carrot par excellence. Its beautiful appearance and uniform shape also make this an attractive bunching sort for market. Pkt., 10c; oz., 20c; 1/4 lb., 50c; lb., \$1.50, prepaid. prepaid.

Isbeli's New Coreless

Earliness and Quality-For Market and Home Use.

An early variety of superior flavor and without core, highly recommended for market and home use. It is a long, cylindrical, blunt-pointed variety, with a very small taproot and small, fine top. The shape and size are extremely uniform, averaging 6 to 7 inches in length and 1½ inches in diameter, clean-skinned, smooth and easily pulled. The color is a rich red-orange and its flavor is of the finest. Pkt., 10e; oz., 15c; ¼ lb., 40e; lb., \$1.25, prepaid.

Isbell's Super Chantenay

Early-Coreless-Tender-Sweet,

This super strain of Chantenay produces very smooth roots of even shape and size, free from eyes and side roots. The color is a rich orange and the sugar content very high. In quality and tenderness nothing more could be desired. Short tops but strong enough to bunch easily. The Carrots are 5 to 6 inches long, evenly stump rooted. Pkt., 10c; oz., 15c; 1/4 lb., 45c; lb., \$1.25, prepaid.

Imperator or Tendersweet

An outstanding type of recent introduction which is a splendid bunching sort and also a fine quality Carrot to grow for home use. The roots taper gradually from the well rounded shoulder and have semi-blunt ends. The flesh is rich orange in color and extends to the center of the root. Average length is 7 to 8½ inches. The roots are always smooth, fine grained and very attractive. Pkt., 10c; oz., 15c; ½ lb., 40c; lb., \$1.20, prepaid.

Select Chantenay

Fine bunching Carrots and early main crop sort for the market gardener. A first-class table variety; stump-rooted, about 5 to 6 inches long, and broad-shouldered. The flesh is of a beautiful, rich orange color and of the finest quality: Ready for table use in 60 days. Pkt., 5c; oz., 10c; 1/4 lb., 30c; lb., 90c, prepaid.

the tools grow uniform and smooth, sto 10 inches long, of large size and deep, rich orange color. It is a good keeper and of fine quality for table use. Ready for table in 75 days. Pkt., 5c; oz., 10c; 1/4 lb., 25c; lb., 85c, prepaid.

Danvers Half Long

The Leading Sort for Main Crop

This is a broad-shouldered Carrot of cylindrical pout 7 to 8 inches in length by 21% inches in diame about 7 to 8 inches in length by 2½ inches in diameter at the shoulder. Color, orange-red; skin smooth; cooking qualities superb. The heaviest yielding sort of the table or market Carrots. Ready for the table in 70 days. Pkt., 5c; oz., 10c; ½ lb., 30c; lb., 90c, prepaid.

Oxheart or Guerande

Oxheart is shorter than the well known Danvers Half Long, but is much thicker than the latter, attaining a diameter of 3 to 4 inches at the top. Of very fine quality for the table and is easy to harvest. A favorite for the home garden. Ready for the table in 65 days. Pkt., 5e; oz., 10c; 1/4 lb., 30c; lb., 90c, prepaid.

Nantes Half Long Scarlet

Very sweet and nearly coreless, of good shape; cylindrical, very smooth and about 6 inches long. Of deep orangered color; crisp, tender and of very fine flavor. Fine homegarden sort, excellent for early market use. Pkt., 10c; oz., 15c; 1/4 lb., 40c; lb., \$1.20, prepaid.

FIELD CARROTS

Carrots will pay you well if sown for a feeding crop for cows, horses or sheep. A large yield can be taken from a small piece of ground. Sow any time before July 1st in rows 24 to 30 inches apart. Thin to 6 inches in the row. Two to three pounds of seed to the acre.

ISBELL'S VICTORIA.—Largest and best feeding Carrot of the yellow varieties. Color is orange-red. Exceptionally heavy cropper. Cz., 15c; ¼ lb., 45c; lb., \$1.45, prepaid.

ISBELL'S MAUDE S.—The Great Stock Carrot. This is the heaviest cropping Carrot grown. The fiesh is white, crisp, solid and very sweet in flavor. Oz., 10c; ¼ lb., 25c; lb., 75c, prepaid.—Not prepaid, 5 lbs., \$3.25.

LARGE YELLOW BELGIAN.—An old favorite stock Carrot of light yellow color. Very heavy yielder. Oz., 10c; ¼ lb., 25c; lb., 85c, prepaid.—Not prepaid, 5 lbs., \$3.25.

CELERY CRISP

TENDER

CULTURE.—Celery seed is slow to germinate and ample time must be given. Sow thinly; cover lightly. Keep constantly moist. Count on about 7,500 plants per ounce of seed, or 1/4 lb. per acre. When the seedling plants are three inches high they should be thinned out one inch apart, or else transplanted.

Celery is mostly grown under flat culture, without trenches, in rows 3 to 5 feet apart. For home use Celery is often grown in double rows, 10 inches apart without trenching, and banked for Winter storage just where it grows, without lifting.

New Golden Detroit

The Best Dwarf Self Blanching Sort

Medium late and particularly valuable for shipping. It is the standard of excellence in the self blanching class of Celery. A very uniform, pure line selection of the old well known Dwarf Golden Self Blanching. The plants grow 20 to 22 inches tall, are heavy, compact and full hearted, with broad, very thick stems. In quality and flavor it is second to none. The edible stalks blanch to a rich golden-yellow color. Pkt., 20c; ½ oz., 60c; oz., \$1.00; ¼ lb., \$3.50, prepaid.

select Golden Self Blanching-Tall

This is the leading market sort of the early varieties of Celery. Large market growers and critical planters consider it the best and most profitable for early market. Plants grow tall, 20 to 25 inches; stalks are quite thick and blanch easily. Of beautiful golden-yellow color, crisp and brittle with a rich nutty flavor. Golden Self Blanching has for many years given entire satisfaction, in yield and quality. Pkt., 15c; ½ oz., 50c; oz., 85c; ¼ lb., \$3.00; lb., \$9.75, prepaid.

Golden Plume or Wonderful

Fine large early Celery of superior quality and splendid appearance. Large, heavy stalks with a full, solid heart; always crisp, brittle and of finest flavor. Blanches easily and quickly; the plants are vigorous, showing marked resistance to Celery blight. For the early market and for home use it is very desirable. Pkt., 10c; oz., 50c; 1/4 lb., \$1.75; lb., \$6.00.

Easy Blanching

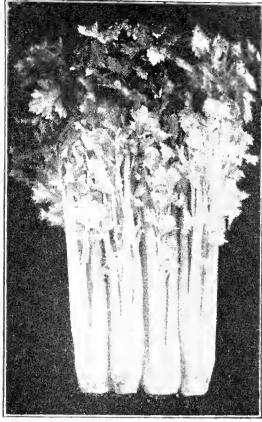

A very useful variety for the home gardener as well as the professional. Fine for early use and for Winter keeping; is brittle but thick and very rich to eat. The easiest and quickest to blanch and keeps real well in the trench. Grows equally well on muck or upland. Easy Blanching is grown extensively in many parts of the country. Pkt., 10c; oz., 35c; 34 lb, \$120, ¼ lb., \$1.20; lb., \$4.00, prepaid.

Giant Pascal or Winter King

No other sort equals Giant Pascal for winter use at home and for nearby markets. It is too crisp for shipping. The stalks are remarkably large, crisp and brittle, fine nutty flavor. It blanches to a beautiful pale yellow color, is very large, solid and of best quality. Pkt., 5e; oz., 20e; 1/4 lb., 65c; lb., \$2.25, prepaid.

Celeriac or Turnip-Rooted Celery

easily grown vegetable that should be in every garden. Forms a ip shaped root with flavor of fine Celery. Splendid for stews, soups salads, or boiled like parsnips. Pkt., 10e; oz., 25c; ½ lb., 75e; lb., turnip

Perfected White Plume.

Perfected White Plume

Perfected White Plume is the finest strain of White Plume Celery grown. This variety is most widely known and highly valued by market gardeners throughout the northern country. It is the recognized best of the white varieties. Not only does the stem whiten, but the leaf itself, especially every inner leaf, assumes the attractive white color. Wellgrown White Plume is simply perfect, both in palatability and beauty, but is not recommended as a long keeper. Our strain is extra choice. Pkt., 10c; oz., 25c; 1/4 lb., 75c; lb., \$2.50, prepaid.

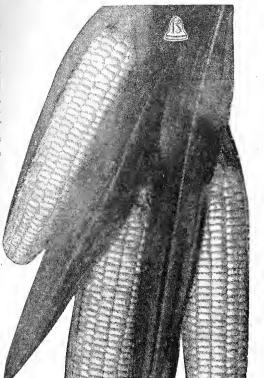

CELERY SEED FOR FLAVORING.— Used in place of fresh Celery, for soups, pickles, etc. 1/4 lb., 20c; lb., 65c, prepaid.

A Michigan Field of Isbell's Extra Select Golden Self-Blauching Celery.

Isbell's Michigan Grown Sweet Corn

Our seed is mainly grown in Michigan, where there is much wooded and rolling country, so that hydridization is reduced to a minimum. Moreover, the season is short and conducive to an early habit of maturity.

In recent years much of the Sweet Corn Seed on the market is raised in the West, where level country, much wind and vast areas of Field Corn—all combine to destroy the sweetness and delicacy of Table Corn.

CULTURE.—A rich, warm, alluvial soil is best, but excellent Sweet Corn can be raised on any good, ordinary soil if it is deeply and thoroughly worked before planting. Give it frequent and thorough but shallow cultivation until the tassels appear. One pound will plant 200 hills. Nine to ten pounds will plant an acre.

THE EARLIEST VARIETIES

Isbell's Early Dawn

The Earliest Sweet Corn in Cultivation.

This fine Sweet Corn of our own introduction is a remarkably early variety. It is extremely hardy, withstanding cold, wet weather to a wonderful degree. The stalks grow about 4 to 4½ feet high and rarely produce less than two good ears, 10- to 12-rowed. The grain is white and very sweet. Isbell's Early Dawn is especially adapted for planting far North. A sure winner for the market gardener. Ready to use in 65 days. Large pkt., 10c; lb., 40c; 3 lbs., \$1.00, prepaid.—Not prepaid, 10 lbs., \$1.85; 25 lbs., \$4.25.

Isbell's 1936 Best Early

Largest Eared Extra Early Yellow.

After many years of selection to combine size with earliness without sacrificing quality, we are able to offer this variety as the best early yellow sweet corn to date. It is more than a week earlier than Golden Bantam, has the same luscious flavor but the ears are much larger. The average length of the ears is 7 to 8 inches with 12 rows of deep golden kernels. Here is a real moneymaker for the market grower and an ideal sort for the home garden. Large pkt., 10c; lb., 40c; 3 lbs., \$1.00, prepaid.—Not prepaid, 10 lbs., \$1.85; 25 lbs., \$4.25.

Golden Sunshine

This was developed by Prof. Yeager of the North Dakota Experiment Station. The ears are larger than the Golden Bantam and it matures earlier. The quality is excellent, sugary and tender. Golden Sunshine produces ears 6 to 8 inches in length well are

Isbell's Prolific

The Largest Eared Second-Early Sweet Corn

It is a very difficult matter to combine earliness and size with good flavor and sweetness in any one variety, but in this very valuable characteristic Isbell's Prolific has outclassed all Sweet Corn to date. It is a vigorous growing sort, with stalks about 5½ feet high. Ears are 9 inches long, well filled with large, deep grains as tender and sweet as Stowell's. Can be planted very early. Popular sort—for home and market gardeners. Large pkt., 10c; lb., 35c; 3 lbs., 90c, prepaid.—Not prepaid, 10 lbs., \$1.85; 25 lbs., \$4.25.

Golden Gem—Extra Early

The Earliest Yellow Sort.

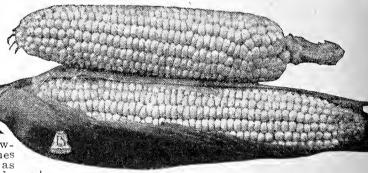

Another introduction by Prof. Yeager. The originator says that Golden Gem is absolutely the earliest yellow Sweet Corn, being about two weeks earlier than Bantam. While it has shorter stalks than Bantam, the ears are nearly as large and the quality fully up to Bantam. Pkt., 10c; lb., 35c; 3 lbs., for 90c, prepaid.—Not prepaid, 10 lbs. for \$1.85; 25 lbs. for \$4.25.

Golden Early Market

Fine Large Early Market Sort.

Early Evergreen.

Isbell's Early Dawn.

Black Mexican

Sweetest of All-Second-Early.

Everyone who has ever eaten this Corn remembers Everyone who has ever eaten this Corn remembers it and the delicious sweetness and fine grain qualities. 8- to 10-rowed; ears about 8 inches long. This Corn, when in condition for the table, cooks clear white, but the ripe grain is black or bluish black. For family use we consider it the most desirable second-early sort. Large pkt., 10c; lb., 35c; 3 lbs., 90c, prepaid.—Not prepaid, 10 lbs., \$1.75.

New Disease-Resistant Varieties

Golden Cross Bantam.
Top Cross Golden Evergreen.
Top Cross Whipple's Yellow. See page 3.

Isbell's Succession Collection of Sweet Corn

The following varieties when planted at the same time, will produce a continuous supply of Sweet Corn of finest quality, from early summer

until frost:
GOLDEN SUNSHINE.—Extra early.
GOLDEN GIANT.—Early.
ISBELL'S PROLIFIC.—Second early.
MAMMOTH SUGAR.—Late.

We make special prices for this collection:

1 large pkt. each, 30c, prepaid.
1 pound each (4 lbs.), \$1.00. prepaid.
3 pounds each (12 lbs.), \$2.90, prepaid.
6 pounds each (40 lbs.), \$6.00, not prepaid.

Sweet Corn

Early Golden Bantam

THE QUALITY SWEET CORN,-This well known Corn is the leading early market sort where yellow Sweet Corn is in demand. When where yellow Sweet Corn is in demand. When ready for the table the kernels are a creamyellow, deliciously sweet, tender and milky. Suited for extra early and later planting up to July 15th, Ready to use in 70 days. Large pkt., 10c; lb., 30c; 3 lbs., 80c, prepaid.—Not prepaid, 10 lbs., \$1.75; 25 lbs., \$3.75.

New Wonder Bantam

An Early Large-Eared Bantam Corn. The stalks grow from 5 to 6 feet high and have ears 8 to 10 inches long, filled with eight rows of broad, rich, golden yellow kernels. Ready to use in 75 days. Pkt., 10c; lb., 30c; 3 lbs., 80c, prepaid.—Not prepaid, 10 lbs., \$1.75; 25 lbs., \$3.75.

Golden Giant

A still larger type of yellow Sweet Corn. Golden Giant closely follows the two preceding sorts. The stalks grow taller and the ears are 8 inches long, with 16 to 18 rows of kernels. Ready to use in 80 days. Pkt., 10c; lb., 30c; 3 lbs., 80c, prepaid.—Not prepaid, 10 lbs., \$1.75; 25 lbs., \$3.75.

Golden Evergreen

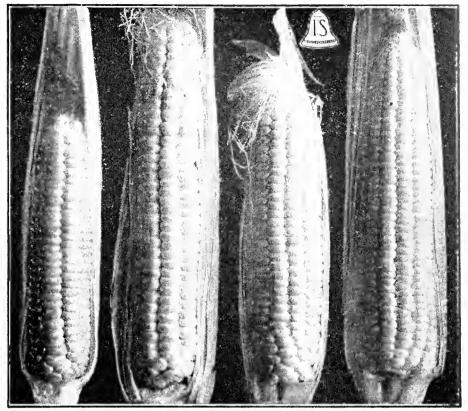

Also called Bantam Evergreen. This variety combines the size of ear of the Evergreen type with the color and delicious quality of the Golden Bantam and is the largest of the Bantam type. The ears are 6 to 8 inches long, well filled with deep kernels of rich yellow color. Ready to use in 85 days. Pkt., 10c; lb., 30c; 3 lbs., 80c, prepaid.—Not lbs., \$1.60; 25 lbs., \$3.00.

Whipple's Early Yellow

More resistant to wilt than other sorts, healthy, robust, More resistant to wilt than other sorts, healthy, robust, and productive. A favorite in the eastern states. Medium early, large ears and a good yielder. The ears are 8 to 10 inches long and have 14 to 16 rows of deep yellow kernels of extra fine quality. It is one of the most profitable varieties to grow for market. The stalks grow 6 feet or more in height and the big ears are well filled. Ready to use in 80 days. Pkt., 10c; lb., 30c; 3 lbs., 80c, prepaid.—Not prepaid, 10 lbs., \$1.60; 25 lbs., \$3.00.

All Season Collection of Yellow Sweet Corn

The five varieties listed above. 1 pkt. of each (5 pkts.), for 40c; 1 lb. of each (5 lbs.), for \$1.35, prepaid; 3 lbs. of each (15 lbs.), for \$2.75, not prepaid.

Golden Giant. Golden Evergreen. Early Bantam. Wonder Bantam.

Early Evergreen

The ears grow 8 inches long, are 12- to 14-rowed and remain tender a remarkably long time. A productive vamain tender a remarkably long time. A productive variety of high quality. In northern localities this variety is a surer cropper than Stowell's Evergreen. Ready to use in 90 to 95 days. Large pkt., 5c; lb., 25c; 3 lbs., 75c, prepaid.—Not prepaid, 10 lbs., \$1.50; 25 lbs., \$3.00.

Stowell's Evergreen

The Standard Main Crop Variety

Northern grown, carefully selected. Stalks grow 6 to 7 ft. high, and produce ears 8 inches long, which have 16 or more rows of the finest sugary grains. The fine, rich flavor and sweetness of the deep-set, tender grains have made it a great and popular favorite. Ready to use in 95 to 100 days. Large pkt., 5c; lb., 25c; 3 lbs., 75c, prepaid.—Not prepaid. 10 lbs., \$1.50; 25 lbs., \$3.00.

Country Gentleman

Country Gentleman or Shoe Pcg is the finest and sweetest of all main crop Sweet Corns for the table. It can be identified easily by the irregular arrangement of the kernels on the cob. The milky kernels are plump, pearly white and tender. Ears average 8 to 9 inches in length. Ready to use in 95 to 100 days. Large pkt., 10c: lb., 30c; 3 lbs., 80c, prepaid.—Not prepaid, 10 lbs., \$1.75; 25 lbs., \$3.75.

Mammoth Sugar

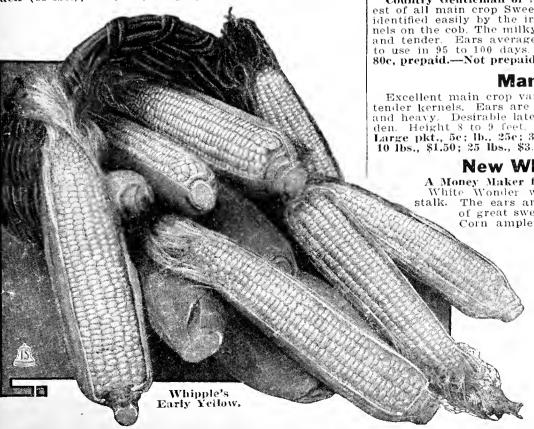

Excellent main crop variety with broad, very sweet and tender kernels. Ears are large, 14 to 18 rowed, well filled and heavy. Desirable late sort for home and market garden. Height 8 to 9 feet. Ready to use in 95 to 100 days. Large pkt., 5c; lb., 25c; 3 lbs., 75c, prepaid.—Not prepaid, 10 lbs., \$1.50; 25 lbs., \$3.00.

New White Wonder

A Money Maker for the Market Gardener. White Wonder will produce 4 to 6 ears to the alk. The ears are large, with fine white kernels The ears are large, with fine white kernels of great sweetness and good flavor. Give this Corn ample space, plenty of fertilizer and good cultivation and you will get highest yields and choice quality roasting ears. Ready for market in \$5 to 90 days. Pkt., 10c; lb., 40c; 3 lbs., \$1.00, prepaid.—Not prepaid, 10 lbs., \$1.85.

Golden Cross Bantam. Top Cross Golden Evergreen. Top Cross Whipple's Yellow. See Page 3.

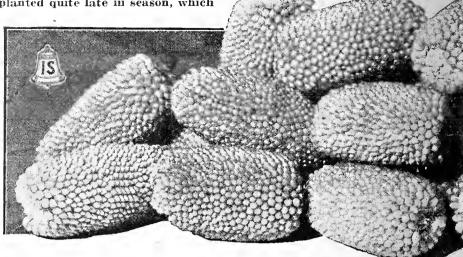

GROW SOME POP CORN FOR POPPING

Australian Hulless The Quality Pop Corn.

Pop Corn is a very profitable crop, yields well even in unfavorable seasons and there is always a good market for it. May be planted quite late in season, which is another advantage. Plant at rate of 5 to 8 pounds per acre in drills 3 feet apart, dropping seed 1½ feet apart in the rows. Or plant in hills, using 4 to 6 pounds of seed per acre. Cultivate the same as field corn.

South American Mushroom

Also sold as T. N. T. This is the new variety which has taken the country by storm. When popped, the kernels are larger than any other sort and are of a rich creamy yellow color. They are nearly round or mushroom shaped, hence the name. The flavor is something new in pop corn and is truly delicious. The stalks grow 6 to 8 feet tail and produce two and often three large ears which are 9 inches long or over. The kernels are deep orange in color, nearly round in shape and smooth. Michigan Grown Seed: Pkt., 10e; lb., 30c; 3 lbs., 75c, prepaid.—Not prepaid, 10 lbs., \$1.50.

Monarch White Rice

Everybody knows the old variety named White Rice. Our strain is an improvement, with large ears, and ears are more abundantly produced. We found many stalks in our fields that had three to four nice, well developed ears to each stalk. Pkt., 5c; lb., 25c; 3 lbs., 65c, prepaid.—Not prepaid, 10 lbs., \$1.25.

Black Beauty

A new kind which ripens earlier than any other sort, and yields very heavily. Ears are medium size and the kernels rounded and smooth. Pops large and is decidedly tender and crisp. Although the kernels are black, they show up nice and white when popped. Pkt., 10c; lb., 30c; 3 lbs., 75c, prepaid.—Not prepaid, 10 lbs., \$1.50.

Australian Hulless

The Quality Pop Corn—Also known in some sections as Japanese Rice, Tom Thumb or Bumble Bee Pop Corn. The Australian Hulless is a dwarf growing Corn, a heavy yielder of attractive ears, peculiar in form, being nearly as thick as long. The kernels are long, slim and pearly white in color. Its crowning merit is its popping quality, fine flavor and absence of hull or shell. Pkt., 5c; lb., 25c; 3 lbs., 65c, prepaid.—Not prepaid, 10 lbs., \$1.25.

Queen's Golden

An Old Favorite. The stalks grow 6 feet high and the large ears are produced in abundance. The ears are larger than other varieties; of rich orange-yellow color and the kernels are round and smooth. It pops perfectly white. Pkt., 5c; lb., 25c; 3 lbs., 65c, prepaid.—Not prepaid, 10 lbs., \$1.25.

Chives or Schnittlauch

An onion-like plant, which by some is highly esteemed for use as a salad, and the green stems afford a very pleasant onion flavor for soups. The plant also makes an excellent ornamental garden bed edging, which may frequently be cut, a new growth of leaves appearing soon after each cutting. The seed may be sown in rows in the garden or in boxes and transplanted. Pkt., 10c; oz., 40c; 4 lb., \$1.35, prepaid.—Chives plants, per clump, 25c, prepaid.

Collards

A loose-leaved plant of the Cab-A loose-leaved plant of the Cabbage family. A hardy and excellent vegetable for winter use. Sow from March until July as directed for Cabbage. Set plants out in rows 3 feet apart, and 2 feet apart in the rows. One ounce of seed for 100 feet of drill, four ounces will produce enough plants to set an acre.

GEORGIA, SOUTHERN, or CRE-OLE.—We offer the true white or green stemmed sort so extensively used in the South, where it furnishes an abundance of food for the table or for stock. Pkt., 5c; oz., 10c; 1/4 lb., 20c; lb., 65c.

Cress

This plant is grown extensively for salad. Plant seed thickly in shallow drills 12 inches apart, in the spring, and for a succession every two weeks.

FINE CURLED OR PEPPER GRASS.—Quick growing; leaves finely cut and feathery, ornamental, crisp and pungent; very refreshing. Ready for table in 30 days. Pkt., 5c; oz., 10c; 1/4 lb., 25c; lb., 75c, prepaid.

WATER CRESS.—Highly esteemed as a salad during spring and fall. Also used as a garnishing for meats during the winter. Sow the seed in cool, moist soil in early spring or if a shallow running stream or ditch is near, the seed may be sown within the same near the bank. Pkt., 10c; oz., 40c; 1/4 lb., \$1.25.

Dandelion

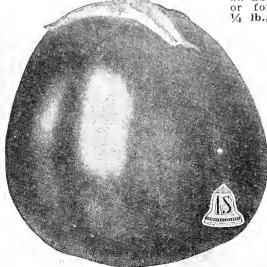

LARGE-LEAVED FRENCH.—The young leaves are useful for "greens" and are very popular as a spring tonic. Sow seed as soon as ground can be worked, in rows one foot apart. The plants are perennial and are perfectly hardy. Pkt., 10c; ½ oz., 30c; oz., 50c; ¼ lb., \$1.50.

Eggplant

Sow the seed in hotbed, in March; transplant when 3 inches high. Set out in garden after danger of frost is past, in rows 3 feet apart and 2 feet apart in the row. The plants will produce an average of 5 to 8 fruits, on rich soil up to 10 fruits. They require rich soil. Dust plants with Slug Shot to keep off the bugs. One ounce of seed for 1000 plants, 5 ounces per acre.

NEW YORK IMPROVED LARGE PURPLE (Spineless). Standard sort both in the North and the South. The large size and fine quality of fruit and its extreme productiveness make it most profitable. Plants large, fruit oval; color, dark purple. Pkt., 10c; ½ oz., 25c; oz., 40c; ¼ lb., \$1.20; lb., \$4.25.

BLACK BEAUTY .- Best for the northern states. It is the earliest good market variety. Average weight 2 to 3 pounds. It is dwarf growing. Ready for table in 135 days. Pkt., 10c; ½ oz., 25c; oz., 40c; ¼ lb., \$1.30; lb., \$4.50.

Chives.

Egg. plant.

New_York

"Last year I ordered seeds from you and also sent for some of the same varieties fom another firm. They were planted side by side and I sure was surprised when your seeds did extra well and the others never made a stand and never did amount to anything. From now on I'm planting only Isbell's Seeds."

OLIVER BULTMAN, Batesville, Indiana.

CELERIAC—Turnip Rooted Celery

This popular European vegetable deserves much wider cultivation. Used in salads, soups and stews, or boiled like Parsnips or Turnips it makes a delicious dish. Sow seed as soon as ground is in good workable condition, and when plants are 3 inches high, transplant to stand 6 inches apart in the rows. When roots are two inches in diameter, they are in condition to use. To keep for winter, pack in damp sand in the cellar. Pkt., 10c; oz., 25c; 1/4 lb., 75c; lb., \$2.50.

The aromatic seeds are used in pickling, preserves, soups and sauces. Dill is used in large quantities in making dill pickles. Easily grown and readily marketable at good prices. Sow the seed early in spring, in rows $1\frac{1}{2}$ to 2 feet apart, cover the seed lightly. A row of dill should be in every large garden.

LONG ISLAND MAMMOTH.—The best variety and a heavy yielder. Pkt., 5c; oz., 10c; 1/4 lb., 25c; lb., 75c, prepaid.

Endive

One of the best salads for fall and winter use; also desirable for greens and for flavoring soups and stews. For early spring crop sow as early as ground can be worked well, in shallow drills 15 to 18 inches apart. Transplant when 2 to 3 inches high or thin to one foot apart in rows. The plants reach eating stage in 65 to 75 days. For fall and winter use sow from June until August.

LARGE GREEN CURLED.—A fine market sort; tender, green leaves which blanch white. Pkt., 5c; oz., 10c; ½ lb., 30c; lb., 90c, prepaid.

BATAVIAN FULL HEART.—An improved strain with larger leaf and broader, thicker head; also matures earlier. Excellent for market gardeners and shippers. Pkt., 10c; oz., 15c; ½ lb., 45c; lb., \$1.25, prepaid.

EVER WHITE CURLED.—A very beautiful sort in which the leaves are very light colored, even the outer ones being nearly white. Does not need to be tied up for blanching. Pkt., 10c; oz., 15c; ½ lb., 45c; lb., \$1.25, prepaid.

BROAD LEAVED BATAVIAN.—Leaves large, broad, slightly curled; tie up for blanching. Pkt., 5c; oz., 10c; ½ lb., 30c; lb., 90c, prepaid.

Fennel - Finocchio

In the last few years this Italian vegetable has become very popular, and has proven to be a profitable crop for market gardeners. This delicious vegetable tastes like celery, but is sweeter and more delicate in flavor. Sow the seed, for successive crops, from April until July, in rows 18 in. apart and thin the plants to 8 in. in the row. The plants are blanched like celery before they are used. I ounce of seed for 75 feet of row.

Endive, G.

FLORENCE EARLY ROUND MAMMOTH.—Considered the best of the Florence type, with large round bulbs at the base of the stalk. The flavor is distinct, sweet and aromatic. Pkt., 10c; oz., 20c; 1/4 lb., 60c; lb., \$2.00, prepaid.

Garden Huckleberry - Wonderberry

A wonderful, prolific plant needing same culture as Tomatoes. When ripe the berries are about ½ to ¾ inch in diameter, of shining black color. They make delicious pies, preserves and jam. Fruit is non-edible when not fully ripened. Grows readily from seed and succeeds well on poor soil. Pkt., 10c; ½ oz., 50c.

Ground Cherry

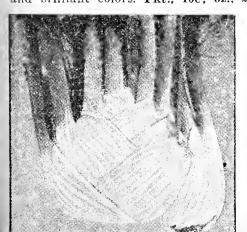

They grow well on almost any dry soil, are easier raised than the tomato, are prolific bearers and Oh! what luscious fruit. For sauce or pies they are excellent. They make delicious preserves and when dried in sugar are used like raisins for cakes and puddings, and they will keep, in the shucks, quite a long time. Requires same culture as tomatoes. Pkt., 10c; ½ oz., 30c; oz., 50c; ½ lb., \$1.50.

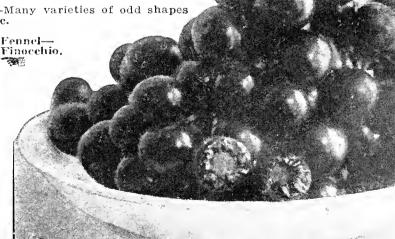

Useful Gourds

They are easily grown and the blooms of some are quite handsome. The large fruited sorts may be used as dippers, sugar troughs and bowls; also for bird's nests, etc. The small fancy gourds make excellent toys.

DISHCLOTH or LUFFA.—The fruits resemble a large flat sponge. Pkt., 10e; oz., 25c.

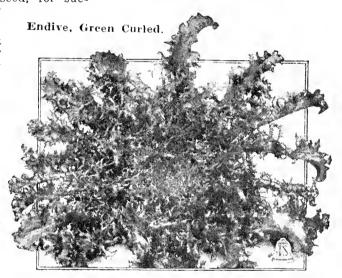

DIPPER.—Holds about a quart, has long handle. Pkt., 10c; oz., 25c. NEST EGG.—Fruits look exactly like a hen's egg. Pkt., 10c; oz., 20c. SUGAR TROUGH.—Grows large enough to hold 4 to 10 quarts each. Pkt., 10c; oz., 30c.
ORNAMENTAL GOURDS, MIXED.—Many varieties of odd shapes and brilliant colors. Pkt., 10c; oz., 25c.

Celeriac.

GARDEN HUCKLE-

BERRY

Michigan Grown Cucumbers

Cucumbers taken fresh from your garden are much more crisp and tender and of far superior flavor than what you can buy at the stores, that peculiar toughness and bitterness is missing. You use what you want sliced and can make many kinds of delicious winter pickles. We offer varieties desirable for various purposes. The seed we offer is grown by ourselves from our own thoroughbred stocks.

Superior in Size, Shape and Color.

This handsome slicing Cucumber is our latest and best of this class. In size, color, productiveness and quality it stands supreme. The beautiful deep green fruits are 8 to 10 inches long, and rather slender. They have a small seed cavity and very thick, crisp, snow-white flesh of finest flavor, without a trace of bitterness. Matures early and continues in bearing over a long period, making it an extremely heavy cropper. As it is such a reliable yielder and the quality is so dependable we recommend our Super Slicer both for home and market gardeners. Here is also a real moneymaker for large shippers. Pkt., 10c; oz., 20c; 1/4 lb., 50c; lb., \$1.50, prepaid.—Not prepaid, 5 lbs., \$6.75.

Isbell's Improved Long Green

The Popular Standard Sort.

This fine Cucumber grows from 12 to 16 inches in length and is of superior This fine Cucumber grows from 12 to 16 inches in length and is of superior quality. Of fine dark green color, slender, tapering toward the stem end. Flesh very firm and crisp. The young fruit is used very largely for pickling and full sized Cucumbers are in high favor for slicing and for making the the so-called sweet pickles when the fruits are ripe and yellow. Ready for market in 70 days. Pkt., 10c; oz., 15c; 1/4 lb., 45c; lb., \$1.35, prepaid.—Not prepaid, 5 lbs., \$6.00.

Isbell's Perfected Davis Perfect

Its Beautiful Color and Quality Attract the Buyers. Unequaled for Market Garden and Greenhouse. Gardeners will be pleased to find that our Perfected Davis Perfect has entirely overcome any fault the original strain of Davis Perfect had in being too necky. Every fruit is shapely and holds its fine cylindrical shape clear to the stem end. By using our Perfected strain a crop can be produced outdoors which cannot be distinguished from greenhouse stock. Pkt., 10c; oz., 20c; ½ lb., 50c; lb., \$1.50, prepaid.—Not prepaid, 5 lbs., \$10.50.

Isbell's Everbearing

Our Everbearing Cucumber is not only extremely prolific, but will continue in bearing a long time. The fruits are of medium size and quite plump; of rich, dark green color. Owing to its great productiveness it is an excellent variety to plant for producing small pickles. Ready to use in 62 to 65 days. Pkt., 10c; oz., 15c; 1/4 lb., 40c; lb., \$1.25, prepaid.

Improved White Spine

This is a standard variety, largely planted everywhere. A uniform and shapely variety, not only for first early, but general crop. Vigorous grower and a great bearer. Fruits 7 inches long, light green. Ready for market in 62 days. Pkt., 5c; oz., 10c; 1/4 lb., 30c; lb., 90c, prepaid.—Not prepaid, 5 lbs., \$4.00.

Extra Long or Evergreen White Spine

Unexcelled in table quality. Flavor is unsurpassed and meat is white, firm and crisp. Vines are of vigorous growth with large, heavy foliage. The color is a rich, dark green, size 10 to 12 inches in length. Ready for market in 70 days. Pkt., 5c; oz., 15c; 1/4 lb., 40c; lb., \$1.25, prepaid.—Not prepaid, 5 lbs., \$5.00.

Isbell's Special Forcing

Also Known As Longfellow and Windermoor Wonder.

We consider this to be the ideal cuke where an extra long slicing sort is desired, either for greenhouse or field culture. 12 to 16 inches long, very uniform in shape and size, with decidedly few seeds. "Special Forcing" is real dark green, and will hold this color until ripe. All growers that cater to a fancy trade want this variety, as it is a money maker, not only in the greenhouse, but also in the field. A very shy seeder, hence price will always be comparatively high. Pkt., 10c; oz., 20c; 1/4 lb., 55c; lb., \$1.75, prepaid.

Isbell's Hybrid White Spine Cucumber

A Money Maker For the Market Grower.

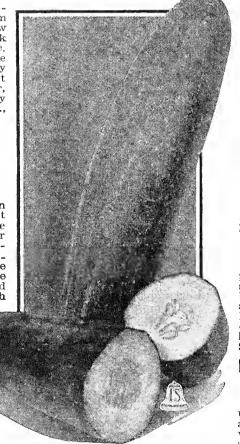

Market Grower.

This is a hybrid of the well known Evergreen White Spine, and is a distinct improvement over that popular sort. The vincs are vigorous and healthy and bear over a long period. The Cucumbers average about 9 inches long and are of a slender, symmetrical shape. The handsome dark green color does not fade until the fruits are past edible condition. Hybrid White Spine is immensely popular with larger growers and shippers on account of the splendid size, shape and color of the fruits and because it is such a reliable heavy yielding sort. Pkt., 10c; oz., 20c; ½ lb., 50c; lb., \$1.50, prepaid.

Dill Pickles

Dill is easily grown and there always is a big demand for it; you will find this seed listed on page

We recommend Isbell's King of Picklers for the best Dill Pickles. Try it and be convinced.

Isbell's Improved Long Green.

FOR PICKLING

Isbell's King of Picklers

The Greatest Yielder of All. Unequalled in Quality.

CUCUMBERS FOR SLICING

Early Fortune

Very productive, early and disease resistant; fruits 8 inches long, flesh white, very firm and crisp, with few seeds. Rich dark green color; ships well. Planted extensively in the South for shipping North. Fine for the home garden. Ready for use in 60 days. Pkt., 5c; oz., 15c; 1/4 lb., 40c; lb. \$120 preprid Ready for use in b., \$1.20, prepaid.

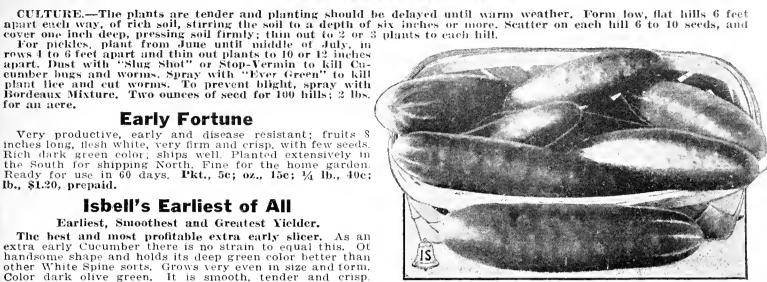

Isbell's Earliest of All

Earliest, Smoothest and Greatest Vielder,

The best and most profitable extra early slicer. As an extra early Cucumber there is no strain to equal this. Of handsome shape and holds its deep green color better than other White Spine sorts. Grows very even in size and form. Color dark olive green. It is smooth, tender and crisp. Profitable market sort. Ready for market in 50 days. Pkt., 10c; oz., 20c; 1/4 lb., 50e; lb., \$1.75, prepaid.

Isbell's White Wonder

White Wonder is a beautiful pure white, not even changing color when fruits are matured. It grows to good size, usually 8 to 10 inches long, and is very uniform. Flavor is pleasing, and flesh firm and crisp. Its smooth, clear surface makes it an ideal pickle. Aside from excellent quality of fruit, it bears a great quantity. Pkt., 10c; oz., 20e; 1/4 lb., 50e; lb., \$1.50, prepaid.

Early Fortune.

Choice Pickling Cucumbers **Chicago Pickling**

Early-Heavy Yielder

"Westerfield." A very prolific variety, combining all the qualities desired by those who raise Cucumbers for commercial pickles. Fruits are of uniform size and good color. Used almost exclusively by all the large pickling houses. Ready for market in 53 days. Pkt., 5c; oz., 15c; 1/4 lb., 40e; lb., \$1.20, prepaid.—Not prepaid, 5 lbs., \$10.75.

Boston Pickling

Distinct, very prolific and exceedingly popu-lar variety, largely planted for pickles. The

arliest of All.

arliest of All.

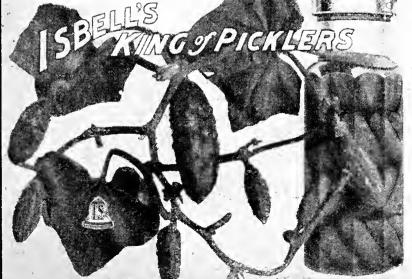

ducing medium sized pickles this variety is highly esteemed. Ready in 50 days. Pkt., 5e; oz., 10c; ½ lb., 30c; lb., \$1.00, prepaid.

Isbell's Earliest of All.

This is one of the grandest of all pickling Cucumbers. It is solid and thick in texture, excellent in flavor and combines all the qualities necessary to make a great pickle. It is to make a good pickle. It is very productive and it is also adapted for slicing, as it grows from 7 to 8 inches long, retaining its rich, green color throughout the entire length, which is straight, smooth and symmetrical. Pkt., 10c; oz., 20c; 1/4 lb., 65e; lb., \$2.25, prepaid.

"I planted 4 ocres of Isbell's King of Picklers and I want you to know that they ore the best I ever grew. It is o good yielder and it stoys green. My pickles on the market here olways sold first and I got 25 to 50c more per bushel. I picked 1500 bushels off from 4 ocres. I have been buying Isbell's seeds for the post 10 years." FRANK KLAUS, Gary, Ind.

Early Green Cluster

Fruits of short, chunky form, light green color; desirable for pickling. Extra prolific, frequently setting in clusters of 2 and 3. Ready for use in about 50 days. Pkt., 5c; oz., 10c; ½ lb., 30c; lb., \$1.00, prepaid.

Lemon Cucumber

This fine Cucumber grows about the size and color of a lemon. The flesh is white and has a peculiar sweet flavor, quite different from other Cucumbers. They are highly esteemed both for table use and pickling. May be pickled while green or ripe, as preferred. Pkt., 10c; oz. 25c; table use and pickling. Magreen or ripe, as preferred.
1/4 lb., 60c, prepaid.

West India Gherkin

very small oval prickly sort, distinct from all others. It is grown for pickles only and must be used when young. Most prolific of all. Pkt., 10c; oz., 20e: 1/4 lb., 60c; lb., \$2.00, prepaid.

Serpent or Snake

This sort is grown mostly as a curiosity, and it has some food value. The fruits are green, averaging two feet in length and grow in a variety of interesting shapes. Grow some for your Fair exhibit. Pkt., 10c; oz., 25e.

Mixed Cucumber Seed

We have inquiries for Mixed Cucumber Seed from those who wish to use the crop themselves, either for pickling or slicing. This mixture is made up of first class varieties. Pkt., 5e; oz., 10c; 1/4 lb., 30e; lb., \$1.00, prepaid.

Kale or Borecole

Kale is very easily grown and much hardier than any cabbage, standing the winter well if protected by a little litter of straw. Splendid "greens" for early fall, winter or spring use. Sow seed about the middle of June and later transplant to rows 2 to $2\frac{1}{2}$ feet apart. The dwarf sorts can be sown later and need not be transplanted. One may start cutting Kale in 55 to 60 days, but the flavor is improved by a good frost in the fall. Sowing may be made as late as August 1st. One ounce of seed for 300 feet of drill.

Green Curled Dwarf Scotch

Leaves very curly, rich green. Remarkably tender and delicate in flavor. Pkt., 5c; oz., 10c; 1/4 lb., 30c; lb., 90c, prepaid.

Tall Scotch

Grows about 2 feet high. Leaves dark green and finely curled. Very hardy. When leaves are of fair size pull off and use the lower ones and let the plant grow on to furnish a continuous supply. Pkt., 5c; oz., 10c; ½ lb., 30c; lb., 90c, prepaid.

Siberian or Winter

Also called Sprouts. Very hardy; of dwarf, spreading growth. The leaves are of bluish-green color, tender and of fine flavor. Pkt., 5c; oz., 10c; 1/4 lb., 25c; lb., 75c, prepaid.

Leek

The stalks are of mild onion flavor and used The staks are of mild onion flavor and used same as onions. May be stored for winter in moist sand in cellar. Sow seed in early spring in rows 1 foot apart and 1 inch deep. When 6 inches high, transplant 4 to 6 inches apart, in rows 12 inches apart, setting the plants in the ground up to their center leaves.

American Flag

Broad leaves of strong and vigorous growth; very hardy. Ready for table in 85 days. Pkt., 10c; oz., 20c; 1/4 lb., 60c; lb., \$2.00, prepaid.

Monstrous Carentan

Very large with broad leaves, stems 6 to 8 inches long. Ready for table in 95 days. Pkt., 10c; oz., 25c; ½ lb., 70c; lb., \$2.25, prepaid.

Mushrooms

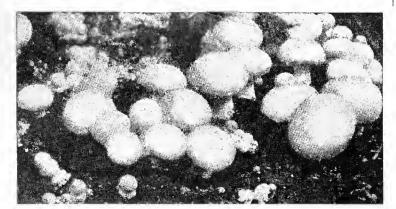

The Mushroom, as a table delicacy, is rapidly becoming extremely popular, and it will certainly continue to increase in favor as fast as people discover how easily it can be grown. With all orders we give our free pamphlet, "How to Grow Mushrooms," and anyone who will carefully follow its simple directions can have no difficulty in producing a crop.

Spore Culture Spawn

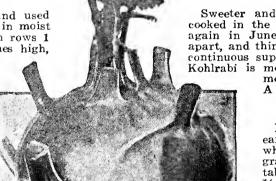

Is far superior to the old style varieties and much better results can be obtained from its use. Bricks weigh from 18 to 24 ounces. A brick will spawn ten square feet of bed. Prices, per brick, 50c, postpaid. By express or freight, 5 bricks, \$1.75; 10 bricks, \$3.25.

Eat More Mushrooms

Yield 204 calories per pound and contain protein.

Mustard

The Leaves are Used as a Salad or Boiled Like Spinach

Sow seed very shallow in any good garden soil early in the spring, in rows $1\frac{1}{2}$ to 2 feet apart, and when well up thin out the plants so as to stand 8 to 10 inches apart. Several sowings a week or so apart give tender leaves throughout the season. One ounce of seed for 100 feet of drill; $1\frac{1}{2}$ to 2 pounds per acre.

Southern Giant Curled

Highly esteemed in the South where the seed is sown in fall; plants used very early in spring as a salad. Pkt., 5c; oz., 10c; 1/4 lb., 20c; lb., 60c, prepaid.

Southern Broad Leaf

Upright growing, deep green leaves, fairly smooth. Most desirable for greens because of the ease of preparing and its pleasant pungent flavor. Pkt., 5c; oz., 10c; 1/4 lb., 20c; lb., 70c, prepaid.

White London

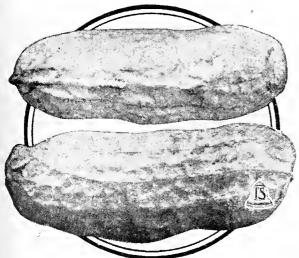

The leaves are light green, mild and tender when young; seed large, light yellow, and is used extensively for flavoring in pickles, preserves, etc. Oz., 10c; 1/4 lb., 20c; lb., 60c, prepaid.

Giant Curled Mustard.

Mustard Spinach - Tendergreen

This new vegetable is all the name implies, a very mild Mustard with a creamy Spinach flavor. Is of quick growth, the leaves are ready for cutting three to four weeks after planting. Dry hot weather does not injure the crop. In the South it is planted very extensively in the spring and fall months. All who like Mustard or Spinach will enjoy this new vegetable. Pkt., 5c; oz., 10c; 1/4 lb., 25c; lb., 65c, prepaid.

Peanuts-Mammoth Bush.

Okra or Gumbo

The Pods are Used in Soups, Stews and Salads.

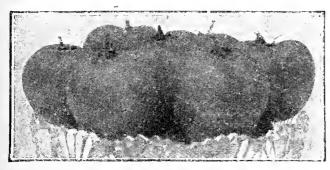

The pods should be picked each day while still tender, to be used in salads, soups and stews, also used in mixed vegetable soup. Has become famous as the gumbo in chickengumbo soup of the South. Plant seed after the ground is warm and dry, in drills 3 feet apart, covering ½ inch and thinning plants to 1 foot apart. One ounce of seed for 50 feet of row, 6 to 7 lbs. per acre.

WHITE VELVET .- Pods round, smooth, and of white, velvety appearance, very tender and of superior flavor. Ready for table in 50 to 60 days. Pkt., 5c; oz., 10c; 1/4 lb., 20c; lb., 65c, prepaid.

MAMMOTH LONG POD.—The best green sort. Extra long pods. Pkt., 5c; oz., 10c; 1/4 lb., 20c; lb., 60c, prepaid.

Okra.

Potato Seed Balls.

Peanuts Peanuts should be shelled before planting. Plant in rows 21/2 to 3

feet apart, dropping the nuts 10 inches apart in the row. Cover one or two inches. A sandy loam is the best soil for peanuts.

New Mammoth Bush

This peanut does exceedingly well in the North, making compact bushes 18 inches high, with heavy, erect stalks and large leaves. They are good producers, and do best on light, sandy soil. Large pkt., 10c: lb., 45c, prepaid.

Early Sweet

Let the children grow some peanuts. The early Sweet is very easy to raise and ripens very early. The nuts are exceedingly sweet and rich when roasted. Any light, sandy soil suits them. Large pkt., 10c: lb., 45c, prepaid.

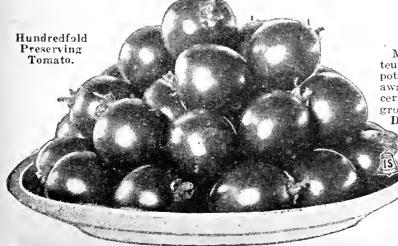

Potato Seed

(HYBRIDIZED)

Many of the choicest varieties have been originated by ama-Many of the choicest varieties have been originated by amateurs from Potato Seed. They have an equal chance with the potato specialist, as Nature does the work. Fame and fortune await the originator of varieties that are distinct and better in certain respects than those now on the market. Further, the growing of potatoes from true seed is very interesting work. Directions for planting on every packet. Pkt., 15c; 2 for 25c.

Preserving Tomato "Hundredfold"

Immensely productive and very delicious for preserving, for canning and sugaring. Will grow quickly and easily from seed grown in the garden, requiring practically no care whatever. Fruit is egg-shaped, about one inch in diameter, bright red, with solid flesh of fine flavor. Do not fail to plant some this year, you will never do without them. Pkt., 10c; ½ oz., 30c; oz., 50c; ¼ lb., \$1.50.

lb., 95c, prepaid.

Field of Isbell's Scleet Grand Rapids Lettuce. Note the Even Stand and the Perfect Heads. **Black Seeded** Simpson Splendid loose leaf or curled leaf Lettuce of great popularity with market and home gardeners. Grows large leaves, the inner ones forming a semi-compact forming a semi-compact head, very tender, crisp, fine quality and sweet flavor. Always reliable and easily grown; Ready for the market in 45 days, Pkt., 5c; oz., 10c; ¼ lb., 30c;

Superior Lettuce

CULTURE.—To have the best Lettuce, it should be kept growing rapidly. A light rich soil will do this, with plenty of sunlight and moisture. For the earliest, start seed in cold-frame in fall and protect through the winter, or start in hotbed in February or March. Transplant to open as soon as ground can be worked. For later use sow seed in open ground when season will permit in rows a feet enert. in rows a foot apart.

Lettuce will produce good firm heads only when the weather is cool and moist. Plant head lettuce early in the spring and again early in August, to head during the cool weather of Sept. or Oct.

Once onnce will sow 125 feet of drill and produce 3000 plants;

Isbell's 1936 Best Head Lettuce

Earliest, Surest Heading, Finest Flavor

fany people who have been unable to grow head Lettuce, will find here a sort which they can grow without difficulty. When planted early in the spring it quickly produces compact, solid heads, with outer leaves of bright green, while the inner leaves blanch to a rich, creamy yellow. while the inner leaves blanch to a rich, creamy yellow. The crispness, tenderness, and nutty flavor makes it a general favorite for home use while its hardiness and resistance to unfavorable weather commend it for market. Pkt., 10c; oz., 20c; 1/4 lb., 60c; lb., \$1.95, prepaid.

Isbell's Select Grand Rapids

This variety of curled or loose leaf Lettuce is especially adapted to, greenhouse culture in winter. In the great Lettuce growing centers this forcing sort is largely used, and the product is sold in such large quantities that prices are quoted by the ton. This superior Lettuce is of rapid, upright growth; retains its freshness a long time after being cut. Its quality is very desirable. The Isbell's Strain is especially selected for purity and is the best to be found. Ready for market in 42 days. Pkt., 5c; oz., 15c; ¼ lb., 45c; lb., \$1.25, prepaid.

Isbell's May King

Simpson's Early Curled

Excellent Early Head Lettuce

It is astonishing how quickly this Lettuce has made its way into popular favor. It grows very rapidly. The habit of growth is very compact; in fact, the plant is about all head. Outer leaves light green, showing a tinge of reddish brown, inner leaves bright yellow and of fine, rich, buttery flavor. Heads weigh from 12 to 16 ounces, and are so solid that they carry to market in perfect condition. Ready for market in 50 to 55 days. Pkt., 5c; oz., 15c; 1/4 lb., 45c; lb., \$1.35, prepaid.

Prizehead-for the Home Garden.

Early Prizehead

Very Popular for the Home Garden

This old standard variety is still the best of the large, thin-leaved sorts for the home garden. The leaves are very large, crimped, bright green tinged with brownish red at the edges and are exceedingly tender, crisp and sweet, forming a large loose head. Stands a long time without going to seed. Is known throughout the country and highly prized by every planter. Ready for table use in 45 days. Pkt., 5c; oz., 15c; ¼ lb., 35c; lb., \$1.10, prepaid.

New Wonderful or New York

ALSO CALLED "LOS ANGELES".—The Largest Heading Lettuce of All. This is the so-called "Dark Iceberg" of commerce, but not the true Iceberg. It frequently weighs 2 or 3 pounds. The heart is very solid, of pleasing light green color. The leaves are large and crumpled. It is pronounced the finest lettuce in cultivation for exhibition purposes, and for an all-season variety it stands unrivaled. Ready for market in 60 to 65 days. Pkt., 10c; oz., 15c; 1/4 lb., 50c; lb., \$1.75, prepaid.

Mixed Lettuce

MIXED LETTUCE SEED.—All kinds mixed. If not sown too thickly, will make a continuous crop. The best early and late varieties of curly leaf as well as head Lettuce. Pkt., 5c; oz., 10c; 1/4 lb., 30c; lb., \$1.00, prepaid.

Crisp, Sweet ISBELL'S LETTUCE Highest Quality

ICEBERG.—Splendid for the Home Garden. Pkt., 10c.

Market Gardeners' Net Price List on Request. Lettuce is the best of all salad crops, and a very appetizing and healthful food, especially during the warmer months. To have Lettuce at its best, it must be fresh and unwilted. It is so easy to grow and requires such small space in the garden, that every family should have a plentiful

such small space in the garden, that every lamby should have supply throughout the season.

Lettuce is a short season crop and if sown early, may be followed by bush beans, bects, carrots, Chinese cabbage, sweet corn, pickling cucumbers, endive, kohlrabi, parsley, late peas, radishes, turnips, etc. In this way you can grow two crops on the same piece of ground.

Isbell's Verifirst

THE EARLIEST AND BEST LEAF LETTUCE

A curled leaf variety suitable for forcing and out-door culture, very early, withstanding frost to a remarkable degree.

markable degree.

This new Lettuce is so good that we have so far been unable to find any other Lettuce that can in any way approach it. It is also more tender and sweeter and has a more delicious, nutty, creamy flavor. The leaves are heavily fringed, much crumpled and blistered, of light green color. We recommend it for home garden and to all growers who cater to a "fancy trade." Ready for market in 38 days. Pkt., 10c; oz., 20c; ½ lb., 60c; lb., \$1.95, prepaid.

Iceberg A Winner for the Home Garden

A beautiful and easily grown Lettuce of the crisp-head type. A beautiful and easily grown Lettuce of the crisp-head type. One of the very best summer-growing varieties. The leaves are wavy with fringed edges, tinged at margins with brown. Makes a firm, hard head, blanching the heart leaves to a creamy whiteness. The quality is very good, sweet, and exceedingly crisp.

It is ready for the table in 55 to 60 days, and is one of the best varieties for market and the home garden. Pkt., 10c; oz., 15c; ½ lb., 40c; lb., \$1.25, prepaid.

Crisp-as-Ice

Decidedly solid heading and slow to shoot to seed. The plants are very compact and can be set close together. Interior of heads is remarkably well blanched and the quality is exceedingly buttery, tender and sweet. The leaves are so brittle as to suggest the name "Crisp-as-Ice." The outer leaves are variegated brown and green. They are very broad and green. They are very broad and thick, somewhat crumpled and thick. blistered. Desirable for home garden. Ready for use in 55 to 60 days. Pkt., 10c; oz., 20c; ¼ lb., 50c; lb., \$1.75, prepaid.

> California Cream Butter,

California Cream Butter

One of the best Summer varieties of head

Lettuce, producing large, solid heads of globular form, which are compact, firm, and well blanched, of beautiful appearance; crisp, rich, decidedly buttery flavor. The leaves are broad, very thick, blistered and crumpled. Ready for market in 55 days. Pkt., 5c; oz., 10c; 1/4 lb., 30c; lb., 95c.

Recommended for Market and Home Garden,

Home Garden.

Its table quality is perfection itself, having a sweet, rich flavor, and its ability to remain a long time in edibie condition is one of its leading characteristics. It forms large heads, as an outdoor Lettuce ONLY, and may be planted from earliest Spring to late in the Fall. The outer leaves are large and broad, somewhat blistered and crumpled, with frilled edges, color clear light green. A sure heading sort standing the heat well. Ready for the market in 55 days, Pkt., 5c; oz., 15c; ½ lb., 40c; lb., \$1.20, prepaid.

New Creamy Heart

New and very desirable sort for early planting, where a butterhead variety is wanted for market and home garden. Produces large, solid heads that are crisp and of rich buttery flavor. The leaves are thick, crumpled, green color without brown spots or brown edge. Pkt., 10c; oz., 20c; 14 lb., 50c; lb., \$1.75, prepaid.

Early White Self-Folding Cos

ROMAINE LETTUCE

Cos Lettuce is distinguished by long narrow oval leaves which grow upright and fold into loose heads. The midribs are white and prominent. The inner leaves are light green, nearly white and are very crisp and tender. The heads will blanch better if tied loosely near the tops with soft twine. Makes a delicious Romaine Salad. Pkt., 5c; oz., 15c; ½ lb., 40c; lb., \$1.20, prepaid.

Selected Big Boston

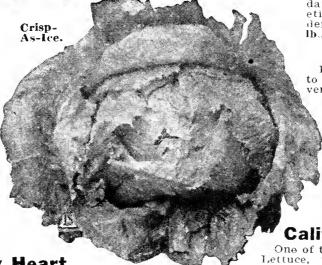

ONE OF THE GREATEST FAVORITES

A large cabbage variety, forming big, yet compact, tender and crisp heads, of rich yellow color inside and good quality when well grown. It is adapted to open ground for summer and fall use, or to growing in frames or to force in cool greenhouses. Withstands adverse weather conditions. Ready for market in 55 days. Pkt., 5c; oz., 15c; 1/4 lb., 40c; lb., \$1.20, prepaid.

Chicken Lettuce

Great for Poultry, Rabbits, etc.

Your poultry needs "green" food and this variety of Lettuce is just the thing you will want to grow for this purpose. It is a genuine Lettuce which will yield as much or more chicken or rabbit feed than any plant you may have used for "greens." When once cut it starts to grow again and makes a succession crop. Pkt., 5c; oz., 10c; 1/4 lb., 30c; lb., 90c, prepaid.

Isbell's Pedigree Muskmelon Seed

NO BETTER SEED IN THE LAND THAN OURS. MICHIGAN GROWN MUSKMELONS ARE KNOWN FOR SUPERIOR QUALITY

CULTURE.—Muskmelons or Cantaloupes like a warm rich soil, quite sandy. Do not plant until the ground is thoroughly warm, latter part of May or first of June. Plant seed in hills 4 to 6 feet apart each way, 8 or 10 seeds in a hill, and when danger of insects is past, thin to 3 or 4 plants. Give shallow cultivation until vines cover the ground.

For melon beetles and melon lice, use "Ever Green." To kill bugs, dust with "Slug Shot." See page 100.

ONE OUNCE OF SEED FOR 60 HILLS; 2 POUNDS TO 3 POUNDS PER ACRE.

Isbell's New 1936 Large Early

Earliest and Sweetest Big Melon

Earliest and Sweetest Big Melon

In this big handsome honey-flavored Muskmelon, we have an ideal sort for the early market and home garden. Here is an early sort which grows big, is one of the earliest to ripen and has the sweetest flavor imaginable in a melon. Ripens only a few days later than our famous Lake Champlain, but the size is nearly that of Bender's Surprise, averaging 5 to 6 lbs. each. Oval in shape and the outside color is light green overlaid with silvery netting. The seed cavity is very small and the flesh is very thick, juicy, of a deep orange color, and is surprisingly sweet and aromatic. For several years we have carefully selected our stock for earliness, size, and flavor so that we can highly recommend this melon for home use and local markets. Pkt., 10c; oz., 20c; 1/4 lb., 50c; lb., \$1.75, prepaid. lb., 50c; lb., \$1.75, prepaid.

Isbell's Lake Champlain

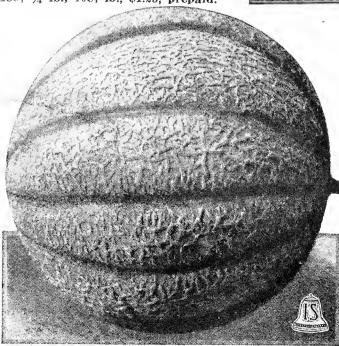

Famous for Earliness.

This is the earliest Muskmelon of good This is the earliest Muskmelon of good quality and it is still unbeatable as a first early sort either for home or market. The vines are hardy, vigorous and productive. The melons are nearly round, medium in size and well netted. The flesh is thick, fine grained and very sweet, of a rich deep golden yellow color. No matter what other sorts you grow, you should have some Lake Champlain as they will ripen at least a week before any other sort. Pkt., 10c; oz., 15c; ½ lb., 40c; lb., \$1.25, prepaid. prepaid.

Ohio Sugar

The Sweetest Green-Fleshed Melon.

A Green Fleshed Tip Top.—This is an absolutely distinct and very superior Melon. It is the sweetest and most luscious green fleshed cantaloupe on the market, of exquisite texture, sugary, juicy and tender. Of desirable size, round, inclined to oval in shape, distinctly ribbed and thickly netted—color of skin gray-green. Pkt., 5c: oz., 15c; 1/4 lb., 40c; lb., \$1.25, prepaid.

Isbell's New 1936 Large Early.

Ohio Sugar.

Honey Rock

Isbell's

Lake Champlain.

Also Called Sugar Rock

See color illustration on inside front cov-See color illustration on inside front cover and full description on page 2. Honey Rock has four characteristics which are outstanding. First, quality—second, productiveness—third, ability to stand shipping and handling—fourth, striking appearance. This Melon has deep orange flesh with a flavor different from other sorts, which can only be appreciated by tasting. It has won its way so far, mostly on account of its wonderful sweetness. Pkt., 10c; oz., 20c; 14 lb., 50c; lb. \$1.50; 5 lbs., \$6.75. prepaid.

HOTKAPS for early crops.—See page 98.

Isbell's Golden Hearts

Extra Fine Quality

A main crop basket melon of the finest quality. The flesh is thick, very tender, and of a beautiful golden salmon color. It is of excellent flaving of grayish color.

Ishell's Cold The Extra Fine Quality

A main crop basket melon of the finest quality. The flesh is thick, very tender, and of a beautiful golden salmon color. It is of excellent flaving of grayish color.

Isbell's Golden Hearts are nearly round, averaging five inches in diameter, and weigh about one and three-quarter pounds apiece. It is a splendid market and shipping Melon. Ripe fruits in 90 days. Pkt., 5c; oz., 15c; ¼ lb., 40c; lb.,

Tip Top

The Largest Main Crop Melon.

The testimony of all who use Tip Top is that every Melon produced, whether big or little, early or late, is a good one; sweet, juicy, fine flavor, firm fleshed and eatable to the outside coating. Its appearance on the market is very attractive—sells on sight. The fruits are of large size, nearly round. Flesh rich, deep salmon, sweet and spicy. Ripe fruits in 90 days. Pkt., 5c; oz., 15c; 1/4 lb., 35c; lb., \$1.00, prepaid.

Extra Early Hackensack

A Standard Early Market Sort

Ready for market fully ten days ahead of the well-known old Hackensack. Fruits round, flattened at the ends, irregularly ribbed and heavily netted. Flesh green, thick, of excellent quality and flavor. One of the earliest, hardiest and most prolific green-fleshed sorts. Ripe fruit in 75 days. Pkt., 5c; oz., 10c; ¼ lb., 30c; lb., 90c, prepaid.

MR. GEO. B. SHELTON OF INDIANA writes: "Isbell's Honey Rock Melon certainly is fine. I have the best melon field I ever raised."

ISBELLS' CHOICE MUSKMELONS

Selected Osage

MICHGAN IS THE HOME OF THE OSAGE MUSKMELON

OSAGE MUSKMELON

We give particular attention to our strain of Osage Melon, each year carefully selecting our stock seed, so that today our seed is truly a pedigreed strain. Special care has been exercised to increase thickness of the flesh, and to develop the rich, deep salmon color and fine flavor. The fruit is medium in size, oval in shape, slightly ribbed, dark green in color, and just nicely netted. The Osage is a favorite Muskmelon on the Jackson market on account of its rich, delicious flavor and superior quality. It is considered one of the best general purpose Melons in cultivation. Ripe fruits in 75 days. Large Pkt., 10c; oz., 20c; 1/4 lb., 50c; lb., \$1.50, prepaid. prepaid.

OSAGE—REGULAR STOCK

This is field-run seed grown from selected stock and is equal to the general quality of seed offered, and much superior to the ordinary stock. Pkt., 5c; oz., 10c; 1/4 lb., 30c; lb., 90c, prepaid.—Not prepaid, 5 lbs., \$1.00.

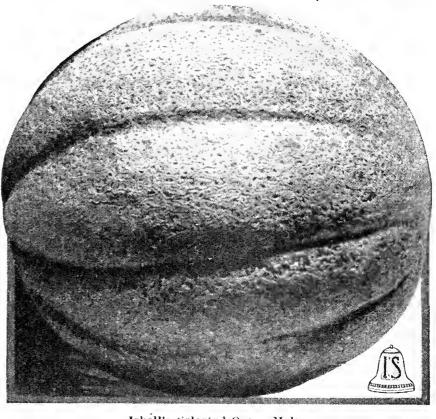

Extra Early Osage

WHITE SEEDED.—An extra early strain of Osage for market gardeners who depend on early maturity of Melons for top prices. A trifle smaller in size than above strain, well netted, of superior flavor, and a little earlier. As a long distance shipping Melon it cannot be excelled. One prominent Melon grower near Jackson has shipped them to nearly every state in the Union guaranteeing arrival in good conin the Union, guaranteeing arrival in good condition. Pkt.. 10c; oz., 20c; 1/4 lb., 50c; lb., \$1.50.

Bender's Surprise

The Popular Market Melon
Exquisitely fine flavor, large size and earliness combine to make this Melon a great favorite. The Melons are of oval shape; flesh deep orange, very thick, deliciously sweet and of high flavor. Grows fairly large, weighing up to 10 lbs. each. The Melons are very firm, keep for a week after being picked. Selected seed grown in Michigan. Pkt., 10c; oz., 20c; 1/4 lb., 50c; lb., \$1.50. The Popular Market Melon

HOTKAPS for early

Isbell's Selected Osage Melon,

Hale's Best A SUPERIOR SHIPPER

A SUPERIOR SHIPPER

The earliest of the Rocky Ford type, A splendid shipping Melon with salmon flesh of excellent quality. Medium early, of good size and a good yielder. The flesh is of a salmon-pink clear to the rind, which is well ribbed and netted, The quality is uniformly good; in flavor it is excellent, being sweet and aromatic. Netted Gem Rocky Ford

This Melon surpasses all others in its delicious fragrance. The flesh (the Melon being nearly solid) is of a rich salmon. The quality is first-rate when the Melon is thoroughly ripe. It grows from 20 to 28 inches in length and is very prolific. It is essentially a home garden variety. Pkt., 5c; oz., 15c; 1/4 lb., 45c; lb., \$1.35. prepaid.

Famous Melon "Honey Dew"

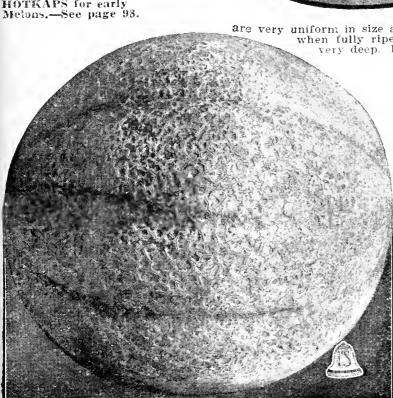

The Melon is nearly white, turning to a lemon-yellow when ripening. Surface is absolutely smooth When cut open revealing the crisp, green flesh, the contrast of colors is beautiful. Indescribably sweet, with a distinctive, delightful aromatic flavor. Fruits are a nice size, weighing 8 to 10 pounds; flesh is very thick. The name Honey Dew well describes it. Ripens rather late. Pkt., 10c., oz., 20c; 1/4 lb., 50c; lb., \$1.50.

Milwaukee Market Melon FOR MARKET AND THE HOME GARDEN

We do not know of many large Muskmelons or Cantaloupes quite equal to the Milwaukee Market. It has a fine, rich, aromatic flavor. Slightly oval in shape, ribs fairly prominent and heavily netted. The flesh is a deep salmon color, thick, firm and solid. Uniform in size, packing nicely ten to a crate, Pkt., 5c; oz., 10c; 1/4 lb., 30c; lb., \$1.60, prepaid.

Mango Melon

Also called Vine Peach or Vegetable Orange, Fruit is size and color of a medium orange—used for pickles, pies and preserving. Easily grown and wonderfully prolific. Directions for preserving, etc., on every packet. Pkt., 10c; oz., 25c; ½ lb., 75c.

Bender's Surprise.

ISBELL'S WATERMELONS

PLANT MICHIGAN GROWN WATERMELON SEED FOR EARLY MATURITY. BE FIRST ON THE MARKET.

Northern grown seed should be planted because it has

Isbell's Earliest and Sweetest.

Isbell's Earliest and Sweetest

The Most Valuable Home-Garden Watermelon.

Very early and deliciously sweet. It fairly melts in your mouth. The size is medium, averaging from 10 to 15 pounds. The flesh is scarlet, of extra fineness and sweetness. Entirely free from stringiness. This variety is one of the most prolific known, and as the plant is of hardy and vigorous growth we are not surprised that this Melans has become

not surprised that this Melon has become extremely popular. It is a cross between Mountain Sweet and Cole's Early, combining the best qualities of both. Fruits are of attractive appearance, the rind being mottled with several shades of green. Ripe Melons in 75 days. Pkt., 10c; oz., 15c; 4 lb., 40c; lb., \$1.20, prepaid.—Not prepaid, 5 lbs., \$5.00. \$5.00.

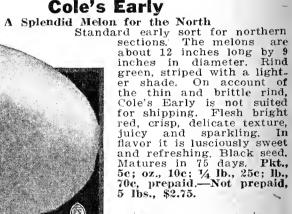

Excellent for Home Market.

This old standby is our best general cropper for the home market; has too thin a rind for shipping. Ripens early; fruit oblong, large size, rind light green, mottled and veined; flesh bright scarlet, solid to the center, melting and delicious. A great favorite with our customers in the central and northern states. Seeds white. Matures in 75 days. Pkt.. 5c; oz., 10c; 1/4 lb., 25c; lb.. 70c, prepaid.—Not prepaid, 5 lbs., \$2.75.

If you want the biggest and sweetest watermelons you ever grew here is one that will surprise you. Grows to the immense size of 40 to 50 lbs., and is one of the most prolific of all varieties. Often one hill produces 6 or 7 full size melons. The luscious, dark green, nearly round melons sell well on the market and the melting sweetness of the crisp bright red flesh brings the buyers back for more. The fine grained flesh is always free from stringiness and does not become soft or mushy. Pkt., 10c; oz., 15c; 1/4 lb., 40c; lb., \$1.20, prepaid. Not prepaid, 5 lbs for \$5.00.

Cole's Early

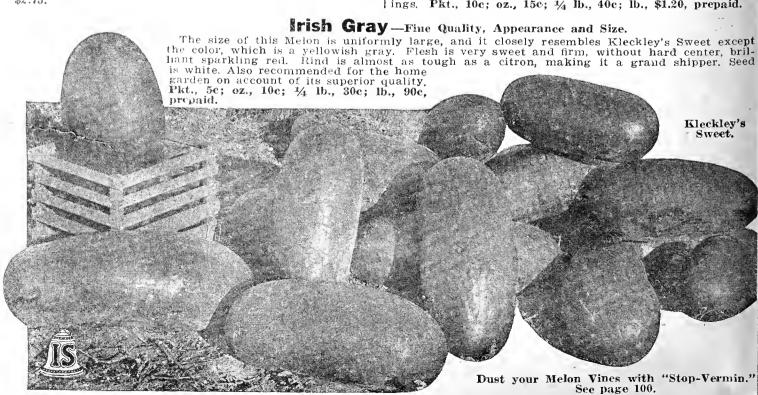

Verly Early

Irish Gray-A Fine Watermelon. watermelon.

One of the best early watermelons from a quality standpoint. The melons are oblong and of an even dark green color. Flesh is deep red, exceptionally crisp, and tender as well as most delicious in flavor. A very good yielder and has given excellent satisfaction in the North for the market as well as home use. The seed is small, black with brown markings. Pkt., 10c; oz., 15c; 1/4 lb., 40c; lb., \$1.20, prepaid.

WATERMELONS

Harris' Earliest

THE BEST SHIPPER IN THE EARLY CLASS

The originator of this Melon (Mr. B. F. Harris), says: "For 20 years we have been trying to find an extra early Watermelon, with which we could beat all competitors, and one that would be the first on the market, and at last our efforts are crowned with success." The general shape and appearance of the Harris are shown in the illustration. The skin is mottled with green and white. The flesh is red, sweet, juicy and crisp. The seeds are black. The weight averages 15 to 20 pounds. Its table quality is first-class. Matures in 75 days. Pkt., 5c; oz., 10c; 1/4 lb., 25c; lb., 70c, prepaid.—Not prepaid, 5 lbs., \$2.75.

Kleckley's Sweet or Monte Cristo

ISBELL'S EXTRA SELECT STOCK

This Melon has become immensely popular because of its superb flavor and surpassing crispness. On account of its ness and tenderness it is not recommended for shipping, but for nearby markets and for home consumption it has no superior. Shape is accurately shown in illustration; average length is about 18 to 20 inches, The large fruits taper slightly toward the stem end. Color very dark green, almost black. Quality is superb. Seeds are white and placed close to the rind, outside of the big, solid, bright scarlet heart. Season is medium early; nothing can be finer for the latitude of Pennsylvania, Ohio, Indiana, Michigan, Illinois, etc.

michigan, Illinois, etc Matures in 80 days Pkt., 5c; oz., 10c; ½ lb., 25c; lb., 80c, pre-paid.—Not prepaid, 5 lbs., \$3.25. Illinois, etc. n 80 days. oz., 10c; 1/4

Fordhook Early

An early sort that is popular in the eastern states. Excellent quick growing melon of good size, oval in shape and of fine quality. Light green, striped darker green. Very sweet and tender. Seeds white. Pkt., 5c; oz., 10c; ry sweet and tender. Seed lb., 25c; lb. 70c, prepaid.

New "Winter" Melon

A New Long-Keeping Watermelon, Not a Citron

A sweet, luscious Watermelon for your Thanksgiving dinner The fruits are of medium size, round, pale fun size, round, pale yellow when ripening. Flesh bright red, crystaline, sweet as honey. tailne, sweet as honey. This melon is a very heavy yielder. In keeping qualities it excels all other kinds. Seeds very small, black. Pkt., 10c; oz., 15c; ¼ lb., 35c; lb., \$1.15, prepaid.

Halbert Honey-Fine for the Home Garden.

Stone Mountain

The Quality Melon. Also called Dixie Belle or Lipsey

It originated in Georgia and was named after the Great Stone Mountain in that state. The melons are very large, almost round, rich green. The flesh is bright scarlet, extremely sweet and of finest quality, solid through, almost all heart and but very few seeds. When eaten once, it is not forgotten—the finest and sweetest flavor of them all. On the southern markets it outsells all other melons, We offer Michigan grown seed, best for the states north of the Mason-Dixon line. Pkt., 5c; oz 10c; ½ lb., 30c; lb., 95c, prepaid.—Not prepaid, 5 lbs., \$4.00.

Tom Watson

A great shipping melon. This melon has surprised everybody by its sudden rise in popularity. It is a long, green variety covered with a fine netting, giving it a most attractive appearance. The fiesh is of most superb quality and intensely red color. The rind is thin, but hard and tough so that it is unequaled as a market and shipping sort. Seed is white, spotted brown. The melons are of large size and heavy, about 24 inches long and 10 to 12 inches through. Matures in 85 days. Pkt., 5c; oz., 10c; ¼ lb., 25c; lb., 75c, prepaid.—Not prepaid, 5 lbs., \$3.00.

Citron

This Melon is used exclusively for making This Melon is used exclusively for making preserves. The flesh is thick and clear white, and makes preserves of excellent quality. Cultivation similar to watermelons. There are two varieties, one with red seed and the other with green. The green-seeded variety is called Colorado Preserving. We offer either kind. Pkt., 5c; oz., 10c; 1/4 lb., 30c; lb., \$1.00, preserving. prepaid.

THE BEST AND LARGEST
"I have been using Isbell's Seeds for 12 years and I find them the best always. I have the reputation of raising the best melons in Gratiot County, best in flavor and size, and I plant Isbell's Seeds to produce them."—R. L. SAILOR, North Star, Michigan.

Yellow

ISBELL'S PERFECT EVERGOOD RED GLOBE. RED GLOBE.

ONION SEED

MORE DOLLARS worth of onions can be grown on an acre than almost any other crop. They are most suited to produce big crops under intense cultivation. The small grower has the same chance as the big grower, and many a housewife has made pin money and more from onions.

THE SEED is all-important—many poor strains of onion seed are on the market. They will grow onions—but all sorts and sizes. Buy your seed from a reliable firm.

CULTURE.—Be very careful about preparing the soil. It should be well pulverized and smooth. The richer the soil, the bigger the crop will be. Sow the seed as early as the ground can be worked in rows 12 to 15 inches apart, covering one-half inch deep. When plants are up cultivate thoroughly, keep free from weeds and thin out to prevent crowding. One ounce will sow about 150 feet of drill; 4 to 6 pounds per acre:

Isbell's Michigan Yellow Globe

BRIGHAM STRAIN

Also called Brigham's Long Keeper—See color illustration on page 2.—Another year has again demonstrated the value of this handsome, heavy yielding, long keeping yellow globe onion. While many fields of other sorts were badly diseased and ripened prematurely, resulting in poor yields of small sized bulbs, this variety came through, generally with little damage and yielded paying crops of large well matured onions. Bulbs of this sort are extremely hard and come out of storage in the spring as solid as when they went in. In shape they are nearly perfect globes and the color is a rich amber or deep straw-color. These onions sell best as there is a marked preference for them by commercial onion

preference for them by commercial onion buyers. We offer a superior strain of this seed grown by ourselves here in Michigan. Pkt., 10c; oz., 30c; ½ lb., 95c; lb., \$3.25.

Southport

Similar in shape to the her Southport Globe Southport Glos but differing

Yellow Globe

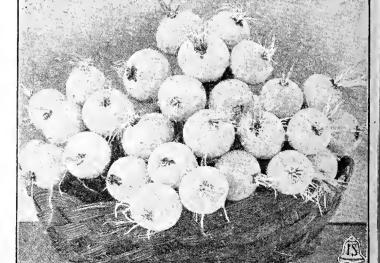

Yellow Globe

other Southport Globe Onions, but differing in color. Is entirely distinct from the Danvers type, being more globe shaped. Flesh is white and of mild flavor; handsome in appearance, large in size, a heavy cropper and an excellent keeper. We sell large quantities of seed of this variety to Onion growers who ship in carloads to Eastern markets. Matures in 125 days. Pkt., 5c; oz., 25c; 1/4 lb., 80c; lb., \$2.75.

Danvers

Our strain of Yellow Globe Danvers is unsurpassed. It forms a large, deep, heavy bulb with small neck, but is not quite as oval in form as the Southport type of Globe Onions. The flavor is rather mild. It matures early and yet is a splendid keeper. Its yielding qualities are equal to the best. Matures in 125 days. Pkt., 5c; oz., 25c; ¼ lb., 80c; lb., \$2.75, prepaid.

Danvers.

Isbell's Early White Sugar Ball.

Isbell's Evergood Red Globe Onion

THE HANDSOMEST RED GLOBE IN CULTIVATION

Isbell's Evergood has been Isbell's Evergood has been one of our leading specialties for many years. Bulbs are perfectly globe-shaped and uniformly small necked, which insures thorough drying out near the top where nearly all the trouble originates in keeping onions. Color is deep blood red. Having been raised so long in a favorable climate. red. Having been raised so long in a favorable climate, it has formed the habit of early ripening, and yet grows to full marketable size. The Evergood is a magnificent keeper. Matures in 10 days. Pkt., 10c; oz., 30c; 1/4 lb., 95c; lb., \$3.25, prepaid.

Southport Red Globe

The Standard Red Onion

Grown from hand-picked bulbs, Grown from hand-picked bulbs, only bulbs which are perfect in size and shape being used for seed. Red Globe onions are just the size to command the highest price. They are more uniform in size, darker colored skin, heavier and better keepers than any strain of Southport we have ever seen. Keeps well until spring. Matures in 135 days. Pkt., 5c; oz., 25c; ½ lb., 80c; lb., \$2.75, prepaid.

Isbell's Early White Sugar Ball

The Earliest and Mildest Bunching Onion

For years there has been an inquiry for an extremely early onion to be sold in the green state in bunches. Isbell's Early White Sugar Ball will fill the bill completely. There is no onion seed known that will produce an onion one inch or more in diameter quicker than this. This is the earliest of all the White Onions, and is especially adapted for early bunch Onions and for pickling. It is so sweet and mild flavored we have named it "Sugar Ball." Ready for use in 90 to 95 days. Pkt., 10c; oz., 25c; ½ Ib., 80c; lb., \$2.75, prepaid.

Onion Seed made an extremely short crop. Order early. Prices quoted are subject to change.

RELIABLE ONION SEED

MR. R. H. RENO, ONE OF THE LARGEST ONION GROWERS IN MICHIGAN, writes as follows: "I have bought large quantities of Onion Seed from your firm for the past several years and have always found the stock to be entirely satisfactory. I plant around 300 acres of Onions every year and of course I must have good seed."

ONION SEED

For the Home Garden.—For very early use grow Mountain Danvers, Isbell's Sugarball and White Portugal, especially in sections where seasons are short and cool. For main crop we recommend Prizetaker, Isbell's Yellow Globe and Perfect short and cool. For Prizetaker, Isbell's White Globe.

For Pickling and Salads use Isbell's Sugarball, White Queen, and White Portugal.

Market Gardeners plant largely of the Globe types, such as White Globe, Yellow Globe and types, such Red Globe.

For Growing Sets.—The White Portugal, Mounin Danvers and Ebenezer are most generally

Onion Seed made an extremely short crop. Order early. Prices quoted are subject to change,

New Early Yellow Globe

Long Keeper-Ripens Early.

Here is a new early type of yellow globe onion of Connecticut origin which matures fully three weeks ahead of Southport and other similar sorts. weeks ahead of Southport and other similar sorts. This is a fine globe-shaped onion with a beautiful yellow color. It is a splendid winter keeper and because of its thick skin, keeps in storage, better than most early sorts. The bulbs do not quite reach the size of some of the later sorts but it yields nearly as well and is a more sure yielder because it is earlier. Pkt., 10c; oz., 30c; 1/4 lb., 90c; lb., \$3.00, prepaid.

Isbell's Perfect White Globe

Finest White Globe Onion in Existence

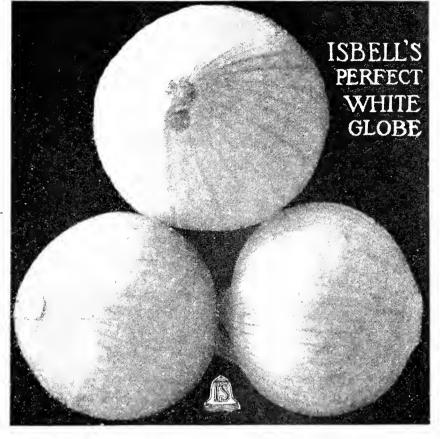

Finest White Globe Onion in Existence

For many years this has been one of our great specialties on account of the high prices at which the bulbs can be sold if they are fancy stock.

As a result our strain is especially attractive. The skin is of purest paper whiteness Flesh is crisp, fine grained, snowy white and of mild flavor. Yields abundantly, producing handsome and uniformly globe-shaped bulbs. Matures in 120 days. Pkt., 10c; oz., 35c; ¼ lb., \$1.10; lb., \$3.75, prepaid.

Mountain Danvers

The Best Keeping Onion of All. Heavy yielder. Ripens early and is very hard and solid, without any thick neek. Is of good size, of slightly flattened globe shape like the Danvers Yellow Globe, but a darker yellow color. The crop ripens evenly, without any scallions, and will keep with less shrinkage or loss from any cause than any other Onion. We recommend it for market and home garden. Pkt., 5c; oz., 25c; ¼ lb., 89c; lb., \$2.50, prepaid.

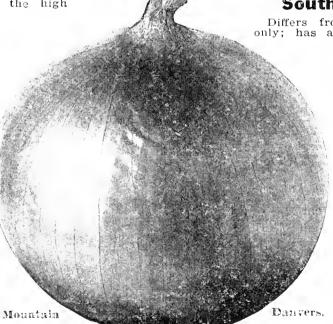

Southport White Globe

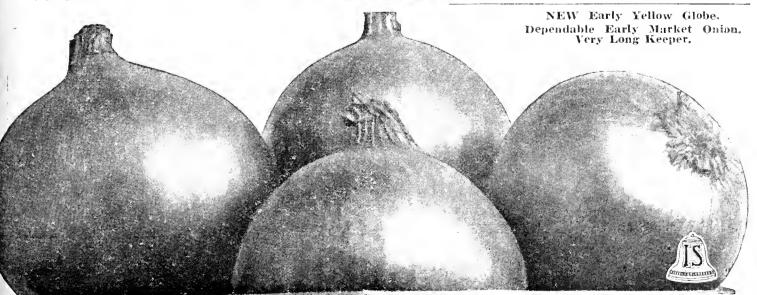

Differs from other Southports in color only; has all their general excellence. A favorite, owing to its beautifut Southports command a big price on Eastern markets. The bulbs are of good size, splendid globe shape, pure white in color. Matures in 125 days. Pkt., 10c; oz., 30c; ½ lb., 95c; lb., \$3.25, perpaid. color, shape and attractiveness.

Riverside Sweet Spanish

The Largest and Sweetest Onion

This is an American grown strain of the large Sweet Spanish Onion, producing very large, globe-shaped Onions of light yellow color, having an extremely mild, sweet flavor. Has quickly become very popular in many sections. Said to be the largest of all onions and the mildest as well. Extra heavy yielder. Pkt., 5c; oz., 20c; ½ lb., 60c; lb., \$2.00, prepaid.

ONION SEED—Continued

Prizetaker—Largest Size, Very Mild

This variety produces very large, handsome Onions of bright yellow color and mild flavor. Single bulbs grown under favorable conditions sometimes weigh three pounds each. The Onions are globe-shaped and of very mild, pleasant flavor. These Onions can be grown with perfect success by sowing the seed in the ordinary way in the open ground. For the largest and finest specimens start the seed in boxes in February or March, and transplant. Pkt., 10c; oz., 25c; 1/4 lb., 75c; lb., \$2.35, prepaid.

This new Onion resembles White Welsh but the edible stems are whiter and much longer. The flavor is very mild and the onions remain tender and crisp and hold the pure white color. Seed may be sown very early in the spring or in midsummer or fall to get onions very early the following spring. It is hardy and trenches well. This is the finest perennial bunch Onion for a critical market demanding a fancy grade. Pkt., 10c; oz., 20c; ¼ lb., 75c; lb., \$2.35, prenaid. paid.

Valencia Sweet Spanish

An excellent very large sweet yellow onion that is being grown commercially on a large scale. The onions are globular, with golden yellow skin. Flesh is white, exceedingly mild and sweet. Heavy yielder. Pkt., 10c; oz., 30c; ¼ lb., 90c; lb., \$3.25, prepaid.

Extra Large Red Wethersfield

Persistent selections of bulbs planted for seed have given us a small-necked sure ripening strain. Though well flattened, the solid Onions are thick through. The outer skin is a deep rich, purplish red; flesh white, lightly tinged with pinkish rose. Its splendid keeping qualities make it easy to hold crops for late winter markets. Standard red Onion in the Northwest. Pkt., 5c; oz., 25c; ½ lb., 70c; lb., \$2.25, prepaid.

paid.

Yellow Bermuda

Bermuda Onions are noted as the mildest and sweetest of all onions. They are flat in shape and make fine large bulbs on good soil. The Yellow Bermuda is of a clear light straw color. Early enough to mature from seed where other onions can be grown successfully. Pkt., 10c; oz., 25c; 1/4 lb., 70c; lb., \$2.25, prepaid.

Crystal White Wax

This is very similar to the Yellow Bermuda, except in color, which is a clear, waxy white. Also makes fine green onions as they are so mild and tender. For Bermuda onion plants, see below Pkt., 10c; oz., 25c; 1/4 lb., 70c; lb., \$2.25, prepaid.

Bermuda

Onions Grown

Ebenezer or Japanese

The flesh is white, firm and of a very delicate flavor. The Onions are large, somewhat flattened, yellow skinned and have very small tops and mature early. They will keep sound and hard all winter. Those who want a nice mild Onion for their own use would do well to try the Ebenezer. It has such a reputation for quality that the Onions of this variety command much higher prices than other kinds. Used extensively for growing onion sets. Pkt., 5e; oz., 20c; ½ lb., 60e; lb., \$2.00, prepaid.

White Portugal or Silverskin

A mild and pleasant flavored Onion of somewhat flattened shape when matured. It is very popular for family use, and one of the best for pickling, also for slicing and boiling. A favorite with many when young as a salad or bunching onion. Matures quickly and may be sown as late as June to produce small pickling Onions by late fall. Pkt., 10c; oz., 25c; 1/4 lb., 75c; lb., \$2.50, prepaid.

Early White Welsh Onion

A very hardy perennial variety of Onions used only for bunching or for early green Onions.

From fall-sown seed, the shoots attain marketable size very quickly and sell at top prices before the green Onions grown from sets are brought to the market. Much superior to the Egyptian Onion. Sow seed thinly in rows 12 to 16 inches apart. Seed may be sown in summer or early fall. Pkt., 5c; oz., 20c; 1/4 lb., 60c; lb., \$1.90, prepaid.

White Queen

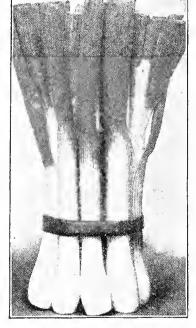

For Pickling Onions

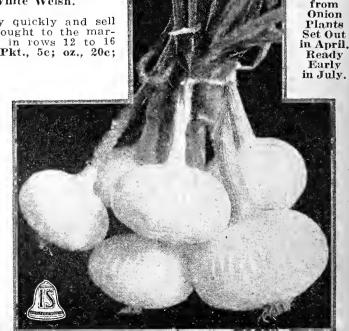

A very good early maturing pickling variety. The Onions are somewhat flat in shape, pure paper-white, from 1 to 1½ inches in diameter, of very mild and delicate flavor. Fine for bunching for early market, also for pickling. Gardeners plant largely of this variety for early bunching Onions. Ready to use in 90 to 95 days. Pkt., 5c; oz., 20c; ½ lb., 55c; lb., \$1.90.

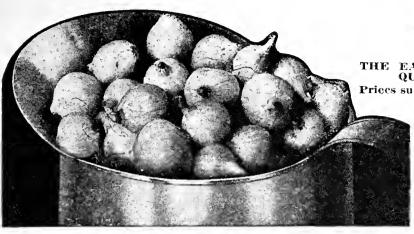

Bermuda Onion Plants

Weight her crate about 40 pounds. Can supply only up to May 10th. Not less than 200 plants on any order.

Bottom Onion Sets.

YELLOW BOTTOM SETS.—Medium size, fine dry sets. Planted extensively for market or home use. Pt., 15c; qt., 25c; 4 qts., 75c, prepaid.—Not prepaid: peck, 75c; bu., \$2.65.

RED BOTTOM SETS.—This variety is very popular in the northern states. A good keeper. Pt., 15c; qt., 25c; 4 qts., 75c, prepaid.—Not prepaid: peck, 75c; bu., \$2.65.

WHITE BOTTOM SETS.—Market gardeners plant these white sets in very large quantities for green onions. Pt., 20c; qt., 30c; 4 qts., \$1.00, prepaid.—Not prepaid: peck, 85c; bu., \$2.85.

EBENEZER or JAPANESE SETS.—In great favor for growing large marketable Onions from sets. Pt., 15c; qt., 25c; 4 qts., 80c, prepaid.—Not prepaid: peck, 75c; bu.. 25c; 4 \$2.65.

POTATO ONIONS.—Also called English Multiplier. Valuable for bunching or an early crop of bulbs. The smallest sets make fine, large bulbs; the large bulbs, when planted, immediately multiply, each bulb producing 6 to 12 stalks for bunching. They are of mild flavor. Pt., 25c; qt., 45c; 4 qts., \$1.50, prepaid.

PARSLEY

CULTURE.—One ounce to 125 feet of drill. Soak the seed a few hours in lukewarm water and sow early in the spring in drills one foot apart. Thin out to 6 inches. A few seeds sown in onion rows take up no space, Used extensivefor garnishing and scasoning,

For winter use, transplant in the cold-frame in carly autumn, or a few plants may be placed in pots or boxes and kept in the kitchen window for convenient use in winter. Where the winters are not very cold the seed may be sown in early autumn in the open ground.

Isbell's Emerald

Leaves extra well curled and of beautiful rich dark green color. Plant is very dwarf, making it suitable to plant for a border in your garden. Ready to use in 70 to 75 days. Pkt., 10c; oz., 15c; 1/4 lb., 40c; lb., \$1.25, prepaid.

Champion Moss Curled

The well known and most popular variety. We have a choice selected strain with beautifully crimped and curled leaves. Ready to use in 75 to 80 days. Pkt., 5c; oz., 10c; ¼ lb., 30c; lb., 90c, prepaid.

Hamburg Turnip-Rooted

The root, which resembles a small parsnip, is the edible portion of this variety. Extensively grown and used for flavoring soups, etc. Foliage same as the plain Parsley. Ready to use in 85 to 90 days. Pkt., 5c; oz., 10c; 1/4 lb., 30c; lb., 90c.

PARSNIPS

CULTURE.—Parsnips do the best in deep, rich, sandy soil and on muck or peat soils. As the seed is slow to germinate it should be sown as early as possible in drills 2 to 3 feet apart; cover ½ inch deep and press the soil firmly over the seed; give frequent cultivation and thin the plants to stand 4 or 5 inches apart in the rows. One ounce will sow 125 feet of drill; 5 to 6 pounds to the

Among the edible roots the Parsnip ranks high for usefulness. There are but few people who do not relish its rich, sweet flavor.

The roots are improved by frost and should not be dug until late fall, then store them for winter use.

HOLLOW CROWN or LONG SMOOTH.—A great cropper; long, white roots, tender, sugary, considered best for general cultivation. Ready to use in 120 days. Pkt., 5c; oz., 10c; 1/4 lb., 25c; lb., 70c, prepaid.

GUERNSEY.—Roots do not grow as long as those of the Hollow Crown. are of greater diameter and more easily gathered. Of most excellent qua Ready to use in 110 days. Pkt., 5c; oz., 10c; 1/4 Ib., 25c; lb., 80c, prepaid.

ISBELL'S NEW HALF-LONG.—Beautiful white roots, shorter than the pre-ling sorts, with broad shoulders. We recommend this variety for your home rden. Ready to use in 100 days. Pkt., 10c; oz., 15c; 1/4 lb., 35c; lb., \$1.00, ceding sorts. prepaid.

ONION SETS

THE EASIEST WAY TO GROW LARGE ONIONS. THE QUICKEST WAY TO GROW BUNCH ONIONS.

Prices subject to market, Write for prices on larger quantities.

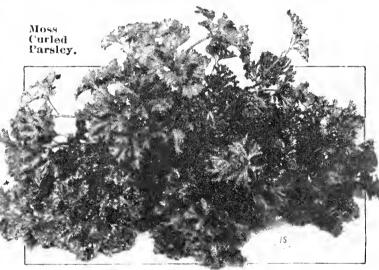

We Supply Best Quality Sets

These sets are the product of seed and the little bulbs are planted for "Green Onions," or to produce large Onions for early market, which they do much quicker than can be grown from seed. The planter is enabled thereby to get highest market price for his early Onions grown from sets, also permitting the growing of another crop on the same land the same year.

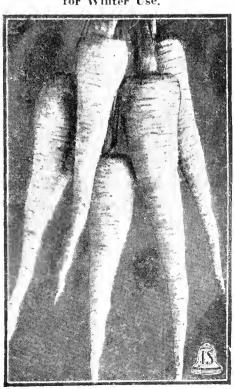

Green Onions from sets will be your first garden crop in spring. Several plantings may be made to prolong the season's supply. These sets can be planted very early in Spring. One quart of sets will plant a 50-foot row; 10 to 12 bushels per acre.

All Onion Sets are sold per bushel of 32 pounds.

YELLOW MULTIPLIER SETS .- Also called "Shallots." A favorite for the home garden; of superior flavor. These do not form large Onions for market but are planted for green Onions only. Very productive, producing six to twelve bulbs from one Onion bulb set out. Pt., 20c; qt., 30c; 4 qts., \$1.00, prepaid.—Not prepaid: peck, 85c; bu., \$2.85.

Parsnips Are An Excellent Vegetable for Winter Use.

Parsnip-Hollow Crown.

Isbell's Monarch of Earlies.

PEAS NORTHERN GROWN SEED

CULTURE. Any good rich garden soil is suitable for peas but they thrive best in heavy or clay soils which hold moisture well. Peas like a moderate temperature and plenty of moisture and, as they are not injured by frost, should be planted just as early as the frost is out of the ground. It is best to plant early, medium and late varieties all as early as possible. This will give a fine supply of peas for a period

Sow seed in a trench 2 to 3 inches deep and an inch apart. The dwarf kinds may be planted in rows 2 to $2\frac{1}{2}$ feet apart but the tall kinds should be 3 to 4 feet apart. For the tall kinds some suitable support should be provided such as sticks, brush, string or wire. One pound of seed will sow a row 50 feet long.

Extra Early Peas Isbell's Monarch of Earlies

The Earliest of All. It is a round-seeded Pea, 2½ feet high, and will grow and mature quicker than any other sort in cultivation. This with the fact that it can be planted as soon as the ground can be worked, makes it possible to get into the market with this Pea sooner than any other variety known. Extremely generous producer of good size pods, filled with well developed Peas of fine flavor, sweet and tender. Ready to use in 48 days. Pkt., 10c; lb., 35c; 3 lbs., 90c, prepaid.—Not prepaid, 10 lbs., \$2.00; 25 lbs., \$4.50.

Prolific Early Market

Round-seeded. Extra early, heavy yielding sort, about 2½ feet high. Well filled pods of good size, blunt-ended and light green in color. An excellent early market sort and a favorite for the home garden. Pkt., 5c; lb., 30c; 3 lbs., 75c, prepaid.—Not prepaid, 10 lbs., \$1.40; 25 lbs., \$3.00.

MRS. S. P. HUGHES OF VIRGINIA writes: I have been using Isbell's Seeds for fourteen years and I don't want to miss them this year.

MRS. C. ANDERSON OF WISCONSIN writes: Want to tell you that your seeds were very satisfactory last year, everything was just fine. Enclosed another order.

Tall Telephone

It Pays To Inoculate Peas

Tests conducted in York County, Pennsylvania, showed that Peas just about doubled in yield if the seed was inoculated at planting time, compared to yields from untreated seed. The increase came about both in more pods per plant and in the larger size of the peas in the pods.

For price on Nitragin Inoculation, see page 64.

Mangoes

PEPPERS

Hot Ones

Fresh Peppers are excellent to have on hand for salads, pickles and mangoes—as well as for seasoning meats and vegetable dishes. The milder varieties are relished by many in sandwiches. Everyone with a garden should surely plant Peppers. They add fine flavor to relishes, winter sauces and salads.

FOR DRYING FOR WINTER USE the Large Bell or Harris Giant is the best, while for STUFFING PURPOSES we recommend Pimiento, Ruby King and Chinese Giant. King of the North and Early Giant are best for the North. FOR HOT SAUCES use the Red Cayenne sorts.

CULTURE.—Peppers like a light, rich, warm soil for best results. They require about same treatment as tomatoes. Sow seed in hotbed early in April and transplant to open ground when weather is settled—or start seed outside after all danger of frost is past. One ounce is sufficient for about 1,500 plants. 1/4 pound to transplant one acre. Spray with "Ever Green" to destroy cutworms.

California Wonder.

King of the North

The Earliest Large Pepper.

This is the newest and best early large pepper and is especially valuable in the northern states. The fruits are enormous in size and color up a brilliant red much earlier than any other large sort. They average about six inches long, 3 to 4 inches across. The flesh is thick, firm and very sweet and mild. The plants are spreading in habit and are literally covered with large peppers. Often one plant will have 8 to 10 mature fruits. We grew our seed of this wonderful new variety here in Michigan, but as the supply is limited, we advise ordering early. Pkt., 15c; ½ oz., 10c; oz., 70c; ½ lb., \$2.50, prepaid.

Ruby King

One of the most popular varieties and is grown practically everywhere. Large scarlet fruits, 4 to 6 inches long by 3 to 4 inches thick. Flesh quite thick, crisp, tender, and somewhat pungent in flavor, ripe fruits in 130 days. Pkt., 5c; oz., 25c; ½ lb., 75c; lb., \$2.75, prepaid.

Pimiento

Well known sweet Pepper. The plants are quite tall, very productive and Peppers of medium size, desirable for filling, in preparing salads and for flavoring. Pkt., 10e; oz., 25e; ½ lb., 75e; lb., \$2.75, prepaid.

Harris' Early Giant

A large sweet Pepper that will produce enormous yields and the Peppers mature early. The plants are of vigorous growth, and covered from top to bottom with big Peppers. The Peppers are 5 inches high and $3\frac{1}{2}$ inches through; deep green turning to brilliant red. Flesh thick and of a very sweet, pleasant flavor. A very fine Pepper for the home garden and profitable for market. Pkt., 10c; $\frac{1}{2}$ oz., 25c; oz., 40c; $\frac{1}{4}$ lb., \$1.25; lb., \$4.50, prepaid.

Sweet Salad -The Mildest Pepper.

Is an early, prolific, good sized, sweet, mild Pepper; so mild indeed that the fruits may be eaten raw. The plants are of medium height, and bear the Peppers upright. Extremely prolific, the fruits are medium size, just right for stuffing and frying. Pkt., 10c; ½ oz., 20c; oz., 35c; ¼ lb., \$1.15; lb., \$3.90, prepaid.

Large Bell or Bull Nose

Standard market sort. Matures quite early. Fruit bright red, of large size and has thick flesh of mild, sweet taste. Is excellent for stuffing. Favorite Detroit market sort. Pkt., 5c; oz., 25c; 1/4 lb., 75c; lb., \$2.75, prepaid.

Long Red Cayenne

The conical fruits are 3 to 4 inches long and bright red. The flesh is very sharp and pungent in flavor. Pkt., 10c; ½ oz., 20c; oz., 35c; ¼ lb., \$1.00; lb., \$3.75, prepaid.

Short Cayenne

Fruits are of conical shape, two inches long, very thin, bright red, very hot and pungent to the taste. Pkt., 10c; ½ oz., 20c; oz., 35c; ¼ lb., \$1.15; lb., \$4.00, prepaid.

Ornamental Mixed Peppers

Grow these for your County Fair and exhibition purposes. This mixture contains the small ornamental sorts such as New Lantern Shaped, Celestial Red Cluster, Coral Gem Bouquet, Kaleidoscope, and many others. Pkt., 15c.

PEPPER.—Continued on Page 44. FOR PEPPER PLANTS.—See Page 56.

California Wonder

The Giant Sweet Mango. This is a fine new variety of real merit which is rapidly becoming one of the leading sorts. It is one of the largest Peppers grown and has much thicker flesh than other sorts. The flesh is very mild and sweet. They are very solid and stand handling and shipping well. When fully ripe they are brilliant scarlet, and often attain a size of 4 inches in diameter and 4½ inches long. Splendid for both home and market. Pkt., 10c; ½ oz., 30c; oz., 50c; ¼ lb., \$1.75; lb., \$6.00, prepaid.

Pimiento.

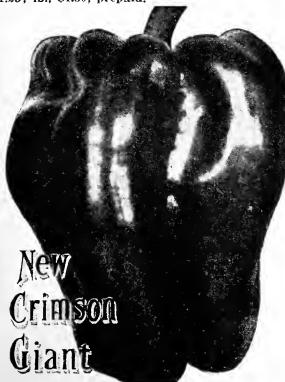

The Largest of All Peppers.

The fruits of this variety are of monstrous size, almost square, 4 to 5 inches in diameter and of equal length. Color brilliant glossy scarlet. It is so immensely productive that frequently a half dozen. Penpers, will touch one productive that frequently a half dozen Peppers will touch one another. The habit of growth is strong and stocky, about 18 to 24 inches high. The flesh is thick and meaty, and entirely free from any flery flavor. Ripe fruits in 140 days. Pkt., 10c: ½ oz., 30c: oz., 50c; ¼ lb., \$1.75; lb., \$6.00, prepaid.

Crimson Giant

Also known as "Ohio Crimson."
An early, giant fruited sweet Pepper.
The fruit is of long shape, nearly as big as Chinese Giant and much more oblong. In flavor it is very mild and sweet. Excellent for salads. Ripe fruits in 135 days. Pkt., 10e; ½ oz., 25c; oz., 40c; ¼ lb., \$1.25; lb., \$4.50, prepaid.

PEPPER Two Popular Yellow Sorts

Hungarian Yellow-Hot

Also called Banana and Yellow Wax Pepper. An extremely hot, long, slender Pepper of a bright waxy yellow color. The fruits are pointed and from 5½ to 7 inches long. The plants are of strong growth and produce abundantly. A special favorite with many people because of its pungency. It is a profitable market sort. Also known as Bulgarian Yellow. Pkt., 10c; ½ 0z., 35c; 0z., 60c; ¼ lb., \$1.75; lb., \$6.50, prepaid.

New Golden Giant

A distinct and very desirable large pepper. The fruits are of rich golden yellow color when ripe; thick meat of mild sweet flavor. During growth the peppers are deep glossy green. Fruits oblong, 5 inches long and 3½ inches in diameter. A heavy yielder. Pkt., 10c; ½ oz., 30c; oz., 50c; ¼ lb., \$1.50; diameter. A heav lb., \$5.50, prepaid.

PUMPKIN For Pies, For Stock

No farm should be without a field of Pumpkin—some big ones to take to the Fair, quite a few of the Pie Pumpkins and plenty to feed to the stock. They are excellent for slicep after grass pasture fails. Grow two crops on the same land by planting Pumpkins in with your corn or potatoes.

CULTURE.—Not so particular as to soil as the other vine crops, such as Cucumbers and Melons, but are cultivated about the same. After danger of frost is over plant the seed in hills eight to ten feet apart each way, dropping about a dozen seeds in a hill. The soil should be made as rich as possible. When danger from bugs is past, thin to three plants to a hill. One ounce of seed to 25 hills, 3 to 4 lbs. per acre. Dust with "Slug Shot" to kill bugs and

Small Sugar Pie

The Best Pumpkin of Them All

Large Sweet Pie Pumpkin.

One of the best pie Pumpkins, One of the best pie Pumpkins, and its winter keeping qualities are almost unequaled. Is slightly oval in shape and of medium size. Evenly and finely netted and is a yellowish russet color. Flesh deep golden color, sweet and tender. Winter Luxury is larger than the well known Small Sugar Pie, weighing 8 to 9 pounds each. Popular for the home garden. Matures in 80 days. Pkt., 5c; oz., 10c; 1/4 lb., 30c; lb., 90c; prepaid. paid.

Small Sugar Pie.

Japanese Pie

Hungarian

Yellow Pepper.

High Quality-Rich Color.

The flesh is very thick, of a rich salmon color, fine grained, dry and sweet. Of medium size, early; very productive and highly desirable for pies or cooking. A crookneck variety with curiously marked seeds. Matures in 95 days. Pkt., 5c; oz., 15c; ½ lb., 40e; lb., \$1.20, prepaid.

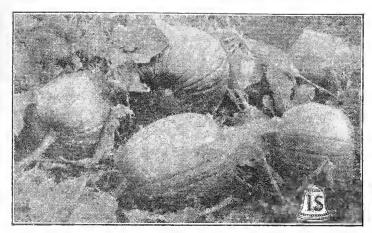

Tennessee Sweet Potato

Excellent sort which resembles a sweet potato in flavor. It is pear-shaped and slightly ribbed. The color is a creamy white, sometimes striped with green. Flesh is fine grained and very dry and of superior flavor. Matures in 95 days. Pkt., 5c; oz., 10c; ½ lb., 30c; lb., 90c, prepaid.

Connecticut Field

Or Big Tom.

The standard Pumpkin grown in cornfields to make a feeding crop for cattle. Wonderfuly prolific. Fruits average 15 to 20 inches in diameter. Smooth, hard, reddish orange skin, with rich orange-yellow flesh. Matures in 70 to 75 days. Oz., 10c: 1/4 lb., 25c: lb., 65c, prepaid.—Not prepaid, 5 lbs., \$2.75.

Connecticut Field Pumpkin.

King of Mammoths

Seed saved only from select specimens. This is the Pumpkin to plant for show purposes, as it is the largest of all. The flesh is fine grained and sweet and of a bright yellow color. A high quality table or pie Pumpkin. Invariably wins the prizes at fairs. Matures in 110 to 120 days. Pkt., 10c; oz., 20c; 1/4 lb., 50c; lb., \$1.50, prepaid.

Kentucky Field

Also called Sweet Cheese. Of large size, about two feet in diameter, round, flattened, hardy and productive. A fine sort for market and family use. Great for stock feed. Matures in 85 to 90 days. Oz., 5c; 1/4 lb., 20c; lb., 50c, prepaid.—Not prepaid, 5 lbs., \$2.00.

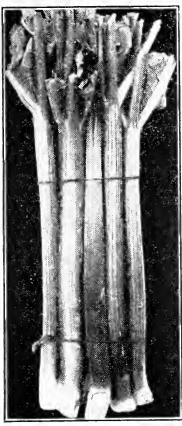

Pumpkins are a good feed for dairy cows. One ton of Pumpkins is equal in feeding value to about 400 pounds of mixed hay or 800 pounds of corn silage.

Succession Crops

Early beets followed by celery.
Early beans followed by turnips.
Lettuce or onion sets followed by tomatoes,
Radishes followed by tomatoes.
Spinach, lettuce or radishes followed by cabbage.
Early peas followed by pepper, eggplant, or tomatoes.
Begin on the second crop the day you remove the first crop. Dig the soil and add a little manure.
Make several plantings of beans and peas to have a fresh table supply all season.

45

Rhubarb.

Rhubarb or Pie Plant

Our first and best spring tonic. It contains valuable mineral elements which should be a part of the family diet all the time, either fresh or in the canned state.

Rhubarb is considered a necessity in the home gardens, furnishing very early in the spring, juicy stalks for the favorite rhubarb pie, for sauce, for canning for winter use, for winemaking, etc.

Sow the seed early and, when the plants are large enough, thin them to stand 4 to 5 inches apart. Early in the fall or the next spring, transplant them 3 to 4 feet apart each way.

GIANT VICTORIA.—An improved variety producing large, thick stalks. It is a main crop sort, with a long season of bearing. Pkt., 10c; oz., 15c; 1/4 lb., 45c; lb., \$1.50.

GIANT VICTORIA RHUBARB ROOTS .- The best variety. Excellent quality and large stalks.

Prices by mail, postpaid: 15c each; 3 for 35c; 12 roots for \$1.00.—Not prepaid, 12 roots for 85c; 100 roots for \$6.00.

Salsify or Vegetable Oyster

A wholesome and nutritious vegetable. They are fine when boiled, or may be sliced and fried; very fine in soups. Salsify succeeds best in light, well-enriched soil. Sow early and quite deep, giving the general culture recommended for parsnips. The roots are perfectly hardy and may remain out all winter. Store for winter use in pit or caller in damp courth or said winter. for winter use in pit or cellar in damp earth or sand.

MAMMOTH SANDWICH ISLAND.—An improved type of the Long White, producing roots of nearly double the size and weight of those of the old variety, and of very superior quality and delicate flavor. Ready for table in 140 days. Pkt., 10c; oz., 20c; 1/4 lb., 50c; lb., \$1.75, prepaid.

Salsify.

Sorrel

Is boiled and served like Spinach, also delicious salad and soup is made with it. Possesses a pleasant acid flavor. Sow seed in shallow drills a foot apart. Thin plants to a few inches apart, remove seed stalks when they appear. Pkt., 10c; oz., 20c; 1/4 lb., 60c.

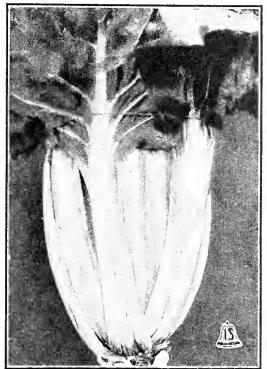

Swiss Chard

A fine vegetable and giving large returns for little care—a constant crop from July until winter. Leaves used for greens same as Spinach.

Sow early in spring in rows 16 inches apart and thin to 6 inches apart in rows. Can be used all summer when Spinach is not available. Later leaves grow very large with broad, flat, pure white stems and midribs which may be cooked like asparagus or made may be cooked like asparagus or made into very good pickles.

LUCULLUS.—The best garden sort. Produces large, tender stalks with curly leaves. You may start cutting in 35 to 40 days. Pkt., 5c; oz., 10c; 1/4 lb., 30c; lb., 90c, prepaid.

WHITE LYON-PLAIN LEAF. Very broad midribs with plain leaves and for this reason preferred by many planters. Pkt., 5c; oz., 10c; 1/4 lb., 30c;

Swiss Chard.

Tobacco

CONNECTICUT SEED LEAF. Best kind for Northern localities. Broad leaf of medium length. Suitable for cigar fillers. Pkt., 10c; oz., 50c; 14 lb., \$1.50.

IMPROVED WHITE BURLEY. -The general favorite, superior to the old variety of Burley. Makes a better and broader leaf; much used for wrappers. Pkt., 10c; oz., 40c; ¼ lb.,

HAVANA. — Well known broad leaved cigar tobacco. Pkt., 10c; oz., 40c; ½ lb., \$1.35.

Vine Peach

Sometimes called Vegetable Orange or Mango Melon. Fruit is size and color of medium orange—vines much like muskmelons and require same nke muskmelons and require same care. Fruits used for pickles, pies and preserving. Try a few glass jars of these—cut fruit in halves and cook in syrup. Easily grown and wonderfully prolific. Directions for preserving, etc., on every packet. Pkt., 10c; oz., 25c; 1/4 lb., 75c.

Strawberry, "Rugen"

New Everbearing Strawberry From Seed.

The ideal Strawberry for the home garden, producing luscious fruits from seed the same year. Sown early and the young plants trans-

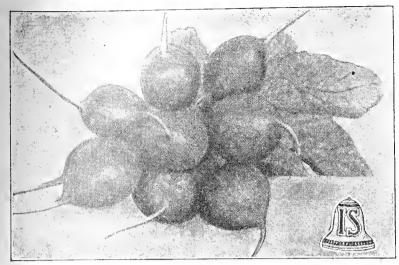

Strawberry, "Rugen."

RADISHES-Northern Michigan Grown

Isbell's Early Bird.

Isbell's Michigan grown Radish bears certain well defined points of superiority over seed from other sections. the first place, it is hardier and has proven by test time and time again to be better adapted to a wide variety of soils and conditions. That means a surer and earlier crop for the gardener. Secondly, the tops run very small, desirable when space is valuable.

Sow Radish seed every two weeks throughout the season for a continuous supply of fresh, crisp radishes.

Isbell's Early Bird

The Most Profitable Market Variety

Because of quick maturity—rich color—perfect shape—exquisite quality, Early Bird gets customers and keeps them. Our Early Bird Radish seed is all grown from transplanted roots. It costs us more than double to produce this but it insures absolute uniformity and trueness of type.

Crimson

Giant or

Butter

Radish.

By many years of careful selection and most skillful cultivation, this Radish has been bred up to a point that will be hard to surpass. It is a very early and quick growing Radish, fit to pull in 16 to 20 days, its strikingly rich scarlet color attracts attention everywhere, while the flesh is snow-white, always crisp, juicy, mild. In shape a slightly elongated globe.

Our strain of this popular Radish is used by a great many greenhouse men for growing in Winter. If you are a market gardener, or if you have only a kitchen garden, by all means plant Isbell's Early Bird. Pkt., 10c; oz., 15c; 1/4 lb., 35c; lb., \$1.00, prepaid.—Not prepaid. 5 lbs., \$4.50.

MR. GEO. F. WHITAKER OF OHIO writes:—Your Early Bird Radish is the finest we have ever grown, ready in 20 days. You can't beat it.

The Most Attractive Bunching Radish on the Market

The best strain of Scarlet Turnip White Tip Radish, with the white tip well developed, covering the lower third of the radish. Extra early, crisp and tender. Combines beautiful appearance with finest quality, appealing at once to the eye as well as the palate. Isbell's Perfection White Tip Radish is a leading market sort. In time of maturity it ranker with our famous Early Bird hairs with our famous Early Bird, being ready for the table in 18 days. Pkt., 10c; oz., 15c; ¼ lb., 35c; lb., \$1.00, prepaid.—Not prepaid, 5 lbs., \$4.50.

Mixed Radishes Early and Late Kinds

Radishes of all colors—red, pink and white; round, oblong, half-long and long; and from the earliest to the very latest varieties. One sowing is all that is required for the whole season. Pkt., 5c; oz., 10c; 1/4 lb., 25c; lb., 75c, prepaid.

Improved Early Scarlet Globe

Standard Sort for Home and Market.

For forcing and for garden culture. It is very For forcing and for garden culture. It is very early and of fine shape and color. The flesh is crisp and tender, juicy and mild. The color is rich scarlet. Has a small top and the Radishes are surprisingly uniform in shape and size. The leading Radish on the Detroit market. We offer only the most carefully grown seed. Ready for table use in 20 days. Pkt., 5c; oz., 10c; 1/4 lb., 25c; lb., 75c, prepaid.—Not prepaid, 5 lbs., \$3.00.

Crimson Giant

This early Radish is double the size of any of the early turnip-shaped type, and equally suitable for forcing or for early planting out-of-doors. It is a rapid growing sort, developing roots of a beautiful deep crimson color, which vary in shape from round to almost oval, and often measure two inches in diameter. Mild in flavor, firm and crisp, remaining in edible condition longer than other early sorts. Ready for the table in 30 days. Pkt., 5c; oz., 10c; 1/4 lb., 25c; lb., 75c, prepaid.—Not prepaid, 5 lbs., \$3.00.

Glowing Ball

All-America Selection.

Excellent for forcing and for the home garden. Brilliant fiery scarlet, the brightest colored of all radishes. Perfectly round, about one inch in diameter, with a short top and very thin tap-root. The flesh is white, crisp and delicious. Extra early. Pkt., 10c; oz., 15c; 1/4 lb., 35c; lb., \$1.00, prepaid.

Isbell's All-Seasons

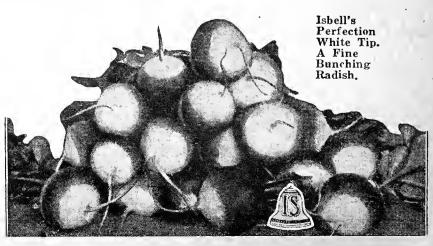

A round scarlet Radish of good size, may be sown for early summer or winter use and can be used at all stages of growth. Flesh very solid and crisp, of mild flavor. Very popular for home gardens, especially in the southern states on account of resisting heat. Pkt., 10c; oz., 15c; ¼ lb., 35c; lb., \$1.00, prepaid.

French Breakfast

An old favorite for market and home garden; just right for a small, crisp table Radish. Of quick growth, oblong in shape; color a beautiful scarlet, except near the tip where it is pure white. Should be pulled and used when small, as they become soft as they grow larger. A splendid variety on account of earliness and attractive color. Ready for table use in 22 days. Pkt., 5c; oz., 10c; ¼ lb., 25c; lb., 75c, prepaid.—Not prepaid, 5 lbs., \$3.25.

Early Scarlet Turnip

A round, red turnip-shaped Radish of very quick growth. A very early variety, deserving general cultivation on account of its rich color and crisp, tender flesh. Very desirable for early outdoor planting. Ready for use in 20 days. Pkt., 5c; ez., 10c; 1/4 lb., 25c; lb., 70c, prepaid.—Not prepaid, 5 lbs., \$3.00.

Superior Quality Seed

RADISHES

CULTURE.—The secret in growing good Radishes consists chiefly in the observance on the part of the grower of three points. First, they should be grown on light, quick soil. Second, they should be given plenty of water, and last, but by no means least, the right kind of seed should be sown. For the first crop sow as early in Spring as ground can be worked, and every two weeks throughout the season for succession.

A warm, sandy loam, made rich and light by strong manure, is best. Sow in drills 10 to 12 inches apart. The Winter varieties should be sown in July and August. One ounce will sow 100 feet of drill, 8 to 10 pounds per acre.

White Tipped Early Scarlet Turnip

For outdoor sowing this is an important sort on the market—thousands of pounds sing annually used. Our stock of this is unexcelled. Handsome bright scarlet color being annually used. Our stock of this is unexcelled. Handsome bright scarlet color with white tip. Its fine appearance attracts customers, and its quality always pleases. Ready for table in 20 days. Pkt., 5c; oz., 10c; 1/4 lb., 25c; lb., 75c, prepaid.—Not prepaid, 5 lbs., \$3.25.

New Icicle

A Fine Early, Long White Radish

Long, slender, pure white roots, and they remain mild and crisp until they grow large; they mature early, and have short tops, which permits close planting and forcing. Regarded by many of our customers as the first ers as the finest Radish they have ever grown. Plant every ten days for succession. Try Icicle

this year—you will always plant it. Ready for the table in 30 days. In big demand on the Detroit mar-ket. Pkt., 5c; oz., 10c; ¼ lb., 25c; lb., 75c, prepaid. — Not prepaid, 5 lbs., \$3.00.

White Strassburg

Excellent Summer Radish, popular with gardeners. Larger and thicker than

Icicle— Icicle, with thick shoulder. Crisp, tender and delicious 5 inches long, 1½ to 2 inches diameter. Ready for table 38 days. Pkt., 5c; oz., 10c; ¼ lb., 25c; lb., 75c, prepaid. Ready for table in

Cincinnati Market

The Finest Long Red Radish

This superior forcing Radish was bred up by the Glass Gardeners near Cincinnati and no finer Radishes go into any market.

The tops are so small that the Radishes may stand touching one another in the rows. Grows perfectly

straight and smooth, 6 to 7 inches in length. Skin scarlet colored, very thin, the flesh crisp, brittle and of a de-lightful flavor. Ready for market in 35 days. Pkt., 5c; oz., 10c; ¼ lb., 25c; lb., 75c, prepaid.—Not prepaid, 5 lbs., \$3.00.

Long Scarlet

China Rose.

Winter Radishes

White Tip

Scarlet Turnip.

Sow the seed the latter part of June, up to August 1st. Culture same as for other Radishes. Thin out to stand 4 to 6 inches apart in the rows. Can be kept over Winter by placing in box of sand, stored in a cool cellar.

The Merits of Winter Radishes are little appreciated, probably because they are seldom grown and few people have knowledge of their worth. These grow to large size and keep crisp and solid for Winter and Spring use. They make nice salads during the Winter months.

CHINA ROSE.—More used than any other Winter Radish. Grows larger than the Spanish varieties. Very handsome, of medium size, rose color. Flesh white and mild for a Winter Radish. By packing these in sand, crisp, fresh radishes may be had all Winter. Very fine cooked. Pkt., 5c; oz., 10c; 1/4 lb., 30c; Ib., 90c, prepaid.

CELESTIAL or MAMMOTH WHITE CHINA.—The finest of all large Winter radishes. Very large; paper-white skin; flesh solid, crisp and sweet as a turnip. May be used in all stages of growth. Pkt., 5c; oz., 10c; 1/4 lb., 30c; lb., 90c, prepaid.

LONG BLACK SPANISH.—Keeps longest and best of all Winter radishes. Skin coal-black; flesh white, crisp and quite pungent. Pkt., 5c; oz., 10c; ¼ lb., 30c; lb., 90c, prepaid.

SAKURAJIMA.—The Largest Radish in the World. SARURAJIMA.—The Largest Radish in the World. This is an introduction from Japan. The root grows to enormous dimensions, sometimes over three feet around and two feet long, yet the white flesh is always crisp and tender, can be eaten like other radishes or cooked like turnips. Of delicate taste, not strong. In Japan these radishes take the place of potatoes. Seed should be sown in May. Pkt., 10c; oz., 20c; ¼ Ib., 60c; Ib., \$2.00, prepaid.

Radish is the most universally grown crop in the home garden. Realizing its great importance we have spent a vast amount of time and money to better existing strains of seed. Now the leading seedsmen come to us for Radish seed of the strains grown on our Michigan farms, There are Radishes for every purpose and every locality.

Celestial.

SPINACH

CULTURE.—Should be planted in very rich ground, the richer the better. Sew in drills, one foot apart, and begin thinning out the plants when the leaves are an inch wide. All should be cut before the hot weather or they will be tough and stringy. For succession sow every two weeks until June. Lime-treated soil will produce better and larger crops.

For early spring use, sow in autumn and protect the plants with a light covering of leaves or straw. South of Cincinnati Spinach can be grown without covering. One ounce of seed to 50 feet of drill, 10 to 20 pounds per acre in drills.

King of Denmark

The Long Standing Market Variety

The Long Standing Market Variety

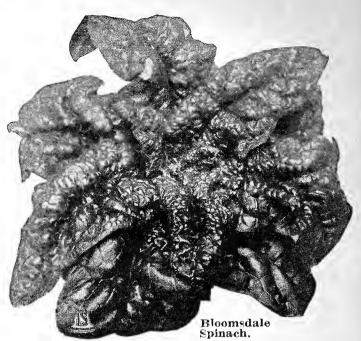

The large leaves are very thick, rounded, dark green and curled or blistered. Plants grow rapidly and are ready to use as soon as the earliest kinds, yet remain in good condition two weeks longer. They are hardy and vigorous, forming quite large tufts, compact and low. By growing this variety the market gardeners will have a longer marketing season. King of Denmark is a fine long standing and heat resistant Spinach for the home and market garden. It is well adapted for canning as the leaves are tender, succulent and of excellent quality. Oz., 10c; 1/4 lb., 20c; lb., 50c, prepaid.—Not prepaid, 10 lbs., \$2.50; 25 lbs., \$5.50; 100 lbs., \$18.00.

Giant Nobel

A recent introduction of high merit. Very valuable for market and for canning. Plants large, hardy, strong growing. Leaves extra large, the largest of all Spinach varieties; quite broad, arrow-shaped with rounded tip, of bright green color; they are tender and succulent, of very high quality. This is the best of the Giant Smooth Leaved sorts and is a heavy yielder. Oz., 10c; ¼ lb., 20c; lb., 45c, prepaid.—Not prepaid, 10 lbs., \$2.25; 25 lbs., \$5.00.

Triumph or Fillbasket

King of Denmark Spinach.

An improved large, thick leaved, very long-standing variety. Plant forms a flat rosette; leaves compact, short and broad, pointed and much wrinkled. Very fine quality when cooked. Good variety for home garden and market. Oz., 10c; 1/4 lb., 20c; lb., 45c, prepaid.—Not prepaid, 10 lbs., \$2.25; 25 lbs., \$4.90; 100 lbs., \$17.00.

New Zealand

The Ideal Home Garden Sort

THE EVERBEARING VARIETY. THE EVERBEARING VARIETY.—The most remarkable Spinach ever introduced. This variety planted under the same conditions and right next to other varieties will withstand the summer heat and keep on bearing luscious green shoots and leaves for weeks after the others have gone to seed. It will make fine Spinach greens possible in your garden all summer and fall.

Plant in spring, when ground is warm, in hills 18 inches apart each way, 4 to 6 seeds to the hill, thin out later. Soak seed in lukewarm water for 12 hours before planting. Pkt., 5c: oz., 10c; 1/4 lb., 25c; lb., 75c, prepaid.—Not prepaid, 10 oz., 10c; 1 lbs., \$5.00.

Victoria

Drought Resistant Noted for its dark green leaves and ability to withstand hot weather. Makes a dense, flat rosette. Leaves large, thick, much wrinkled, very dark green. Fine market sort for mid-summer use. Oz., 5c; 1/4 lb., 15c; lb., 40c, prepaid.—Not prepaid, 10 lbs., \$2.25; 25 lbs., \$4.75; 100 lbs., \$17.00.

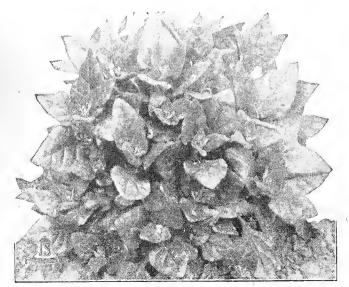

Blight Resistant Bloomsdale

Of the Bloomsdale type but earlier. This is a very early sort of high quality and is blight resistant. A strong, vigorous grower, seeding rather early, therefore recommended for early planting. Oz., 10c; ¼ lb., 20c; lb., 45c, prepaid.—Not prepaid, 10 lbs., \$2.25; 25 lbs., \$4.90; 100 lbs., \$17.00.

LARGE CROPS — FINE QUALITY

"I want to tell you that Isbell's Seeds cannot be beat. Hubbard Squash, Davis Perfect Cucumber, Pencil Pod Beans, Chantenay Carrots, Rutabagas and Beets all produced wonderfully well and we had more than we could use. The cucumbers were the heaviest yielding of anything I ever saw, from one ounce of seed we sold \$54.00 worth and put up twelve gallons in brine."

MRS. M. VIAN, Munising, Mich.

New Zealand Everbearing Spinach.

SQUASH

New Golden Delicious

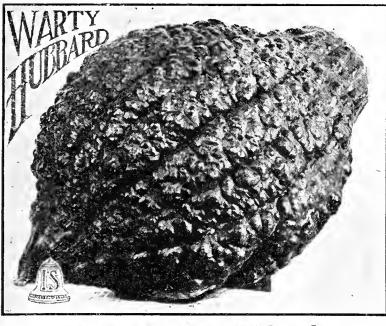

This remarkable new sort we believe will become very popular with market gardeners and home gardeners, while for canning it is of highest quality. The skin is a bright reddish-orange and the flesh is rich golden orange. The flesh is 2 to 3 inches thick and there is no green zone near the rind. It cooks extra dry, fine grained and sweet. Many who have grown it say "it is better than a sweet potato". The skin is thin without a hard shell but it is a fine keeper for winter use. On account of its high quality and attractive color it has created a sensation with canners and those who tested it claim it has the highest starch content of any variety they have tried. Besides all its other fine qualities it is the finest squash for pies. Pkt., 10c; oz., 20c; 1/4 lb., 45c; lb., \$1.20, prepaid.

For Summer

SQUASH

Syme's Blue Hubbard.

For Winter

Isbell's Golden Hubbard

A Fine Squash for the Home Garden.

A Fine Squash for the Home Garden.

The best Winter Squash for the private or home garden and desirable for market; the fruits are of the same shape as Green Hubbard, and warted, but average smaller in size. They are earlier in season but keep in fine condition through the winter. The skin is bright, deep orange-yellow, very attractive in appearance. Flesh is deep golden yellow, fine grained, cooks very dry and has rich flavor. Yields extra heavy. Ready for the table in 90 to 95 days. Pkt., 5c; oz., 10c; 1/4 lb., 35c; lb., \$1.10, prepaid.

IMPROVED BANANA

Introduced and named by

Introduced and named by us in 1912, and it has been gaining in popularity ever since. One of the best general purpose Squashes yet introduced, because it can be used as either a summer or winter Squash. The color of the shell is a bright gray, the shell is not as hard as that of the Hubbards, but they are nevertheless an excellent winter keeper and will keep without difficulty until March. Isbell's Plymouth Rock grows from 18 to 30 inches long and from 7 to 12 inches in diameter. The flesh is a deep golden color, entirely free from lumps and stringiness, and very fine grained. They cook quickly and the flavor is the finest imaginable in a Squash. The Squashes, when about half grown, cook up splendidly as a summer Squash. Grow Plymouth Rock for home use, for market and exhibition purposes. Pkt., 10c; oz., 15c; 1/4 lb., 45c; lb., \$1.50, prepaid.

Also Called Acorn or Des Moines Squash

Also Called Acorn or Des Moines Squash
Surely a Squash fit for a Queen's taste. Cut in half
and baked for 20 minutes it will give you a delicious
meal; if you like pie, try one made from Table Queen.
You will be pleased not only with the quality of this
Squash, but you get so many from each seed planted,
the vines being so vigorous and productive. The fruits
are a nice size to handle, 6 to 7 inches long and 4 to
5 inches in diameter. The meat is exceptionally dry
and mealy and of extra fine flavor. The shell is thin
but hard and smooth, so that they keep as well as the
Hubbard, although they ripen 2 to 3 weeks earlier.
The color is dark green, almost black, with sometimes
a blotch of red at pointed end. Pkt., 5e; oz., 15c;
1/4 lb., 40c; lb., \$1.20.

"Isbell's Table Queen Squash we think is of better quality than any other and just the right size for a small family. Have found Isbell's Seeds to be of superior quality."
—MRS. E. ANDREWS, Columbia, Ohio.

Squashes should not be planted until danger of frost is past and the ground has become warm, but plant the winter kinds as soon as safe in order that they mature. Plant in hills 3 to 4 fect apart for bush varieties, and 6 to 8 fect for running varieties, putting 6 to 8 seeds to the hill, finally leaving but 3 plants.

hill, finally leaving but 3 plants.

A rich, warm, mellow soil is conducive to high yields and early matnrity, but Squashes grow quite well in almost any well-drained soil. It pays to enrich each hill with rotted manure or commercial fertilizer. During the early stages of growth keep the plants well dusted with Slug Shot to save them from insects. The Winter Squashes may be grown in corn fields in same manner as pumpkins. In the small garden, squash may follow early beets, early cabbage, corn salad, and spinach.

Winter Squash are grown in Southern Michigan.

Winter Squash are grown in Southern Michigan on a large scale for feeding stock. Some stock farmers and dairymen put in from 10 to 20 acres every year and consider this crop one of the most profitable on the farm. Raisers of hogs also say that nothing will equal Squash for conditioning hogs for market.

One ounce of the bush varieties to 40 hills, or of the larger-seeded kinds, 15 hills; 2 or 3 lbs. of the bush and 3 or 4 lbs. of the large-seeded for an acre,

Chicago Warted Hubbard

Excellent Winter Sort.

A new type of Hubbard produced by careful selection of the large, dark green, warted specimens always seen in good stocks of it. It has been bred to this type seen in good stocks of it. It has been bred to this type until it is so fixed that nearly all have very hard, warty shells, are large, and of very best quality. The vines are healthy and strong, producing quite freely the handsome dark green fruits. Flesh very rich, golden yellow, fine grained and dry. Popular with market men and growers catering to a fancy trade. Our Michigan grown seed will mature early crops. Pkt., 5c; oz., 15c; 3/4 lb., 40c; lb., \$1.20, prepaid.

A new distinct type of Hubbard and a very fine quality Squash. Fruit resembles the Warty Hubbard in size and shape, but the color is a clear greenblue and very distinct. Not to be confused with Marblehead Squash, which is earlier and of much lighter color. Extra thick meated, fine grained, dry and of excellent flavor. Keeps as well as the other Hubbards. In big demand Hubbards. In big demand in the eastern markets. Pkt., 10c; oz., 20c; ¼ lb., 50c; lb., \$1.50, prepaid.

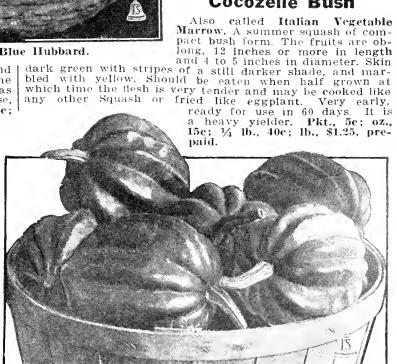

Table Queen Squash.

Yellow Bush.

Mammoth White Bush.

Summer Crockneck.

Delicious Winter

THE SWEETEST OF ALL SQUASHES.

Isbell's Delicious Squash is particularly excellent in table quality and is by some preferred even to the Hubbard. Is an early winter variety of medium size, topshaped in form and dark green; shell moderately hard but very thin; flesh thick; fine grained and bright yellow in color. The fruits are somewhat smaller than Hubbard, weighing from 6 to 10 pounds each. Makes an ideal home garden Squash, as it combines all desirable qualities. Even when immature this Squash is in condition for use and is of very fine flavor. Ready for table use in 95 days. This variety has received special care in seed selection for many years until we have a really improved strain to offer 18kt., 5c; oz., 15c; 1/4 lb., 46c; lb., \$1.20, prepaid.

NEW GOLDEN DELICIOUS See Page 48.

Mammoth White Bush

Favorite summer squash. An improved variety of the well-known White Bush Scalloped or Patty Pan Squash, producing fruits 12 to 15 inches across, of uniform shape, flattened and scalloped, of beautiful white color. Very early and prolific. Ready for use in 50 days. Pkt., 5c; oz., 10c; 1/4 lb., 30c; lb., \$1.00, prepaid.

Mammoth Yellow Bush

Golden Custard.—This is a new, rich golden yellow scalloped bush summer squash, grows large, is not excelled in quality and is very productive. Used for cooking when green and the ripe fruits will make good pies. In shape and size similar to the White Bush. Pkt., 5c; ez., 10c; 1/4 lb., 30c; lb., \$1.00, prepaid.

Mammoth Chili

The outer skin of this great Squash is a rich orange-yellow. The flesh is yellow and very thick, and the quality is good. It is of the highest value as a stock food. Has reached the great weight of 292 pounds. A large size Squash to grow for exhibition purposes. Pkt., 10c; oz., 20c; 1/4 lb., 50c; lb., \$1.50, prepaid.

Isbell's Improved Hubbard

THE ACKNOWLEDGED STANDARD FOR QUALITY

THE ACKNOWLEDGED STANDARD FOR QUALITY

Isbell's Improved Hubbard Squash represents the most perfect type of this justly famous variety, and in addition our strain is so early that we grow our seed in Michigan. This is an extremely valuable characteristic because this otherwise universally popular sort sometimes fails to ripen, even as far South as Central Ohio, unless it is planted very early. The fruits large, moderately warted; shell dark bronze-green. The flesh is always of a rich golden-yellow color, very fine grained, solid and sweet. The shell is very hard and protects the flesh from bruising, etc., so that no sort can surpass the Hubbard as a winter keeper. In addition to its earliness our strain is particularly selected for its rich color of flesh. Ready for table use in 95 to 100 days. Pkt., 5c; oz., 15c;

1/4 lb., 40c; lb., \$1.20, prepaid.

Giant Summer Crookneck

FAVORITE MARKET SORT.

A great improvement of the popular Yellow Crookneck. Bigger, more uniform, with heavily warted shell and deep golden-yellow flesh. Surpasses other Summer Squash and approaches winter varieties in flavor. A favorite with market gardeners because of its beautiful appearance, ready sale and profit producing qualities. Ready for table in 55 days.

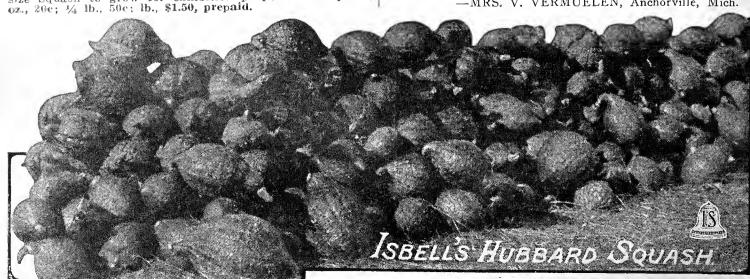

Pkt., 5c; oz., 10c; 1/4 lb., 30c; lb., \$1.00, prepaid.

NEW MACARONI OR SPAGHETTI SQUASH. See page 9.

DEPENDABLE SEEDS

"Your Hubbard Squash certainly is very fine. I raised some af the nicest and biggest Squash I ever saw. One weighed 48 pounds. Yaur seeds are all you say they are."

-MRS. V. VERMUELEN, Anchorville, Mich.

Isbell's Michigan Grown Tomatoes

Isbell's Earlibell.

Livingston's Globe.

Hardy and Productive

low the seed in March and April in the hotbed, or in pots in a sunny exposure in the house. If it is desired to make very stocky plants they may be transplanted when about two or three inches high. When six or eight inches high, if the ground has become warm, transplant to the open ground, on a rainy or cloudy day, if possible; if not, the young plants should be liberally watered and shaded from the hot sun. Set the plants four to five feet apart again.

the hot sun. Set the plants four to five feet apart each way,

Isbell's Earlibell

First on the Market-Brings Highest Prices Idea! for Home and Market

lsbell's Earlibell might fittingly be called the old reliable, as for over twenty-five years it has held its place as a leading first early variety. We have received literally hundreds of testimonial letters from our customers from all dreds of testimonial letters from our customers from all over the United States praising this variety. Continued improvement by careful selection of our planting stock has enabled this splendid tomato to hold its own against newer varieties and maintain its popularity. The bright glossy scarlet fruits are of large size, nearly round, very thick meated and color up evenly. Earlibell is still our leading first early sort. See color illustration and further description on page 2. Pkt., 10c; ½ oz., 25c; oz., 40c; ¼ lb., \$1.25; lb., \$4.00, prepaid.

Isbell's Alpha Pink

THE EARLIEST PINK TOMATO. The gardener who has a demand for pink Tomatoes, will find Alpha Pink just what he has been looking for. In addition to its extreme earliness, it is superior in table quality, in handsome shape and attractiveness. The plants are of such vigorous growth, that uveness. The plants are of such vigorous growth that fine fruits are produced, both extra early and until frost. The Tomatoes are of grand flavor. Ready for market in 90 days. Pkt., 10c; ½ oz., 25c; oz., 40c; ¼ lb., \$1.35; lb., \$4.75, prepaid.

New Break o' Day

Break o' Day will fill a long-felt want for an early Tomato with the good qualities of the popular and heavier yielding later sorts. From present indications it will be a most popular early Tomato with market gardeners, large truckers and shippers. This new sort was developed by Prof. Pritchard of the U. S. Department of Agriculture. The fruit is the same color, shape, size and soldity as Marglobe but ripens 10 to 15 days earlier. Break o' Day is a wonderful yielder and the vine is of spreading growth with good foliage to protect the fruit. Pkt., 10c; oz., 50c; ½ lb., \$1.25; lb., \$4.50, prepaid. Break o' Day will fill a long-felt

Scarlet Topper

Also called Pritchard in honor of the originator. It is a medium early sort, producing splendid highly colored globe-shaped fruits which resemble Marglobe and are of the same high quality but about a week earlier.

They are extremely solid and highly are strong are extremely solid and highly are solds.

few seeds. The vines are sturdy, compact and disease resistant, compact and disease resistant, with heavy foliage which protects the fruit. While a comparatively new sort it has already gained great popularity both for the home garden and as a commercial sort. Market gardeners for definitions of the compact o sort. Market gardeners find this variety sells readily and is a very profitable one to raise. Pkt., 10c; ½ oz., 25c; oz., 45c; ¼ lb., \$1.35; lb., \$4.75, prepaid.

Bonny Best

Select Michigan Grown

Splendid, large, second-early red Tomato. Our stock has been carefully re-selected for earliness, solidity of fruit, smoothness and evenness in ripening up to stem. It is a vigorous grower and quite prolific. Color is intense scarlet. Shape is perfect and remarkably uniform. Ready for market in 100

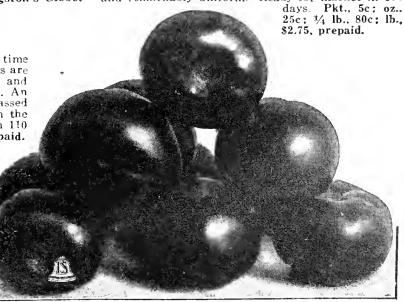

The Globe Tomato is an extra good all-round sort. In time of ripusing belongs among the main crop sorts. The fruits are fairly large, of globe shape, always smooth; of firm flesh and has few seeds; ripens evenly; the color is purplish pink. An exceedingly productive variety of high quality; unsurpassed for slicing or to eat from the hand. Globe is the leader in the southern sections for shipping North. Ready for market in 110 days. Pkt., 10c; oz., 35c; 1/4 lb., \$1.00; lb., \$3.75, prepaid.

Isbell's Michigan Red Wonder

A Very Productive Early Tomato

Produces large, smooth, solid Tomatoes of rich deep red color in great abundance. The fruits begin to ripen soon after Earlibell and are nearly perfectly round, always smooth, and do not crack hadly. Continues in bearing throughout the season which makes it an unusually heavy yielding sort. It is a splendist an unusually heavy yielding sort. It is a splendist early table variety and is unexcelled for canning. A profitable early market sort because of its handsome appearance and the big crops it produces. We introduced this Tomato thirteen years ago and it still holds its own and is justly popular. Pkt., 10c; 0z., 45c; ¼ lb., \$1.35; lb., \$4.50.

Michigan Red Wonder.

TOMATOES—Continued

Isbell's 1936 Best Main Crop

Our Contribution to More and Better Tomatoes

The handsome, large, brilliant red fruits of this new variety come pretty close to perfection in tomatoes. They are nearly round, slightly flattened, with thick, solid, meaty flesh and comparatively few seeds. They are medium early and continue to bear throughout flattened. They have a wenderful rich wild flavor and hold. the entire season. They have a wonderful rich mild flavor and hold their color and flavor well when cooked or canned. This also makes them an ideal variety for tomato juice. For salads and slicing they are unexcelled. The plants are vigorous and produce an enormous quantity of large smooth fruits with practically no culls. If you grow tomatoes, either for your own use or for market here is a variety that will reward your efforts generously. Pkt., 15c; ½ oz., 30c; oz., 55c; 1/4 lb., \$1.95.

Chalk's Early Jewel A Popular Second Early Bright Red

Within a week as early as Earliana, it is a heavier cropper.

Best Yellow Tomato

Handsome fruit of good size and very smooth, solid and meaty, mild in flavor. Color is a bright yellow, making a decidedly attractive dish when served to-gether with red-fruited Tomatoes. Ripens quite early and is a prolific bearer. Pkt., 10c; oz., 40c; ¼ lb., \$1.35; lb., \$4.50, prepaid.

John Baer

Early Market Sort

The color is deep, glossy red—of good size and shape, with very solid flesh and few seeds. Ripens evenly right up to the stem and will not burst when dead ripe. It is a strong grower with just enough foliage to handle its immense loads of fruit. A popular early market variety and a great seller on the Detroit market. Pkt., 10c; oz., 30c; 1/4 lb., 90c; lb., \$2.75, prepaid.

Chalk's Early Jewel.

Enormous

Crimson Cushion or Beefsteak

The fruit grows very large and very The fruit grows very large and very smooth, with solid meat and few seeds. It is oval in shape, rather than round, like "Stone." It is very solid and keeps well on the vines after ripening; has rather few seeds and ripens all over and through at one time. The color is a clear deep red. Ripens in 125 days. Pkt., 10c; ½ oz., 25c; oz., 40c; ¼ lb., \$1.35, prepaid. prepaid.

Early Marketeer

First Introduced in the Northern Part of Michigan

It is one of the earliest, handsomest, and heaviest bearing Tomatoes in cultivation. The fruits are of medium size and a good marketable size is retained throughout the entire coarse. throughout the entire season. It is always smooth, of bright scarlet color; firm flesh, few seeds, and ripens evenly. Excellent in quality, being mild, pleasant, and of delicious flavor. An excellent sort for market and shipping. Pkt., 10c; ½ oz., 30c; oz., 50c; ¼ lb., \$1.50; lb., \$5.00, prepaid.

Marglobe—Wilt Resistant

For Main Crop-Shipping and Canning

Its fine appearance, great productiveness, deep globe shape, fine scarlet color and superb table qualities are giving it first place wherever it is known. The Tomatoes are heavy, meaty and almost coreless. In color it is a most beautiful scarlet, ripening well up to the stem. A very productive variety suitable for truck growing, shipping and canning. For the home garden we like it very much. Marglobe is a medium early sort; the plants are of robust and erect growth, its foliage shading the fruit and preventing sunscald. Marglobe is resistant to "nail-head rust." Ripens 10 to 12 days later than Earliana. The seed we offer was grown by ourselves here in Michigan, from seed furnished by Prof. Pritchard of the U. S. Government Experiment Farm. Pkt., 10c; oz., 30c; 1/4 lb., 90c; lb., \$3.00, prepaid. Its fine appearance, great productiveness, deep globe shape, 90c; lb., \$3.00, prepaid.

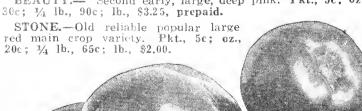

For full description see page 2. Pkt., 15c; $\frac{1}{2}$ oz., 35c; oz., 60e; $\frac{1}{2}$ lb., \$2.00, prepaid.

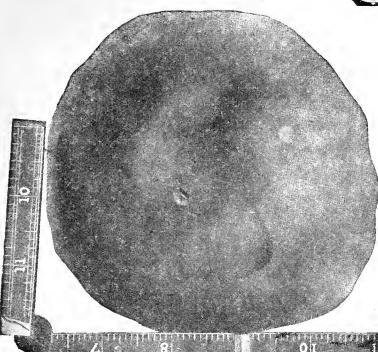

OTHER STANDARD VARIETIES

EARLIANA.—Extra early red. Ripens in 95 days. Pkt., ; oz., 30c; $\frac{1}{4}$ lb., 90c; lb., \$3.25.

Second early, large, deep pink. Pkt., 5c; oz.,

MARGLOBE. The Famous New Disease-Resistant Tomato.

Isbell's Colossal-Combines Quality With Size.

Results of Isbell's 1935 Prize Tomato Contest

In spite of the backward and generally poor season for tomatoes, our prize contest was a decided success. Tomatoes were sent in from all the surrounding states and from many distant states such as Georgia, Missouri, Virginia, Massachusetts and Vermont. Most of these were of unusual size and all of the prizewinning tomatoes except two, weighed over two and one-half pounds.

Improved Dwarf Champion OR TREE TOMATO

The dwarf compact tree-like plants of this variety make it an especially fine sort for small gardens. The plants may be set as close as 2 by 3 feet, with excellent results. The medium size fruits are round as a ball and held well off the ground by the stiff short branches. The color is a deep pinkish-crimson. They are very thick meated, mild in flavor, and never rough. Ripens in midseason and continues until frost. The quality is splendid either in salads or cooked. Pkt., 10c; oz., 35c; 1/4 lb., \$1.00; lb., \$3.75.

White Beauty

We have at last been able to propagate a white Tomato of good quality. The New White Beauty contains very little acid and so will make Tomatoes agreeable to thousands of people who have heretofore avoided them. White Beauty is ivory-white in color, and the flesh is almost paper-white. It grows about as large as Stone. Pkt., 15c; 3 pkts., 40c.

Isbell's Improved Ponderosa

A Great Favorite for Home Garden

This fine variety as grown by us is quite smooth, of immense size, very meaty, solid and luscious. For family gardens it is deserving of universal use and many market gardeners plant Ponderosa every year for their special trade. Unsurpassed in fine quality for slicing. The vines are of strong growth and produce large clusters of beautiful Tomatoes; they are extremely prolific and bear continuously until frost. The extra large, deep purple fruits are very fleshy with small seed cells; of extra sweet flavor. Ready for the table in 120 days. Ripens with the main crop and canning varieties. Pkt., 10c; ½ oz., 30c; oz., 50c; ¼ lb., \$1.50; lb., \$5.25, prepaid.

TOMATOES

Continued

Isbell's Colossal

THE LARGEST OF ALL TOMATOES

The Colossal was correctly named, as it is unquestionably the largest Tomato in existence. In quality it is likewise supreme. The very thick, meaty flesh, few seeds, and mild flavor combine to give the Colossal a quality on a par with its immense size. Equally suitable for slicing, in salads, and for canning. The mild flavor appeals to many people who cannot eat sharper flavored sorts containing more acid. Colossal not only produces giant fruits, but it also is a very big yielding variety. The Tomatoes are of a deep purplish red color. If you have never tried Isbell's Colossal Tomato, there is a fine surprise in store for you. We know you will be delighted with it as thousands who have grown it have been. It is especially suitable for the home garden. We introduced and named it the Colossal and our seed is pure. Pkt., 15c; ½ oz., 40c; oz., 75c; ½ lb., \$2.75; lb., \$10.00, prepaid.

Isbell's Golden Colossal

The best way to describe the Golden Colossal is to say that it is just like our famous Colossal except in color, which is a beautiful golden yellow. Try a packet of these together with the red. Slices of the two on the table make a very attractive dish. Pkt., 15c; ½ oz., 40c; oz., 75c, prepaid.

New Oxheart

Heart Shaped Fruits of Immense Size

Aptly named because of the distinctive heart-shaped fruits, which attain unusual size and are of the finest quality. Very solid tomatoes with decidedly few seeds; of mild flavor, less acid than other sorts. A wonderful exhibition sort, creating unusual interest wherever displayed. Complete description on page 2. Pkt., 15c; ½ oz., 45c; oz., 75c; ¼ lb., \$2.75, prepaid.

Small Fruited Tomatoes

Largely used for making fancy pickles, preserves, canning, etc. These varieties are easily grown and yield wonderfully well. Do not fail to plant one or more kinds this year, you will never do without them.

RED PEAR—YELLOW PEAR—RED PEACH—RED PLUM YELLOW PLUM—GOLDEN HUSK OR GROUND CHERRY

Price of any of the six varieties: Pkt., 10c; $\frac{1}{2}$ oz., 30c; oz., 50c, prepaid.

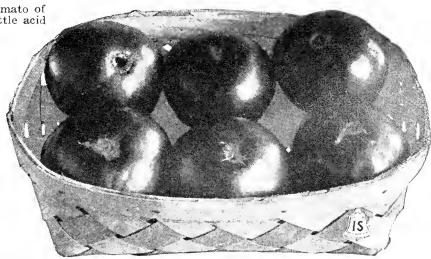

SPECIAL: One packet of each of these six Tomatoes for 50c, postpaid.

SMALL-FRUITED SORTS MIXED.—Just the thing for the home garden. Pkt., 5c; ½ oz., 30c; oz., 50c.

New Yellow Oxheart

Resembles Oxheart very closely in size, shape and habit of growth but the color is bright yellow. Makes a handsome contrast when sliced with Oxheart. The flavor is very mild and pleasing. Supply of seed is limited. Pkt., 15c; ½ oz., 75c, prepaid.

HOTKAPS. For Early Tomatoes. See page 98.

Isbell's Improved Ponderosa-Popular Home Garden Sort.

AS)

Cow Horn.

Purple Top Strap-Leaved More generally planted than any other variety. It is a quick grower, flesh is very fine grained and sweet flavored. In shape the roots are broad and flat, of medium size. Planted largely for table use and stock feeding; it is a very good keeper. May be sown either broadcast or in drills, and will form good sized bulbs in seven to eight weeks. Pkt., 5c; oz., 10c; 1/4 lb., 20c; lb., 65c, prepaid.—Not prepaid, 5 lbs., \$2.50.

White Egg

Popular early Turnip, adapted for either spring or fall sowing. The solid roots are egg-shaped, perfectly smooth and pure white. The sweet, firm flesh is always mild, rich and fine flavored. Pkt., 5c; oz., 10c: 1/4 lb., 20c; lb., 65c, prepaid.—Not prepaid, 5 lbs., \$2.50.

Extra Early Purple Top Milan

This splendid Turnip is the earliest in cultivation. Very flat, of medium size, quite smooth, with bright purple top. Of uniform growth, and in quality the best. Planted extensively for first market crop but is not so well suited for summer planting. Reaches marketable size in 50 days. Pkt., 5c; oz., 10c; 1/4 lb., 30c; lb., 85c; prepaid. Golden

Purple Top Yellow Aberdeen

A large, globe-shaped yellow turnip with purple top. Fine for use in the fall or early winter, but is planted very extensively for stock feeding. A heavy cropper. Matures in 75 to 80 days. Pkt., 5c; oz., 10e: 1/4 lb., 20c; lb., 65c, prepaid.—Not prepaid, 5 lbs., \$2.50.

Cow Horn or Long White

This variety is a great field Turnip, and is Carrot-like in form, growing nearly half out of the ground. Finc quality; good keeper. The flesh is fine grained and well flavored, and for table use is in best condition when the roots are about two inches in diameter. Desirable for stock feeding. Cow Horn is planted extensively for feed and for green manuring purposes, here in Michigan and other states. Pkt., 5c; oz., 10c; 1/4 lb., 20c; lb., 65c, prepaid.—Not prepaid, 5 lbs., \$2.50.

of maggets and root worms on your Turnip, Radish and Onion crops. It is easily applied and economical to use. See full description on page 100 page 100.

Snowball or Early Six Weeks

Extra Early—Sweet—Pure White
A fine looking, pure white variety which matures quickly. The bulbs have a smooth white skin and are nearly round. Does not grow large but is one of the best to sow very early in the spring. Ready to use in 50 days. Pkt., 5c; oz., 10c; 1/4 lb., 25c; lb., 70c, prepaid.

Golden Ball or Orange Jelly

Fine Yellow Flesh Table Turnip.

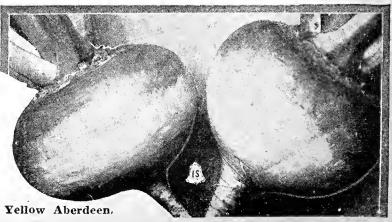

A yellow Turnip grown extensively for home consumption on account of its fine quality. The flesh is of very fine texture. Its beautiful color and fine flesh have earned for it the synonym of "Orange Jelly." Ready in 65 days. Pkt., 5c; oz., 10c; 1/4 lb., 25c; lb., 70c, prepaid.

Japanese Foliage Turnip

For greens as well as for Turnips this new variety is considered very fine. The plant resists extreme dry weather and lice. The leaves are large and very long, they grow upright, about two feet tall. The greens are tender, juicy and of finest mild turnip flavor. In 20 to 25 days the first crop of greens is ready for use. The roots or turnips are all white, and mild in flavor. Pkt., 5c; oz., 10c; ½ lb., 20c; lb., 60c, prepaid.—Not prepaid, 5 lbs., \$2.25; 10 lbs., \$3.90.

Southern Seven Top

Grown extensively for greens for the table as well as for green feed for stock. Pkt., 5c; oz., 10c; ½ lb., 20c; lb., 50c, prepaid.—Not prepaid, 5 lbs., \$1.90.

TURNIPS AND RUTABAGAS

In the northern states turnips and rutabagas are grown on a large scale, they e considered one of the surest crops the farmer can grow as well as a profitable one. producing 600 to 1000 bushels of marketable roots per acre on suitable

Amber Globe Turnip

A good cropper, and keeps in perfect condition until Spring. The turnips are globe-shaped, of good size, and run very uniform; skin light yellow, flesh yellow, firm and sweet. Highly esteemed for table use. Matures in 70 days. Pkt., 5c; oz., 10c; 1/4 lb., 20c; lb., 65c, prepaid.—Not prepaid, 5 lbs., \$2.50.

Mixed Turnips

A mixture of all varieties of garden turnips, early and late sorts, both white and yellow fleshed. One sowing will supply Turnips all season. Pkt., 5c; oz., 10c; 1/4 lb., 20c; lb., 60c, prepaid.

Rutabagas or Swedes

Rutabagas require a longer season for maturing than Turnips, hence should be sown earlier, about the middle of June.

AMERICAN PURPLE TOP.—An old standard variety. Large size roots of yellow color with purple top. Pkt., 5c; oz., 10c; 1/4 lb., 20c; lb., 65c, prepaid.—Not prepaid, 5 lbs., \$2.50.

Rutabaga—Isbell's Improved.

ISBELL'S IMPROVED PURPLE-TOP YELLOW.—The best variety of Swedish Turnip in cultivation; hardy and productive; flesh yellow and well flavored; shape slightly oblong. A great cropper and splendid keeper. Pkt., 10c; oz., 15c; ¼ lb., 30c; lb., 90c, prepaid.—Not prepaid, 5 lbs., \$3.75.

MONARCH, or TANKARD.—Said to yield more than any other sort. Large tankard-shaped roots. Flesh rich yellow, very solid and fine grained. Pkt., 5c; oz., 10c; ¼ lb., 25c; lb., 70c, prepaid.—Not prepaid, 5 lbs., \$2.90.

CANADIAN YELLOW.—Heavy cropping sort. Planted extensively in northern Michigan and in Canada. Fine quality and great keeper. Pkt., 10c; oz., 15c; 1/4 lk., 30c; lb., 90c, prepaid.—Not prepaid, 5 lbs., \$4.00.

"I have eaten Rutabagas all my life but I don't remember eating any with as fine a flavor as the Canadian Yellow. I came from a country (Scotland) that grows them in large quantities."—WILLIAM C. CLARK, Romeo, Michigan.

Monarch Rutabaga.

FOR SEASONING

HERBS

FOR FLAVORING

For flavoring soups, meats, etc., a few pot and sweet herbs are necessary for every garden. Cultural directions on every packet. Varieties preceded by a (*) are perennials.

ANISE.—The seed is used for medicinal purposes as an aromatic and in baking. Leaves used for flavoring garnishing and cordials. Pkt., 10c; oz., 25c; 1/4 lb., 75c.

CARAWAY.—Seed is used for flavoring rye bread, etc., and in the making of cheese, also in flavoring sauces. Pkt., 5c; oz., 16c; 1/4 lb., 30c.

CHIVES.—The leaves are used for seasoning soups, ews, salads, cottage cheese, etc. Pkt., 10c; ½ oz., 35c; stews, oz., 60c.

CORIANDER.—The seed is used for flavoring in baking, and in making candy. Pkt., 10c; oz., 15c; 1/4 lb., 45c.

DILL.—Leaves and seed heads are used in making Dill Pickles and for flavoring soups and sauces. Pkt., 5c; oz., 10c; ¼ lb., 25c; lb., 75c.

*FENNEL, Sweet.

The leaves boiled are used in fish sauces. Seeds are used for flavoring and for medicine. Pkt., 10c; oz., 20c; 1/4 lb., 65c 1/4 lb., 65c.

*LAVENDER. Chiefly grown for its flowers, which are used in the manufacture of perfumery. Pkt., 10c; ez., 50c.

MARJOR A M, SWEET. - Leaves and ends of the shoots are used for flavoring, both green and dried. Pkt., 10e; oz., 25e; 1/4 lb.,

*ROSEMARY.—Leaves are used for seasoning. 10e; ½ oz., 45e; oz., 75c.

SAFFRON.—Used in coloring certain dishes, also for flavoring. Pkt., 10c; oz., 30c; 1/4 lb., 90c.

SAGE.—Leaves and tops are used for seasoning and uffing, also for medicinal purposes. Pkt., 10c; oz., 25c; stuffing, als 1/4 lb., 75c.

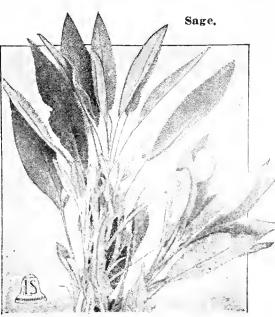

SORREL.—Is b -Is boiled and served like Spinach, also used

in soups. Pkt., 10c; oz., 20c; ½4 lb., 50c; lb., \$1.65.

SUMMER SA-VORY.— Leaves and young shoots are used for flavoring, especially for boiled string beans. Pkt., 10c; oz., 20c; 1/4 lb., 60c.

THYME.—Used for seasoning; a tea is also made for nervous headache. Pkt.. headache. Pkt.. 10c; ½ oz., 25c; oz., 40c.

WORMWOOD. WORMWOOD.
—For medicinal purposes. Beneficial to poultry; plant in your poultry yard.
Pkt., 10c; oz., 25e; 1/4 lb., 80c.

ISBELL'S IS SEEDS

Strong

Isbell's Vegetable Plants

Hardy

Cabbage Plant.

WILL HELP YOU TO EARLY MARKET PRICES-THEY ARE GROWN RIGHT FROM SELECTED SEED.

All plant orders going beyond the third zone (over 300 miles) will be shipped at purchaser's risk; we assume no responsibility.

You will have early maturing vegetables, and few disappointments from plants dying on being set out, or nipped by frost. The treatment they receive at our greenhouses so hardens the plants that they will stand cold. Experience has taught us just how to transplant to develop the big bunches of fibrous roots.

Shipments will be made on orders as soon as the plants are ready. Dates given are approximately right. Prices on dozen and hundred lots include carrying charges, either by parcel post or express. Prices on 1,000 lots do not include transportation charges. We supply transplanted stock (not seedlings) at prices quoted. No orders filled for less than 1 dozen plants of a variety. Please do not ask it.

TOMATOES .- Early and Medium Sorts-Ready May 10th; Late kinds, May 20th.

Alpha Pink, Earlibell, Marglobe, Phenomenal and Scarlet Toper. Doz., 35e; 100 for \$1.75, postpaid.—Not prepaid, \$14.50 per

Isbell's Colossal and Oxheart. Doz., 45c; 100 for \$2.00, prepaid.

Chalk's Jewel, Earliana, Bonny Best, John Baer, Stone, Beauty and Ponderosa. Doz., 30c; 100 for \$1.50, postpaid.—Not prepaid, \$12.50 per 1000.

Tomato Plant.

CABBAGE.—Early Varieties—Ready about April 10th; ersey Wakefield, Golden Acre, All Seasons, Copenhagen Jersey Wakefield, Golden Acre, All Seasons, Copenhagen Market and Glory. Price, doz., 25c; 100 for \$1.50, postpaid.

Not prepaid. \$10.00 per 1000.

Late Varieties.—Ready June 1st to July 15th: Jackson Winter, Danish Ballhead, Danish Roundhead, Premium Flat Dutch. 50 for 60c; 100 for \$1.00, postpaid.—Not prepaid, \$5.00 per 1000.

Red Stonehead and Drumhead Savoy. Doz., 30c; 100 for \$1.50, postpaid.

CAUINFLOWER.—Early Transplanted—Ready 15th. Isbell's Snowball and Dry Weather. Doz., 100 for \$2.25, postpaid.—Not.prepaid, \$17.50 per 1000.

Field-Grown Plants of Cauliflower. Ready in June. 100 for \$1.75, postpaid.—Not prepaid, \$10.00 per 1000. CELERY.—Early Transplanted—Ready about May 1st: Golden Self-Blanching, Easy-Blanching, and White Plume. Doz., 30c; 100 for \$1.75, postpaid.—Not prepaid, \$10.00 per 1000.

EGGPLANT.—Ready May 20th. New York Improved. Doz., 40c; 100 for \$2.50, postpaid.

PEPPERS.—Ready May 20th. Chinese Giant, California Wonder, Harris' Early Giant, Ruby King, Pimiento, Bull Nose, Long Red Cayenne. Doz., 35c; 100 for \$1.75, postpaid. Write for prices in quantity.

SAGE PLANTS.—The leaves are used for seasoning. 3 for 30c; doz., \$1.00, prepaid.

Asparagus Chives

Vegetable Roots

Horseradish Rhubarb

Asparagus Roots

A bed of Asparagus in the garden properly attended to will for many years furnish an abundance of the finest vegetable in the early spring. An Asparagus bed is a permanent investment and every garden should have one. Plant about 8 to 10 inches apart in the row, and the rows 3 to 3½ feet apart. Plant deep enough to permit the crowns to be covered about 3 to 4 inches, with rich, mellow soil. The roots may be planted either in the spring or fall. Two year old plants give best results. We have a very fine stock of strong field-grown roots. For full description of varieties, see page 10. Price on following varieties: Bonvallet's Giant—Giant Argenteuil. Strong, selected, two-year roots, 100 for \$1.25; 500 for \$5.00, not prepaid.—By mail, postpaid, 12 for 35c; 25 for 60c; 100 for \$1.65.

NEW WASHINGTON.—The New Giant Rust-Proof Variety. Two-year-old roots, 100 for \$1.35; 500 for \$6.00, not prepaid. By mail, postpaid, 12 for 40c; 25 for 75c; 100 for \$2.00.

Horseradish is easily grown from sets morseradish is easily grown from sets small lengths of roots. These sets, if planted in the spring in good, rich soil, will form large roots by fall. The sets should be planted with the small end down and the upper portion 2 inches below the surface. Plant in rows 2 or 3 feet apart and set roots 12 to 15 inches apart in the rows.

apart and set roots 12 to 15 inches apart in the rows.

"MALINER KREN."—This new variety from Bohemia is by far the best. It is larger, earlier and whiter than the common kind. Ready to use in 125 days. Prices, postpaid: Choice sets, doz., 35c; 100 roots, \$1.50. Not prepaid, 1000 roots, \$10.00

BERMUDA ONION PLANTS
These will make large sweet onions
for the table in a very short time.
Full description on page 38. Price,
200 plants, 35c; 500 plants, 85c; 1000
plants, \$1.50, prepaid.—Not prepaid,
crate of 6000, \$4.75.

Rhubarb or Pie Plant

Our first and best Spring tonic. It contains valuable mineral elements which should be a part of the family diet all the time, either fresh or in the canned state.

Rhubarb is considered a necessity in the home garden, furnishing very early in the spring, juicy stalks for the favorite rhubarb pie, for sauce, for canning for winter use, for wine-making, etc. The richer the soil the larger and juicier the stalks will be. Plant the roots 3 to 4 feet apart each way; they may be set out either in the spring or fall. A bed of Rhubarb, or at least a few clumps, should be in every garden—it is a permanent investment for little cost.

GIANT VICTORIA RHUBARB ROOTS.—The best va-ety. Excellent quality and large stalks.

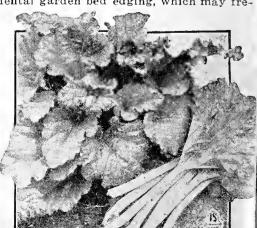

Prices, by mail, postpaid: 15c each; 3 for 35c; 12 roots or \$1.00.—Not prepaid, 12 roots for 85c; 50 roots for \$3.00.

Chives - Schnittlauch

An onion-like plant, which by some is highly esteemed for use as a salad, and the green stems afford a very pleasant onion flavor for soups. The plant also makes an excellent ornamental garden bed edging, which may fre-

quently be cut, a new growth of leaves appearing soon after each cutting. The seed may be sown in rows in the garden or in boxes and transplanted. After 2 or 3 years the plants may be taken may be taken up, divided and reset. Chives Plants, per clump, 25c; 5 for \$1.00, prepaid.

Isbell's Northern Grown Farm Seeds

Best Quality Seeds at Growers' Prices

We offer hardy, dependable, northern grown field seeds of highest quality and known origin. All of our seed is carefully tested both for purity and germination and is first class in every way. You run no risk of getting a lot of foul weeds or a poor stand on account of low germination when you plant Isbell's Bell Brand Seeds. However, there are so many other factors which enter into production that to guarantee a crop is an impossibility and, therefore, in common with all reputable seed houses, our seed is sold subject to the disclaimer of the American Seed Trade Association:

"We do not give any warranty, express or implied, as to description, quality, productiveness or any other matter of any seeds we sell and will not be responsible for the crop."

Isbell's Michigan Grown Seed Corn

QUALITY BETTER THAN EVER WITH LOWER PRICES

Growers generally fail to realize that the cost of good seed corn averages only thirty to fifty cents per acre. This is the smallest item in producing a crop. With these facts in mind everyone who expects to grow Corn at a profit will realize the importance of good dependable Seed Corn, such as we offer.

All of our Seed Corn is from specially selected ears and shows an extra good germination test this year. Most varieties test better than 95 per cent and all grow 90 per cent or over. All of our Seed Corn is shelled, cleaned and graded and is sold on the basis of 56 lbs. per bushel. All prices include bags. At the prevailing low prices of Seed Corn, this season offers a golden opportunity to secure new seed of improved strains at the lowest possible cost.

POLAR YELLOW DENT

HARDY— RESISTS FROST — BIG YIELDER

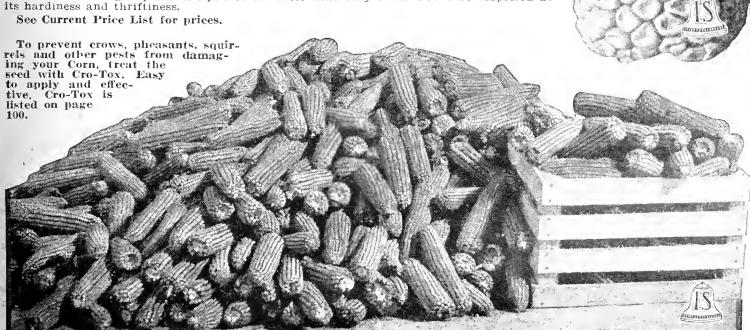

Polar Yellow Dent was developed at the Michigan State Experiment Station by Michigan's premier Corn breeder, J. R. Duncan. It was the result of a series of tests to freeze out all forms of root rot and produce a Corn entirely free from root diseases. It was first distributed for increase in 1925, so that it has now been grown for ten years. This is the ninth year we have handled seed of this variety.

Polar Yellow Dent is a vigorous growing variety resembling in general characteristics Duncan Yellow Dent. The stalks are large and leafy, making it a splendid variety for both fodder and ensilage, as well as grain. The ears are large and of a beautiful rich golden color. The kernels are deep and slightly rough. The average number of rows per ear is sixteen. The Polar Yellow Dent Corn we are handling now is a great improvement over this variety ten years ago. The ears are much more uniform and the kernels deeper, making a heavy shelling variety.

Polar Yellow Dent is not an extra early sort, but, because of its resistance to frosts and cold weather, may be planted earlier than any other sort, which gives it ample time to mature a full crop. It is one of our heaviest yielding sorts.

Polar Yellow Dent should always be planted early enough so that it goes through at least one frost. This will keep it free from fusarium root rot and all other root diseases which affect so much of the Corn crop with disastrous results. This early planting has other advantages, also. The Corn is so far advanced when the corn borer first appears that it is not much affected by it. Early planting also insures a strong, healthy root growth so that the stalks stand up better than other varieties and are seldom blown down.

Don't be afraid to plant early. Any ordinary frost will not hurt it a particle and it has withstood freezes which froze the ground so that the crust would hold a man up. In Southern Michigan plant in April or not later than May 10th. You'll be surprised at its hardiness and thriftiness.

Some of Isbell's Polar Yellow Dent Corn, the best seed of this variety we have ever offered.

Isbell's First Choice Yellow Dent

An Early Maturing, Heavy Yielding Dent.

We have been growing and improving this strain of Corn for over twenty-five years so that the type is thoroughly fixed and it is very uniform. First Choice Yellow Dent is an extra early variety, maturing in 90 days. Ears are well formed, symmetrical and well filled at both butts and tips with golden yellow kernels having a good depth for such an early sort. Cobs are small and dark red. The stalks grow 7 to 8 feet tall and are very vigorous. Matures ordinarily as far north as Saginaw Bay in this state and often even farther north in a favorable season. We have received literally hundreds of letters from growers who have produced splendid crops from our seed and plant Isbell's First Choice year after year. See Current Price List for prices.

Northwestern Dent

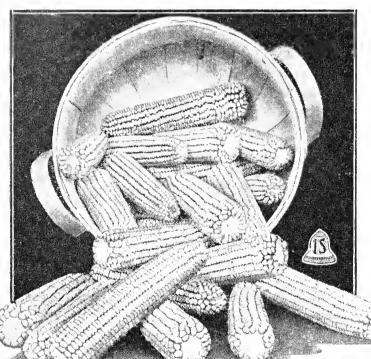

The Earliest Variety of Dent Corn.

Northwestern Dent, also known as Pony Dent and Smoky Dent, is grown farther north than any other sort. It will mature regularly in Northern Michigan, Wisconsin and Minnesota in normal seasons. In Southern Michigan it is usually ready to cut by the middle of August. It is a good yielder and a good feeding sort. The ears average 7 to 8 inches long and usually have 12 to 14 rows of kernels with a very small cob. The color is a deep red with bright yellow caps making it very attractive. It is often used for hogging down early in the fall before other sorts are mature. See Current Price List for prices. for prices.

Early White Cap Yellow Dent (RED COB TYPE)

A Selected Strain of the Old Standard Variety

Do not confuse this strain with the large, late, white cob type of White Cap which is only suitable to the southern counties of Michigan, Isbell's Early White Cap Yellow Dent matures in 90 to 100 days and the ears have small, red cobs. The kernels are creamy yellow with white caps. It is a good yielder on light soils and is also more resistant to drought than the yellow variety.

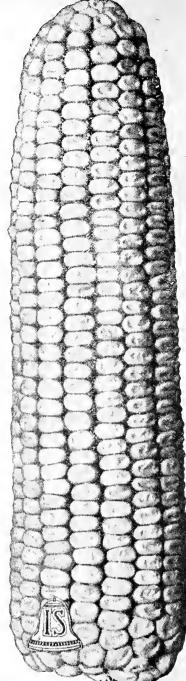

and is also more resistant to drought than the yellow vari-eties. Makes a good leafy stalk 8 to 9 feet high and is a splendid early ensilage vari-ety especially for the North. See Current Price List for

Woodburn Yellow Dent

A Large Dent for Southern Michigan and the Corn Belt. Woodburn Yellow Dent is

the largest and most ul varieties and is beautiful beautiful varieties and is rapidly becoming very popular in the extreme southern part of Michigan and in Indiana and Ohio where it was developed. It is one of the heaviest yielding and shelling sorts and a rich feeding variety. The ears are 9 inches or over in length and of very uniform type with 16 to

uniform type with 16 to 18 rows of deep golden oblong kernels. The stalks oplong kernets. The starks are large and leafy, making it also a splendid ensilage variety. See Current Price List for Prices.

Isbell's First Choice.

White Cap Yellow Dent.

Isbell's Sure Thing Purple Tip Dent A DISTINCT Early Variety Especially Suited to Light Soils

Isbell's Sure Thing Purple Tip Dent derives its name from the purple coloring on the tips of the ears and from its earliness and sure earing habits. This variety is entirely free from barren stalks, many producing two good ears. Stalks are 6 to 8 feet high and stand up well. Ears are long, stender, and have very small cobs. The kernels are cream colored with white caps except at the tip end where they are bright reddish purple.

Ears average 9 inches long but are often much law. A Distinct Early Variety Especially Suited to Light Soils Ears average 9 inches long but are often much longer. This Corn will ear up better on poor, sandy soils than any other variety. Its earliness makes it a fine variety for hogging down and for early ensilage as well as fodder. As a thoroughly dependable, early and sure maturing sort for light soils, Sure Thing Purple light soils, Sure Ti Tip Dent is unequaled. See Current Price List for prices. Early, Ears, Yielder. Isbell's Sure Thing Dent.

Isbell's Northern Grown Seed Corn

Golden Glow or Murdock

An Early Yellow Dent for the North
Golden Glow is a very early Dent of Wisconsin origin. It has proven to be
a very useful sort for the North where the seasons are too short for the
larger and later types. The stalks grow six to eight feet tall and bear ears
of deep yellow from 7 to 8 inches long. The kernels are nearly square and
the cobs are deep red. Ripens normally in 90 days. See Current Price
List for prices List for prices.

Pickett's Yellow Dent

A Reliable 90-Day Yellow Dent

This variety is the result of many years of careful selection by Mr. Pickett of Kent County, Michigan, from whom it derives the name. The ears are long and somewhat slender, with a small, dark red cob. The kernels are slightly rough and rather deep for such an early variety. The seed we offer was grown from Certified seed which came direct from the originator. See Current Price List for prices.

Isbell's Earliest of Early Dents

Also Called Canadian Dent and Minnesota King

Earliest of Early Dents is an extremely early Corn that ripens normally in 85 to 90 days. It is an eight-rowed Corn, neither a true Dent nor a Flint, but a Hybrid Dent having very broad yellow kernels with white caps. The ears are slender with very small cobstit is used a great deal by stockmen who feed Corn in the bundle without husking, and also for hogging down early. See Current Price List for prices. List for prices.

Improved Reid's Yellow Dent

A Large, Late, Heavy-Shelling Sort for the Corn Belt

Recommended highly for Ohio, Indiana, Illinois and Iowa, but not for Michigan, except for fodder and cnsilage. Ears 8 to 11 inches long, very uniform and of light golden yellow. Often shells 88% grain. Matures in 110 to 120 days. Our seed was grown in Northern Ohio. See Current Price List for prices.

Smut Nose Early Flint

Also Called Early Red Blazed

Golden Glow.

An Old Time Favorite

King Philip is an early, dark red Flint, producing ears 10 to 15 inches long. It is a very hardy sort and will stand planting on wet cold soils. Recommended for sections where the spring is apt to be cold, wet and late. Often produces two ears on a stalk and is a heavy yielding sort. A valuable sort for feeding early and also a useful variety for ensilage in the North. See Current Price List for prices.

ENSILAGE CORN

Giant Growing Sorts That Produce Extra Tonnage

EUREKA ENSILAGE.—A very large, leafy variety of white Corn which will produce more tonnage per acre than any other variety we list. Large ears having broad, white kernels. We offer seed grown in Virginia, which state produces the best quality seed of this variety.

IMPROVED LEAMING ENSILAGE,—Is a large, yellow Dent sort which matures in 110 to 120 days, making it very desirable for ensilage where nearly matured Corn is desired. Stalks grow 10 feet high and are very leafy. This variety has produced 100 bushels of shelled Corn per acre in the Corn Belt. If you want both fodder and grain, plant Improved Leaming Ensilage.

GIANT RED COB.—Is a large, late, pure white corn with red cobs. A wonderful variety for fodder and ensilage. Has produced 45 tons of ensilage per acre in Michigan. An old standard sort for ensilage where mature grain is not desired.

IMPROVED RED COB.—Is a little finer grade of seed than the preceding as it is seed from ears which have been tipped and butted and graded somewhat closer.

Early Sweet Fodder Corn

This is a mixture of early varieties of Sweet Corn which will make fodder very early. Ready at a time when pasture is short and needs supplementing. Stalks grow about 5½ feet tall with lots of ears.

Evergreen Sweet Fodder Corn

Evergreen Corn is well known nearly everywhere, but the seed is rather expensive for fodder. This seed is not quite good enough for the best grade of Sweet Corn seed but is splendid for fodder and priced accordingly. Produces stalks 6 to 7 feet tall, and large, very sweet ears.

Eureka Ensilage Corn.

See Isbell's Current Price List for prices on Seed Corn.

Soils

MICHIGAN GROWN SEED OATS

Reliable, Heavy Yielding Sorts

New Markton Oats

A Smut-Resisting Sort for Light Soils.

The most remarkable feature of this new variety is its The most remarkable feature of this new variety is its immunity to smut, which makes treatment of the seed unnecessary. Another valuable characteristic is the way it yields on light soils. On the sandy loam soils which make up such a large part of Michigan it outyields all other sorts. The straw is of good length but is not stiff enough for use on extremely rich or heavy clay soils as it will lodge. Markton is an early variety which is usually ready for cutting nearly a week before Wolverine. The heads are loose and spreading resembling those of Wolverine. Wolverine.

Wolverine.

This oat was developed in Oregon from a pure line selection made by the plant breeders of the U. S. Dept. of Agriculture from a variety which was thought to be of Turkish origin. It has been given a thorough trial at the Michigan State Experiment Station and in many other parts of the state where it has thoroughly demonstrated its practical value on the lighter soils where lodging is not a problem. Markton Oats supply a real need for a reliable yielding variety with straw of good length suitable for light land. We offer certified seed grown from registered seed. Order early as our supply is limited,

Mammoth Cluster Oats

Especially Valuable on Rich Prairie Soils.

Especially Valuable on Rich Prairie Soils.

Mammoth Cluster Oats originated in Illinois where only exceptionally stiff strawed sorts can be grown on account of lodging. Seed of this variety has sold from \$2.50 to \$5.00 per bushel in recent years. It yields tremendously on rich soils and often produces 100 bushels and over per acre in good oat seasons. The heads are loose and spreading, and the straw is stiff and strong. The kernels are white, very large, plump and heavy. A measured bushel usually weighs well over 40 pounds. This is distinctly a rich land oat and should not be planted on light or poor soil. For the rich alluvial soils of Michigan such as the Saginaw Valley, and for the rich prairie soils of Illinois, Ohio, and Indiana, this oat is ideal.

Isbell's Bumper Crop Oats

Here is a splendid, reliable sort that we have featured for several years and which has a host of friends. It is especially valuable for planting on heavy clay soils as it makes very stiff straw and does not lodge. It is a very hardy sort and resistant to blight and rust. It does well on any type of rich, well-drained land.

Yields of 100 bushels and over per acre have been produced many times in favorable Oat years. The grain is very heavy and a measured bushel usually weighs 40 to 45 lbs. The kernels are large, white and very plump.

"Our Wolverine Oats yielded over eighty bushels per acre from the seed we bought of you. They are plump and heavy, and we have fine seed for next year. We are well pleased with all the seed we got from you."—HENRY JOHNSON, Owosso, Mich.

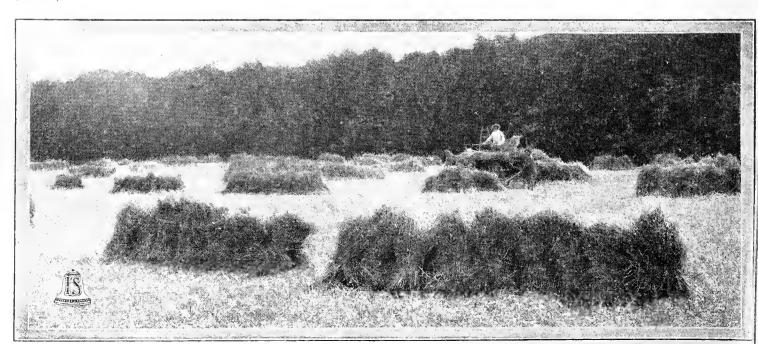

Wolverine Oats

A Very Popular Variety in Michigan.

Wolverine Oats are strong, vigorous growers, medium early, and heavy yielders. The head is full and loose with the seeds evenly distributed around the stem. The straw is of medium height and stiff enough so that they seldom lodge. The grain is large, white, rather blunt, and very plump. It is not unusual for a measured bushel to weigh 40 pounds and often more. This variety is grown more extensively in Michigan than any other variety because it has given such uniformly good yields. 40 pounds and often more. This va extensively in Michigan than any oth has given such uniformly good yields.

One of our customers from Central Michigan wrote us a few years ago as follows: "I grew 1505 bushels of Wolverine Oats on 17 acres from the certified seed I got of you and they are of extra fine quality." This crop averaged almost 90 bushels per acre. It pays to buy good seed oats.

See Current Price List for Prices on Seed Oats

Good Seed Oats

Are Scarce This Year and the Demand for Them is Greater Than for Many

The continued humid weather of the past season was hard on Oats. Many crops which were very promising turned out to be a disappointment at threshing time. Also, due to weather conditions smut and rust were prevalent and most crops were badly discolored by rains at harvest time. Nearly all Oats are lighter in weight than common and many lots are low in germination. We have a fair supply of good seed Oats but our stock is much less than our usual requirements. We advise buying your seed Oats and all seed grains early to be sure of your supply of reliable seed.

GIANT PERFECTION— The King of Oats

Isbell's Giant Perfection is a new and dis-

Isbell's Giant Perfection is a new and distinct variety of unusually robust and sturdy growth. This new Oat originated in Michigan and it produces the heaviest, thickest straw of any variety. The straw is so heavy and stiff that these Oats do not lodge even on the heaviest and richest soils. The grain is borne in dense, compact clusters. The kernels are unusually large and plump and have thin hulls and extra large meats. The grain is exceptionally heavy so that a measured bushel will often weigh 40 pounds or over.

Yields of 80 to 95 bushels per acre have been obtained under favorable conditions. In season it is medium early and ripens at the same time as Wolverine. It is a very leafy variety and the straw is well liked by all kinds of livestock. Giant Perfection is a great stooling variety so that only 1¼ to 1½ bushels of seed are needed per acre.

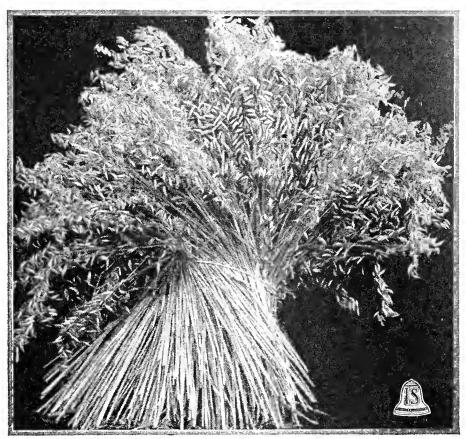

Isbeli's Johnson Oats

Johnson Oats originated here in Michigan and we introduced them more than twenty years ago. They have never lost their popularity and a multitude of growers still continue to raise them year after year. There are abundant reasons for their favor with the growers.

Johnson Oats produce large branching heads and the straw is always of good length even on sandy soils and in dry seasons. It is not a side Oat but has a full spreading head. The kernels are long, plump and of exceptional whiteness. To sum it up briefly, it is a consistent yielder and under good growing conditions will yield as well as any other variety. Johnson Oats are absolutely dependable.

Improved Swedish Select Oats

This Oat, as the name indicates, is of Swedish origin, a country where the production of good Oats is almost a religion. First offered to American growers in 1908 and still very popular. One of the principal advantages of this variety is the short, very stiff straw which practically never lodges. The heads are in close clusters and the kernels are short, plump and very heavy. A measured bushel of Swedish Select Oats often weighs 45 lbs. In yielding ability it is second to none.

New Giant Perfection-The King of Oats.

Marquis Spring Wheat

This variety is grown almost exclusively in the Spring Wheat District

Marquis Wheat was originated by the late Dr. Saunders on the Dominion Experiment Farms, Ottawa, Ont. After a careful selection for a number of years to fix the type, it was sent to the different Canadian Experiment Farms, where it quickly made a name for itself on account of its earliness and its enormous yields. It is a bald Wheat. Has given the very best results in Michigan.

Spring Rye

Spring Rye is highly valuable for a catch crop and for sowing with Vetches and Oats for a forage crop. For turning under it is considered a great soil restorer. As a grain crop it is profitable, as it yields well. Will make a good crop on soils too poor for wheat. We recommend Spring Rye as a profitable crop in New York, Pennsylvania, Michigan, Wisconsin, Ohio, Indiana, Illinois, and Minnesota.

Speltz

This grain is of Russian origin and is closely related to Spring Wheat. It should be planted very early in the spring as it will withstand cold weather, and like Spring Wheat, does better when planted early. While in Western States it does well on the poorer, stony soils, it is our experience that it produces much higher yields on the better coils.

Speltz is very good feed, either for pasturing or when ripe. When threshed, most of the hulls are left on the grain, which lightens it and makes it safer to feed it. It is a very rich feed, having practically the same feeding value as wheat, except that it is lightened by the hulls. It is a good grain to grind with any other grain for a ground feed. Sow 1½ to 2 bushels per acre. Prepare ground as for oats and sow early.

WE GLADLY SUBMIT SAMPLES

of any seed grains or other field seeds you are interested in. If you will send us a list of the varieties and quantities you need, we will make you our lowest price on your entire order and also quote you a delivered price if you wish. Crops of seed grains are short. Write early.

This Plant of Peat Land Barley, Having Over 20 Heads,

Was Produced

From

One

Seed. Notice the Great Stooling Habit. and Heavy Straw.

NORTHERN GROWN SEED BARLEY

New Peat Land or Muck Barley

A Valuable New Variety for Muck Farmers

Peat Land or Muck Barley was developed at the Minnesota State Experiment Station to fill a real need for a variety that could be grown successfully on muck or peat land. It has been thoroughly tested and has proven its ability to produce surprisingly large crops on muck without lodging. Yields of sixty bushels per acre have been obtained many times.

Peat Land Barley is a six-rowed bearded sort, the beards of which break off cleanly in threshing. The straw is of medium length and of unusual stiffness. Another valuable characteristic is its great habit of stooling. Often as many as twenty stalks grow from one seed, each producing a well developed head. Because of this habit, only one bushel of seed is required on muck and 1¼ bushels on upland. More than these quantities should never be sown.

Peat Land Barley is a very hardy sort and early spring frosts will not hurt it. To get the largest yield possible, the use of 150 lbs. potash and 50 lbs. phosphate per acre is recommended. On muck it ripens about ten days later than Barley on uplands. Many farmers, with good muck land, will find, in this Barley, the answer to their problem of what to grow for feed on their muck land.

Spartan Barley

A Popular, Heavy Yielding, Smooth-Bearded Sort.

Spartan Barley is a consistently heavy-yielding sort and often yields 50 bushels and over per acre. In comparative tests at Michigan State College, Spartan has consistently outyielded other sorts, usual-ly by 6 to 8 bushels per acre. It is an early sort ripening a week ahead of other varieties. For best quality grain Spartan should be allowed to stand until thor-oughly ripe. should be a oughly ripe.

Velvet Barley

Minnesota No. 447

Velvet is a new six-rowed bearded barley with smooth, barbless beards, that
originated in Minnesota. It has been
grown in Michigan for several years with
splendid success. The seed is much in
demand in the great barley producing
states of Iowa, Illinois, Indiana, Ohio,
and Pennsylvania. Velvet is a splendid
malting barley and is in high favor with
manufacturers of malt. The straw is
stiff and of good height, Velvet is one of
the heaviest yielding varieties and seems
to be more disease resistant than other
sorts. We offer choice Michigan grown
seed.

Isbell's Silver King Barley

Silver King Barley is noted for its extra large heads and long, stiff straw. The heads are the largest of any six-rowed sort and the kernels are exceptionally bright and plump. This Barley is also of Wisconsin origin where they know good Barley. While it does best on heavy, rich soil, it is also adapted to the warm, light soils of Michigan. Silver King Barley seldom lodges and is an all-around reliable sort to grow. It is a splendid malting barley.

Wisconsin Pedigree

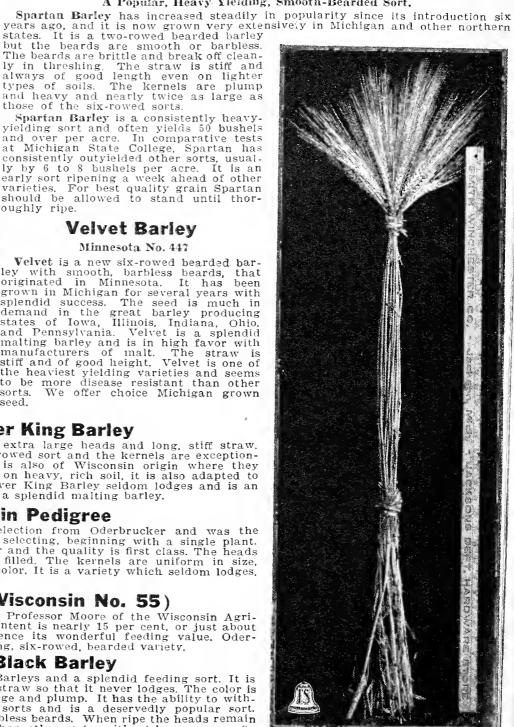

Wisconsin Pedigree Barley is a selection from Oderbrucker and was the result of many years of breeding and selecting, beginning with a single plant. It has always been a consistent yielder and the quality is first class. The heads are six-rowed, long and always well filled. The kernels are uniform in size, plump, and of a bright, nearly white color. It is a variety which seldom lodges. Also a good malting barley.

Oderbrucker (Wisconsin No. 55)

This great variety was developed by Professor Moore of the Wisconsin Agricultural College. He says its protein content is nearly 15 per cent, or just about twice as much as any other sort—hence its wonderful feeding value. Oderbrucker is a soft-strawed, heavy-yielding, six-rowed, bearded variety.

Michigan Black Barley

One of the heaviest yielding of all Barleys and a splendid feeding sort. It is a six-rowed variety, having very stiff straw so that it never lodges. The color is black and the kernels are unusually large and plump. It has the ability to withstand dry weather better than most sorts and is a deservedly popular sort. Michigan Black Barley has smooth barbless beards. When ripe the heads remain upright, so that it can be left longer than other sorts, without loss.

Spartan Barley Showing Characteristic Heads and Long Straw.

See Current Price List for prices on all varieties of Barley.

BUCKWHEAT-FIELD PEAS-SOY BEANS

Buckwheat

Unsurpassed as a catch crop when a late season has made it impossible to follow out first plans, or when other crops fail. Buckwheat is a valuable crop for those parts of the farm which always seem to be left unplanted at the close of the season. Generally sown in July and will fill up the vacant plots at a time when all other planting is past. Can be sown after a crop of winter wheat or rye and make a second crop. Use one-half to three-quarters of a bushel of seed per acre.

JAPANESE BUCKWHEAT.—The Japanese is the best, most productive and decidedly the most prolific variety in cultivation; produces the finest flour and is a week earlier than Silver Hull. From one-half bushel of seed sown a crop of 40 bushels has been harvested.

SILVER HULL BUCKWHEAT.—A standard variety, largely grown, and gives excellent satisfaction. Our Michigan seed produces enormous crops of 30 to 40 bushels per acre. The grain is smaller than Japanese and is silver-grey in color.

Field Peas

Canadian White

Field Peas are especially valuable in the northern states and are useful for many purposes. Peas and oats make a splendid early hay crop, which in feeding value is equal to clover hay. Sown either alone or with oats Peas produce fine pasture for sheep, swine and cattle. Dry Peas make good growing and fattening feed when ground with any grain such as oats, barley, wheat, speltz or rye. Plowing under Peas greatly improves poor land, and makes it possible to grow grain crops such as wheat, rye, oats, corn and barley. Peas are useful for human food, besides making good feed for poultry and pigeons.

Peas and Oats for Hay. Sow 1½ bushels of peas per acre

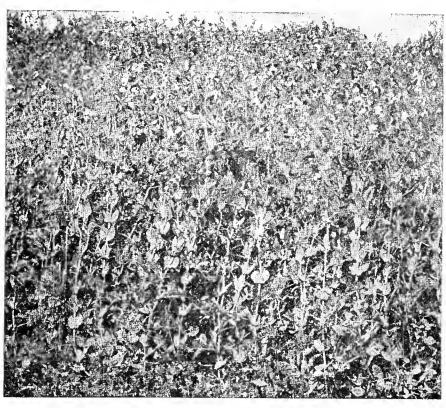

Peas and Oats for Hay. Sow 1½ bushels of peas per acre 4 inches deep as early in April as the ground can be worked. About two weeks later drill the Oats as usual using 1½ bushels per acre. If the oats are sown with the peas, the oats grow too rapidly and check the growth of Peas. Cut when the Oats are in the milk stage.

Cow Peas

A splendid green forage or hay crop. Unexcelled for silage and fine for plowing under. Do not confuse Cow Peas with Canadian Field Peas. Cow Peas are in reality a bean and should not be planted until the ground is well warmed, usually about June 1st or later. Cow Peas do better in a hot, dry season. It takes 1 to 1½ bushels for an acre. If planted with corn, one-half bushel per acre is sufficient.

WHIPPOORWILL.—A favorite, early bunch-growing variety. The plants are rampant growers, hence well adapted for soiling purposes. Suitable also for either grain or hay production.

NEW ERA.—An early maturing variety which has become very popular. It is nearly erect, rarely having any prostrate branches. It is a heavy seed producer and matures in from 75 to 90 days. The vines cure easily, making splendid dry forage. Plant only from three pecks to one bushel of seed per acre

Field Peas Make Great Hog Pasture.

Soy Beans

Interest in Soy Beans has been increasing the past few years especially in the northern states. Soy Bean hay is higher in protein than Clover hay and makes a good sub-stitute. Plowing under Soy Beans greatly improves the soil.

Soy Beans should be planted late in May or in June. They withstand drought to an extraordinary degree. For hay, silage or green manure crops, plant 4 to 5 pecks per acre, if drilled. If planted with corn planters, ½ bushel per acre.

MANCHU.—An early variety that is the leading sort in the northern states. Grows 2½ to 3 feet tall and ripens seed in Michigan, producing 20 to 30 bushels of Beans per acre. The robust vines stand up well and are easily cut with mower or binder. Matures in about 100 days.

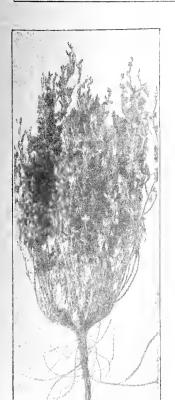

ILLINI.—A very popular sort which grows larger than Manchu and is nearly as early. It was developed at the Illinois Experiment Station with the aim of increasing the yield both of hay and grain. Grows about six inches taller than Manchu and the pods are borne higher up on the stems. Yields up to 50 bushels of Beans per acre.

Field Peas, Cow Peas, and Soy Beans should be inoculated with NITRAGIN. See page 64.

Field of Manchu Soy Beans. Average Height 36 Inches.

Plant of Hardy Michigan Grown Alfalfa.

ISBELL'S ALFALFA

Hardy Michigan Grown Seed At Lowest Prices

No crop is more dependent for success upon the seed planted than alfalfa. A good thick stand will produce big crops of the finest hay for at least four years and often for seven or more years. Alfalfa is one of the most valuable crops on any farm and wherever you see prosperous farms you will see plenty of alfalfa. Growing alfalfa increases the fertility of the soil because it provides feed for more stock.

There are only three essentials for growing alfalfa which are: well-drained soil; soil which is not acid; and good seed. Heavy clay or low ground if not well drained must be tiled or ditched. If the soil is sour or acid, this can be remedied by applying lime in some form. Isbell's Michigan Grown Alfalfa Seed can always be depended upon to give a good catch at minimum expense.

Alfalfa Seed should be sown at the rate of 10 to 15 pounds per acre on a firm seed bed, and covered lightly. May be seeded with Oats or Barley in the spring but in this case only about a bushel of grain should be sown per acre. May also be sown alone in the spring or in July and August. Always inoculate the seed for best results.

Michigan Grown Alfalfa

Home Grown Seed of Verified Origin

Verified Origin

For more than ten years we have handled large quantities of Michigan Grown Alfalfa seed and we have yet to receive our first complaint of poor results or failure resulting from the use of this seed. The fact that this seed was produced from fields that have gone through our trying winters with alternate freezing and thawing and severe cold is abundant proof of its hardiness and adaptability. Alfalfa experts have always recommended native grown seed very highly and the only reason it has not been used more extensively is because of the relatively small quantity of seed grown annually, as not much alfalfa was left to make seed in Michigan. The supply is much smaller than usual, making a real shortage of this seed. We strongly urge our customers to order their Alfalfa Seed as early as possible.

The New Hardy Michigan Alfalfa Hardigan

Hardiest, best yielding variety for Northern States. Produces better quality hay than any other sort.

Hardigan Alfalfa was developed in Michigan and is rapidly becoming one of the leading sorts through sheer merit. Everyone who has visited the Alfalfa trial plots of the State Experiment Station at East Lansing, has been impressed by its marked superiority. It has been the outstanding variety for several years and has consistently outyielded all other sorts, usually by from five to ten per cent. At the New Jersey Experiment Station it outyielded other varieties by 10 to 12 per cent.

Hardigan Alfalfa also has other superior qualities besides

Hardigan Alfalfa also has other superior qualities besides its heavy yielding ability and hardiness. It produces better quality hay than any other sort. The stems are finer and there are more of them. It grows as tall or taller than other sorts and is very leafy. Hardigan has a characteristic dark green color and is the greatest stooling variety of Alfalfa yet developed. For this reason, only ten pounds of seed are required per acre.

Good seed of Hardigan is scarce this year, and our stock is much below our usual requirements. Order early to be sure of this seed.

Grimm Alfalfa

Michigan Grown and Certified Seed.

Grimm Alfalfa has been grown so long that it needs no introduction by us. Its characteristic variegated blossoms and branching root system are well known by Alfalfa growers. Grimm was developed in Minnesota and its hardiness is an inherited trait. It is especially suited to heavy soils having a hard pan near the surface and soils not so well drained as are usually required by other sorts. Grimm will often winter over successfully and thrive where other varieties will not live.

Michigan Grown Grimm Alfalfa Seed is also in short supply this season so that we advise ordering early.

ISBELL'S BELL BRAND CLOVERS

PRICES ON CLOVER SEED ARE SUBJECT TO MARKET CHANGES. SEE CURRENT PRICE LIST FOR PRICES.

Michigan Grown Clover Seed has always been classed as the hardiest and best quality seed produced anywhere. If you want the purest, cleanest Clover Seed you can get at the lowest price, buy Isbell's Bell Brand.

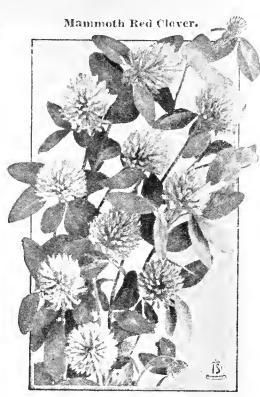

Medium Red Clover

Also Called Small Red June. It makes two crops each year. The first is usually cut when it is in blossom for hay; the last crop may be harvested for seed, cut for hay or plowed under to add fertility to the soil. It may be sown either in the spring or fall, and if no other grasses are used, at the rate of 8 to 12 pounds per acre.

Mammoth Red Clover English Sapling or Pea Vine Clover. Well known in many parts of the country and highly valued for its enormous yield. It is claimed by many that it is easier to get a "catch" with Mammoth Red on light, sandy lands than with any other. For hog pasture it has no equal. It produces very large crops of hay, yielding from 3 to 5 tons per acre.

Bargain Lots of Clover and Alfalfa Seed

As we are continually cleaning and handling alfalfa and clover seed we usually have some slightly off-grade lots which while not good enough for our Bell Brand grade are nevertheless good useful lots of seed which are offered at much lower prices. Often times these lower grades will serve your purpose at a considerable saving. If interested write for samples and prices

White Dutch Clover

This is of particular value in permanent pastures and lawns. It will grow on most any kind of soil, and on wet ground. Being of creeping habit, it prevents ground from being washed by rains. Sow 5 to 6 lbs. per acre in lawn and pasture mixtures.

Timothy and Alsike Mixed

A valuable combination for both hay and pasture. Makes the finest hay and very good permanent pasture. Alsike will grow on land too wet and sour for Red Clover and Timothy, also thrives on low ground so that this com-bination is ideal for lowlands.

ISBELL'S MIXTURE of Timothy and Alsike contains 20 per cent Bell Brand Alsike by weight and 80 per cent Bell Brand Timothy. This is a strictly high grade mixture.

Alsike or Swedish Clover

The best Clover for low moist soils—or soils deficient in lime.

Alsike Clover has a place on a great many farms where it is more profitable to grow than either Red Clover or Alfalfa. Under certain conditions it has many advantages over other Clovers—for instance where the soil is slightly acid or sour and lime is hard to get or for some reason has not been applied—sow Alsike Clover—it will stand poorly drained wet soils very well.

Alsike makes an excellent feed for dairy cows, bright colored and sweet when properly cured. The being smooth it is less dusty than Red Clover hay. The plant

Alsike Clover seed is much smaller than Red Clover and will go twice as far.

SWEET CLOVER

Sweet Clover Provides the Quickest and Cheapest Way to Improve Poor Land

Sweet Clover is valuable for hay, pasture and plowing under. When cutting Sweet Clover for hay it should be cut from 6 to 8 inches above ground in order to produce another crop of hay, pasture or seed. Sweet Clover may be seeded in the spring, summer or fall. It may be sown either with some kind of small grain, such as oats, barley or buckwheat, or alone. Liming the ground and inoculating the seed will aid greatly in securing a good, even stand.

White Blossom Sweet Clover

(Melilotus Alba—Biennial)

This variety is a very rank grower, which makes it especially valuable for plowing under as a green manure crop. It loosens up the soil, adds humus and leaves a splendid mulch. When used as a pasture crop, stock should be turned in on it while young as at this stage it is very palatable. It makes the best kind of pasture for dairy cows and for fattening cattle. It fits into rotations like Rcd Clover. If wanted for permanent pasture the seed should be sown two successive years and each year the last crop should be allowed to resced itself.

Yellow Blossom Sweet Clover

(Melilotus Officinalis-Biennial)

The Yellow Blossom is very similar to the White Blossom, but it is more especially adapted for hay or pasture. The plant is more palatable to livestock as it contains less cumarin and does not have so bitter a taste. It is not a rank grower; more on the order of alfalfa. For those who wish to use Sweet Clover for pasture, hay and bee purposes, we would advise the use of the Yellow Blossom.

Grundy County Sweet Clover A Dwarf Type of White Blossom Sweet Clover

The name is derived from Grundy County, Illinois, where more Sweet Clover is grown than in any other county in the United States. Grundy County Sweet Clover is about three weeks earlier than common Sweet Clover, grows much smaller, more branching, leafier, and has finer stems. It seldom grows over 3½ feet tall, produces finer hay and is a better seeder.

Hubam

Annual White Blossom Sweet Clover.

Hubam is a variety of Sweet Clover which blossoms, matures, and produces seed in one season. Grows 4 to 5 feet tall on ordinary soils and when seeded with spring grains will produce a good hay crop, or pasture after the grain is cut. Makes valuable bee feed and is often sown for this purpose. The seed is sown at the rate of 15 to 20 pounds per acre in Oats or Barley or may be planted alone.

Sweet Clover.

See Isbell's Current Price List for Prices of Clover and Field Seeds.

Reed Canary Grass Ready for Cutting.

REED CANARY GRASS

A Profitable Grass for Wet Soils

Reed Canary Grass is rapidly coming into prominence as it grows successfully on soils too wet for other crops or grasses. It has been grown for several years in Michigan and other western states but until recent years was very little known and the seed was very scarce.

Reed Canary Grass yields tremendously, as after it is well established, may be cut two and even three times in one season. Yields as high as ten tons per acre have been obtained. It is a hardy perennial and will live until broken up, but will not spread to cultivated lands and become a pest.

DIRECTIONS FOR GROWING REED CANARY GRASS

If the land is well drained, so that a good seed bed can be prepared, less seed will be required. Where possible, the land should be plowed in the fall. Seed may be sown in October on land which would be too wet in spring. The seed will not germinate at that time but will remain dormant until spring. Will germinate in water if the seed is covered with soil below the water, but will not start

nate in water if the seed is covered with soil below the water, but will not start until after the water is drained off.

Sow in the spring as early as possible to get ahead of weeds. Seeding may be made late in June or in July. Sow broadcast at the rate of 5 to 6 lbs. per acre or drill in rows 16 to 18 inches apart. When broadcasted cover by dragging lightly. Cut for hay as soon as heads appear. Two cuttings may be made besides fall pasture. An acre will pasture three or four cows throughout the season. Yields 4 to 10 tons of hay per acre. Price, \$1.00 per lb; 5 lbs., \$1.75, prepaid.

Valuable Grasses for Late Planting. For Emergency Hay Crops.

German or Golden Millet

This grows very rank and on good, rich soil it will make a growth of 4 to 5 feet high. Although the hay may seem coarse, yet it is so tender that if cut at the right stage, which is when in full bloom, even hogs will eat the cured hay greedily. A yield of five tons of hay per acre is nothing unusual. Sow three pecks per acre.

Common Millet Earlier than German and of similar growth, but it is not equal to German for quality of hay.

Hungarian Willet

Preferred by some to German Millet, as it is about a week earlier. Does not grow as large but the hay for moist soils and muck.

Preferred by some to German Millet, as it is about a week earlier. Does not grow as large but the hay for moist soils and muck.

White Wonder Millet The most striking feature of this Millet is the great size of the heads, which are 8 to 18 inches in length. The yield of hay is very heavy and is nearly double that of any of the other Millets. This variety is a little later than the German,

Japanese Millet is adapted to all sections of the country. It will grow six to eight feet high and yield 15 to 20 tons per acre. The seed may be sown broadcast at the rate of 20 to 25 pounds per acre, but it is also sown in drills 10 to 15 inches apart, using 10 to 12 pounds per acre. Japanese Millet is adapted to all sections of the

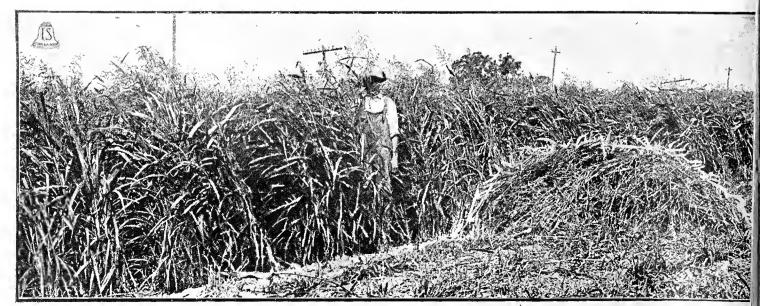

Hog Millet or Proso

A coarse growing variety of great stooling and branching habit which is an enormous seed producer. Grows about 3½ feet tall and makes rather coarse hay but the seed is valuable poultry feed. Sow 25 pounds per acre broadcast.

SUDAN GRASS Popular Quick-Growing Hay Pasture and Forage Crop.

Sudan Grass is a member of the Sorghum family. It is an annual plant, having a fibrous root system. It makes a richer feed than cane, cures easily, and will not sour. All kinds of stock eat it readily, and it is especially good for milk cows, horses, mules, and sheep. It will grow anywhere that field corn or millet can be grown and will thrive when it is dry. It makes a slender, leafy growth from 5 to 7 feet high and yields from 4 to 10 tons of excellent hay per acre

Sow 10 to 20 lbs. of Sudan Grass seed to the acre with a grain drill, or by hand from crop planting time until the middle of July. The seed should be covered a half inch deep. Prices, lb., 20c; 3 lbs., 50c, prepaid. See Current Price covered a half inch deep. List for Quantity Prices.

Sudan Yields 8 to 10 Tons of Hay Per Acre.

ISBELL'S BELL BRAND GRASS SEED

Prices Subject to Market Changes. Ask for Our Current Farm Seed Price List.

Timothy

As a crop to cut for hay, Timothy is probably surpassed by no other grass now cultivated. If sown alone it requires 8 to 12 pounds per acre. It is usually sown with other grasses about one-half to one-third of the above amount. Can be sown in either fall or spring. Timothy Seed is one of our specialties; we sell many carrouads of seed annually to other seed houses, besides the great quantities required for our regular trade. Bell Brand Timothy Seed is of superior quality and will suit the most critical buyer.

ISBELL "BELL" BRAND TIMOTHY.—The best grade of extra recleaned seed and is unexcelled for purity and germination. Lb., 20c; 3 lbs., 50c, prepaid.

Kentucky Blue Grass (Poa Pratensis)

The most widely known of all natural grasses, which does well everywhere and can be found in almost every part of our broad country. It is grown more for pasture than for hay, as it starts to grow unusually early in spring and provides good feed in May and June in our Northern States, and produces a good growth until the ground freezes. This grass is very hardy and neither injured by the cold nor by dry weather, hot sun, the tramping of hoofs or close mowing. It is suited to any variety of soil, but seems to succeed best on moist, rich land. Used extensively for lawns. ISBELL'S "BELL" BRAND.—Lb., 40c; 3 lbs., \$1.00, prepaid.

Canadian Blue Grass (Poa Compressa)

Very similar to Kentucky Blue Grass but does not grow quite as tall and has flat stems. Valuable for pasture on Sandy soils in the North and does well on poor clay soils it is also a good grass for lawns in dry regions. Lb., 40c; 3 lbs., \$1.00, prepaid.

Orchard Grass

A most valuable grass for pasture and hay land and on account of its earliness very valuable for permanent pastures, as it furnishes the first green bite in the spring and the last in the fall, is quick to recover from close cropping and even thrives better the more it is cropped. Gives rich pastures till late in the fall. It will stand the drought. It is well suited for shady places, such as orchards and groves. Sow 15 pounds per acre. ISBELL'S "BELL" BRAND.—Lb., 30c; 3 lbs., 80c, prepaid.

Meadow Fescue

Also known as English Blue Grass.

We regard this as one of the most valuable grasses for it adapts itself to different conditions of soil and climate. It produces a great amount of early and late feed of good quality and yields heavily. As a pasture grass it is particularly valuable, being one of the earliest in the spring and latest in fall, and never freezes out or winter-kills. Sow 18 to 22 lbs. per acre.

ISBEIL'S "BEIL" BRAND.—Lb., 35c; 3 lbs., 90c, Write for Current

prepaid.

Sheep's Fescue

A dwarf, thickly growing grass yielding a large amount A dwarf, thickly growing grass yielding a large amount of nutritious herbage. Is a valuable plant in pasture mixtures. It prefers the uplands and is known to thrive on poor, shallow, gravelly soils. It forms a thick sod that stands tramping well. If alone, sow 20 lbs. per acre. ISBELL'S "BELL" BRAND.—Lb., 45c; 3 lbs., \$1.10,

prevaid.

Red Top or Herd's Grass

FANCY SOLID SEED .- This is well adapted to North-Adapts itself to any soil, but produces best results on moist, rich solls, where it grows 2 to 2½ feet high. One of the few grasses that will stand a slightly sour soil. For pasture, 8 to 10 lbs. per acre. Often sown with Timothy and Clover.

ISBELL "BELL" BRAND.—Lb., 25c; 3 lbs., 65c, pre-

Bromus Inermis

Bromus Inermis or Brome Grass has proved a great success. It forms a leafy, compact turf and does well for pasture and hay. A very quick grass to start. Will make green verdure in 4 weeks. It makes hay of about the same quality as timothy and yields well. Stands drought best of any of our cultivated grasses. We recommended some years ago that the seed be sown with one-third to one-half seeding of oats (which should be cut green and very high stubble left) instead of alone. In this way 15 lbs. to the acre is sufficient, as the oats assist in keeping down the weeds. lbs. to the acre is sufficient, as the oats assist in Acoption down the weeds.

ISBELL'S "BELL" BRAND.—Lb., 35c; 3 lbs., 90c, pre-

A Pasture Like This Makes Money for the Owner.

For All Kinds of Stock

DWARF ESSEX RAPE

Ready for Pasture in Six Weeks

Rape is an annual forage plant of great value which is profitably grown wherever there is stock to be pastured.

Under favorable circumstances, Dwarf Under favorable circumstances, Dwarf Essex Rape is ready for pasture in six weeks from the time of sowing. One acre of good rape will carry a flock of a dozen sheep for two months. The Wisconsin Experiment Station found that an acre of rape produced as much gain on pigs when used as a pasture crop along with grain as 56 bushels of corn would do.

An acre of rape in this experiment equaled much more than an average acre of corn and the cost of production was much less. The cost of harvesting was nothing as it was done by the pigs. More recent experiments in Iowa have shown rape to be the means of producing pork at the lowest cost, even less than alfalfa. Rape is also the forage that can be sown at the least cost of seed per acre.

Rape seeded in corn at the last cultivation furnishes one of the greatest money-making methods known to the progressive farmer today. Sow rape in corn at the rate of 4 lbs, per acre. When the corn is laid by, turn the pigs into the field. Lb., 20c; 3 lbs., 50c, postpaid. See Current Price List for quantity prices.

Dwarf Essex Rape Excellent for Sheep and Hog Pasture.

Lespedeza - Harbin Lespedeza No. 65280

Lespedeza is a new plant in the North and so far its cultivation is mostly in the experimental stage. It is a legume that thrives on poor acid soils without lime. The plants are bushy and spreading, growing close to the ground. The leaves resemble clover but are much smaller.

Harbin No. 65280 is the earliest and hardiest annual Harbin No. 65280 is the earliest and hardiest annual Lespedeza and takes its name from Harbin, Manchuria, where it was discovered by a plant explorer for the U.S. Department of Agriculture. It matures and reseeds itself in the northern states. It appears to be useful for three purposes: to supply pasture during July and August when grass pastures are dried up; as a soil builder for poor and worn out soils; as a protection against erosion on hilly fields.

Harbin produces pasture six weeks after the seed is sown.

It will not bloat cattle or sheep and very close pasturing will not hurt it. Its feeding value is nearly equal to Alfalfa and it is greatly relished by both cattle and sheep. Sow the seed very thinly in rows 2 feet apart. Plant the seed one inch deep about June first in the North. One pound of seed will plant an acre. The seed must be inoculated when planted for the first time. Price: Lb., \$1.00; 5 lbs., \$4.75, prepaid.

Sunflower, Mammoth Russian

The seed is highly valued by farmers and poultry breedrine seed is highly valued by farmers and poultry breeds. The hens will fatten on it and lay more eggs. Single heads measure from 12 to 22 inches in diameter, and contain a lot of seed, which can be raised much cheaper than corn. 3 lbs. per acre. Lb., 25c; 3 lbs., 65c, postpaid.

Winter, or Sand Vetch

Sand Vetch is very valuable as a winter cover crop to prevent leaching, and nothing equals it for orchards. Planted in the fall with rye, it deposits great amounts of nitrogen; adds large quantities of humus to the soil if turned under in the spring after cattle have taken it off for early pasture. With one-half bushel of rye, sow 25 to 40 lbs. per acre.

May be planted in the spring with cate After howesting the cate the

May be planted in the spring with oats. After harvesting the oats the Vetch can then be pastured; then turned under as green manure. Withouts sow 25 to 35 lbs. and three-fourths bushel oats per acre.

It yields a surprising amount of feed, ten tons per acre is not unusual. For cutting it should be sown with oats in the spring, or with rye in the fall. Vetch is quite spreading and the grain furnishes support so it can be mowed readily. It is eagerly eaten by all kinds of stock. Like clover, cow peas and alfalfa, it is a very rich fodder. When sown in April or May it can be cut in August for hay, and the second growth will provide abundant pasture during balance of summer. Our seed is all Michigan grown.

Inoculate Vetch with Nitragin-See Page 64.

Sorghum, or Sugar Cane

Cane is a valuable crop that is not fully appreciated and has been neglected on this account. It can be grown profitably wherever corn can be grown. Cane produces 20 tons or more of fodder per acre or will make 200 gailons of syrup. It makes good hay when sown broadcast and, if cut before it gets too high, will often produce a good second crop.

Cane is a warm weather plant so that the seed should not be planted until after all danger from frosts is past. If sown broadcast for hay or fodder, 50 pounds of seed is required per acre. It may be drilled in rows like corn for fodder and when sown in this manner only 15 pounds of seed is needed per acre. For syrup it is drilled thinly in rows 3 to 3½ feet apart using 10 pounds of seed per acre. Sow the seed about one inch deep from June 1st to July 1st in the northern states.

EARLY AMBER CANE.—The most common variety of Cane. It can be grown on any soil or in any climate from California to Maine. It will thrive on your poorest lands as well as your best, and is one of the greatest destroyers of obnoxious weeds in existence. Our northern grown stock is the earliest, richest, and best for syrup. It produces a rich, clear syrup, yielding 150 to 250 gallons per acre. Sorghum grown for syrup often returns \$100.00 per acre. Lb., 20c; 3 lbs., 50c, prepaid.

EARLY ORANGE CANE.—Grows similar to Early Amber Cane but has heavier and shorter stalks. Especially suitable for extremely rich soils as it withstands storms and wet weather without lodging. Makes fine quality syrup and is a splendid sort for fodder. Lb., 20c; 3 lbs., 50c, prepaid.

For prices on larger quantities see Isbell's Current Price List,

ISBELL'S NORTHERN GROWN **SEED POTATOES**

IT PAYS TO PLANT CLEAN SEED

The first step in growing potatoes profitably is the planting of hardy, disease-free seed from heavy yielding crops. Isbell's Northern Grown Seed Potatoes are famous for their earliness, hardiness, freedom from disease, and the big profitable crops they produce. Prices of our seed potatoes are low this year so that you can secure new seed at small expense. The increased yield and better quality will more than offset the cost of the seed and return a good profit

SHIPPING SEASON. About April 1st, is the earliest date seed potatoes can be shipped safely and all orders are booked for shipment after that date.

A fine Extra Early White Potato. Extra Early Eureka seldom fails to produce fine crops of extra early Potatoes. The plant is compact in growth, vigorous and hardy. The Potatoes are nearly round, white and very attractive. In quality they rank high, being splendid cookers. They ripen evenly and will not make a second growth.

Early Six Weeks

A fine Potato for the early market. It is extra early and one of the best market varieties. The Potatoes begin to form when the vines are only 5 to 6 inches high, and in 7 to 8 weeks from planting are of fine marketable size. The tubers are of oval form, light red color, with shallow eyes. They cook well even before they are thoroughly ripe and have a fine pleasing flavor. and have a fine pleasing flavor.

Irish Cobbler

The Irish Cobbler is creamy white, nearly round in shape. A little later than Ohio, but a heavier yielder. Continued heavy crops have earned Irish Cobbler the name of "old reliable." Very close planting is possible because of upright vine growth. Irish Cobbler is a favorite variety on Long Island and in Maine. Also is grown quite extensively in Michigan. Often grown on muck for a main crop.

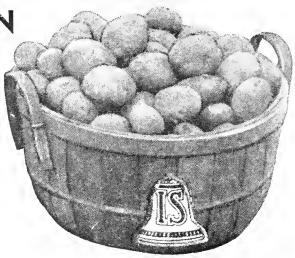

Early Ohio—Red River Grown

While this is one of the oldest early varieties it is still one of the most popular. The skin is light pink and flesh white. They are of good size and always smooth. They are oval or egg-shaped and very uniform. Many people prefer them because of their fine flavor when cooked. Vines are hardy, erect and the tubers are set in a compact clump. Red River stock is the best seed of this variety produced anywhere.

Idaho Baking Russet

Also Known as Russet Burbank.

This is not a new variety but is new in the East. It is the finest baking and cooking potato known and for this reason is well worth raising. Idaho Baking Russet is a late Potato of vigorous habit of growth. The tubers are long and taper toward each end. They are almost perfectly smooth with very shallow eyes. They have a thick russet skin which protects them and makes them the best of all winter keepers. They have the finest flavor ever found in a Potato. Western growers have been shipping Idaho Baking Russets to eastern markets for several years with woning Russets to eastern markets for several years with wonderful success.

New Katahdin,

Katahdin

This new Potato was originated in Maine by the U. S. Dept of Agriculture. It takes its name from Mt. Katahdin near which it was developed. The government has spent \$250,000.00 during the last eight years in producing this new variety.

\$250,000.00 during the last eight years in producing new variety.

Katahdin is a round or slightly oval white Potato, very smooth, with very shallow eyes. The vines are light green and vigorous. So far no trace of mosaic has been found on plants of Katahdin. It ripens about a week earlier than Late Petoskey and White Rural. It has consistently out-yielded Rural New Yorker and Green Mountain, and grades out with a smaller per cent of No. 2 grade and culls. The type is very uniform and in cooking and eating qualities it is unsurpassed. Katahdin does well on rich peat soils and on muck.

Rural New Yorker or White Rural

This has been a standard late White Potato for many years and is still being grown extensively. Is a vigorous and thrifty grower and one of the heaviest yielders. Tubers are slightly oval, smooth and have a very white skin. Good winter keeper and of fine cooking quality.

Late Petoskey or Russet Rural

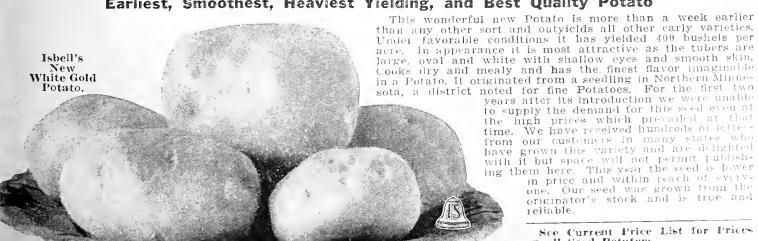

This variety has been the standard late variety of Michigan but of late is losing favor somewhat because it is not as white in color as the market demands. When grown on light colored sandy soils, the skin is very light in color and it has a fine appearance. When grown on dark loam or clay soils, the color is not so good. It is recognized as the best winter keeper and as one of the heaviest yielding sorts as well as a good cooking variety.

Potato Seed (HYBRIDIZED)

Practically every seed produces a distinct variety. Many of the choicest varieties have been originated by amateurs from Potato Seed. They have an equal chance with the Potato specialist, as Nature does the work. Fame and fortune wait the originator of varieties that are distinct and better in certain respects than those now on the market. Further, the growing of Potatoes from the true seed is very interesting work. Directions for planting and cultivating on every packet. Pkt., 15c. is very interesting work. Directions vating on every packet. Pkt., 15c.

Earliest, Smoothest, Heaviest Yielding, and Best Quality Potato

See Current Price List for Prices on all Seed Potatoes.

FLOWER SEED NOVELTIES

Aster, Super Giant Los Angeles.

New Dwarf Bedding Petunias

All-America Selection, Gold Medal Award.

PINK GEM represents a new race of very dwarf compact growing Petunias. It forms a neat, compact plant 6 inches high, literally smothered with deep pink flowers 2 inches in diameter. Thirty to forty blooms in flower at the same time. Indispensable for borders, window boxes and for bedding. Pkt., 20c; 1/8 oz., 50c.

NANA COMPACTA PETUNIA.
Each plant forms a compact ball about 10 inches high and 12 inches across. Grows quickly from seed and blooms very profusely until frost. We strongly recommend this strain for beds, borders, window boyes, note and over for the rock garden.

frost. We strongly recommend this strain for beds, borders, window boxes, pots and even for the rock garden. Mixed colors. Pkt., 20c; 1/2, oz., 50c.

DWARF GIANT FRINGED PETUNIA.—A new

DWARF GIANT FRINGED PETUNIA.—A new dwarf, sturdy growing type with beautifully ruffled and frilled flowers of large size. The color range is magnificent. An ideal bedding sort. Mixed colors. Pkt., 35c.

Baby Zinnias

Improved Lilliput or Pompon

This type is fast supplanting all other Zinnias for cut flower use. The plants form handsome little bushes that are entirely covered with small round very double flowers. They are very beautiful plants, 12 to 15 inches, blooming profusely all summer. Special florist mixture, all colors. Pkt., 10c; ½ oz., 30c; oz., \$1.00.

Double Begonia Poppy

SWEET BRIAR.—Flowers are of the popular wildrose-pink, a delightful shade of deep rose-pink. The blossoms come full double, resembling a very large double begonia. You will like this new variety. Pkt., 10c; 1/4 oz., 25c.

New Giant Annual Lupins

Wonderful flower spikes with large blooms in shades of blue, pink and white. The plants grow 3 to 4 feet tall, with 4 to 6 long spikes to the plant. Easily and quickly grown from seed. Pkt., 10c; 1/4 oz., 30c.

NEW FLOWERS.—Please refer to color pages 4, 5 and 6 for other novelties and specialties in Flower Seeds.

Aster, Super Giant Los Angeles

The Largest and Most Fully Double Aster

Sensational new Aster from California. The flowers are 6 to 8 inches across, of a lovely shell-pink, blending to a creampink at the center. Sturdy plants, 2 feet tall, with six to eight long stems. Considered the finest Aster yet developed. Pkt., 20c; 1/2 oz., 50c.

Aster, Firelight

Brilliant Dark Scarlet - Long Stems

New introduction from Europe. Full double, rose-flowered Aster of bright fiery red color; no other Aster is of so bright a color. Plants are tall, of branching habit and very free bloomers. Particularly effective in the garden as well as for cut flowers. Pkt., 20c; 1/2 oz., 50c.

Annual Carnation

ENFANT DE NICE.—New French Hybrid strain. The best annual Carnation grown from seed. Magnificent double flowers measuring 2½ to 3 inches across, on long stems. Fine for garden display and for cutting. Mixed colors. Pkt., 15c; ½ oz., 75c.

Columbine - Aquilegia

CRIMSON STAR.—Long Spurred.—Brilliant dark crimson with white center and long spurs. Very profuse bloomer. A most attractive hardy perennial for border planting. Pkt., 25c.

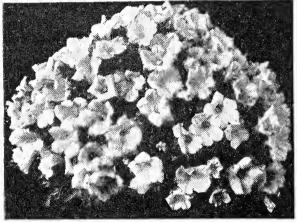

Lovely Light Blue Larkspur

GIANT BLUE BELL.—A fine deep sky-blue variety with long flower spikes. This annual Larkspur is ideal for cutting as the flower stems are three to four feet long. Pkt., 15c; 1/8 oz., 50c.

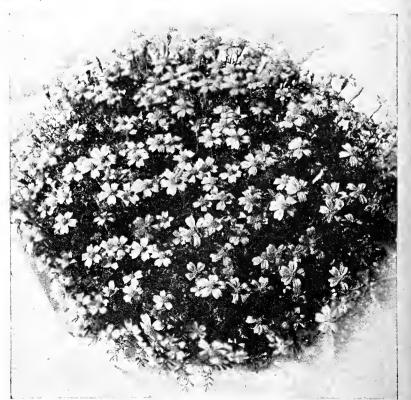

Little Giant Marigold

The New Dwarf Compact Marigold for Edging

Something entirely different. The plants grow only six inches high and are covered with great masses of pretty, single, golden orange flowers. The plants spread 8 to 10 inches, are well rounded, with slender, fernlike foliage. In bloom all season. Pkt., 15c; 1/4 oz., 40c.

Dwarf Petunia, Pink Gem.

Marigold, Little Giant.

BETTER FLOWERS

Calendula, Orange Shaggy.

Gold Medal 1935-All-America Selection

Calendulas are quite the vogue again and this is a most interesting and distinct new type. The shaggy flowers are deep orange shading lighter at the center. Exceedingly graceful and informal in appearance, in striking contrast to the formal Calendulas in general use. Plants are neat and compact, very free flowering, bearing long-stemmed flowers greatly prized for cutting. Pkt., 15c; 1/8 oz., 40c.

Coreopsis, Double Sunburst Hardy Perennial — Brilliant Golden Yellow

A pleasant change from the well known single Coreopsis. Makes a brilliant display in the garden and for cut flowers it is most excellent. The double flowers are large, 1½ to 2 inches across and keep well. Easy to grow. Pkt., 15c; 1/8 oz., 40c.

Marigold, Dwarf Double Queen

An Elegant Bedding Plant

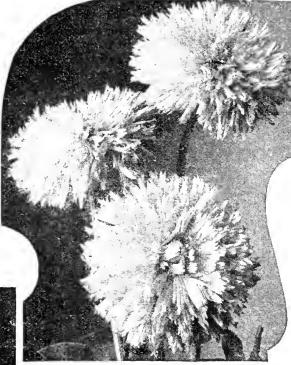

The bright colored flowers are 2 to 3 inches across, with rather flat petals, giving a novel effect of softness, in contrast to the somewhat formal Marigolds in general use. Sturdy plants, 18 inches high, decidedly free flowering, forming a veritable pyramid of blooms for a long season. We highly recommend this flower for large and small groups in the garden. Yellow and orange shades in mixture. Pkt., 15c; 1/8 oz., 40c.

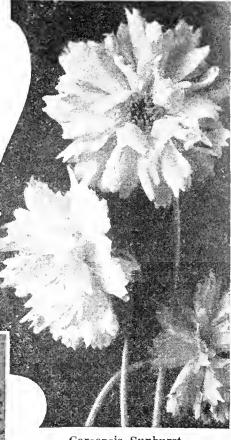

For Garden Display and Cut Flowers

New and fascinating sort from Dixieland. Large, ball-shaped flowers composed of dozens of tiny five-petaled florets, gracefully fringed in effect. Brilliant golden yellow, fully double flowers resembling a lovely Japanese Chrysanthemum. Magnificent for garden display and cut flowers. Tall, bushy plants literally covered with flowers. This will prove a constant joy from August until frost. Pkt., 20c; ½ 0z., 50c.

NEW FLOWERS .- Please refer to color pages 4, 5 and 6 for other novelties and specialties in Flower Seeds.

Calendula, Orange Shaggy.

Coreopsis, Sunburst.

Nasturtium

The New Double Glorious Gleam Hybrids

(See color plate on back cover). These new Hybrids are gorgeously colored, large, well formed dou-ble flowers of dazzling beauty. Glorious blooms of salmon, golden yellow, orange, cerise, cream-yellow, crimson and gold flushed scarlet combined with the foliage of fresh green. The plants are semidwarf, throwing short runners from well rounded free flowering bushes. Stems are long, and bear the flowers well above the foliage. In the garden or for cutting no flower could be more lovely. This is the greatest sensation in the Flower World for 1936. Mixed colors. Pkt., 15c; ½ oz., 30c; oz., 50c.

Pansy, Maple Leaf Giants

Flowers of Giant Size - Large Leaves

Distinct variety of extraordinary size, up to 4 inches in diameter. The leaves also are very large. The flowers are of wonderful substance and fine form while the color range is exceptionally large, showing many charming new color combinations. This has been a prize winner wherever shown. Mixed colors. Pkt., 35c.

Salvia, Coral Gem

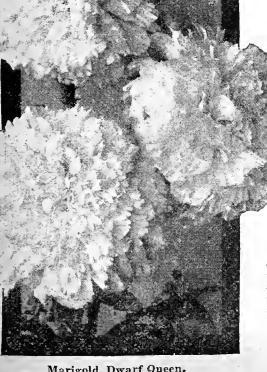

A Pleasing Variation of the Scarlet Sorts
This new sort attracted a great deal of attention in our trials. The long flower spikes are of a lovely coral pink color, bright yet soft. A most pleasing change from the strong colored scarlet sorts commonly planted. It is a flower that will not clash with other colors. The plants are semi-dwarf, forming well rounded bushes that are early and free blooming until frost. Pkt., 20c; ½ oz., 50c.

Ice Plant, Criniflorum (Livingston Daisy)

The plants, which are of slightly spreading habit, are literally covered with daisy-like flowers, measuring about 2 inches, of the most delightful shades imaginable. There are pure whites tinted with rose, crimson, pink and buff; and self colors including primrose, golden, buff, crimson and pink. An ideal carpet or rockery plant and a gem for edging. Will succeed well in poor soil. Pkt., 20c.

Rose Marie Morning Glory A Lovely Double Pink Morning Glory

Blooms as early and as freely as any Morning Glory, with lovely double and semi-double flowers of a beautiful shade of deep rose. Pkt., 15c; ½ oz., 40c.

Marigold, Dwarf Queen.

ANNUAL FLOWERS That Are Easily Grown

Annuals are flowers which grow from seed and bloom the same season. On the following pages we offer a comprehensive and carefully selected list of choice varieties, that are easily grown by amateurs. By planting assorted kinds a profusion of flowers may be had from early summer until killing frosts in the fall.

for edging and borders, for garden display and cut flowers, and for winter bouquets. You need not be without flowers any time during the growing season.

In this list you will find flowers for all purposes—

Cultural directions are on each packet and the prices given are prepaid.

Ageratum

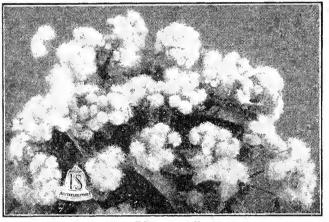

For Blue Flowers

Ageratums remain in flower throughout the summer and are among the most effective of our among the most effective of our annuals for edging and bedding. The flowers of the taller varieties are very useful for bouquets. Seed sown in August will produce plants for winter flowering.

DWARF BLUE.—6 inches. Splendidfor edging. Deeplayender-blue. Pkt., 10c; 1/4 oz., 30c. inches.

TALL BLUE .-- 18 inches. Soft lavender-blue flowers; excellent for cutting. Pkt., 5c; 1/4 oz., 25c.

MIXED.—White and blue varieties for bouquets. 18 inches. Pkt., 5c; ¼ oz., 20c; oz., 50c.

Ageratum-Blooms All Summer.

Amaranthus

Foliage of Bright Colors

Quick growing, tall plants with brilliant colored foliage. They thrive best in hot, sunny loca-tions and on light soil. Splendid for center of beds or for background. $2\frac{1}{2}$ to 4 feet.

MIXED.—Many varieties and colors. Pkt., 5c; 1/4 oz., 20c.

Alyssum

Best White Edging Plant

Free flowering pretty little plants for beds, edgings, or win-ter blooming. Of easiest culture. In bloom from June to November. Suitable for the rock garden. Seed may be sown very early in spring and up to June 15th.

Anchusa The Summer Forget-me-not.

BLUE BIRD.—Fine annual plant of easy culture, succeeding well on most any soil. Brilliant deep blue flowers in large sprays produced freely all summer. Plant is of compact growth, 18 inches high. Pkt., 10c; 1/4 oz., 25c.

Annual Vines of Rapid Growth

Balloon Vine Curious Ornamental Climber.

LOVE-IN-A-PUFF.--A clean, free-growing annual vine reaching 10 to 15 feet, bearing delicate clusters of bloom and numerous large, round inflated seed-pods resembling minature balloons. The effect is most odd and curious. Pkt., 5c; oz., 35c.

Balsam Apple Quick Growing Vine.

Very ornamental and quick growing annual climber, 10 feet tall. Nice foliage and apple- or pear-shaped fruits, which when ripe, open and show the seeds and blood-red interior. Apple and Pear mixed, pkt., 10c; ½ oz., 25c.

Bean, Scarlet Runner

The well known rapid-growing annual climber, producing bright red flowers, from July to September. The foliage being dense, makes it splendid for porches or any location where shade is desired. Pkt., 10c; 1/4 lb., 15c.

Cardinal Climber Tall Vine—Red Flowers.

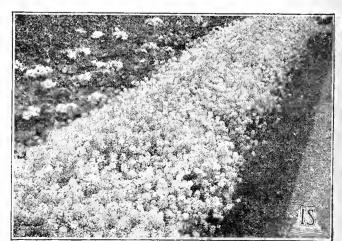

A new annual climber of extremely rapid growth, attaining a height of 20 to 30 feet. Beautiful fernlike foliage. Bears almost countless numbers of round, glowing scarlet flowers. Blooms freely from June until frost. Pkt., 10c; ½ oz., 50c.

LITTLE GEM (Carpet of Snow).—Very dwarf. A solid mass of white all summer. Splendid for edging. 4 to 5 inches. Try it this year. Pkt., 10c; ¼ oz., 25c; ½ oz., 40c.

LILAC QUEEN.—Dwarf and compact. Distinct new variety with flowers of light lavender or lilac color. 8 inches. Pkt., 10c; ¼ oz., 25c; ½ oz., 40c.

SWEET ALYSSUM.—The well known variety with white flowers of trailing habit. Pkt., 5c; ½ oz., 15c; oz., 25c.

SAXATILE COMPACTUM (Basket of Gold) .- See list of Perennial Flowers.

Alyssum-Little Gem, for Border.

73

BEAUTIFUL ASTERS

For Choice Cut Flowers

The Asters are great favorites for garden display and desirable for cut flowers as the blooms last a long time in water. Asters prefer an open, sunny position and good soil that has been enriched with bone meal; they should receive frequent cultivation to produce extra large flowers on long stems. For early flowering, the seeds should be started in a sunny window, hotbed or cold frame. For fall blooming sow the seed outdoors in May and reset 1 to 2 feet apart each way.

Aster, California Giants

Extra large and full flowers with broad, graceful petals that are curled and interlaced, a truly beautiful Aster. The plants reach a height of three feet, blooming from midsummer until frost. Long-stemmed flowers of marvelous size for those who want the finest in their garden and for cut flowers.

Mixed Colors. Pkt., 15c; 1/8 oz., 40c.

New Daybreak Aster

Most beautiful bushy branching Asters, growing about 15 to 18 inches high, with large double flowers, composed of incurved petals almost as regularly placed as in a Dahlia. The plants bloom early and for a long season.

Mixed Colors. Pkt., 10c; 1/8 oz., 30c; 1/4 oz., 50c.

Crego Mammoth Aster

Plants grow about 2 feet in height, branch well, have long and strong stems, and bear most artistic, fluffy, chrysanthemumlike flowers, often 5 inches in diam-

White. Crimson. Lavender.
Pink. Purple.

Pkt,. 10c; ½ oz., 30c; ¼ oz., 50c.

MIXED.—Pkt., 5c; ¼ oz., 40c;
½ oz., 70c.

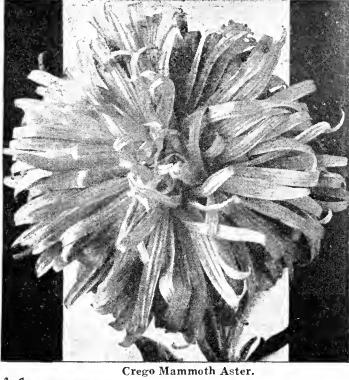

Heart of France Aster

Heart of France opens as red as the purest ruby, deepens with age and retains its remarkable beauty. The flowers are large and full, carried on long, sturdy stems. The plants begin to bloom quite early in the season. 18 to 24 inches. Pkt., 10c; ½ oz., 40c.

New Wilt Resistant Asters

See Color Illustration on Back Cover

These new strains are immune from wilt. Only through these resistant stocks is it possible to grow Asters on wilt-infected soil. See page 4 for full description.

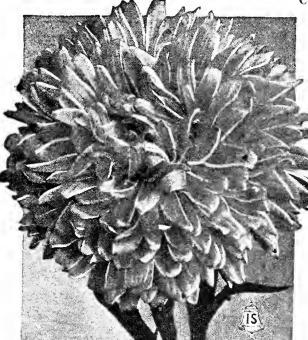

Queen of the Market Aster

Very early. A fine dwarf Aster, branching in habit, with large flowers, of good size, double, and are borne on long stems. Plants grow about 15 inches high. Mixed colors, pkt., 5c; ½ oz., 35c; ½ oz., 60c; oz., \$1.00.

Peony-Flowered Aster

Plants grow from 18 to 24 inches high; the flowers are borne on long, wiry stems, are large, from 3 to 4 inches in diameter, and very double. The petals incurve, giving the flowers a ball-like appearance. Midseason bloomer. Finest mixed colors, pkt., 15c; ½ 0z., 45c; ¼ 0z., 75c; ½ 0z., \$1.25.

THE NEW WILT-RESISTANT ASTERS are described on page 4 of this catalog.

American Branching Aster.

American Branching Aster

Large Flowers - Tall Plants

This Aster is a strong grower, 2 to $2\frac{1}{2}$ feet high, well branched. The flowers are borne on very long stems and are 4 inches and more in diameter. Unexcelled for cutting.

White. Pink. Lavender. Crimson. Purple. Azure Blue

 $\begin{cases} \text{Per pkt., } 10c; \ 3 \ \text{pkts., } 25c; \frac{1}{4} \ \text{oz.,} \\ 50c; \frac{1}{2} \ \text{oz., } 80c; \ \text{any color.} \end{cases}$

Azure Blue. (50c; ½ oz., 80c; any color. MIXED VARIETIES.—Pkt., 5c; ¼ oz., 40c; ½ oz., 70c; oz., \$1.25.

Isbell's Excelsior Mixture of Dwarf Asters

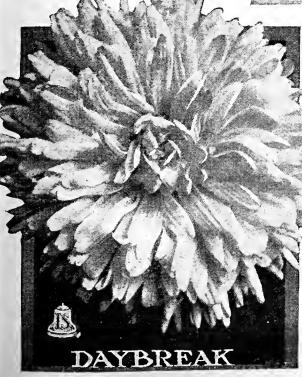

Some of our customers may find it difficult to choose among the many strains of Dwarf Asters, and where not desired for an even bed or border, we would recommend the planting of our Excelsion Mixture. It is composed of distinct and desirable colors of the different classes of Dwarf Asters and we guarantee it to give entire satisfaction. Pkt., 15c; 3 pkts., 40c; ½ oz., 50c; ½ oz., 85c; ½ oz., \$1.50.

Isbell's Excelsior Mixture of Tall Asters

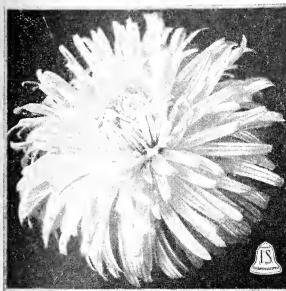

This is a mixture of the most beautiful, striking and distinct colors of all the tall-growing Asters, including the Victoria, Peony, Giant Comet, Empress, Late Branching, and other desirable sorts. Finest mixture of Tall Asters ever offered. Per pkt., 15c; 3 pkts., 40c; ½ oz., 95c; ½ oz., \$1.75.

Mixed Asters

DWARF SORTS MIXED.—Good selection. Pkt., 5c; 1/4 ez., 40c; ez., \$1.35. TALL SORTS MIXED.—Nice varieties. Pkt., 5c; 1/4 ez., 30c; ez., \$1.00.

Asters, Early June

Choice Early Dwarf Aster

This dwarf Aster is very valuable for its extreme earliness. The plants of "Early June" Asters are of healthy, robust, branching growth, 15 to 18 inches high, and bear freely and in succession for many weeks—on long, wiry stems, perfectly formed double flowers 2½ to 3 inches in diameter, the petals of which slightly recurve. Mixed colors, per pkt.; 15c; ½ 0z., \$1.00.02, \$2.00. \$1.00; oz., \$3.00.

Aster—Mammoth Rose King

New variety with massive flowers of a particularly pleasing shade of bright, brilliant rose color. Stems are frequently 2 feet in length; flowers are large as a saucer, crowns completely covered. The plants are of robust, upright growth, about $2\frac{1}{2}$ feet high. Pkt., 15c; $\frac{1}{8}$ oz., 40c.

-Giant Salmon Queen Aster-

It is the brightest and purest salmon-rose imaginable and very attractive. The flowers are very large, of the Comet Aster type, with recurved petals, resembling a big chrysanthemum. Plants grow 24 to 30 inches high. Pkt., 15c; ½ oz., 50c.

New Wilt Resistant Asters

See Color Illustration on Back Cover

Many people who used to grow beautiful Asters have found it is almost impossible to grow them now because of Aster blight or wilt. These new strains are immune from wilt. Only through these resistant stocks is it possible to grow Asters on wilt-infested soil.

See page 4 for full description.

Good New Asters

For Color Illustration and Full Description, See Page 4.

These new varieties of Asters are great merit and make a most welcome addition to the list of standard sorts. They give us new colors and new forms of great interest to flower lovers.

The Lovely Sunshine Aster

For Cutting

wonderful cut-flower Aster. Some of the flowers have twisted petals and others have the cushion center of tiny quills of a contrasting color; their delicate beauty is difficult to describe. The colors are pink, white, blue and light in mixture. 2 feet. Pkt., 10c; 1/8 oz., 30c.

Chinese Money Plant

(See Lunaria, page 86).

Canary Bird Vine

Choice Climber - Yellow Flowers

A dainty vine with beautiful cut leaves and pretty, delicate flowers of a clear canary-yellow. From the color of its blossoms the plant obtained its common name. The vines grow to a height of 20 feet. Does well in the shade. Pkt., 5c; ½ oz., 25c.

Cypress Vine

A Rapid Climber.

Well known and popular climbing vine for trellises. It has a profusion of pretty star-shaped blossoms and fine-leaved, feathery foliage; very ornamental; 8 to 10 feet high. Red and White Mixed. Pkt., 5c; ½ oz., 25c; oz., 40c.

Make Showy Garden Plants. Balsams or "Lady's Slippers" are one of

the showiest of our annuals; they succeed best in sunny spots in rich loam and are especially easy to grow, blooming from July to October. Plants grow 15 to 20 inches tall and produce an abundance of flower sprays which are fine for table decoration.

NEW BUSH DOUBLE FLOWERING. New race of Balsams growing about 15 inches tall and producing the pretty double flowers in rich bouquets held well above the foliage. Mixed colors. Pkt., 20c.

DOUBLE FLOWERED MIXED. — Pkt., 5c; ¼ oz., 20c; oz., 50c.

ISBELL'S BALSAM MIXTURE.-The choicest sorts and colors, our own mixture. Pkt., 10c; 1/4 oz., 40c; 1/2 oz., 70c.

CHOICE TALL MIXED.—This contains a very gomany colors. Pkt., 5c; oz., 15c; 1/4 lb., 40c; lb., \$1.25. good mixture of

New Sweet Scented Double Nasturtiums

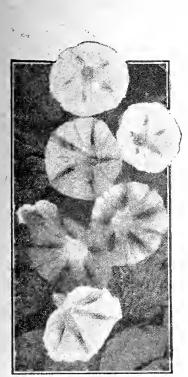

See Color Plate on Back Cover

GOLDEN GLEAM.—Semi-double and double flowers of rich golden yellow color and delightful fragrance. Round bushes with short runners, well covered with large flowers on stiff, erect stems, making it a wonderful cut flower. Pkt., 10c: oz., 20c.

SCARLET GLEAM.—The second introduction in this new class. The extra large double flowers are a fiery orange-scarlet, and the sweet fragrance is more pronounced than in Golden Gleam. It is the largest flowered of all Nasturtiums. Pkt., 15c; ½ oz., 30c.

GLORIOUS GLEAM HYBRIDS.—These new Hybrids are gorgeously colored, large, well formed, double flowers of dazzling beauty. Glorious blooms of salmon, golden yellow, orange, cerise, cream-yellow, crimson and gold flushed scarlet. In the garden or for cutting no flower could be more lovely. The greatest sensation in the Flower World for 1935. Mixed colors, pkt., 15c; ½ 0z., 30c; 0z., 50c.

Morning Glory.

Morning Glories of Many Colors

Climbers of rapid growth, with beautiful and varied flowers. Seed should be soaked in warm water for twenty-four hours before planting.

Heavenly Blue - Early Flowering

The flowers measure from 3½ to 4 inches across, sky-blue with a white throat. They are profuse bloomers and during a long season the vines are a mass of baby-blue blossoms. Pkt., 15c: ½ oz., 45c; oz., 75c.

IMPERIAL JAPANESE.—These are a great improvement over the common Morning Glory. Not only are the flowers of greatly increased size and more distinct coloring, but the dense foliage is also wonderfully attractive. Our choice mixture contains many colors, single and double. Pkt., 5c; oz., 20c; ¼ lb., 60c.

BRAZILIAN MORNING GLORY—Crapality leaves a foot wide. The rose-colored.

BRAZILIAN MORNING GLORY.—Grapelike leaves a foot wide. The rose-colored flowers measure 2 to 3 inches across and show a five-pointed star; these are followed by curious seed pods. Pkt., 10c; ½ oz., 25c; oz., 40c.

TALL MORNING GLORY.—An old-fashioned popular climber, showing many shades of color. White to dark blue, red and striped. Mixed, pkt., 5c; oz., 15c; ¼ lb., 40c.

Moonflower

Beautiful Rapid Climbers

The seed should be soaked in warm water for 24 hours before planting. The large seeds about the size of a pea, should first be notched with a file.

WHITE-SEEDED (Grandiflora Alba).—It bears in greatest profusion immense, lovely, white flowers, five to six inches in diameter. Pkt., 10c; ½ oz., 25c; oz., 40c.

GIANT PINK .- Very large flowers of soft lilac-pink color. Pkt., 10c; 1/2 oz., 25c; oz.,

NEW DOUBLE "ROSE MARIE".—An early, free-flowering double form. Of a beautiful shade of deep rose. Pkt., 15c; ½ oz., 40c.

NEW CROSS BRED. Blooms early. The flowers are large and very numerous, of violet-blue color. Pkt., 10c; ½ oz., 25c; oz., 40c.

Nicotiana

SWEET SCENTED TOBACCO PLANT

One of the most effective annuals, and easy to grow from seed. The plants are loaded with highly perfumed flowers throughout the season. Do not plant out until danger of frost is over.

of frost is over.

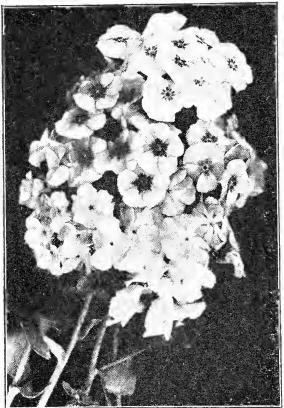

AFFINIS HYBRIDA. — Of branching habit, 2 to 2½ feet high, each plant bearing thousands of flowers during the summer and autumn. Delightfully sweet scented. White, blue, red and rose, mixed. Pkt., 10c; ¼ oz., 25c.

SYLVESTRIS.—A fine plant of syramidal growth, producing dense

pyramidal growth, producing dense panicles of long, tubular, pure white, highly perfumed flowers. 3 feet. Pkt., 10c; ¼ oz., 25c.

FLOWERS FOR SEMI-SHADE

Balsam Bellís perennis Campanula Centaurea Clarkia Columbine Dahlia Double Daisy Forget-me-not Godetia Unnin Mignonette Myosotis Platycodon Sweet William

Phlox or Flame Flower.

Phlox - Flame Flower

Vivid Colors-Long Blooming Season

The annual Phlox surpasses almost everything else in dazzling brilliancy and yet is of the easiest culture. Plants are of neat, compact growth and will thrive on any soil, if given a sunny location. Plants from seed sown in open ground in fall or early spring will begin flowering in June and remain literally covered with bloom until late in autumn, 12 inches.

BRIGHT PINK.—Very fine for bedding. Pkt., 10c; 1/8 oz., 30c.

BRILLIANT SCARLET.—Extra showy for mass planting. Pkt., 10c; 1/8 oz., 30c.

PHLOX DRUMMONDI MIXED. The popular small-flowering sorts; all colors. Pkt., 5c; 1/4 0z., 39c; oz., \$1.00.

STAR PHILOX.—Beautiful starshaped and fringed flowers of all shades. Very attractive for bedding. Pkt., 10c; 1/2 oz., 30c.

ISBELL'S PHLOX MIXTURE.
—All the above sorts and many others included in this superfine mixture. Guaranteed to please. Pkt., 15c; 1/4 oz., 50c; oz., \$1.75.

Portulaca, The Bright Colored Rose Moss

Succeeds Best on Hot Dry Spots

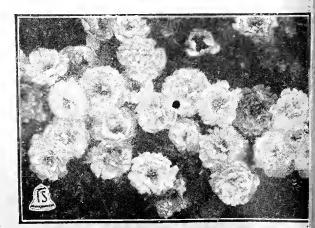

Also called "Sun Plant." This charming little annual is unrivaled for brilliancy among plants of low growth; hot sun and light sandy soil suit it best. Nothing is prettier for beds, edgings, rockwork, etc. Through the driest, hottest seasons it flourishes amazingly, carpeting the ground with a mat of foliage that is almost hidden by an abundance of pretty flowers. Height 6 inches. Do not plant seed until weather is warm. It is well to mix the seed with three or four times its bulk of dry sand or soil, which permits an even and easy distribution of the seed. A fine plant for the rock garden.

DOUBLE FINEST MIXED.—Flowers perfectly double, of the most brilliant colors. Pkt., 10c; ½ oz., 45c; oz., \$2.50.

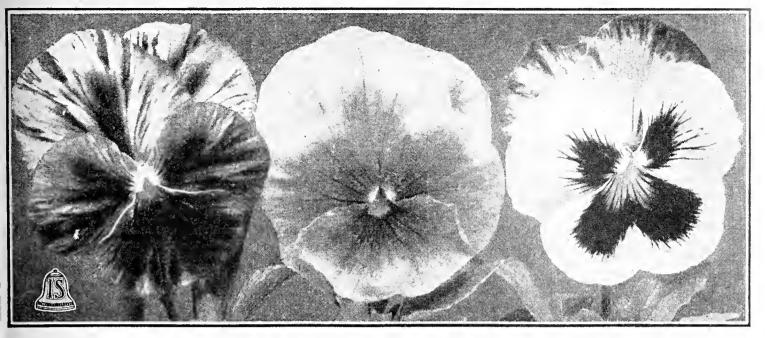

NEW UPRIGHT STEM .- This new sort carries the fine double flowers on upright stems, showing them up to better advantage. The color range is exceptionally fine. Pkt., 15c; ½ oz., 75c.

SINGLE MIXED.—All colors. Pkt., 5c; 1/4 oz., 20c; oz., 60c.

PARIS BEAUTY.—Flowers are twice as large as those of other sorts. Color a most dazzling purple-scarlet. Pkt., 10c; 1/4 oz., 35c.

Double Portulaca.

ISBELL'S SUPERB PANSIES

Pansies are the favorite of almost all flower lovers. Many years of scientific culture have gradually evolved a very superior race of luxurious, robust growth and drought-resisting qualities. The size and substance of the flowers have also been greatly improved.

Pansies thrive best in cool, semi-shaded positions. The seed should be started in the house in early spring and plants set out when danger of frost is over, or plant in fall in a cold frame and winter over. For late summer and fall blooming, the seed may be sown out-of-doors in the spring.

New Giant Flowering Pansies

"ALPENGLOW" SWISS GIANT.—The color is a rich garnet-red with dark blotches. A very striking and attractive flower. Pkt., 25c; 3 for 50c.

SWISS GIANT BLUE (Lake of Thun) .--The bluest of all blue Pansies. An exquisite shade of rich ultramarine-blue with a darker blue blotch. Pkt., 20c; 3 for 50c.

SWISS GIANT YELLOW.—Rich golden yellow with dark blotches on the three lower petals. Pkt., 25c; 3 for 65c.

SWISS GIANTS MIXED.—A well balanced mixture of his wonderful strain of Roggli's Giant Pansies. Pkt., 25c; this wonderful strain 3 for 65c; 1/4 oz., \$2.50.

MAPLE LEAF GIANTS.—Distinct variety of extraordinary size, up to 4 inches in diameter. The leaves also are very large. The flowers are of wonderful substance and fine form while the color range is exceptionally large, showing many charming new color combinations. This has been a winner wherever shown. Mixed colors. Pkt., 35c. prize

NEW DWARF GIANTS.—This new strain produces very handsome and beautifully marked flowers of enormous size, often measuring 4 to 5 inches across. The plants are of vigorous growth but of dwarf, compact habit. Mixed colors, pkt., 35c.

Other Good Giant Pansies

BLACK MASTODON.—Enormous blooms of velvety black color and great substance. Pkt., 10c; ½ oz., 50c.

.MASTODON MIXED.—Our mixture contains many shades and color combinations of this popular American strain. Pkt., 15e; ½ oz., 75c; oz., \$5.00.

GIANT MASTERPIECE or RUFFLED PANSY.—Remarkable for having its petals waved or curled, giving the lowers a double appearance. Pkt., 10c; 1/8 oz., 60c.

GIANT METEOR.—Fine dark red Pansy; profuse bloomer. Pkt., 10c; 1/2 oz., 50c.

New Early Blooming Hardy Pansies

This new type of Pansy is valuable on account of its lardiness and earliness. If given slight protection they will be found perfectly hardy, beginning to bloom about the end of March. Flowers are large, show many beautiful colors, and have a sweet perfume. Pkt., 25c.

Tufted Pansies (Violas)

Hardy perennial plants. While the Tufted Pansies do not produce as large flowers as the regular type, yet they plant more profusely and for a longer time. If sown in april the plants will flower in June, continuing a sheet of plants will frost, and the following spring they flower gain. Mixed Pkt., 10c; ½ oz., 50c.

Pansies in Mixture

Isbell's "Prize Flower" Mixture

This special Isbell strain comprises the finest collection of Giant-flowered types of Pansies, and represents the highest obtainable degree of perfection of the present time, as regards size and coloring of the flowers. The cream of the crop is procured by us for this mixture; blossoms exceeding three inches in diameter are not at all uncommon. Pkt., 25c; 3 pkts., 65c; ½ oz., \$1.75; oz., \$10.00.

Isbell's International Mixture

This famous Pansy mixture is a carefully blended assortment of the richest and handsomest of the mammoth-flowering Pansy types known, and excepting Isbell's Prize Flower Mixture is the finest in the world. People who sow this strain in good soil may look for blossoms two to three inches across Pkt. (250 seeds), 20c; 2 pkts., 35c; ½ oz., \$1.50; oz., \$8.00.

Swiss Giants Mixed

This new giant-flowered strain has created a sensation wherever grown. Flowers are of mammoth size, perfectly round and produced on long stems. The colors are magnificent, many new shades previously unknown, and the plants bloom more freely than other sorts. Pkt., 25c; 3 pkts., 65c; 1/4 oz., \$2.50.

Giant Pansy Mixture

Comprises many strains and colors; giant flowers, but not so complete as our International Mixture. Pkt., 10c; ¼ oz., \$1.00; oz., \$3.50.

Large Flowering Bedding Pansies

Admirably suited for heds and borders, where masses of distinct colors are required. The flowers are not the largest type, but the plants are remarkably free-flowering.

MIXED BEDDING PANSIES.—All colors. Pkt., 5c; 1/4 oz., 50c; oz., \$1.50.

Fluffy Ruffles Petunia.

Pretty Petunias

LARGE-FLOWERING SINGLE AND DOUBLE SORTS

For garden or house culture few plants equal the Petunia in effectiveness. Beautiful and especially useful for borders, solid beds, window boxes, porch boxes and vases. They commence flowering early and continue a sheet of bloom throughout the whole season until killed by frost; easily grown and preferring sunny position.

NEW MARVELOUS DOUBLE.—In beauty, size, form and color it surpasses anything we have ever seen before. It would be impossible to describe at length the many variations in form and color. Pink, white, violet, lavender, mauve and crimson are all present, together with innumerable intermediate shades. Many flowers measure 5 inches across and are fluted, frilled and ruffled. Pkt., 35c; 2 pkts., 60c.

DOUBLE CARNATION-FLOWERED .- Nice double flowers of medium size, resembling carnations. Very free-flowering and of medium height. Fine for bedding and house culture. Pkt., 25c.

DWARF GIANT FRINGED.—A dwarf, sturdy growing type. Beautifully ruffled and frilled flowers of large size. Fine bedding sort. Pkt., 35c.

ding sort, Pkt., 35c.

GIANT FLUFFY RUFFLES.—These Petunias are very large flowered, but the great beauty of the flowers is that the petals are waved and frilled, giving an extremely dainty and pretty flower, Pkt., 35c; 2 pkts., 60c.

GIANTS OF CALIFORNIA .- The finest large-flowering strain of single Petunias. Magnificent flowers of extra large size, often measuring five inches in diameter. Mixed, pkt., 25c; 2 pkts., 45c.

GIANT FRINGED ROSE.—New Large flowers of a lovely rose-pink color. The petals are nicely fringed and ruffled. Choice bedding sort. Pkt., 25c.

Large Flowering Balcony Petunias

For Window Boxes And For Bedding

A fine large and free-flowering type of single Petunias, especially suited for window boxes, vases, hanging baskets, etc. Also used extensively for bedding and borders. The many branches are of trailing habit and the large flowers are produced very freely all season.

STAR OF CALIFORNIA.—Magnificent new sort. The large flowers are of rich velvety violet-blue, starred with five distinct blotches of pure white. Pkt., 20c.

BALCONY BLUE.—Velvety indigoblue. Pkt., 15c; ½ oz., \$1.00.

BALCONY RED.—Rich deep red. Pkt., 15c; ½ oz., \$1.00.

BALCONY ROSE.—Bright rosepink. Pkt., 15c; ½ oz., \$1.00.

BALCONY WHITE.—Pkt., 15c;

BALCONY MIXED.—White, rose, crimson and blue shades. Pkt., 10c; 1/8 oz., 75c.

Dwarf Single Bedding Petunias

The bedding Petunias are easily grown and provide a wonderful display of bright colored delicately fragrant flowers from early summer until frost. They prefer a sunny spot and give a brilliant effect planted in rows or masses.

HEAVENLY BLUE.—A silvery light blue, Pkt., 25c; 1/8 oz., 75c.

CRIMSON KING.—Showy deep red flowers. Pkt., 15c; ½ oz., 40c. ROSE OF HEAVEN. — Rich brilliant rose, darker than Rosy Morn. Pkt., 10c; ½ oz., 35c. ROSY MORN, IMPROVED.— A lovely light pink. Pkt., 15c; ½ oz., 50c. ROYAL PURPLE. — Beautiful dark viglet-blue. Pkt., 15c; ½ oz., 50c.

1% oz., 50c.

TRUE BLUE,—The color is steel-blue or mid-blue. Very effective bedding sort. Pkt., 15c;

-Castor Bean.

FINE MIXED. — Good bright colors and many sorts. Pkt., 5e; ¼ oz., 35e; oz., \$1.00.

FRINGED MIXED. dwarf bedding sorts with fringed petals. Many colors. Pkt., 25c.

DWARF GIANTS MINED.— New strain of extra large flower-ed bedding Petunias. Pkt., 35c.

PETUNIAS, BEDDING — ISBELL'S SPECIAL MIXTURE.—
A very fine, selected strain of the single-flowering bedding Petunias. All colors, carefully blended, to give you the best satisfaction. Pkt., 15c; 1/8 oz., 50c; oz., \$3.00.

The New Miniature Petunias

For Bedding and Borders

PINK GEM.—This represents a new race of very dwarf, compact growing Petunias. It forms a neat compact plant eight inches high, literally smothered with deep pink flowers 2 inches in diameter. Thirty to forty blooms in flower at the same time. Indispensable for borders, window boxes and for bedding. Planted with dwarf blue Ageratum, the effect is very charming. Pkt., 20c; ½ oz., 50c.

NANA COMPACTA PETUNIA. Each plant forms a compact ball about 10 inches high and twelve inches across. Grows quickly from seed and blooms very profusely until frost. We strongly recommend this Petunia for beds, borders, window boxes, pots and the rock garden. Mixed colors. Pkt., 20c; ½ oz., 50c.

borders, wí 1<mark>% oz., 50c.</mark>

Ricinus - Castor Bean

perennial. Forms round tufts of neat foliage, above which are borne a profusion of medium sized flowers on slender, erect stems. Beautiful light blue color. Splendid for edging, for group planting and for rock gardens.

- (Harebell).

Hardy

Perennials are herbaceous plants that bloom the second year from seed. Their top growth dies down during the winter and grows up again the following spring, blooming freely that season and many years thereafter.

The seed of perennials may be started in the house in boxes quite early and later transplanted to the garden. Or sow the seed out in the open in May or June and transplant to permanent position in the fall.

Sow the seed thinly, cover lightly, water gently but thoroughly and do not allow the soil to become dry while the seed is in process of germination. Nearly all failures in growing perennials are attributable to this one neglect.

Seed of most perennials may also be sown successfully during the summer and early fall, preferably in August. When starting at this time the young seedlings must be shaded from the hot midday sun to prevent being burned off, and kept moist at all times. The plants should be protected over winter with a loose mulch of leaves or straw.

Alyssum - Basket of Gold

SAXATILE COMPACTUM.—A hardy perennial variety of dwarf habit, bearing a pro-fusion of golden yellow flowers in April or May. Will resist the most extreme weather. Very showy for edging, for rock gardens and mass plantings. 9 inches. Pkt., 10c; 1/4 oz., 30c.

Kirchhoff's Violet.

HARDY GARDEN LILIES

L. ELEGANS.—One of the most showy, hardy and satisfactory Lilies for general planting. As brilliant as Tulips, with fine cup-shaped blossoms borne in upright umbels. In shades of red, orange and yellow. Blooms June and July. 2 to 3 feet.

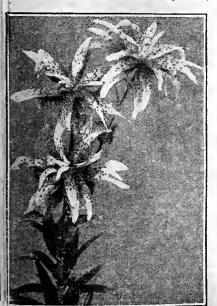

low. Blooms June and July. 2 to 3 20c each; 3 for 50c; \$1.75 per doz.

L. HENRYI (Yellow Speciosum Lily). Large branching heads of beautiful bright orange-yellow flowers with recurved petals. Hardy, easy to grow and a free bloomer. 5 to 6 feet. August-September. Cover 7 to 8 inches. Large bulbs, 25c each; 3 for 65c; \$2.35 per doz, prepaid.

doz, prepaid.

L. MYRIOPHYLLUM (The Regal Lily),—See color illustration on page 103. A real beauty with large white flowers shading to yellow in the center, with a faint tinge of pink at the edges. Deliciously scented, similar to the Jasmine; extremely hardy, robust grower and free bloomer. One of the finest garden Lilies, bearing up to 9 flowers to the stem. Very easy to grow; set the bulbs to 6 inches deep. 3 to 5 feet. Blooms in July. Blooming size bulbs, each, 15c; doz., \$1.50; 100 for \$10.00, prepaid.—Select size bulbs, each, 26c; doz., \$1.35, prepaid.—Extra large bulbs, each, 30c; 3 for 75c; doz., \$2.75, prepaid.

L. PARDALINUM (Leopard or Panther Lily).—Flowers are yellow spotted with rich brown, each petal tipped with scarlet. Very free flowering. Hardy, of robust growth. Will grow most anywhere if the drainage is good. Late June to early August, 3 to 4 feet high. 25c each; 3 for 65c; \$2.35 per doz., prepaid.—Extra large bulbs, each, 35c; 3 for 90c; doz., \$3.25, prepaid.

Double Tiger Lily.

SPECIOSUM RU-BRUM. — Fine waxlike flowers; petals are white shaded and spotted rose. A very attractive flower with recurved petals. 3 to 4 ft. Blooms August and September. Succeeds best in leaf soil. Plant deep. 30c each; 3 for 80c; \$3.00 per doz.

Beautiful and Permanent

Lilies are becoming increasingly popular and may be grown successfully by any gardener. They bring charm to the garden quite different from that of any other flower. You may have cool whites, rich yellows and dazzling scarlets. Lilies may be had in bloom from early summer until fall by proper selection. Plant Lilies informally in clumps or large masses. Place the bulbs 4 to 8 inches deep (depending upon variety and size of bulbs), with a handful of sand around each one. If the soil is well enriched, so much the better for the size and beauty of the flower. A well drained deep soil gives the best results. Bone meal is the best fertilizer.

Some Lilies produce large bulbs, such as Auratum and Rubrum,

Some Lilies produce large bulbs, such as Auratum and Rubrum, whereas many others will never make such a large bulb, as for example the Pardalinum and Tenuifolium.

The Best Varieties

LILIUM AURATUM (The Gold-Banded Lily of Japan) .sidered the most beautiful of all the Lily family. Excellent for cut flowers, blooming in July and August. Very large flowers, pure white, dotted with crimson, while through the center of each petal runs a golden band. Of delicious fragrance; 3 to 5 feet tall and will bear up to twenty flowers. Succeeds best in open, porous soil, not in rich humus. Plant the bulbs very deep. 30c each; 3 for 80c; \$3.00 per doz., prepaid.

LILIUM CANADENSE (The Meadow Lily).—With beautiful, drooping, bell-shaped flowers of yellow, spotted with crimson; red anthers; up to ten flowers to each stem. Very hardy and easy to grow. It flowers in June and July. 2 to 3 feet. 25c each; 3 for 65c; \$2.35 per doz.—Extra select bulbs, 35c each, prepaid.

L. SUPERBUM (Nodding Lily; Turk's Cap Lily).—Gives a bril-

L. SUPERBUM (Nodding Lily; Turk's Cap Lily).—Gives a brilliant effect—bright orange-red, spotted brown; red anthers. Even a small clump will supply you with hundreds of flowers from June to August. Perfectly hardy. 4 to 5 feet. Fine for planting among shrubs. 20c each; 3 for 50c; \$1.75 per doz.—Extra large bulbs, each, 30c; 3 for 80c; \$2.85 per doz.

L. TENUIFOLIUM (Coral Lily or Fern-Leaved Lily).—See color illustration on page 103. Brilliant coral-red flowers in clusters up to fifteen; slender stems 1½ to 2 feet high with finely cut, fernlike foliage. Does well in moist situations and partial shade. The bulbs should be set deep. Blooms June to July, 20c each; 3 for 45c; \$1.50 per doz. Extra large bulbs, 25c each; 3 for 65c.

L. TIGRINUM SPLENDENS (The Single Tiger Lily).—An improved form of the old well known Tiger Lily. Bright orange-red with black spots and red anthers. Up to twenty flowers to the stem. Very showy. Blooms August and September. 3 to 5 feet. 15c each; 3 for 40c; \$1.35 per doz.—Extra large bulbs, each, 25c; 3 for 65c; \$2.35 per doz.

L. TIGRINUM FLORE PLENO (The Double Tiger Lily).—This is the double-flowered form of the preceding species.

A very stately plant, 3 to 4 feet high, bears a large number of light orange-red flowers, spotted black. Blooms July to August, The only desirable double Lily. 20c each; 3 for 45c; \$1.20 per doz., prepaid.—Extra large bulbs, each, 30c; 3 for 80c.

L. UMBELLATUM .- This beautiful Lily is of easy cul-

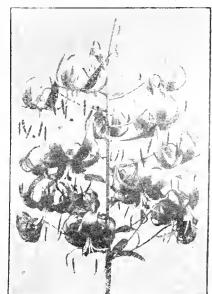

L. UMBELLATUM.—T ture, grows 2 to 3 feet high and blooms in umbels of 3 to 5 upright bright scarlet flowers. Very hardy, succeeding almost anywhere; multiplies freely. June to July. 20c each; 3 for 50c; \$1.75 per doz., prepaid.—Extra large bulbs, each, 30c; 3 for 80c; doz., \$2.85, prepaid.

PHILIPPINENSE FORMOSANUM.—A very graceful hardy Lily with long, wide-mouthed, trumpet-like flowers; pure white with a beautiful pale emerald-green throat. Very fragrant. They commence blooming in carly August and continue to flower until frost. Plant 4 inches deep in well drained, sandy soil. 3 to 4 feet high. We offer hardy Michigan-grown bulbs. 25c each; 3 for 65c; doz., \$2.35, prepaid.—Extra select bulbs, 40c each.

1936 Lily Collection

Elegans, Regal, Superbum, and Umbellatum. 1 of each (4 bulbs), for only 70c, prepaid. 3 of each (12 bulbs), for only \$1.90, prepaid.

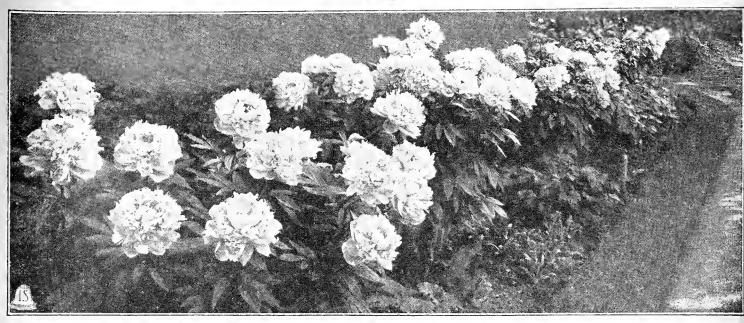

Superbum Lily.

Lilium Elegans.

A Border of Pconies Make a Marvelous Showing.

Isbell's Magnificent Free Blooming Peonies

The Peony is a noble flower, almost rivaling the rose in coloring, perfection of bloom and fragrance. It is perfectly hardy without protection; is not troubled with insect pests or diseases, and once planted takes care of itself, increasing in size and profusion of bloom each year. They last a lifetime and longer,

The roots you get from us are field grown, large and healthy, showing 3 to 5 good eyes.

Plant in spring, in well enriched soil; bone meal is the best fertilizer. Plant just as early as possible and you are likely to have some flowers the first summer. Set the roots with crown or eyes covered not more than 2 or 3 inches. An open, sunny location is best. PLEASE NOTE OUR VERY LOW PRICES ON BEST QUALITY.

BARONESS SCHROEDER.—One of the finest. White with shadings of flesh; rose type. Immense flowers, freely produced. Pleasing June-rose fragrance. Strong grower; midseason. 50c each; 3 for \$1.25; \$4.50 per doz.

CLAIRE DUBOIS.—An outstanding pink sort. Enormous flowers of globular shape and of rich clear satiny pink color overlaid with a beautiful silver sheen. Blooms late. 75c each; 3 for \$1.95; \$7.00 per doz., prepaid.

EDULIS SUPERBA.—The earliest in our collection. A large flower of brilliant rose-pink with silvery reflex. Very fragrant. 35c each; 3 for 90c; \$3.25 per doz.

FELIX CROUSSE.—Brilliant dazzling red; very bright and effective; easily the best of that color. It blooms in midseason. The flower is round and full, delightfully fragrant. 50c each; 3 for \$1.25; \$4.50 per doz., prepaid.

FESTIVA MAXIMA.—The finest white Peony. Flower is extra large, full and double, pure snow-white. Blossoms early. 30c each; 3 for 75c; \$2.50 per doz., prepaid.

FLORAL TREASURE.—Lovely shade of clear light pink; fragrant. Showy in the garden; midseason to late. 30c each; 3 for 75c; \$2.50 per doz., prepaid.

KARL ROSENFIELD.—Rich velvety bright red, clear and brilliant without a trace of purple; very large flowers of the semi-rose type and slightly fragrant, Medium early. 50c each; 3 for \$1.25; \$4.50 per doz., prepaid.

LORD KITCHENER.—Remarkably brilliant colored Peony. Lovely flowers of the rose type, brilliant cherry-red. Good grower and free flowering sort. Blooms early. 65c each; 3 for \$1.75; \$6.00 per doz., prepaid.

MONS. JULES ELIE.—Immense globular flowers of bright rose-pink, overlaid with a glistening sheen of silver. One of the largest and most beautiful Peonies, like a great big chrysanthemum. Blooms early. 50c each: 3 for \$1.25; \$4.50 per doz.

OFFICHALIS RUBRA PLENA.—The old-fashioned dark red sort of our grandmother's garden, now very scarce. Perhaps the most brilliant of all the red Peonies. It is in full bloom by Decoration Day throughout the North, 65c each; 3 for \$1.75; \$6.25 per doz., prepaid.

PRIMEVERE.—Finest yellow Peony. Center of flower deep sulphur-yellow, outer petals creamy white. Tall, strong grower; free bloomer; midseason. \$1.00 each; 3 for \$2.75.

REINE HORTENSE.—Beautiful hydrangea-pink flowers of largest size. It has all the qualities that could be required. Delicious fragrance, strong, healthy growth, large flower on straight stem. 60c each: 3 for \$1.65; \$6.00 per doz.

SARAH BERNHARDT.—One of the very best of the newer varieties. Lovely apple-blossom pink with each petal silver tipped. Flowers full double, of very large size and with agreeable fragrance. Blooms midseason. Each, 60c; 3 for \$1.65; \$6.00 per doz., prepaid.

TENUIFOLIA. (The Fern Leaved Peony).—Earliest to bloom of all Peonies. Graceful, finely cut foliage. Flowers very double, of clear brilliant red color. Dwarf in growth; fine round bushes. Very scarce sort. \$1.75 each; 3 for \$1.75.

THERESE.—Among the world's finest, and the largest size flower of all. Exquisite light satiny pink. The blooms are of enormous size so that they require support. They are very double, with delicate fragrance. Very free blooming. Midseason. 90c each; 3 for \$2.50, prepaid.

Mixed Double Peonies

The quality and price of this mixture make it highly desirable. A nice assortment of varieties and colors, 25c each; 3 for 60c; \$2.00 per doz., prepaid.

Double Peonies in Colors

PINK SHADES.—30c each; 3 for 75c; \$2.75 per doz. REDS.—30c each; 3 for 75c; \$2.75 per doz. WHITES.—25c each; 3 for 60c; \$2.00 per doz.

Hardy Bulbs for Fall Planting

Gorgeous Tulips, beautiful Hyacinths, lovely Narcissi, dainty Scillas and Snowdrops, and many others. All of these hardy bulbs MUST be planted in the fall, they cannot be had at any other time. Once planted, they will bloom early in the spring for many years to come. Isbell's Fall Catalog shows these flowers in full natural colors, write for it.

ISBELL'S LAWN GRASS SEED

A BEAUTIFUL LAWN is the desire of every home owner, whether in city, village or country. A good lawn adds more to the fine appearance of your home than any other one thing. A fine lawn always attracts notice. The making of a good lawn is not difficult, but certain things are necessary. The first and greatest essential is good seed, for with inferior seed all the expense of labor, fertilizer, and preparation are wasted.

PLANT ISBELL'S LAWN SEED and you have eliminated the greatest source of failure. We have learned by many years of experience the best grasses and the proper proportions for producing a smooth, velvety lawn that will be permanent.

Directions for Making Lawns

First.—A rich, properly prepared soil. If the ground is naturally rich, all that is necessary is that it be well spaded, making it as fine and mellow as possible. If, as is often the case, it consists of earth from the excavation for the house, or is hard or lumpy, it should first receive a good dressing of manure, which should be spaded in and mixed with the soil.

Second .- We must have good seed of the right varieties. Some sorts are the most luxuriant in the spring, others in summer, and still others in autumn, and a wise selection of varieties in proper proportion is very important. Our "Central City" Mixture is the best combination to secure a fine lawn.

Third.—It is important that the seed be sown evenly at the rate of 1 lb. per square rod or from 125 to 150 lbs. per acre. Should be sown early in the spring or in the fall, but may also be sown any time during the summer if plenty of water is available. Roll the ground and then rake lightly. Sow the seed evenly and rake the ground again to cover the seed. When watering before the seed is well started, care must be taken or the seed will be washed off, particularly if the lawn slopes.

Isbell's Central City Lawn Seed

The best general purpose lawn seed. You will have no difficulty in producing a fine, smooth, velvety lawn if you sow "Isbell's Central City Mixture and follow the directions given above. The lawn in the photograph above was seeded May 20th with Isbell's "Central City" Lawn Seed, and was mowed the first time on July 3rd. This, in spite of the fact that the house was not yet completed and the lawn was walked on considerably. The photowas taken in September. This is only one case out of literally thousands we can point out, not only in Jackson but in nearly every city of any size in the United States.

The beautiful lawns surrounding the following public buildings were the results of sowing Isbell's Central City Lawn Seed: East Intermediate School, West Intermediate School, Jackson High School, and the First M. E. Church. Our Central City Lawn Seed is a perfectly balanced mixture of the best and most durable grasses for lawns. There are many cheap mixtures of lawn grass seed on the market which are made up mostly of chaff and screenings. These always contain a large percentage of weed seeds. Isbell's Central City Lawn Seed is a quality product, and the price is as reasonable as can be made without lowering the quality. Sow at the rate of 1 lb to 250 sq. ft. or 150 lbs. per acre. Prices: Lb., 45c; 3 lbs., \$1.20; 10 lbs., \$3.75, prepaid.—Not prepaid, 25 lbs., \$7.75.

Terrace Sod Lawn Seed

For Terraces, Hillsides and Embankments

A special mixture of grasses best suited for sowing on terraces and side-hills—grasses that produce strong, spreading roots, thus preventing heavy rains from washing them out, that will withstand drought and exposure, thrive on shallow soils, and at the same time produce a rich, green turf. Prices: Lb., 50e; 5 lbs., \$2.25, prepaid. Not prepaid, 10 lbs., \$3.90; 25 lbs., \$8.75.

Isbell's Quick Growth Lawn Seed

We frequently have inquiries for a lawn mixture which will give quick results, and our "QUICK GROWTH" has been prepared with this end in view. It is especially useful where for some reason or other the seed cannot be sown in early spring. Where sowing must be delayed until May, the Quick Growth mixture will cover the ground like magic, and later on produce a permanent and beautiful sod. Prices: Lb., 35c; 3 lbs., 95c, prepaid.—Not prepaid, 10 lbs., \$2.50; 25 lbs., \$5.75.

Isbell's "Shady Spot" Lawn Seed

On nearly all lawns there are unsightly spots caused by the fact that ordinary varieties of grasses used for lawns do not do well in the shade; consequently we have prepared a mixture of grasses which naturally grow in shady spots. Before sowing in such places it is well to rake off the surface thoroughly and then apply Lime. Prices: Lb., 50c; 5 lbs., \$2.25, prepaid.—Not prepaid, 10 lbs., \$3.90; 25 lbs., \$8.75.

Creeping Bent Grass

The Bent grasses produce the finest turf it is possible to make, but unfortunately are rather slow in starting. Sow with Red Top for best results. Prices: Lb., \$1.25; 5 lbs., \$5.75, prepaid.—Not prepaid, 10 lbs., \$10.90; 25 lbs., \$25.00, make, but with Red

White Clover

Extra Fancy Seed.—Some prefer a clear White Clover lawn which can be quickly established by sowing this extra fancy grade of seed. On weedy ground White Clover will make a better showing in a shorter time than other grasses. Prices: Lb., 50c; 5 lbs., \$2.25, prepaid.—Not prepaid, 10 lbs., \$4.15.

"Out of three kinds of lawn seed tried, your Central City was so far superior that we could not consider anything else. Therefore, the enclosed order (20 lbs.)."—J. B. BURY, Minneapolis, Minn.

FERTILIZERS

For Lawns, Gardens, Flowers and Shrubs

Lawns Gardens Flowers Shrubs

Vigoro is a quick acting well balanced plant food that is odorless, clean and easy to apply. Sow at the rate of 3 to 4 lbs. per 100 square feet. Vigoro will make your lawn a rich velvety green and work wonders in your vegetable and flower garden. Also splendid for roses and shrubs. 5-lb. pkg., 50c; 25 lbs., \$1.50; 50 lbs., \$2.50; 100 lbs., \$4.00, f. o. b. Jackson.

Bone Meal

A splendid slow acting fertilizer for the lawn, garden and flower bed. Safe and sure. Especially good for peonies, roses and all plants grown from bulbs such as gladiolus, cannas, tulips, etc. 10 lbs., 50c; 25 lbs., \$1.00; 50 lbs., \$1.75; 100 lbs., \$2.95, f. o. b. Jackson.

HUMO The Perfect Soil Conditioner for House and Garden Plants

Humo is a pure clean humus made up of natural decomposed vegetation. It is highly refined, in pulverized form and thoroughly sterilized, has no offensive odor and does not contain any weed seeds. Builds up a mellow, moistureretaining loam. Using Humo is the modern way of preparing the basic and most essential gardening requirements—a good, wholesome, nourishing soil. Make your own soil for potting house plants, ferneries, flower boxes, outdoor beds, roses, evergreens and shrubs. Simply mix with soil. Humo is ideal for all kinds of bulbs, both indoors and outdoors. All seeds start well with Humo and it is especially valuable for fine flower seeds. Convenient and easy to use. Full directions on each package, Large, 2-lb. package, only 35c, prepaid.

Driconure

Driconure is a mixture of cattle manure and peat. It is kiln-dried, odorless, free from weed seeds and is finely pulverized. Driconure not only greatly improves the physical condition of the soil by supplying much needed humus, but also supplies valuable plant food. It is easy to apply.

On poor soils a layer of Driconure 2 to 3 inches deep and spaded in will work wonders. It is ideal for all kinds of flowers, bulbs, perennial plants, roses, shrubs, vegetables and lawns. 12-oz. pkg. (about 2 quarts), 20c, postpaid.—Not prepaid prices: 5 lbs., 50c; 50 lbs. (3½ bushels), \$3.00; 100 lbs. (7 bushels), \$5.00.

National 1 Garden Gloves

For Men and Women t vour hands with these Protect your hands with these soft leather gloves. Easy to wear, always soft and pliable and very durable. One pair outlasts 6 pairs of cloth gloves. They are dirt proof and washable. Sizes for both men and women in small, medium and large. Price 75c; 2 pairs \$1.40, postpaid.

ALWAYS Hotkaps FOR EARLY VEGETABLES

Now Less than One Cent Each

Hotkaps have been used by the millions from Maine to Texas to protect plants from frost, excess rain, wind and cold, and from the ravages of birds and insects. They maintain a perfect mulch around each plant. Growth is materially forced, resulting in stronger plants maturing two to three weeks earlier.

Hotkaps are patented waxed paper cones, placed over each plant as it is set out. Each Hotkap is a small hothouse. It is easily put in place—one man can set more than 3,000 a day. Hotkaps come in rolls of, 1,000 for ordinary use, and in special trial or garden packages. For rapid placing, use the steel Hotkap setter.

Prices:

Prices:

Shipping weight, 5 lbs.

wanted by mail. Shipping weight, 5 lbs.

Isbell's Cypress Hotbed Sash

Made of Most Durable Wood—Will Last a Lifetime Isbell's Hotbed Sash are made only of the best quality seasoned clear red cypress and with reasonable care will last a lifetime. At our greenhouses we have sash which have been in use regularly for thirty-one years, and are still in good shape. Our sash are made with double strength glass which in good shape. Our sash are made with double strength glass which is thicker and more durable, and will withstand snow, ice, hail and resist small stones much better than single strength glass. No substitute yet devised will successfully take the place of glass for botheds. hotbeds.

We are listing the standard size hotbed sash which is 3 by 6 feet, with three rows of double strength glass 10 by 14 inches, set in with the best grade of greenhouse putty.

The wood is accurately machined and is reinforced with a galvanized steel bar in the center attached with brass screws. This is a new and valuable feature. Prices f.o.b. Jackson or factory in Ohio, \$4.85; six or more, \$4.75 cach. Write for prices on larger quantities.

Isbell's "Home Garden" Sash

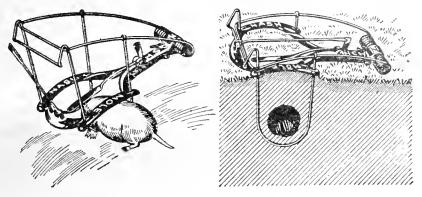

This Sash is a very handy size, 3x4 feet, and is especially adapted for the home gardener. Just the thing for starting cabbage, tomato, pepper and other vegetable plants for your own use, as well as starting flowers, such as asters, pansies, etc. Produces just as good plants as the large size Sash. Made of clear White Pine, tough as steel, with joints that will not pull apart. Price, glazed like illustration, double strength glass, \$3.75 each.

Nash Mole Trap

The Trap That Always Catches the Mele

The Nash type of trap is recommended by the The Nash type of trap is recommended by the U. S. Department of Agriculture. It is the only trap that cannot fail when properly set, and it is easily set. Both choker wires are made of a single piece of metal, bent to the desired form, so that they are held perfectly in place without depending on numerous joints. The springs are of one piece of best Bessemer spring steel, while the trap as a whole is strong enough so that clods, sticks, stones, etc., will not prevent its perfect operation.

This trap catches the mole when it comes from either direction. The trigger pan is located between the two choker loops, so the mole in passing will always spring the trap and cannot fail being caught. \$1.50 each, postpaid.

INSECTICIDES AND SPRAYS

NEW IMPROVED **EVERGREEN SPRAY**

Harmless to Man, Birds, or Animals. Especially recommended for killing:—Ants; Aphis (Plant Lice); Asparagus Aster and Bean Beetles; Cabbage, Currant and Cut Worms; Celery Leaf Tier; Cucumber, Melon and Squash Beetles (Stink Bugs); Green and White Flies; Leaf Hoppers; and Theirs. Worms; Celery I Beetles (Stink Bi pers; and Thrips.

New Ever Green is a pyrethrum spray containing soap, which spreads the solution and wets the insects. Mixes readily with water and will not damage buds or leaves. Ideal for commercial growers since it controls both chew-

ing and sucking insects.

Prepaid prices: 1 oz., 35c; 6 ozs., \$1.00. Not prepaid prices: Pint, \$2.00; gallon, \$12.00.

"BLACK LEAF 40"

Destroys insects—aphis (plant lice), thrips, leaf hoppers on fruits, vegetables, flowers, shrubs, poultry and animals. "Black Leaf 40" is a concentrated solution of nicotine-sulphate. It is a contact insecticide and kills insects when brought into contact with their bodies. Mixes readily with water, does not clog, nor does it injure foliage if diluted as recommended.

as recommended.

For Poultry—Paint roosts with Black Leaf 40 at rate of one pound to 200 running feet. Apply in evening before dark and the next day the hens will be free from lice. Postpaid prices: 1 oz., 35c; 5 oz., \$1.00. Not prepaid prices: 1 bb., \$2.25; 2 lbs., \$3.25; 5 lbs., \$5.85; 10 lbs., \$9.85.

1 lb. makes 75 to 100 gallons spray. Full directions on

ANTROL PYRETHRUM SPRAY

Kills All Sucking and Chewing Insects.
Pyrethrum Garden Spray is a concentrated extract of pyrethrum combined with spreader. Will not injure plants or flowers and is nonpoisonous. Ready to use when water is added. CYANOGAS

The Universal Pest Destroyer

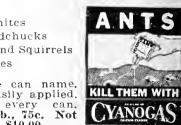

Non-Explosive and Non-Inflammable and Leaves No Poisonous Residue. Surest, Quickest and Most Economical

Way to Get Rid of:

Moles Ants Rats Mice Gophers Fleas Grasshoppers Snails

Termites Woodchucks Ground Squirrels Snakes

And almost any pest one can name. And almost any pest one can name. Cyanogas is a dust and is easily applied. Complete Instructions on every can. Prepaid prices: ½ lb., 45c; lb., 75c. Not prepaid. 5 lbs., \$3.00; 25 lbs., \$10.00.

QB-DUST

QB-Dust contains Derris Root or Rotenone, the most efficient substance for killing all kinds of insects on plants, shrubs and vegetables. Is non-poisonous, economical and shrubs and vegetables. Is non-poisonous, economical and very easy to apply. Rotenone is anathema to all insect life and is being used in increasingly larger quantities, replacing many older chemical poisons. 5-oz. can, 30c, prepaid.

CRO-TOX—Bird and Rodent Repellent

Cro-Tox gives the surest protection against seed pests. Unlike the common crow repellents which are for treating seed corn only.

seed corn only.

Cro-Tox protects your seeds during the germinating period by ridding your fields of crows, doves, larks, starlings, blackbirds, pheasants and other seed-pulling birds and rodents, such as squirrels, woodchucks, moles, etc. No need to replant when Cro-Tox is used, and it saves you expense and labor—assists in preventing seed rot and aids germination. A sure protection at a cost of only a few cents per acre. One pint of Cro-Tox treats cents per acre. One pint of Cro-Tox treats bushels of seed.

Prices, 1/2 pint, 60c; 1 pint, \$1.00 post-

TOPZOL—Rat and Mouse Killer

Topzol is a new exterminator that is non-poisonous to humans, domestic animals, poultry, dogs or cats; but will kill rats and mice quick. Topzol drives them outdoors to die. Can be used with safety around any rat or mouse-infested building. Topzol may be used with butter, meats, cereals, and is guaranteed to kill mice and rats and nothing else. Price, pkg. of 10 baits, 15c; 4 pkgs., for 50c, postpaid.

ROSE-AID (with Rotenone)

Rose-Aid with Rotenone is a Sherwin-Williams product and is the latest development of their research laboratories. Besides Rotenone Rose-Aid contains dry lime sulful-Bentonite, Arsenate of calcium and extremely fine sulphur. It is a complete rose dust as it controls all rose diseases such as Black Spot and Mildew, besides being an effective insecticide for all kinds of bugs, worms, beetles and aphis which affect roses. Comes in sifter top cans and is tinted green so it will not discolor the foliage. Also useful on all kinds of flowers, shrubs, vines and vegetable plants. 1 lb can, 50c, prepaid.

PESTROY—Bordeaux-Arsenate Mixture A SHERWIN-WILLIAMS PRODUCT

Pestroy is an all-around garden spray as it is a combined insecticide and fungicide. Contains 85% Bordeaux Mixture and 15% Arsenate of Lead, in dry powder form. May be used either as dust or wet spray. Especially valuable in the control of blight on vine crops such as cucumbers, melons, squash, tomatoes, and potatoes. Also splendid for flowers. Prepaid prices: ½ lb., 25c; 1 lb., 40c. Not prepaid: lb., 30c; 4 lbs., 85c.

The No. 33 Seeder will sow any kind of seed and sow it as it should be sown.

Handles the finest seeds, such as tur-

nips as well as coarse seeds, such as peas and beans. The handy shutoff is a valuable feature in preventing wasting seed. A

well made drill.

TRUE TEMPER GARDEN TOOLS

Combined Durability, Efficiency, Dependability

True Temper Tools are manufactured by the American Fork and Hoe Company, one of the oldest and largest implement concerns in America. Their tools are noted for durability, fine workmanship and quality of materials used. The True Temper trade-mark has always stood for the best in tools and is recognized everywhere as the mark of quality. The prices are very reasonable due to modern manufacturing methods and large scale production.

The New No. 33 True Temper Seeder

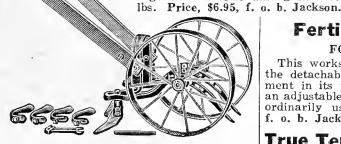

This new model seeder represents a distinct advance in seed drill construction and is the latest and most improved type on the market. Has a detachable hopper of four quarts capacity, which is easily and quickly removed by turning a small lever and lifting it out of the frame. Front wheel has a diameter of 16 inches and rear wheel 12 inches, both having 2¾-inch rims and run on steel bushings. Scrapers on each wheel keep them free of dirt. Has a simple and efficient shut-off operated from the handle. Seed coverer is of swinging type. Works perfectly in all soils.

A special heavy brush crossing the seed opening gives a continuous and uniform flow of seed. There are two independent sets of brass seed plates. One plate has an adjustable seed opening and can be used for both large and fine seeds. The other set of plates has holes ranging from 5/64 to 24/64 inch in diameter. Shipping weight 58 lbs. Price, \$14.75, f. o. b. Jackson.

While this is intended primarily for use as a double wheel hoe, it can easily be changed to use as a single wheel cultivator to go between the rows. The wheels are 16 inches high and have 1¼-inch wide tires. The frame is very stiff and rigid which is necessary for good work and hard usage. Handles, oak with bent grips. Attachments consist of four steel cultivator teeth or shovels and two right and left hand hoes or blades. A pair of leaf guards also goes with each cultivator, these are used in vines or large plants. All the cultivating attachments used on True Temper machines are made from high grade steel, oil tempered and polished bright and smooth, and have the correct shape for oil tempered and polished bright and smooth, and have the correct shape for doing the best work under all conditions. A fine tool for a home garden and is a general favorite among market gardeners everywhere. Shipping weight 28

17. True Temper Standard Double and Single Wheel Cultivator.

The New American Gardener Cultivator No. G2—4 Tools in One

Four high quality tools—trenching plow, sweep, cultivator and mulcher attachment—are mounted on a revolving head; mulcher attachment interchangeable with trenching plow. Loosen the hand wheel and turn any one of these tools into

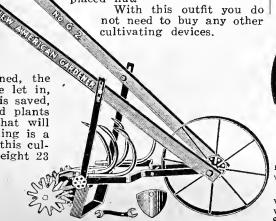

You can keep your garden in splendid growing condition by the use of the American Gardener once a week. Simply push this splendid tool down the rows at a good walking gait.

The wonderful new Mulcher-Pulverizer is now a regular part of every New American Gardener Cultivator.

This tool is attached to the head in place of the trenching plow by removing one conveniently removing one conveniently placed nut.
With this outfit you do

not need to buy any other cultivating devices.

The soil is loosened, the sunlight and air are let in, life-giving moisture is saved, weeds are killed and plants respond in a way that will delight you. Gardening is a delight you. high speed job with this cultivator. Shipping weight 23 lbs. Price, \$4.95, f. o. b. Jackson.

Fertilizer Attachment No. FD

FOR USE WITH NO. 33 SEEDER.

This works on the No. 33 seeder frame; simply lift off the detachable seed hopper and set the fertilizer attachment in its place. The hopper holds 35 pounds and has an adjustable feed that will distribute fertilizer in amounts ordinarily used. Shipping weight 9 lbs. Price, \$4.25, f. o. b. Jackson.

True Temper Seeder Unit No. SU33

FOR USE IN GANGS

Same as No. 33 Seeder without handles and marker. Is a desirable machine to be assembled in gangs of two or more, and pulled by a small tractor or team. Also equipped to attach to a sled or other device for use in onion fields. Shipping weight 44 lbs. Price, \$11.95 each, f. o. b. Jackson.

The Midget Seeder No. 1

(WITHOUT HANDLE)

The Midget is the most popular little Seeder on the market.

the Midget is the most popular little Seeder on the market. It is all metal construction, but is extremely light and easy to lift about and to empty. It operates very simply; the shoe is adjustable for any depth.

The Midget will handle accurately almost any kind of Garden Seeds, from the smallest up to Peas and Beans.

The hopper holds one pint, yet it will drill out clean a five-cent package of seed just ex well as a hopperage of seed just as well as a hopper

full. Index on top names the seeds and regulates the openings. Easil tached to most Easily high wheel cultiva-

tors, or to any make cultiva-tor, having tor, have more space between shank and wheel. Handle

made from broom-stick, hoe or rake handle, etc. Shipping weight 6 lbs. Price, without handle, \$3.15, f. o. b. Jackson.

MIDGET SEEDER NO. 2.—Capacity 1 quart. For use where a larger seeder is wanted for attaching to cultivator. Fits No. G2 perfectly. Weight 10 lbs. Price, \$4.15, f. o. b. Jackson.

Each, 30c; 3 for 75c, prepaid.

Hardy Chrysanthemums.

Delphinium - Hardy Larkspur

It is almost impossible to convey anything like an adequate description of the improved Delphiniums. Their greatest charm lies in the wonderful stateliness of growth and the rich colors and tints of their striking flowers. Nothing in blue can compare with Delphiniums. Plant with Candidum Lilies for a lovely garden picture.

BELLADONNA.—The light blue flowers are freely produced on numerous branching stems. 3 feet. 2-year-old plants, 3 for 55c; doz., \$1.85, prepaid.

BELLAMOSA.—This is the dark blue form of the popular Belladonna, 2-year-old plants, 3 for 55c; doz., \$1.85, prepaid. ENGLISH HYBRIDS.—Grown from imported "Gold Medal" strains of seed. Beautiful assortment of colors, single and double. Very heavy flower spikes, 5 to 6 feet. 2-year-old plants, 3 for 70c; doz., \$2.50, prepaid.

NEW WREXHAM HOLLYHOCK-FLOWERED.—This new giant-flowered type produces wonderful spikes of flowers in many shades, the individual flowers measuring up to 2 inches in diameter. 3 for 75c; doz., \$2.75.

BLUE CHINESE.—Dwarf. Very pretty variety with fine feathery foliage and intense gentian-blue flowers in open panicles. About 2½ feet high and they bloom 2 to 4 weeks later than preceding sorts. 3 for 55c; doz., \$1.85.

CHINESE MIXED .- The blue and white sorts in mixture. 3 for 50c; doz., \$1.75, prepaid.

Chinese Lantern Plant

See Color Illustration on Page 109.

Plant grows 1½ to 2 feet high and produces numerous balloon-like husks, which turn bright orange-red when ripe and resemble the Chinese Lanterns. Excellent for decorative purposes in the house during winter; will keep a full year. When planting, lay the roots down flat and cover 3 inches. 3 for 50c; doz., \$1.75, prepaid.

Coreopsis Grandiflora

For Garden Display and Cut Flowers.

A fine hardy plant that blooms profusely all summer. The flowers are a rich golden yellow color, of graceful form, on long, slender stems. Invaluable for cutting, making a grand bouquet by themselves or combined with blue flowers. 2 feet. June to October. 3 for 45c; doz., \$1.50, prepaid.

Gaillardia

Splendid Cut Flower.

BLANKET FLOWER.--The most glorious of our true "old-fashioned flowers." In bloom constantly from June till Ocfashioned flowers." In bloom constantly from June till October in many rich and brilliant colors of orange, crimson and red. Unexcelled as a cut flower. 2 feet high.

GRANDIFLORA.-3 for 50c; doz., \$1.75, prepaid.

MAGNIFICENT .- New large flowering strain. Brilliant colored blooms on long strong stems. 3 for 75c; doz., \$2.50,

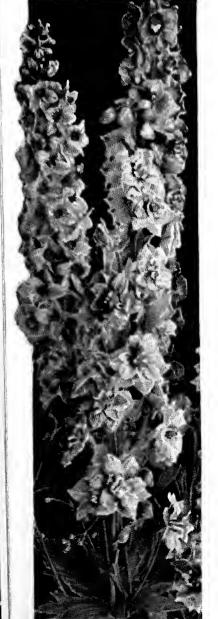

Gypsophila—Bristol Fairy

Highly Prized for Cutting-In Mixed Bouquets.

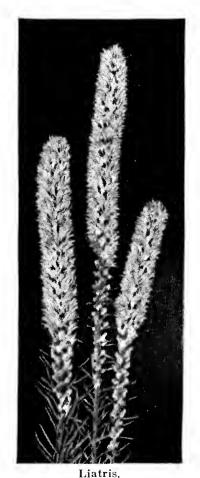

This wonderful new sort blooms early, with large, double, are white flowers in great big sprays. Produces a second pure white flowers in great big sprays. crop of flowers later on. Established plants bear cloudlike masses of small flowers that are highly prized for cutting and they dry perfectly for winter bouquets. Will thrive in any soil in a sunny position, $2\frac{1}{2}$ to 3 feet, 3 for \$1.00; doz., \$3.50, prepaid.

Liatris - Blazing Star

Beautiful as well as odd. Nothing else will attract more attention on account of its unusual appearance. Produces strong plants that throw up long, narrow spikes of rich light rosy purple flowers, which last a long time. Blooms in July and August. A peculiarity of this plant is its great attraction to butterflies. Use it as a background. 4 to 5 feet. 3 for 50c; doz., \$1.90, prepaid.

Hybrid Delphiniums.
